330. **Electromechanics.** Quasi-static electromagnetic fields; lumped-parameter electromechanics; rotating machines; dynamics of electromechanical systems; and fields and moving media. Prerequisite: Electrical Engineering 229 and 260. 3 hours, or 0 to 1 unit.
332. **Induction Motors and D. C. Machines.** The fundamentals and applications of single- and three-phase induction motors and D. C. machines. Prerequisite: Senior standing. 3 hours or $\frac{3}{4}$ unit.
335. **Electrical Machinery Laboratory.** A study of the performance characteristics of transformers and AC and DC rotating machines by laboratory methods. Prerequisite: Credit or concurrent registration in Electrical Engineering 332 or 336. 2 hours or $\frac{1}{2}$ unit.
336. **Transformers and Synchronous Machines.** Transformers, polyphase transformer connections, synchronous generators, synchronous motors, and parallel operation of synchronous machines. Prerequisite: Senior standing. 3 hours, or 0 to 1 unit.
337. **Control Structure of Computers.** Same as Computer Science 337. Asynchronous, synchronous, and microprogrammed control structures in the framework of computer architecture; interlocking of autonomous subcontrols; and case studies in typical control features: instruction look-ahead, multiprocessing interrupt, and input/output. Prerequisite: Computer Science, Electrical Engineering, or Mathematics 391 or Computer Science 221, or consent of instructor. 3 hours or 1 unit.
340. **Electronics, I.** Semiconductor materials and their electronic properties and applications to electronic devices; p-n junctions, transistors, and other diode and triode devices; and low-frequency applications of diodes. Prerequisite: Physics 108; Mathematics 345. 3 hours, or 0 to $\frac{3}{4}$ unit.
342. **Advanced Electronics.** Linear and nonlinear amplification; modulation and demodulation concepts; and introduction to feedback amplifiers and oscillators. Prerequisite: Electrical Engineering 244, 260, and 340. 3 hours, or 0 or $\frac{3}{4}$ unit.
344. **Theory and Fabrication of Solid State Devices.** Laboratory and lecture course on the physical theory, design, and fabrication of solid state devices; includes the electronic properties of semiconductors (such as mobility, carrier concentration, lifetime, energy gap), and techniques for fabricating (oxidation, diffusion, oxide masking, alloying) p-n junction devices. Prerequisite: Electrical Engineering 340. 4 hours or 1 unit.
346. **Hybrid Circuit Fabrication Laboratory.** Laboratory course on the basics of fabricating thin- and thick-film components as used in hybrid electronic circuits; experiments covering vacuum deposition, sputtering, anodization, resist processes, screen preparation, screen printing, and firing and trimming. Lectures provide background material and cover trade-offs of the two technologies. Prerequisite: Electrical Engineering 344. 2 hours or $\frac{1}{2}$ unit.
350. **Lines, Fields, and Waves.** Wave equation, free and guided wave propagation, waveguides, and radiation. Prerequisite: Electrical Engineering 229 and 260. 3 hours or $\frac{3}{4}$ unit.
351. **Microwave Laboratory.** Laboratory analysis at UHF and microwave frequencies. Prerequisite: Electrical Engineering 350. 2 hours, or 0 to $\frac{1}{2}$ unit.

352. **Electromagnetic Fields.** Plane waves at oblique incidence, wave polarization, anisotropic media, radiation, space communications, and waveguides. Prerequisite: Electrical Engineering 350. 3 hours, or $\frac{3}{4}$ or 1 unit.
353. **Radio Communication Circuits.** Design of a radio system for transmission of information; types of receivers, matching techniques, receiver and antenna noise, types of modulation, high-frequency circuitry, and point-to-point and satellite communications. Prerequisite: Electrical Engineering 260; credit or concurrent registration in Electrical Engineering 350. 4 hours or 1 unit.
354. **Antennas.** Antenna parameters; polarization of electromagnetic waves; basic antenna types; antenna arrays; broadband antenna design; and antenna measurements. Prerequisite: Electrical Engineering 350 or Physics 342, or consent of instructor. 3 hours or 1 unit.
355. **Optical Electronics.** Optical beams and cavities; semiclassical theory of gain; characteristics of typical lasers; and application of optical devices. Prerequisite: Electrical Engineering 350 or Physics 342, or consent of instructor. 3 hours or 1 unit.
358. **Applications of Radio Wave Propagation.** Terrestrial atmosphere, radio wave propagation, and applications to radio sensing and radio communication. Prerequisite: Electrical Engineering 350 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
359. **Analog and Pulse Communication Systems.** Introduction to amplitude, phase, frequency, and pulse code modulation systems; discusses bandwidth requirements, effects of noise and applications in commercial broadcast, and telephone and satellite communications. Prerequisite: Electrical Engineering 308 or equivalent; credit or registration in Electrical Engineering 266 or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
361. **Introduction to Digital Communication Systems.** Introduction to signals and noise in digital communication systems; analysis and design of efficient digital communication receivers; and signal design for, and performance of, practical communication systems. Prerequisite: Electrical Engineering 266 and 308, or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
364. **Introduction to Computer Arithmetic.** Same as Computer Science 364. Review of binary number representations, logical design of adders and arithmetic units, and simple multiplication and division methods; multiplier recoding; redundant division methods; design of carry-save adders and signed-digit arithmetic units; and case studies of high-speed arithmetic units. Prerequisite: Computer Science 264. 3 hours or 1 unit.
367. **Active Networks.** Study of active device models and their application to electrical network equation forms; expression of systems in terms of their network functions; examination of the characteristics of feedback systems in particular; and examination of sensitivity and stability factors. Prerequisite: Electrical Engineering 342. 3 hours or $\frac{3}{4}$ unit.
368. **Solid-State Motor Drive Systems.** General principles of solid-state motor drives using silicon-controlled rectifiers and integrated circuits; discussion of drive systems and components including inverters, frequency converters, motors, generators, and control systems; and industrial applications. Prerequisite: Electrical Engineering 330 and 342. 3 hours or $\frac{3}{4}$ unit.
369. **Semiconductor Device and Linear IC Applications Laboratory.** Laboratory study of applications of unijunction transistors, silicon-controlled rectifiers, triacs, field effect transistors, and linear integrated circuits such as differential amplifiers, operational amplifiers, and linear communications integrated circuits. One hour of lecture and a three-hour laboratory each week. Prerequisite: Electrical Engineering 342. 2 hours or $\frac{1}{2}$ unit.
371. **Topics in Electrical Engineering.** Lectures and discussions relating to new areas of interest. Prerequisite: Specified by department or instructor. 0 to 4 hours, or 0 to 1 unit. May be repeated.
372. **Basic Aeronomic Processes.** Aeronomic aspects of gas kinetic theory; energy levels of atomic and molecular atmospheric species; emission and absorption bands and continua; atomic collision processes; chemical kinetics; photochemistry or oxygen allotropes and nitrogen and hydrogen oxides; transport mechanisms; plasma properties; and lab-

- oratory measurements. Prerequisite: Physics 383 or consent of instructor. 3 hours or 1 unit.
373. **Engineering Acoustics.** Same as Theoretical and Applied Mechanics 373. Development of the basic concepts needed for the understanding of mechanical and electrical acoustic systems; vibrating string; vibrating membrane; plane waves; spherical waves; vibrating piston; acoustical filters; loudspeakers and microphones; principle of reciprocity; the ear; and architectural acoustics. Students may not receive credit for both Electrical Engineering 373 and 374. Prerequisite: Senior standing with credit in Mathematics 345 or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ to 1 unit.
374. **Ultrasonic Techniques.** Ultrasonic wave propagation, generation, detection, and measurement in liquid and solid media; acoustic impedance concepts; ultrasonic absorption phenomena; piezoelectricity; and discussion of selected industrial, experimental, and bioengineering applications with laboratory demonstrations. Students may not receive credit for both Electrical Engineering 373 and 374. Prerequisite: Mathematics 345. 3 hours or 1 unit.
375. **Modeling of Bio-Systems.** Same as Bioengineering 375. Application of linear systems theory and feedback control systems analysis to biological systems; sensory receptors, neuro-muscular system models, control of eye movement, the pupil control system, man-machine interactions, parameter identification in biological systems; and optional project laboratory. Prerequisite: General Engineering 222, Mechanical Engineering 265, Aeronautical and Astronautical Engineering 271, or Electrical Engineering 308 or 310; or consent of instructor. 3 or 4 hours, or $\frac{3}{4}$ or 1 unit.
376. **Symmetrical Component Analysis of Power Systems.** Representation of power systems; symmetrical component; positive, negative, and zero sequence impedances of network components; sequence networks; unsymmetrical faults; unsymmetrical power systems; and matrix algebra in symmetrical component analysis. Prerequisite: Senior standing. 3 hours, or 0 or 1 unit.
377. **Biomedical Instrumentation.** Same as Bioengineering 377. Introduction to engineering aspects of the detection, acquisition, processing, and display of signals from living systems; emphasizes biomedical transducers for measurements of biopotentials, pH, pCO₂, pO₂, force, displacement, pressure, flow, temperature, and impedance; and optional laboratory with animal experiments. Prerequisite: Electrical Engineering 244 and 260, or consent of instructor. 3 or 4 hours, or $\frac{3}{4}$ or 1 unit.
378. **Steady State Power Systems.** Power system design, steady state power system analysis, computer solutions, and economic dispatch. Prerequisite: Senior standing. 3 hours, or 0 to 1 unit.
379. **Pulse and Digital Laboratory.** Laboratory to accompany Electrical Engineering 380. Prerequisite: Credit or concurrent registration in Electrical Engineering 380. 1 hour or $\frac{1}{4}$ unit.
380. **Pulse and Digital Circuits.** Analysis and design of circuits in which nonlinearities of the active devices are a significant factor or in which the signals are primarily pulses; generation, transmission, and processing of such signals appropriate for small-scale instrumentation as well as to large systems such as computers. Prerequisite: Electrical Engineering 260, 340, and 290; credit or concurrent registration in Electrical Engineering 379, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
381. **Introduction to Computer Memories and I/O.** Same as Computer Science 381. Introduction to memories, input/output devices, and optical processors; lecture and demonstration. Prerequisite: Computer Science 281, Electrical Engineering 340, or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
383. **Principles and Application of Linear Integrated Circuits.** Techniques of analysis and synthesis of linear integrated circuits, concentrating on linear integrated circuit biasing systems, building blocks, differential amplifiers, operational amplifiers, and integrated circuits used in communications; analysis of integrated circuits by hand calculations and by specialized computer analysis programs. Prerequisite: Electrical Engineering 342. 3 hours or $\frac{3}{4}$ unit.

384. **Information and Signal Processing by Computing Devices.** Same as Computer Science 384. Operation and theory of computing devices for signal and information processing; analog, digital, and stochastic information representation and processing; and conversion of information representation from one type to another. Prerequisite: Computer Science 264 and 281, or Electrical Engineering 290 and 340, or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
385. **Semiconductor Computer Devices.** Same as Computer Science 385. The theory of bipolar junction transistors and the fabrication of monolithic integrated logic circuits; unipolar field effect device properties, theory, fabrication, and application to logic and memories. Prerequisite: Computer Science 281, Electrical Engineering 340, or equivalent. 3 hours or 1 unit.
386. **Control Systems, I.** Analysis and design of control systems with emphasis on modeling, state variable representation, computer solutions, modern design principles, and laboratory techniques. Prerequisite: Electrical Engineering 310 or consent of instructor. 4 hours or 1 unit.
387. **Introduction to Quantum Electronics for Electrical Engineers.** Introduction for the senior electrical engineering student to the application of quantum mechanical concepts to electronics problems; specifically, application of elementary quantum mechanics to the detailed study of a calculable two-state laser system; and incidental quantum ideas bearing on electronics. Prerequisite: Physics 383 or consent of instructor. 3 hours or 1 unit.
389. **Digital Computer Circuit Design.** Same as Computer Science 389. Design of switching circuits and systems taking into account properties of currently available diodes, transistors, and related circuit elements; applications to slow-speed as well as high-speed computer circuits and data-handling links; and consideration of component tolerance, circuit reliability, and cost factors. Prerequisite: Computer Science 264 or Electrical Engineering 290 and either Computer Science 281 or Electrical Engineering 340. 3 hours or 1 unit.
390. **Introduction to Optimization.** Basic theory and methods for the solution of optimization problems; iterative techniques for unconstrained minimization; and introductory presentation of linear and nonlinear programming with engineering applications. Prerequisite: Computer Science 101 or Mathematics 343, or consent of instructor. 3 hours or 1 unit.
391. **Switching Theory.** Same as Computer Science 391 and Mathematics 391. Combinational electronic and relay switching networks; two-level design methods; and pulse-mode and fundamental mode sequential networks. Prerequisite: Computer Science 264, Electrical Engineering 290, or Mathematics 319, or consent of instructor. 3 hours or 1 unit.
392. **Finite State Machines.** Same as Computer Science 392 and Mathematics 392. Synchronous machines: state reduction of incompletely specified machines, series parallel decomposition, state assignment, and machine behavior; asynchronous machines: state assignment, hazards, and interacting machines. Prerequisite: Mathematics 319 and Computer Science/Electrical Engineering/Mathematics 391, or consent of instructor. 3 hours or 1 unit.
396. **Computer Displays and Peripherals.** Same as Computer Science 386. Theory and operation of computer displays and peripheral devices; human and machine aspects; and available techniques and devices. Prerequisite: Electrical Engineering 381 or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
397. **Projects and Lectures in Quantum Electronics.** Study of processes involving quantum mechanical energy transfers in energized media leading to various laser devices and their applications. A series of lectures, supplementing the special projects, offers background information on spectroscopy, collisional energy transfer, laser pumping schemes, modulation at optical frequencies, holography, and other related topics. Prerequisite: Senior standing; consent of instructor; Electrical Engineering 387 recommended. 3 hours, or 0 to 1 unit.

400. **Seminar.** Required of all graduate students. 0 credit.
414. **Engineering Applications of Linear Graphs.** Same as Computer Science 414. Elementary theory of linear graphs; Euler graphs; incidence, cut-set, and circuit matrices and their properties; realizability of cut-set, circuit, and tree matrices; applications to network analysis and synthesis; signal flow graphs; applications to switching circuits and automata; and communication networks. Prerequisite: Electrical Engineering 416; Mathematics 315 or 318. 1 unit.
415. **Control System Theory and Design.** Synthesis of feedback control systems to meet design specifications, including sensitivity; multivariable systems; introduction to systems with random inputs; state variable techniques; and nonlinear systems. Prerequisite: Electrical Engineering 386 or equivalent, or consent of instructor. 1 unit.
416. **Analysis of Networks and Systems.** Dynamic equations of linear lumped networks and systems; time-domain analysis and state space methods; frequency-domain analysis and transform methods; stability criteria; and applications to various problems in electrical engineering. Prerequisite: Electrical Engineering 308 and 310. 1 unit.
418. **Electric and Magnetic Fields.** Rigorous treatment of basic laws, static fields, typical field systems, harmonic functions, conjugate functions, and conformal transformation. 1 unit.
420. **Electromagnetic Waves and Radiating Systems.** Fundamental electromagnetic theory with applications to transmission lines, waveguides, and antennas; introduction to the solution of advanced problems in static electric and magnetic fields. Prerequisite: Electrical Engineering 352. 1 unit.
421. **Advanced Electromagnetic Engineering.** Reciprocity and equivalence principles; formulation of scattering and diffraction problems; approximations for large and for short wavelengths; plane, cylindrical, and spherical wave problems; variational methods; Wiener-Hopf techniques; and applications to antennas and waveguide problems. Prerequisite: Electrical Engineering 420. 1 unit.
422. **Controlled Fusion Systems.** Same as Nuclear Engineering 422. Development of plasma models for fusion analysis; treatment of plasma heating and confinement with applications to current experiments; and energy balances and energy extraction, minimum-B configuration, instability criteria, Tokamak machines, pinch systems, and mirror systems. Prerequisite: Nuclear Engineering 321 or consent of instructor. 1 unit.
423. **Gaseous Electronics and Plasmas.** Basic concepts and techniques, both theoretical and experimental, which are used in the areas of gaseous electronics, gas and solid plasmas, controlled fusion, aeronomy, gas lasers, and magnetohydrodynamics. Prerequisite: Physics 383 or Electrical Engineering 352, or equivalent, or consent of instructor. 1 unit.
425. **Nuclear-Electrical Energy Conversion.** Same as Nuclear Engineering 425. Advanced concepts in nuclear radiation energy conversion of importance in both power production and radiation detection; analysis and applications of direct collection of charged particles; and theory and applications of radiation-induced ionization and excitation. 1 unit.
428. **Analysis of Nonlinear Systems.** Same as Theoretical and Applied Mechanics 428. Treatment of singular points and stability considerations; consideration of graphical and analytical methods, including the perturbation method, variation of parameters, Galerkin's method, and the Ritz method for solving nonlinear differential equations. Prerequisite: Mathematics 341; consent of instructor. 1 unit.
431. **Theory of Guided Waves.** Propagation in general cylindrical waveguides; eigenvalue problems, stationary principles, microwave circuit theorems, boundary value problems, and the determination of circuit parameters; and periodically loaded waveguides with anisotropic media. Prerequisite: Electrical Engineering 420. 1 unit.
432. **Compound Semiconductors (Optical Devices).** Properties of III-V and II-VI compound semiconductors and the devices which are unique to these materials; emphasis on materials such as GaAs, Ga(AsP), GaP, CdSe, Cd(SeS), etc., and on luminescence, semiconductor lamps, and semiconductor lasers. Prerequisite: Graduate standing in

electrical engineering with some background in modern physics; elementary quantum mechanics; elementary semiconductor theory or equivalent. 1 unit.

433. **Theory of High-Speed Parallel Computation.** Same as Computer Science 433. Theoretical aspects of parallel and pipeline computation; time and processor bounds on classes of computations; data alignment network speed and cost bounds; conflict-free access memories; and overall computer system ideas. Prerequisite: Computer Science 333 or equivalent. 1 unit.
434. **Random Processes.** Basic concepts of random processes; spectral analysis; linear systems with random inputs; Markov chains and Markov processes; and applications to communications and control systems engineering. Prerequisite: Mathematics 361 or equivalent, or Electrical Engineering 361. 1 unit.
435. **Theory of Semiconductors and Semiconductor Devices.** Same as Physics 435. Introductory quantum mechanics of semiconductors; energy bands; dynamics of Bloch electrons in static and high-frequency electric and magnetic fields; equilibrium statistics; transport theory, diffusion, drift and thermoelectric effects; and characteristics of p-n junctions, heterojunctions, and transistor devices. Prerequisite: Senior-level course in quantum mechanics or atomic physics. 1 unit.
437. **Principles of Microwave Measurements.** Generation and detection of the laboratory signal; the generalized impedance concept; matrix representation of waveguide discontinuities; determination of equivalent network parameters; analysis of measurement techniques by signal flow graphs; and accuracy criteria. Prerequisite: Electrical Engineering 355. 1 unit.
439. **Advanced Theory of Semiconductors and Semiconductor Devices.** Continuation of Electrical Engineering 435. Selected advanced topics of current interest in the physics of semiconductors and solid-state devices. Prerequisite: Electrical Engineering 435. 1 unit.
440. **Advanced Power Circuit Analysis, I.** Analysis of power systems by symmetrical and related components; equivalent circuits of lines, transformers, and machines; fault calculations on symmetrical and unsymmetrical power systems; and the network analyzer in fault studies. 1 unit.
444. **Introduction to Artificial Intelligence.** Same as Computer Science 444. Introduction to basic concepts in artificial intelligence with emphasis on computer understanding of natural language concepts; formal representations of natural language concepts, data structure, and list processing; linguistic analysis including both syntactic and semantic processing; automatic logic deduction and theorem proving; and survey of applications to systems including question answering, information retrieval, and problem solving. Prerequisite: Consent of instructor. 1 unit.
445. **Power System Stability.** Transient and steady-state stability in power systems; power flow equations; transient stability swing curves; critical clearing time; the network analyzer in stability studies; and the analog computer in transient stability studies. Prerequisite: Electrical Engineering 440. 1 unit.
451. **Digital Processing of Signals.** Sampling theorem; the fast Fourier transform and its application in the digital processing of signals; design of finite impulse response digital filters; theory and design of recursive digital filters including round-off errors and limit cycles; and surface wave filters. Prerequisite: Electrical Engineering 310 or equivalent. 1 unit.
452. **Time-Varying and Nonlinear Circuits.** Energy considerations; equations in normal form; frequency power relations in nonlinear networks; frequency conversion; Lyapunov's direct method; the circle stability criterion; and calculus of variations and Hamilton's principle applied to the stability and matching problems. Prerequisite: Electrical Engineering 416; Mathematics 346. 1 unit.
453. **Optimum Control Systems.** Formulation of the optimization problem; controllability; observability; stability; Lyapunov's second method; application of variational calculus, maximum principle, and principle of optimality to control problems; stochastic control; and adaptive control. Prerequisite: Electrical Engineering 415. 1 unit.

454. **Sampled-Data Control Systems.** Analysis and design of feedback control systems with digital and sampled data. Prerequisite: Electrical Engineering 415 or equivalent. 1 unit.
456. **Coding Theory.** Same as Computer Science 456. General discussion on coding theory with emphasis on the algebraic theory of cyclic codes; error-control procedures and circuits; and applications to computers and data-transmission systems. Prerequisite: Mathematics 317 or equivalent, or consent of instructor. 1 unit.
461. **Signal Detection and Estimation.** Introduction to detection and estimation theory, with applications to communication, control, and radar systems; decision-theory concepts and optimum-receiver principles; detection of random signals in noise, coherent and noncoherent detection; and parameter estimation, linear and nonlinear estimation, and filtering. Prerequisite: Electrical Engineering 434 or equivalent, or consent of instructor. 1 unit.
463. **Information Theory.** Same as Computer Science 463 and Mathematics 463. Mathematical models for information channels and sources; existence theorems for and construction of error-correcting codes. Prerequisite: Mathematics 361 or equivalent. 1 unit.
464. **Topics in Digital Computer Arithmetic.** Same as Computer Science 464. Topics selected from the advanced theory of digital computer arithmetic, including division methods, use of redundancy, and implications of the use of number representations, such as continued products and continued fractions. Prerequisite: Computer Science/Electrical Engineering 364. 1 unit.
465. **Topics in Automata Theory.** Same as Computer Science 465 and Mathematics 465. Topics selected from mathematical systems and automata theory, decision problems, formal languages, decomposition theory, etc. Prerequisite: Electrical Engineering 392 or consent of instructor. 1 unit.
468. **Advanced Solid-state Electrical Energy Conversion Systems.** Principles of solid-state electrical energy conversion systems; emphasis on the theory and operation of various types of inverters, converters, and cycloconverters; and applications including uninterrupted computer power supplies, electric automobiles, trucks, locomotives, earth-moving equipment, off-highway vehicles, industrial automation, and power system distribution. Prerequisite: Graduate standing. 1 unit.
469. **Introduction to Coherent Optics and Holography.** Same as Computer Science 469. The diffraction transformation of aperture distributions between parallel planes and the imaging and Fourier-transforming properties of lenses; the theory of coherence; the principles of optical and digital holography; and devices and systems for optical data processing. 0 or 1 unit.
470. **Nonlinear Optics.** Light propagation in anisotropic crystals; second- and third-order nonlinear susceptibility and electro-optic effect; and discussion of the relationship of these effects along with such applications as light modulation, harmonic generation, and optical parametric amplification and oscillation. Prerequisite: Electrical Engineering 420. 1 unit.
472. **Quantum Electronics.** Brief theoretical introduction to quantum mechanics and atomic physics, with many applications in spin resonance and modern maser theory. Prerequisite: Physics 362 and 385 recommended. 1 unit.
475. **Ionospheric Radio Propagation.** Propagation in a stratified medium; WKB solution; ray theory; ionospheric sounding; ionospheric transmission problems; scattering by irregularities; propagation in a random medium; cross-modulation and nonlinear effects; magneto-ionic theory; Faraday effect; whistler propagation; coupling of characteristic waves; magnetohydrodynamic waves; formation of ionospheric E-region; and formation of F-region. Prerequisite: Electrical Engineering 420 or equivalent. 1 unit.
477. **Advanced Antenna Theory.** Selected topics from recent engineering literature on antennas supplemented by advanced topics in electromagnetic theory needed for comprehension; current techniques for analysis of wire, slot, horn, frequency independent, quasi-optical, and array antennas. Prerequisite: Electrical Engineering 420. 1 unit.

- 485. **Topics in Computer Hardware.** Same as Computer Science 485. Advanced features of computer hardware; topics vary, but typically are chosen from: memories, optical data processing and storage, device modeling and computer-aided circuit design, and stochastic representation and processing of information. Prerequisite: Consent of instructor. 1 unit.
- 486. **The Constitution and Behavior of the Upper Atmosphere.** Chemical and dynamical processes in the upper atmosphere; emphasis on the processes by which emitted solar energy is transformed and the resulting behavior of the atmosphere and ionosphere. Prerequisite: Electrical Engineering 372 or consent of instructor. 1 unit.
- 488. **Experimental Techniques in Aeronomy.** Principles and typical results of measurement techniques for studies of the neutral and ionized constituents of the earth's upper atmosphere; radio techniques, probes, mass spectrometers, photometers, and particle detectors. Prerequisite: Graduate standing in electrical engineering or physics. 1 unit.
- 490. **Seminar in Special Topics.** Lectures and discussions on current research and literature on advanced topics in electrical engineering. Prerequisite: Advanced standing; consent of instructor. 0 to 1/2 unit. May be repeated for credit.
- 497. **Electrical Engineering Problems.** Lectures and discussions relating to new areas of interest. Prerequisite: Consent of instructor. 0 to 1 unit. May be repeated for credit.
- 498. **Individual Study.** Individual projects. Prerequisite: Consent of instructor. 1/2 to 2 units.
- 499. **Thesis Research.** 0 to 4 units.

ELEMENTARY AND EARLY CHILDHOOD EDUCATION

Chairperson of Department: Professor J. D. Rath

Department Office: 311 Education Building, Urbana

- 199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
- 230. **Principles, Problems, and Issues in Elementary and Early Childhood Education.** Focuses on the problems and issues facing the classroom teacher in curriculum development, planning, and evaluation; develops and applies educational principles which serve to guide the teacher in dealing with these problems and issues. Prerequisite: For students pursuing the B.S. in elementary education, concurrent registration in Educational Practice 232. For students pursuing the B.S. in early childhood education, Elementary and Early Childhood Education 234 and concurrent registration in Educational Practice 232. 3 hours.
- 233. **Classroom Programs in Childhood Education.** Organizing balanced daily programs in childhood education; planning and using materials of instruction; and evaluating pupil achievement. Prerequisite: Junior standing; Educational Psychology 236. 2 hours.
- 234. **Theory and Process in Early Childhood Education.** Directed toward assisting the preservice teacher to understand his or her role in implementing curriculum in early childhood settings; deals with topics such as evaluation, communication, cognition, and working with parents; and includes an eight-week practicum in local elementary and nursery schools and day care centers. Prerequisite: Educational Psychology 236. 5 hours.
- 237. **Theory and Process in Elementary School Teaching.** Directed toward affecting prospective teacher insight with regard to classroom behavior in teaching; includes materials dealing with child learning, teaching theory, and elementary school curriculum. A six-week morning assignment to a public school classroom is part of the course structure. Prerequisite: Educational Psychology 236. 5 hours.
- 249. **Independent Study.** Permits study of problems not considered in other courses; designed for students who excel in self-direction and intellectual curiosity. Prerequisite: Upperclassman; upper 5 percent of class in grade-point average; demonstrated writing

competence, research potential, scholarly attitude, and interest as attested to by instructors; consent of adviser and staff member who supervises the work. 2 hours.

291. Thesis. Prerequisite: Senior standing. 2 hours.
292. Thesis. Prerequisite: Senior standing. 2 hours.
304. **Literature for Elementary School Children.** Examines literature written for children and the uses of literature in the elementary school curriculum. Prerequisite: One college course in literature. 3 hours or 1 unit. Students may not receive credit for both Elementary and Early Childhood Education 304 and Library Science 303.
331. **Teaching Social Studies in the Elementary School.** Emphasis on the role of social education in the elementary school; the formal instructional program in social studies, including the knowledge, skills, and sensitivities to be taught; the teaching strategies and materials employed; and the organization of learning experiences and the total program in addition to the educative impact of the elementary school as a social system. Prerequisite: Elementary and Early Childhood Education 234 or 237; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
332. **Principles and Practices in Elementary Mathematics Education.** Organization, scope, and sequence of the elementary mathematics program and the functional nature of mathematics; methods, techniques, experiences, and materials of value in teaching elementary mathematics, and the role of classroom teacher. Prerequisite: Mathematics 202 and 203, or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
333. **The Teaching of Language Arts in the Elementary School.** Goals, content, and teaching problems involved in the devising of programs in the area of elementary school language arts that are cumulative and sequential from kindergarten through the elementary school. Prerequisite: Elementary and Early Childhood Education 234 or 237; Educational Psychology 236. 3 hours, or $\frac{1}{2}$ or 1 unit.
334. **Principles and Practices in Early Childhood Education.** Study of the principles and practices of using play as an educational tool in early childhood education; review of historical, philosophical, and psychological foundations of nursery-kindergarten methods; assessment of techniques relating play to various aspects of instruction; survey of materials and equipment; and presentation of methods of classroom evaluation. Prerequisite: Elementary and Early Childhood Education 234. 3 hours, or $\frac{1}{2}$ or 1 unit.
335. **Science in the Elementary School.** The principles, place, and practice of science education in the elementary school and in the lives of children; stresses the functional nature of science and its place in the curriculum; and considers the organization of the science program, experiences and techniques of value in teaching, and the role of the classroom teacher and specialist. Opportunity for experience in field and laboratory work. Prerequisite: Elementary and Early Childhood Education 237, or equivalent; two years of college science. 3 hours or $\frac{1}{2}$ unit.
336. **Fundamentals of Reading Techniques.** Same as Secondary Education 336. Basic principles, techniques, and materials for the developmental reading program; emphasis on methods and materials which provide for differentiated instruction. Prerequisite: Junior standing; registration in a teacher education curriculum. 3 hours, or $\frac{1}{2}$ or 1 unit.
337. **Art Education in the Elementary School.** Methods, plans, and materials for teaching art as an integral part of the total educational program in the elementary school. Prerequisite: Junior standing. 3 hours or $\frac{1}{2}$ unit.
338. **Teaching of Reading in Grades Four Through Twelve.** Same as Secondary Education 338. Developmental reading programs beyond the primary grades; factors related to reading speed and comprehension; and vocabulary development, specific comprehension skills, study skills, and reading interests and tastes. Prerequisite: Elementary and Early Childhood Education 336 or Educational Psychology 211; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
339. **Corrective Reading.** Same as Educational Psychology 339. Practice in administering and interpreting group diagnostic reading tests; presentation of instructional techniques appropriate for less severe reading disabilities. Prerequisite: Elementary and Early Childhood Education 336 or 338. 3 hours or 1 unit.

- 344. Parent Involvement Techniques for Teachers.** Principles and practices in working with parents in programs of involvement, education, and participation for elementary and early childhood teachers; includes techniques of reporting to parents, counseling with parents, guiding parent participation in schools, and developing relations with community agencies. Prerequisite: Elementary and Early Childhood Education 234 or graduate standing. 3 hours or 1 unit.
- 348. Speech and Language Clinical Methods in the Schools.** Same as Speech and Hearing Science 348. Study of methods and materials used in the schools by the speech and language clinician. Prerequisite: Speech and Hearing Science 388. 3 hours or ½ unit.
- 354. Audio-Visual Communication.** Same as Library Science 354 and Secondary Education 354. Analysis and application of those introductory aspects of communication theory and practices concerned with the design and use of audio-visual messages which influence the learning process; the selection, utilization, production, and evaluation of audio-visual materials and selected technological aids. Prerequisite: Senior or graduate standing. 3 hours, or ½ or 1 unit.
- 399. Issues and Developments in Elementary and Early Childhood Education.** A special course for experimentation or for seminar on topics not treated by regularly scheduled courses; requests for initiation may be made by students or faculty members. 2 or 4 hours, or ½ or 1 unit. May be repeated to a maximum of 8 hours or 2 units toward any one degree.
- 431. Elementary School Classroom Programs.** Exploration of organizational centers for determining selection and sequence of educative experiences in the elementary school classroom; emphasis on the role of the teacher in curriculum construction. 1 unit.
- 432. Clinical Diagnosis and Remediation in Reading.** Supervised experience in the reading center; special attention to evaluative and interpretative techniques in cases of severe reading disabilities based on the analysis of specific reading needs. Prerequisite: Elementary and Early Childhood Education 339; a course in individual mental testing. 1 unit. May be repeated to a maximum of 2 units.
- 433. Curriculum Problems and Trends in Special Fields of Elementary and Early Childhood Education.** Study of the place of the various special fields of elementary education in the emerging elementary school curriculum, with a review and analysis of recent trends and research findings in these fields. Sections are usually offered in the following fields: (a) language arts; (b) social studies; (c) mathematics; (d) science; (e) creative arts; (f) reading; (g) early childhood education; (h) teacher education; and (i) open education. Prerequisite: For all sections, Elementary and Early Childhood Education 431 or 434, or consent of instructor; for the section in language arts, Elementary and Early Childhood Education 333 and 336, or a course in the teaching of reading or language arts, or consent of instructor; for the section in creative arts, Elementary and Early Childhood Education 337 or consent of instructor; for the section in science, Elementary and Early Childhood Education 335 or a methods course in teaching science in the elementary school and two years of college science, or consent of instructor; for the section in reading, Elementary and Early Childhood Education 336 or a course in teaching of reading, or consent of instructor; for the section in early childhood education, Elementary and Early Childhood Education 434 or consent of instructor. 1 unit.
- 434. Programs in Early Childhood Education.** Advanced course intended primarily for teachers and supervisors of younger children, ages three to eight; review and analysis of research findings, experimentation, and current trends in curriculum organization, procedures, and materials essential to developing classroom programs for children. 1 unit.
- 435. Diagnosis and Correction in Elementary Mathematics.** The nature, causes, and correction of mathematical difficulties at the elementary level; process of evaluation through group and individual procedures; the development and use of diagnostic instruments and corrective techniques; and supervised experience with pupils having difficulties. Prerequisite: Elementary and Early Childhood Education 332 and Educational Psychology 392, or equivalent. 1 unit. May be repeated to a maximum of 2 units.

436. **Field Instruction in Reading Programs.** Directed practice in the area of reading; students are placed in an approved and supervised field position for part of the semester. Prerequisite: Elementary and Early Childhood Education 432. 1 unit.
437. **Methods of Child Study.** Study of ways in which teachers can evaluate child behavior and development with emphasis on classroom application; instruction and practice in the use and interpretation of observations, anecdotal records, rating scales, interviews, achievement tests, intelligence tests, questionnaires, and sociometric and projective techniques. Prerequisite: Educational Psychology 312 or consent of instructor. 1 unit.
438. **The Organization and Supervision of School Reading Programs.** Study of procedures for planning, improving, and evaluating reading programs on a system-wide basis. Open only to those persons who are preparing to supervise reading programs or with approval of graduate adviser. Prerequisite: Elementary and Early Childhood Education 339; Elementary and Early Childhood Education 433 (reading section). 1 unit.
439. **Fundamentals of Curriculum Development.** Same as Secondary Education 439. Explores the several theoretical bases of curriculum planning and the implications of these approaches for practice. 1 unit.
449. **Independent Study.** Offers opportunity and challenge of self-directive, independent study, that is, develops the individual's ability as an independent student, and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given semester. Prerequisite: Approval of study outline by adviser and the department chairman prior to enrollment. $\frac{1}{2}$ or 1 unit. No more than 2 units may be offered toward an advanced degree except by consent of the Dean of the College of Education.
459. **Workshop in Curriculum Development.** Curriculum development projects in specialized fields of elementary and early childhood education. 1 unit. May be repeated to a maximum of 2 units toward any one degree.
490. **Seminar for Advanced Students of Education.** Seminar in elementary and early childhood education. Prerequisite: Admission to doctoral study in elementary and early childhood education. 0 to 2 units.
491. **Field Study and Thesis Seminar.** Assists doctoral candidates in planning field studies and thesis problems. Students are expected to present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze critically all presentations. Limited to students who have been admitted for doctoral study. 1 to 2 units.
493. **Research and Design in Curriculum Development.** Criteria and procedures for evaluating reported research and for conducting research studies by professional educators at all levels, particularly those involved in teaching, modifying, or developing educational programs; considers researchable problems, development of research designs, selection of analyses for design and data, and utilization of results in findings and conclusions. (1) Section A is directed toward practitioners in education, and includes consumption and use of reported research and conducting of research in field situations, with emphasis on simple designs and non-parametric statistical procedures. Prerequisite: None. 1 unit. (2) Section B is directed toward the professional researcher in education, and emphasizes more sophisticated and controlled research designs with implications for appropriate statistical analysis. Prerequisite: Educational Psychology 390 or equivalent, Elementary and Early Childhood Education 493A, or consent of instructor. 1 unit. Sections A and B may not be taken concurrently, but credit may be received for each.
499. **Thesis Research.** Individual direction of research and thesis writing. 0 to 4 units.

ENGINEERING

Program Administrator: Professor H. L. Wakeland

Program Office: 207 Engineering Hall, Urbana

100. **Engineering Lecture.** Engineering lecture for freshmen; selected topics each week. Required of freshmen in the College of Engineering. 0 credit.
101. **Cooperative Engineering Education Seminar.** Discussion seminar which gives an introduction to cooperative engineering education. Topics discussed include duties and responsibilities of the student; duties and responsibilities of the cooperative employer; and techniques for obtaining maximum benefits from the program. Prerequisite: Cooperative student in any engineering curriculum. 0 credit.
102. **Cooperative Engineering Education Practice.** Off-campus practice of engineering in government or industry. Prerequisite: Cooperative student in any engineering curriculum. 0 credit.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Engineering Lecture.** Required of off-campus transfer students in the College of Engineering. Meets for first three weeks of each semester; selected topics. 0 credit.
299. **Engineering Study Abroad.** Provides campus credit for foreign study and/or provides a mechanism for engineering students to maintain continuous enrollment on this campus. If objective is study abroad for credit, a detailed proposal must be submitted by the student for approval by a committee of the department in which the student is studying and the college office prior to such study abroad. Final determination of credit and its application toward the student's degree is made after a review of the student's work abroad by the above committee and the college office. Prerequisite: Completion of sophomore year in engineering; approval of student's proposed study program by his department and the college office. 0 to 15 hours (summer session, 0 to 7 1/2 hours).

ENGINEERING HONORS

Executive Secretary of Program: Professor R. W. Bokenkamp

Program Office: 207 Engineering Hall, Urbana

196. **The Engineer and Society.** Prerequisite: Freshman James Scholar. 2 hours.
197. **The Engineer and His Profession.** Introduction to the nature of science and engineering, and the attributes of a scientist and an engineer. Prerequisite: Freshman James Scholar. 1 hour.
198. **Honors Seminar.** Special lecture sequence and/or discussion groups arranged each semester for freshman James Scholars to enable them to explore at their own level various aspects of technology that are of interest to them. Prerequisite: Honors student in the University. 1 to 4 hours.
297. **College Honors Seminar.** Special lecture sequences and/or discussion groups arranged each semester in special interdisciplinary subjects of current interest for James Scholars in engineering. Prerequisite: James Scholar in engineering or consent of instructor. 1 to 4 hours.

ENGLISH

(See Humanities, School of)

ENGLISH AS A SECOND LANGUAGE

Acting Director of Division: Professor L. F. Bouton

Division Office: 3070 Foreign Languages Building, Urbana

109. **English as a Second Language.** Intensive course in basic English structure for foreign students who are inadequately prepared for either English as a Second Language 111 or 114. Prerequisite: Reading knowledge of English and ability to understand simple instructions; recommendation from Illinois placement test. 0 credit.
110. **English as a Second Language.** Study of the sounds and intonation patterns of American English and the relation of sound to spelling; designed to improve the student's ability to speak and understand English at normal conversational speed. May also be taken with English as a Second Language 111 and 114. Prerequisite: Reading knowledge of English and ability to understand simple instructions; recommendation from Illinois placement test, or consent of instructor. 0 credit.
111. **English as a Second Language.** Continuation of English as a Second Language 109. Rapid and intensive review of basic English structure and a study of more complicated sentence patterns with practice in simple oral and written composition. Designed for students inadequately prepared for English as a Second Language 114. Prerequisite: English as a Second Language 109 or recommendation from Illinois placement test, or consent of instructor. 0 credit.
114. **English as a Second Language.** Composition for undergraduate students whose native language is not English. Prerequisite: English as a Second Language 111, recommendation from overseas test or Illinois placement test, or consent of instructor. 3 hours.
115. **English as a Second Language.** Composition for undergraduate students whose native language is not English. Prerequisite: English as a Second Language 114 or equivalent, recommendation from Illinois placement test, or consent of instructor. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
301. **Topics in Applied TESL/TEFL Theory.** Implications of TESL/TEFL theory and research for classroom practice; preparation of teaching and testing materials; evaluation of materials on the basis of ESL/EFL teaching experiences; adaptation to needs of different learner ages, language, and achievement backgrounds; and new teaching formats. May be repeated as topic changes. Not more than 1 ½ units may be counted toward the MATESL degree. Prerequisite: Consent of instructor. 1 to 2 hours, or ¼ to ½ unit.
302. **Descriptive English Grammar.** Same as English 302. 3 hours or 1 unit.
305. **Introduction to Applied Linguistics.** Same as Linguistics 305. Introduction to the applications of general linguistic theory to the specific fields of stylistics, theory of translation, contrastive analyses, and the teaching and learning of foreign and second languages; practical assignment work. Prerequisite: Consent of instructor. 3 hours, or ½ or 1 unit.
350. **Sociolinguistics.** Same as Linguistics 350. Critical study of the sociologically oriented general linguistic theories; special reference to language varieties, language attitudes, language diversity, language standardization, linguistic geography, and language and political roles (language loyalty); emphasis on research methodology and techniques. Prerequisite: Introductory course in linguistics or consent of instructor. 3 hours, or ½ or 1 unit.

360. **Principles of Language Testing.** Examines purposes and uses of various types of language tests and relates them to language teaching goals; discusses testing practices and procedures related to language teaching; and includes writing objectives, item writing, basic descriptive statistics, analysis, and test administration. A project is required. 2 hours or $\frac{1}{2}$ unit.
371. **Teaching Composition in the ESL Classroom.** Applies psycholinguistic and pedagogical principles to the teaching of writing/composition in the ESL situation at all levels; examines current approaches and techniques and relates them to teaching goals, student needs, and a variety of teaching situations. Projects require the evaluation, adaptation, and construction of composition teaching materials. 2 hours or $\frac{1}{2}$ unit.
382. **Language Laboratory Techniques.** Same as Classical Civilization, French, German, Humanities, Slavic, and Spanish 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
388. **Linguistics in Language Learning, I.** Same as Linguistics 388. Application of linguistics to language learning with special emphasis on the learning of English as a second language. Prerequisite: Two years of a foreign language or equivalent; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
389. **Linguistics in Language Learning, II.** Same as Linguistics 389. Applied linguistics in teaching and learning English as a second language with special emphasis on the applications of some principles of psycholinguistics, sociolinguistics, and ethnolinguistics along with the related disciplines of education, psychology, and anthropology to structured teaching and learning situations. Prerequisite: Linguistics 388; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
400. **Verbal Communication in English as a Second Language for Graduate Foreign Students, I.** Language laboratory course concentrating on the typical writing problems that a graduate or research student encounters in an American university. Prerequisite: Graduate standing and English as a Second Language 111, or consent of instructor. 0 to 4 hours. No graduate credit.
401. **Verbal Communication in English as a Second Language for Graduate Foreign Students, II.** Language laboratory course dealing with individual, immediate, and specialized speaking and writing problems, with particular attention to orienting graduate or research students to the techniques of the American university in thesis and other specialized writing, and in the oral presentation of such material. Prerequisite: Graduate standing and English as a Second Language 400, or consent of instructor. 0 to 4 hours. No graduate credit.
402. **Introduction to General Linguistics.** Same as Anthropology and Linguistics 400. Introduction to the linguistic sciences; linguistic theory and methodology; and branches of linguistics and their application. 1 unit. Credit may not be applied toward a graduate degree in linguistics.
410. **Generative Phonology in English Teaching.** Generative phonological analyses of English and the teaching of English pronunciation: reevaluation of teaching goals, content, presentation, and methodology; required projects involve developing and evaluating lesson materials and observing and participating in teaching generative materials in ESL classes. Prerequisite: English as a Second Language 301 and English as a Second Language/Linguistics 388. 1 unit.
419. **Contrastive Linguistics.** Same as Linguistics 419. Critical survey of contemporary linguistic models with special reference to their relevance in preparing contrastive analyses of languages; detailed discussion on contrastive analyses of English and selected non-Western languages at different linguistic levels. Prerequisite: Linguistics 300 or consent of instructor. $\frac{1}{2}$ or 1 unit.
463. **College Teaching of Foreign Languages.** Same as French, Russian, German, and Spanish 463. Rationale for curricular objectives for college courses in foreign language-

es; the teaching and testing of pronunciation, listening comprehension, speaking, reading, writing, cultural understanding, and literary appreciation; the use of technology; and recent experimentation. 1 unit.

481. **Seminar in Linguistic and Psychological Foundations of Language Teaching.** Same as French, German, Russian, and Spanish 481. Language teaching problems considered in the light of theoretical and experimental work in language acquisition, verbal learning and memory, motivation, speech perception, reading, error analysis, and language as an aspect of culture and societal relations. Prerequisite: Consent of instructor. 1 unit.
487. **Seminar in the Teaching of English as a Second Language.** Discussion of and research into various topics of current interest to persons involved in teaching English as a second language; emphasis on new approaches to problems facing the field and the development of understanding methods; and study of materials leading to possible solutions. May be repeated as the topic changes. Prerequisite: English as a Second Language 388 or 302, or consent of instructor. $\frac{1}{2}$ to 1 unit.
491. **Research in Special Topics.** Independent study under guidance of a member of the graduate faculty. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 1 unit. May be repeated for a total of 2 units.

ENTOMOLOGY

(See Life Sciences)

ENVIRONMENTAL STUDIES

Director of Institute: Professor B. B. Ewing

Institute Office: 911 West High Street, Urbana

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
236. **Tomorrow's Environment.** Same as Health Education 236. Introduction to the environmental problems of a finite world; temporal perspective on impacts on the natural ecosystem and the resulting limits on growth; and projections of environmental conditions based upon understanding relevant natural systems and human impacts under alternative management strategies. Prerequisite: One course in the life sciences and one course in the social sciences, or consent of instructor. 3 hours.
299. **Individual Studies of Environmental Topics.** Individual studies of environmental problems and their solutions. Studies are accomplished under the immediate supervision of faculty of the Institute for Environmental Studies. Prerequisite: Consent of instructor. 0 to 4 hours.
319. **Environment and Plant Ecosystems.** Same as Agronomy and Forestry 319. Man's role in environmental regulation and how it affects crop productivity through altered cellular and organismal processing; discussion of physiological processes involved in managed plant ecosystems of the community, organismal, and molecular levels. Prerequisite: One course in biology, Chemistry 101 or equivalent, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
348. **The Air Pollution System.** Same as Agricultural Engineering, Civil Engineering, General Engineering, Geography, Mechanical Engineering, Urban and Regional Planning, and Veterinary Medical Science 348. Synthesis of current concepts on air pollution sources, meteorological dispersion, health effects, economic damage, and the political, legal, planning, and engineering implications for control and enforcement. In

Part I, current concepts and applications utilizing recent information are presented. In Part II, implications are examined in small group discussions of several contemporary societal problems. Prerequisite: Senior or graduate standing. 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit. Consent of instructor is required for those students who wish to take this course for 1 hour or $\frac{1}{4}$ unit.

374. **General Epidemiology.** Same as Health Education, Medical Sciences, Veterinary Medical Science, and Veterinary Pathology and Hygiene 374. The epidemiology and natural history of infectious and noninfectious diseases, including integrated vector control and host resistance, and mental health and public health. Prerequisite: Microbiology 326, Veterinary Medical Science 332, or equivalent, or consent of instructor. 4 hours or 1 unit.
393. **Environmental Quality Management.** Same as Urban Planning 393. Issues and concepts used in determining the desired level of environmental quality, with emphasis on pollution control; comparisons of management alternatives with emphasis on equity, cost, and ease of administration; and includes the study of an actual pollution management problem. Designed for students with an environmental or public policy analysis background. Prerequisite: Senior or graduate standing; calculus or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
397. **Selected Environmental Problems.** Advanced study of problems related to the environment. Each unit of instruction focuses on a coherent problem area centered primarily within the subject matter of one or more interrelated disciplines comprising the Institute and taught by one or more faculty members from these disciplines. Prerequisite: Senior or graduate standing and consent of instructor. 1 to 4 hours, or $\frac{1}{4}$ to 1 unit.
495. **Environmental Studies Seminar.** Interdisciplinary seminar on topics of current interest. Students, faculty, and visiting lecturers present seminars based upon their study, research, and/or professional activities in the selected environmental topic area. Prerequisite: Consent of instructor. 0 to 1 unit. May be repeated as topic varies.
497. **Studies of Environmental Topics.** Individual or group research and study of environmental topics. Subjects for individual study, selected by the student, must be approved by the student's adviser and by the Director of the Institute. (Note: This is not a thesis research course.) Group study focuses on environmental problems and their solutions. Prerequisite: Consent of instructor. 0 to 4 units. May be repeated.

FINANCE

Head of Department: Professor J. W. Leonard

Department Office: 340 Commerce Building (West), Urbana

150. **Money, Credit, and Banking.** Study of monetary and banking systems and the impact of monetary policy on employment, prices, economic growth, and international trade. Prerequisite: Economics 101 or equivalent. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
230. **Investment Principles.** Financial investment as promoter of economic productivity; securities: government, corporate, and mutual fund; securities markets: exchanges, brokers, and dealers; investment decisions in theory and practice; elements of security analysis and portfolio management; and the special case of mutual funds and their shares. Prerequisite: Economics 101 or equivalent. 3 hours.
235. **Investment Management.** Application of investment theory, analysis, and valuation methods to practical problems of investment management; selected cases and problems. Prerequisite: Finance 230 and 254. 3 hours.
252. **Banking Practice in the United States.** Study of the functions, operations, policies, or-

- ganization, management, and supervision of banks. Prerequisite: Finance 150 and 254. 3 hours.
253. **Investment Banking.** Role of investment banking in the financial organization; investment banking houses; relation of investment banking to other financial institutions; regulation of investment banking and the security markets; and current problems and developments in investment banking. Prerequisite: Finance 150 and 254. 3 hours.
254. **Introduction to Business Financial Management.** Development and study of a decision framework for financial management; an introduction to the analysis of past and future needs; an analysis of the management of short-term assets; an introduction to a decision framework for capital investment management with an analysis of the cost and sources of long-term capital; and integration of the concepts of financial management into a total systems approach to business decision making. Prerequisite: Accountancy 105 or 201; credit or concurrent registration in Economics 172. 3 hours. Credit is not given for both Finance 254 and 257.
255. **Financing Corporate Consolidation and Reorganization.** Financial aspects of industrial concentration; the combination movement; financing complex corporate enterprises; financial phases of reorganization; and the reorganization process. Prerequisite: Finance 254 or 257. 3 hours.
257. **Corporation Finance.** Study of the character of corporations; corporate securities; acquiring capital; internal financial control; expansion and intercorporate relations; and corporate capital readjustments. For noncommerce students only. Prerequisite: Economics 101 or equivalent. 3 hours. Credit is not given for both Finance 257 and 254.
258. **The Money Market and American Financial Institutions.** Study of the development and the practices of specialized financial institutions in the United States: commercial banking; central banking; savings banks; trust companies; investment banking; real estate finance; agricultural finance; and government financial institutions. Prerequisite: Economics 101 or equivalent. 3 hours.
260. **Economics of Insurance.** Survey course in insurance which serves as a common introductory course to the fire, marine, casualty, surety, and life branches of the insurance business. Prerequisite: Economics 101 or equivalent. 3 hours.
262. **Life Insurance.** Study of the life insurance industry, companies, products, and markets. Prerequisite: Economics 101 or equivalent. 3 hours.
280. **Advanced Financial Management.** Integration of the capital investment, long-run financing working-capital decision processes; use of simulation, cases, and other techniques to study each decision process. Prerequisite: Finance 254. 3 hours.
294. **Senior Research.** Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 4.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. Prerequisite: Senior standing. 2 to 4 hours.
295. **Senior Research.** Research and reading course for students concentrating in finance, insurance, urban land economics, or related areas who meet one of the following requirements: (1) have a cumulative grade-point average of 4.0 or better; (2) have attained Honors Day recognition in the junior year; or (3) have consent of instructor. May be taken by students in the college honors program in partial fulfillment of the honors requirements. Prerequisite: Senior standing. 2 to 4 hours.
340. **Consumer Finance.** Nature and importance of consumer finance; trends in consumer credit; instruments and institutions of consumer credit; economic effects of consumer finance; and consumer credit and public policy. Prerequisite: Finance 150 and 254; or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
357. **Financing Small Business.** Size and nature of small business; significance and limitations of small business; financial structure and problems; financial assistance to small business; and future prospects of small business. Prerequisite: Finance 254 or 257. 3 hours, or $\frac{1}{2}$ or 1 unit.

360. **Employee Benefit Plans.** Same as Labor and Industrial Relations 360. Analysis of the economic and financial issues involved in designing and administering employee benefit plans; major emphasis on group life, disability income, and medical care plans, and on qualified pensions and profit-sharing plans for regular employees; and some attention to special supplementary plans for the executive employees. Prerequisite: Finance 260, Economics 240, or Business Administration 351, or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
363. **Seminar in Life and Health Insurance.** Seminar devoted to discussions of current financial, legal, and social problems involving life and health insurance; discussion of legal and financial problems involving life and health insurance product development, life and health insurance in estate planning, government regulation of the life insurance industry, and the economic aspects of the industry. 3 hours, or $\frac{1}{2}$ to 1 unit.
364. **Fundamentals of Real Estate and Urban Economics.** Determinants of growth and development; survey of problems affecting land resource allocation: transportation, poverty, employment, public finance, and housing; introduction to systems analysis, cost-benefit, and cost-effectiveness studies, real estate market forecasting, appraising, economic base analysis, financing, construction, and land-use controls. Prerequisite: Six hours of economics and a course in political science or sociology, or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
365. **Urban Land Investment Analysis.** Provides an analysis on framework for urban real estate investment decisions by individuals and institutions; exposition of rate-of-return analysis illustrated by actual investment situations. The determinants of real estate investment policy for borrowers and lenders require consideration of mortgage markets, government policies, risk controls, and analysis of different types of real estate investments. Prerequisite: Finance 364 or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
366. **Valuation Theory and Methods.** Concentration on land value theory and methods; primary concern on the selection of a valuation theory which produces an ethical valuation as needed by buyers, sellers, lenders, the government, insurers, etc.; examination of the role of the appraiser as evaluator, expert witness, and counselor; and use of case method to demonstrate principles and practices. Prerequisite: Finance 364 or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
367. **The Urban Public Economy.** Same as Economics 361. Economic analysis of public policy with respect to urban problems; a full development of externalities at the core of the urban economy; the theory of local public finance, pricing, and investment decisions in the urban public sector; and the application of cost-benefit analysis and user charge pricing to such problems as housing, transportation, land-use controls, pollution, poverty, and education. Prerequisite: Economics 360 or Finance 364. 3 hours, or $\frac{1}{2}$ or 1 unit.
370. **Risks and Risk Management.** Analysis of the financial problems in the risks of property damage or bodily injury (in business situations), and evaluation of the alternative methods for dealing with such problems. Prerequisite: One of the following: Accountancy 105 or 201, or Finance 254 or 257; Economics 101 or equivalent. 3 hours, or $\frac{1}{2}$ to 1 unit.
371. **Seminar in Property and Liability Insurance.** Seminar devoted to discussions of current financial, legal, and social problems involving property-liability insurance; analysis of legal problems involving insurance coverages, financial aspects, and governmental regulation of the property-liability insurance enterprise, and economic aspects of the insurance industry. 3 hours, or $\frac{1}{2}$ to 1 unit.
420. **Central Banking Policy.** Examination of modern theories of monetary management, gold standard theories, central banking, fiscal policy, debt management, and their relation to monetary policy. 1 unit.
425. **The Money Market and Financial Stabilization.** Study of interest rate determination; the structure and operations of the money and capital markets; and the objectives and implementation of monetary, fiscal, and debt management policies. Prerequisite: Finance 150. 1 unit.

427. **Research Seminar in Banking.** Research reported and explored in areas of commercial bank models and behavior, bank structure and regulation, and central bank control; current topics, specialized areas in banking, and research procedures are discussed by instructor, students, and guest lecturers. Prerequisite: One semester of graduate economic theory; Economics 470. 1 unit.
452. **Long-Term Financial Decision Making.** Same as Business Administration 452. An analytical approach to the theoretical and applied aspects of decision making in business finance; assumes a long-term planning horizon; and emphasizes valuation and cost of capital theories, capital investment decisions, risk analysis, and capital structure and dividend policies. Prerequisite: Finance 254 or Business Administration 451, or equivalent; Economics 470, Business Administration 472, or concurrent registration in either course. 1 unit.
453. **Working Capital Management.** Same as Business Administration 453. A study of working capital management processes and of theoretical linkages between working capital and long-run financial management; uses a variety of models to study the theory of working capital management and to analyze relationships among variables in the short-run financial decision-making process; and combines theory and applications to provide insight into the total financial decision-making process. Prerequisite: Finance 254 or Business Administration 451, or equivalent; Economics 470, Business Administration 472, or concurrent registration in either course. 1 unit.
454. **Corporation Finance.** Nature of corporation finance and its relation to economics, accounting, and law; development of business corporation; concepts of capital, capitalization, and capital stock; nature of equities in corporation; financial analysis and interpretation; nature and development of financial plans; corporate securities and their adaptation to financial plan; initial and promotional financing; current capital financing; income administration; and refinancing. Prerequisite: Finance 254. 1 unit.
455. **Seminar in Finance.** Philosophy of research; critical evaluation of selected research; emphasis on empirical studies; evaluation of analytical methods employed; relation of research questions to research methods; and development of thesis research topics. Prerequisite: Finance 453 or 458. 1 unit.
456. **Investment.** Study of the financial process by which savings are transformed into capital; theories of investment value and of portfolio composition; critique of individual and institutional portfolio policies; and survey of investment literature. 1 unit.
457. **Security Analysis and Investment Management.** Same as Business Administration 457. Application of decision theory and quantitative methods to problems of individual security valuation and selection, portfolio composition, and investment management. Prerequisite: Finance 254 or equivalent, or Business Administration 451 or equivalent. 1 unit.
458. **Portfolio Theory.** Same as Business Administration 458. Theoretical and research-oriented course related to the problems of efficient allocations of resources in security portfolios of large financial institutions; integration of interdisciplinary problems such as capital market price behavior and stock price behavior with portfolio analysis models. Prerequisite: Finance 457 or equivalent. 1 unit.
460. **Theory of Insurance.** Study of the nature and cost of risk in our economic society, and of the methods of handling it. 1 unit.
468. **Studies in Urban Economics: Environment and Land Use.** Economic forces and policies affecting location, growth, and economic base of the city; consideration of problems affecting urban resource allocation and location: housing, transportation, ecology, segregation, public finance, and strategies in community development; and consideration of theories and methods of analysis of effective urban resource allocation and valuation. Graduate students should consult with the instructor as to whether Finance 364 or this course is preferable. 1 unit.
469. **Problems and Policies in Urban Economics.** Urban development and the national economy; interaction of business institutions and public agencies in performance of urban functions; determinants of land-use patterns; economic aspects of property rights

and land-use controls; and unmet needs. Students undertake intensive analysis problem selected for individual study; cooperation with urban planning, architecture, landscape architecture, and other departments. Prerequisite: Finance 364 or 468, or consent of instructor. 1 unit.

470. **Risk Management and Control.** Same as Business Administration 455. Analysis of the risk management problem in the business enterprise with emphasis on methodology for risk analyses; techniques for risk and loss control; models for risk management decision making; and procedures for administering risk management policy relating to nonspeculative (insurable) risk. Prerequisite: Finance 452 and Business Administration 460, or equivalent, or consent of instructor. 1 unit.
490. **Individual Study and Research.** Directed reading and research. $\frac{1}{2}$ to 1 unit.
499. **Thesis Research.** Required for those writing master's and doctoral theses in finance. 0 to 4 units.

FINE AND APPLIED ARTS

Program Administrator: Professor J. H. McKenzie
Program Office: 114 Architecture Building, Urbana

101. **Language and Design, II.** 0 to 6 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
299. **FAA Study Abroad.** Provides campus credit for foreign study and/or travel. A detailed proposal for study abroad must be submitted for approval by the appropriate committee of the department in which the student is studying and the college dean's office prior to such study abroad. Final determination of credit and its application toward the degree is made after a review of the student's work abroad by the above committee and college office. Prerequisite: Junior standing in the department; approval of the student's proposal by the departmental committee and the college office. 0 to 12 hours (summer session, 0 to 6 hours).

FOOD SCIENCE

Head of Department: Professor A. J. Siedler
Department Office: 567 Bevier Hall, Urbana

101. **Food in Modern Society.** Emphasis on the importance of food in providing adequate nutrients for modern society; introduction to processing and preservation of foods as well as the historical, geographical, chemical, and microbiological ramifications which exist in the food industry. 3 hours.
202. **Sensory Evaluation of Foods.** The physiology, psychology, and chemistry of flavor and flavor perception; tactual, visual, and auditory components affecting food acceptability; principles and application of preference and discrimination testing; and interpretation of panel evaluation data. 3 hours.
206. **Field Trip.** Inspection of typical food preservation and manufacturing plants. Four-day trip required of all seniors in food science and food industry; see *Timetable* for current fees. Prerequisite: Junior standing in food science or consent of instructor. 1 hour.
213. **Food Analysis, I.** Principles and application of the chemical methods used to determine the major and minor constituents of foods; physical measurements applied to foods;

- and special considerations applicable to the analysis of certain foods. Prerequisite: Chemistry 102. 3 hours.
214. **Survey of Food Chemistry.** Chemical composition of foods and the chemistry of the processing of meats, vegetables, fruits, milk, and cereals. Credit is not given for both Food Science 214 and 314. Prerequisite: Chemistry 102. 3 hours.
260. **Raw Materials for Processing.** Lectures, reference readings, and laboratory experiments concerning the problems involved with procurement, harvesting, handling, and storage of fruits, vegetables, cereal grains, dairy products, and meat for the food-processing industry. Field trips to specialized operations. Prerequisite: One course in biological science and Food Science 101, or consent of instructor. 4 hours.
300. **Special Problems.** Supervised research on special problems in food science. Prerequisite: Written consent of instructor must be obtained prior to enrollment. Not open to undergraduates who are on probation. The honors section is open to James Scholars and other students having a minimum grade-point average of 4.0 and may be taken in conjunction with other courses in this department subject to approval of the instructor. 1 to 5 hours, or $\frac{3}{4}$ to 1 $\frac{1}{2}$ units. May be repeated to a maximum of 2 units.
301. **Food Processing.** Principles and application involved in canning, freezing, dehydrating, flour milling, luncheon meats, freeze drying, and plastic films. Field trips to food processing and manufacturing operations. Prerequisite: Food Science 202, 213, or 260, or consent of instructor. 5 hours or 1 $\frac{1}{4}$ units.
308. **Food Plant Management.** Problems in product development, organization, financing, labor management, and operation of food plants. Prerequisite: Senior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
310. **Dairy Product Processing.** Theory and practice in procurement of milk, separation and creaming phenomena, homogenization, and heat treatment; concentrating, drying, and freezing as applied to fluid milk products, cultured milk products, concentrated and dried milk products, ice cream, butter, and cheese. Prerequisite: Food Science 213 and 260, or consent of instructor. 5 hours or 1 $\frac{1}{4}$ units.
313. **Food Analysis, II.** Laboratory exercises, demonstrations, and assigned readings dealing with the application of analytical chemical and instrumental techniques to the analysis of food constituents. Prerequisite: Food Science 213 or equivalent, such as quantitative analysis. 4 hours or 1 unit.
314. **Food Chemistry, I.** Major chemical components of foods, lipids, carbohydrates, and proteins, and the chemical changes that occur during processing and storage. Credit is not given for both Food Science 214 and 314. Prerequisite: Chemistry 131 and 134. 3 hours or $\frac{3}{4}$ unit.
315. **Food Chemistry, II.** Minor chemical components of food: vitamins, pigments, salts, trace elements, and enzymes, and the changes that occur in them during processing and storage; the physical and colloidal properties of foods; food additives and contaminants; and metabolism of foods. Prerequisite: Food Science 314. 3 hours or $\frac{3}{4}$ unit.
320. **Nutrition in Food Science.** The nutritional requirements of man with emphasis on nutritional considerations in the industrial production of food. Prerequisite: Food Science 315 or a course in general biochemistry. 3 hours or $\frac{3}{4}$ unit.
324. **Biochemical Aspects of Human Nutrition.** Same as Home Economics 324. Advanced treatment of human nutrition, with emphasis on the biochemical functions of nutrients essential for man. Prerequisite: Biochemistry 350, Biochemistry 352 and 353 and a course in nutrition, or consent of instructor. 3 hours or $\frac{3}{4}$ unit. Students may not receive credit for Food Science/Home Economics 324 and Food Science 320.
332. **Principles of Sanitation in the Processing and Handling of Foods.** Study of the principles of sanitation with appropriate emphasis on practical considerations as they apply to various food-processing industries; control of insects, rodents, and micro-organisms; fundamentals of detergency; sanitation of water supplies; waste disposal methods; and government and public health regulations. Field trips to local food-processing plants. Prerequisite: Microbiology 100 and 101; Chemistry 102. 2 hours or $\frac{1}{2}$ unit.

- 340. Introduction to Applied Statistics.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Forestry, Horticulture, and Veterinary Medical Science 340. Statistical methods involving relationships between populations and samples; collection, organization, and analysis of data; and techniques in testing hypotheses with an introduction to regression, correlation, and analyses of variance limited to the completely randomized design and the randomized complete-block design. Prerequisite: Mathematics 104, 111, or 112, or equivalent. 4 hours or $\frac{3}{4}$ unit.
- 363. Introduction to Process Engineering.** Fundamentals of heat transfer, fluid flow, evaporation, drying, and other unit operations in the process industries. Prerequisite: Calculus or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
- 373. Advanced Food Microbiology.** Fundamentals of those food and industrial processes which are dependent on fermentation or other microbial activities. Prerequisite: Chemistry 131, Microbiology 311, and a course in calculus. 3 hours or $\frac{3}{4}$ unit.
- 391. The Chemistry of Lipids in Foods.** Detailed survey of the chemical and physical properties of lipids. Prerequisite: Biochemistry 350 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
- 401. Physical Chemical and Colloidal Phenomena of Food Products.** Study of physical, chemical, and colloidal phenomena involved in the processing of food products including such topics as food emulsion, foams, gelation, coagulation, rheology, and membrane phenomena in foods. Prerequisite: Chemistry 340. 1 unit.
- 406. State and Metabolism of Lipids.** Advanced study of the state of lipids in animal tissues and in biological fluids, and of the metabolism of lipids in relation to dietary fats and other food constituents. Prerequisite: Biochemistry 350 or consent of instructor. 1 unit.
- 410. Current Topics in Nutritional Research.** Same as Dairy Science and Nutritional Sciences 410. Discussion of current research problems in experimental nutrition. Prerequisite: Biochemistry 350 or 352; an upper-level course in nutrition. $\frac{3}{4}$ unit.
- 411. Chemistry of Nutritional Processes.** Same as Dairy Science and Nutritional Sciences 411. Biochemical aspects of nutrition with emphasis on the function, regulation, and metabolism of nutrients in man. Prerequisite: Biochemistry 350 or 352; an upper-level course in nutrition. 1 unit.
- 421. Seminar.** Discussions on specialized topics and current literature relating to food technology. Required of all graduate students in food science. $\frac{1}{4}$ unit.
- 440. Design and Analysis of Biological Experiments.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Forestry, Horticulture, and Veterinary Medical Science 440. Statistical methods as tools for research; consideration of principles of designing experiments and methods of analysis for various kinds of designs, including factorial experiments, from the viewpoint of when and how to use them. Prerequisite: Food Science 340 or equivalent. $\frac{3}{4}$ unit.
- 481. Advanced Special Problems in Food Science.** Supervised individual study on advanced special problems in food science. Prerequisite: Written consent of instructor must be obtained prior to enrollment. $\frac{1}{2}$ to 2 units (summer session: $\frac{1}{2}$ to 1 unit).
- 499. Thesis Research.** 0 to 4 units.

FORESTRY

Head of Department: Professor I. I. Holland

Department Office: 211 Mumford Hall, Urbana

- 100. Farm Forestry.** Designed for nonforestry majors. General aspects of forestry in Illinois, including tree identification, map interpretation, timber management, measurement and utilization, harvesting methods, reforestation and protection, and management for

- nontimber uses. Prerequisite: Enrollment in College of Agriculture or College of Education, or consent of instructor. 3 hours.
101. **General Forestry.** The forest as a renewable natural resource; the aims and scope of forestry; economic and social importance of forests to the nation; the principal forest regions and species; forests for timber supply, for water conservation, for recreation, and for wildlife; the principles of forest management and protection; the development of public and private forestry in the United States; and forestry as a profession. Prerequisite: Enrollment in a forestry curriculum or sophomore standing. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Special Problems.** Supervised research on special problems in forestry. Prerequisite: A minimum grade-point average of 3.75; senior standing; consent of instructor and head of department. Specific approval of the associate dean is required in advance of registration for a second and/or third special problem course. The honors section is open to James Scholars and other students having a minimum grade-point average of 4.0 and may be taken in conjunction with other courses in this department subject to approval of the instructor. 1 to 3 hours.
201. **Wildland Recreation (Summer Field Studies).** Field study of wildland recreational resources and facilities, user characteristics and preferences, and management techniques within the multiple-use concept. Prerequisite: Competence in the courses prescribed in the first two years of the forest science curriculum. 1 hour.
211. **Forest Ecology (Summer Field Studies).** Introduction to forest ecology and the application of ecological principles in silviculture and management practices. Prerequisite: Competence in the courses prescribed in the first two years of the forest science curriculum. 2 hours.
213. **Silviculture.** The art and science of controlling forest establishment, composition, and growth that will best fulfill the objectives of the owner. Prerequisite: Forestry 211. 3 hours.
220. **Dendrology.** Taxonomy, geographical distribution, economic importance, and elementary silvics of the important forest trees in the United States and Canada. Prerequisite: Botany 100. 4 hours.
221. **Forest Measurements (Summer Field Studies).** Introduction to forest measurements, including individual tree and stand measurements, inventory methods, and determination of the growth of trees and stands; topics in surveying and aerial photogrammetry. Prerequisite: Competence in the courses prescribed in the first two years of the forest science curriculum. 2 hours.
231. **Wood Utilization, I (Summer Field Studies).** Field and classroom exercises in logging and milling, conversion of raw wood to useful products, visits to plants, and industrial aspects of wood use. Prerequisite: Competence in the courses prescribed in the first two years of the forest science curriculum. 1 hour.
232. **Wood Utilization, II.** Principles and methods of harvesting, grading, and transporting forest products; conversion of logs, bolts, and cordwood; physical-mechanical properties and defects of wood; and specifications and uses of lumber, veneer, plywoods, pulp, paper, and chemical derivatives. Prerequisite: Forestry 231. 3 hours.
236. **Physical Properties of Wood and Wood-Base Materials.** Physical properties of wood materials, emphasizing the influence of anatomy, density, and moisture content; wood-liquid relations; thermal, electrical, and acoustical properties; and study of the theory and practice of wood seasoning for determining dimensional stability. Prerequisite: One year of college physics and one year of college chemistry, or consent of instructor. 3 hours.
242. **Forest Resources Management.** Concepts, techniques, and management tools applied to forest properties managed for continuous production of timber and other forest products; determination of optimum rotation and growing stock; and appraisals, taxation, and management planning. Prerequisite: Senior standing. 4 hours.
253. **Forest Economics.** Concepts of economic supply of, and demand for, the major wood products; trends in wood products consumption and prices, and the major marketing

problems; and prospects for future development of U.S. wood products industries and trade. Prerequisite: Economics 101 or equivalent. 3 hours.

256. **Surveying Agricultural and Forest Lands.** Same as Agricultural Engineering 256. Basic surveying procedures as applied to practices in soil and water conservation engineering and forest management and engineering. Prerequisite: Mathematics 114. 2 hours.
260. **Forest Land Policy and Administration.** Forest land policies and their administration with emphasis on the relations among resources, politics, and people; current major problems in forest land policy administration and progress toward their solution. Prerequisite: Economics 101 or consent of instructor. 3 hours.
271. **Wood Anatomy and Identification.** Study of the macroscopic, microscopic, and ultra-microscopic structure of wood and the identification of many important commercial woods by means of anatomical characteristics; fundamental physical and chemical properties of wood. Prerequisite: Enrollment in forest science or wood science curricula, or consent of instructor. 3 hours.
273. **Adhesives and Laminates.** Physical and chemical properties of the principal adhesives used to bond wood and other materials; principles of adhesion; and manufacture, properties, and uses of plywood, laminated wood, and other products. Prerequisite: Enrollment in the wood science curriculum or consent of instructor. 3 hours.
274. **Wood Preservation.** Theory and application of wood preservation; agencies causing deterioration of wood and their control; and fire retardants, treating chemicals, and processes. 3 hours.
275. **Seminar in Wood Science.** Individual problems in the field of wood technology and utilization chosen by the student. Each problem involves library studies, verbal reporting, and group discussion. Prerequisite: Junior standing in the wood technology and utilization curriculum. 2 hours.
278. **Aerial Photointerpretation.** Same as Geography 278. Introduction to the analysis and interpretation of aerial photographs; emphasizes applications to the inventory and management of natural resources and land use planning. 2 hours.
281. **Introduction to Forest Resource Management (Summer Field Studies).** Field introduction to forest resource management, including wildlife management, watershed management, and forest protection. Prerequisite: Competence in the courses prescribed in the first two years of the forest science curriculum. 2 hours.
304. **Forest Pathology.** Same as Plant Pathology 304. Principles of forest and shade-tree diseases; symptoms, causal agents, and control of major tree diseases and wood decays; and the role of man in creating and solving disease problems. Prerequisite: Botany 100 or equivalent. 3 hours or $\frac{3}{4}$ unit.
315. **Forest Soils.** Study of the physical, chemical, and biological properties of forest soils; includes the relationship of forest soils to the total environment, forest hydrology, tree growth, and stand development; weekend overnight field trip required. Prerequisite: Agronomy 101. 2 hours or $\frac{1}{2}$ unit.
316. **Advanced Forest Ecology.** Emphasizes the relationship between environmental factors and tree growth; discusses various silvicultural and site-improvement practices in relation to their ecological basis; weekend overnight field trip required. Prerequisite: Forestry 211 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
319. **Environment and Plant Ecosystems.** Same as Agronomy and Environmental Studies 319. Man's role in environmental regulation and how it affects crop productivity through altered cellular and organismal processes; discussion of physiological processes involved in managed plant ecosystems of the community, organismal, and molecular levels. Prerequisite: One course in biology, Chemistry 101 or equivalent, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
321. **Forest Biometrics.** Introduction to statistical methods used in the management of natural resources; includes applied regression analysis and survey of sampling methods, with computer applications. Prerequisite: A course in statistics. 3 hours or $\frac{3}{4}$ unit.
324. **Decision Models in Forestry and Wood Sciences.** Introduction to models used in managerial decision making; application of operations research models to problems in for-

- est management and wood processing, with emphasis on linear programming and simulation. Prerequisite: One course in statistics. 3 hours or $\frac{3}{4}$ unit.
340. **Introduction to Applied Statistics.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Food Science, Horticulture, and Veterinary Medical Science 340. Statistical methods involving relationships between populations and samples; collection, organization, and analysis of data; and techniques in testing hypotheses with an introduction to regression, correlation, and analyses of variance limited to the completely randomized design and to the randomized complete-block design. Prerequisite: Mathematics 104, 111, or 112, or equivalent. 4 hours or $\frac{3}{4}$ unit.
362. **Forest Entomology.** Study of the characteristics, life histories, and forest relationships and controls of the economically important forest insects of the United States. Prerequisite: One year of biological science and one year of chemistry. 3 hours or $\frac{3}{4}$ unit.
372. **Mechanical Properties of Wood and Wood-Base Materials.** Static mechanics, strength properties, and structural designs of wood, plywood, particleboard, and hardboard, emphasizing the standard methods of testing wood and fibrous material, wood beam and column designing, and other factors concerning the strength of wood materials, particularly the derivation of allowable stresses. Prerequisite: Forestry 236, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
400. **Seminar.** Discussions on specialized topics and current literature in forestry. Required of all graduate students in forestry. $\frac{1}{4}$ unit. May be repeated to a maximum of $\frac{1}{2}$ unit.
401. **Special Problems.** Individual studies or investigations in selected branches of forestry. 0 to 1 unit. Not more than 2 units may be offered toward an M.S. degree.
414. **Discussions in Forest Ecology and Physiology.** Individual and group discussions of developments and techniques in forest ecology and physiology based on classic and current literature. Prerequisite: Consent of instructor. $\frac{1}{4}$ unit. May be repeated to a maximum of 1 unit.
431. **Plant Cell Metabolism.** Same as Agronomy, Biology, Horticulture, and Plant Pathology 431. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the biochemistry of mature seeds and metabolic processes occurring during seed germination and heterotrophic growth. Meets during the first half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
432. **Plant Cell Energetics.** Same as Agronomy, Biology, Horticulture, and Plant Pathology 432. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the energy coupling processes in plant cells (respiration, photosynthesis, photorespiration); and discusses current literature relating to mechanisms of electron transport, phosphorylation, and carbon fixation. Meets during the second half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
433. **Environmental Regulation of Plant Growth.** Same as Agronomy, Biology, Horticulture, and Plant Pathology 433. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns mechanisms of plant response to the environment, including ion uptake and transport, water relationships, gas exchange, and photosynthesis of whole plants. Meets during the first half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
434. **Regulation of Plant Development and Reproduction.** Same as Agronomy, Biology, Horticulture, and Plant Pathology 434. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the hormonal regulation of growth, development, and reproduction and the metabolism of seed and fruit formation. Meets during the second half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
440. **Design and Analysis of Biological Experiments.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Food Science, Horticulture, and Veterinary Medical Science 440. Statistical methods as tools for research; consideration of the

principles of designing experiments and methods of analysis for various kinds of designs, including factorial experiments, from the viewpoint of when and how to use them. Prerequisite: Forestry 340 or equivalent. $\frac{3}{4}$ unit.

- 460. Discussions in Forest Policy and Administration.** Individual and group discussions of the major relevant problems in the field of forest resources policy and administration (both public and private) based on current literature. Prerequisite: Consent of instructor. $\frac{1}{4}$ unit. May be repeated to a maximum of 1 unit.
- 499. Thesis Research.** Research may be conducted in various phases of forestry; subject must be approved by departmental committee. 0 to 3 units.

FRENCH

(See Humanities, School of)

GENERAL ENGINEERING

Head of Department: Professor J. S. Dobrovolny

Department Office: 117 Transportation Building, Urbana

- 103. Engineering Graphics, I.** Integrated course in engineering graphics for all students in the College of Engineering. Freehand sketching; theory of orthographic projection and the analysis and synthesis of theoretical and practical problems involving the size, shape, and/or relative positions of common geometrical magnitudes such as points, lines, planes, and other surfaces and solids; theory of pictorial projections; basic dimensioning; and basic charts and diagrams. Credit is not given for both General Engineering 103 and General Engineering 105. 3 hours.
- 104. Engineering Project Design Methodology.** An introductory course covering the methods, techniques, and practice of engineering project design. Individual and team effort design projects are carried out from the proposal, through the development, evaluation, and report phases. Emphasis is placed upon creativity, scheduling and planning, economic factors, and communication processes. Suitable for all students with an interest in engineering and engineering administration. Prerequisite: General Engineering 103 or equivalent, or consent of instructor. 3 hours.
- 105. Elements of Drawing.** Theory, techniques, terms, symbols, and conventional practices used in making various types of projection and nonprojection drawings with instruments and freehand. For students in the aircraft maintenance curriculum. Credit is not given for both General Engineering 105 and General Engineering 103. Prerequisite: High school plane geometry. 3 hours.
- 199. Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
- 220. History of Engineering.** Survey of the major contributions of the science and art of engineering from prehistory to the present; integrates the impact of engineering with the cultural aspects of the various periods. Prerequisite: Junior standing or consent of instructor. 3 hours.
- 221. Introduction to General Engineering Design.** Fundamental concepts involved in design problems and in production methods in construction; practice in cost analysis, planning, consideration of materials, and engineering computations involved in analysis of engineering design problems. Prerequisite: General Engineering 103 and 104, or credit or concurrent registration in Theoretical and Applied Mechanics 150. 3 hours.

222. **Analysis of Dynamic Systems.** Introduction to the operational techniques used in describing the behavior of dynamic systems; elements of modeling; equilibrium and linearization; Laplace transformation techniques; system response via the transfer function; block diagrams and computer simulation; matrix operations; system response via state variables; and stability. Prerequisite: Mathematics 345; concurrent registration in Computer Science 101. 3 hours.
232. **Engineering Analysis, II.** Study of stress conditions in various engineering materials and configurations as applied to the development of design criteria. Prerequisite: Theoretical and Applied Mechanics 221. 4 hours.
241. **Component Design.** Application of principles and methods of analysis to design of basic engineering components utilizing the common engineering materials. Prerequisite: General Engineering 232; Theoretical and Applied Mechanics 224. 4 hours.
242. **Project Design.** Design of various engineering projects emphasizing the synthesis of the subject matter covered in previous courses in basic sciences, engineering sciences, analysis, engineering economics, and component design. Prerequisite: General Engineering 241 and 288. 3 hours.
282. **Introduction to Patent Law.** Survey of the U.S. Patent System, including a brief history; requirements of patentability; patent procedures; employer-employee relations; trade secrets; infringement and remedies; copyrights; trademarks; unfair competition; and antitrust considerations. 2 hours.
288. **Economic Analysis for Engineering Decision Making.** Introduction to economic and operational analysis in the engineering decision-making process; mathematics of capital budgeting, mathematical programming, systems analysis, and the application of probability and simulation to decision making. Prerequisite: Junior standing or consent of instructor. 3 hours. Students may not receive credit for both Electrical Engineering 288 and General Engineering 288.
290. **Legal Aspects of Engineering Contracts and Specifications.** Same as Civil Engineering 290. Laws governing various engineering contracts; tort law and professional liability of engineers; workmen's compensation; property law; and business and technical clauses of specifications. Credit is not given for both General Engineering 290 and 292. Prerequisite: Senior standing in architecture or engineering, or consent of instructor. 3 hours.
291. **General Engineering Seminar.** Series of lectures and discussions by department faculty and visiting professional engineers on ethics, professional registration, the role of technical societies, and the relation of engineering to such disciplines as economics, sociology, and government. Prerequisite: Senior standing in general engineering. 0 credit.
292. **Engineering Law.** Nature and development of the legal system; legal relationships, rights and duties, and their importance in the engineering profession; and contracts, torts, agency, business transactions, and liability for defective products. Credit is not given for both General Engineering 290 or Civil Engineering 290 and General Engineering 292. Prerequisite: Senior standing in engineering or architecture, or consent of instructor. 3 hours.
293. **Special Problems.** Individual investigations or studies of any phase of general engineering selected by the students and approved by the department. Prerequisite: Junior standing; consent of instructor. 0 to 4 hours.
304. **Professional Expression.** Reading and critical study of significant authors from Plato to W. H. Whyte, selected for their contributions to intellectual breadth, imagination, and perfection of style. Original projects allow coordination with seminar and other content courses, and permit the mature student to gain any needed knowledge of reports, administrative correspondence, and articles for publication. Prerequisite: Advanced or graduate standing and consent of instructor. 3 or 4 hours, or 1 unit.
330. **Industrial Standardization.** Evolution and history of standardization; local, national, and international standardization; and emphasis on standardization procedures for individual industrial establishments. Prerequisite: Junior standing or consent of instructor. 2 hours or $\frac{1}{2}$ unit.

- 334. Introduction to Reliability Engineering.** Same as Industrial Engineering 334. Introduction to concepts in engineering design, testing, and management for highly reliable components and systems. Prerequisite: Industrial Engineering 238 or Mathematics 361, or equivalent with consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
- 348. The Air Pollution System.** Same as Agricultural Engineering, Civil Engineering, Environmental Studies, Geography, Mechanical Engineering, Urban and Regional Planning, and Veterinary Medical Science 348. Synthesis of current concepts on air pollution sources, meteorological dispersion, health effects, economic damage, and the political, legal, planning, and engineering implications for control and enforcement. In Part I, current concepts and applications utilizing recent information are presented. In Part II, implications are examined in small group discussions of several contemporary societal problems. Prerequisite: Senior or graduate standing. 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit. Consent of instructor is required for those students who wish to take this course for 1 hour or $\frac{1}{4}$ unit.
- 360. Engineering Applications of Meteorological Fundamentals.** Application of the fundamentals of meteorology to engineering problems including the transport and diffusion of particulate matter, aerosols, and gases; precipitation processes and rain-out; behavior of stack effluents; and explosion debris. Prerequisite: Physics 106 and 107; Mechanical Engineering 205 and 206, or 209, or Chemistry 342 and 344, or Physics 360; senior standing in engineering or physical science. 4 hours or 1 unit.
- 393. Special Problems.** Study of advanced problems related to general engineering. Prerequisite: Senior standing and consent of instructor. 1 to 4 hours, or $\frac{1}{4}$ to 1 unit.

GEOGRAPHY

Acting Head of Department: Professor J. D. Fellmann

Department Office: 220 Davenport Hall, Urbana

- 102. Atmospheric Environment.** Introduction to the processes responsible for the spatial variation of weather and climate with a survey of world climatic patterns. 4 hours.
- 103. Earth's Physical Systems.** Systems approach to the physical environment, including landform, soil, vegetation, and animal elements; man's role as an ecological dominant. 4 hours.
- 104. Geographic Perspectives on Human Behavior.** Individual and aggregate human spatial behavior: perception of environment, territoriality, behavior settings, prejudicial uses of space, spatial diffusion, migration, political fragmentation, and spatial patterns of social pathologies. 4 hours.
- 105. Introductory Economic Geography.** Geographic analysis of the distribution of various kinds of economic activity; an examination of the patterns resulting from man's exploitation of the world's resources; and emphasis placed on the principles governing the location of mineral, manufacturing, and commercial activities. 4 hours.
- 185. Introduction to Social Statistics.** Same as Sociology 185. First course in social statistics for students without mathematics beyond the high school level. Topics include the role of statistics in social science inquiry, measures of central tendency and dispersion, simple correlation techniques, contingency analysis, and introduction to statistical inference. Prerequisite: Sociology 100 or consent of instructor, or 6 hours in sociology, political science, anthropology, or geography. 3 hours.
- 198. Freshman Honors Seminar.** Through discussions and research projects, the seminar is designed to provide an in-depth understanding of topics in the field of systematic or regional geography which are selected for group study. Appropriate geographic methodology is emphasized. Prerequisite: James Scholar standing or other designation as a superior student. 3 hours.

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Interaction Between Man and Nature.** Interactions between man and the ecosystem through time and across cultures, and the spatial patterns evolving from these interactions. Prerequisite: Enrollment as a participant in three-year degree study. 3 or 6 hours.
210. **Contemporary Social and Environmental Problems.** Geographic perspectives on contemporary national and international problems. Topics vary each semester and include such themes as environmental quality, food production, urban problems, and particular social and political conflicts. 3 hours.
214. **Conservation of Natural Resources.** Survey of distribution of natural resources and major forms of utilization of these resources; emphasizes consequences of utilization systems which deplete or degrade resources and systems which conserve these resources with respect to future needs of human populations. 3 hours.
223. **Geography of Anglo-America.** Occupance patterns of the United States and Canada; regions of Anglo-America; and United States and Canada in world relations. 3 hours.
271. **Spatial Analysis.** An overview of the spatial analysis (nomothetic) approach to geographic research, both physical and human; includes discussion of the scientific method, with explanations and uses of analytic geographic concepts in studying real world problems. Prerequisite: A course in geography. 4 hours.
272. **Introductory Field Geography.** Application of fundamental geographical field techniques to field mapping; develops field mapping skills, permits practical application of geographical principles, and provides a basic understanding of field procedures; and an introduction to advanced field geography for the student who later seeks an advanced degree. 5 to 8 hours.
278. **Aerial Photointerpretation.** Same as Forestry 278. Introduction to the analysis and interpretation of aerial photographs; emphasizes applications to the inventory and management of natural resources and land use planning. 2 hours.
290. **Individual Study.** Supervised independent study of special topics or regions; required for students graduating with departmental distinction. Prerequisite: At least one formal course in the topic or region of interest; consent of instructor. 2 to 4 hours. May be repeated once for credit.
296. **Seminar on the Scope and Purpose of Geography.** The nature of geography; a brief history of the discipline, and an examination of its methodology, content and emerging trends. Strongly recommended for students planning graduate work in geography. 2 hours.
303. **Advanced Physical Geography.** Systematic analysis of the basic elements of physical geography and their interaction through time and surface expression, including the modifying effects of man. Complementary to Geology 301. Prerequisite: Consent of instructor. 4 hours or 1 unit.
304. **Soil Geomorphology.** Analysis and review of the principles of soils as applied to geomorphology, archaeology, and geography; one weekend and several one-day field trips. Prerequisite: Geography 103 or equivalent, or consent of instructor. 4 hours or 1 unit.
305. **Zoogeography.** Introduction to the principles of zoogeography; the central theme explains present distribution of animals, chiefly mammals. Prerequisite: Geography 102 and 103, Geology 102, or consent of instructor. 3 hours or 1 unit.
306. **Maps and Cartobibliographical Aids.** Examination of the problems involved in the acquisitions, care, and library use of maps. Classes become familiar with the major cartobibliographical and related aids. 2 hours or ½ unit.
312. **Atmospheric Ecology.** Elementary survey of the physical causes of climate as it is observed on all scales of time and space; the climate of the world seen as process; interactions of plants, animals, and humans with the atmosphere; and selected current topics on the atmosphere and general ecoseptematics. Prerequisite: Junior standing and consent of instructor. 3 hours or 1 unit.
313. **Climates of the Continents.** Regional treatment of the climates of the world by continents. Prerequisite: Geography 102 or consent of instructor. 3 hours or ¾ unit.

314. **Regional Problems in Resource Management.** Major problems of resource utilization examined in regions where problems are most acute; emphasizes interrelationships among resource management problems, environmental consequences of resource utilization, and the problems of public policy involved in resource management. 3 hours or $\frac{3}{4}$ unit.
315. **Physical Climatology.** A survey of the basic concepts of energy balance climatology and synoptic climatology, with emphasis on the microscale and the global scale; lectures supplemented by calculations and field observations examining the effects of location and surface characteristics on determination of climate. Prerequisite: Mathematics 112, Physics 101, and Geography 102 or 312; or consent of instructor. 3 hours or 1 unit.
318. **Bioclimatology.** A quantitative treatment of mass and energy exchanges between individual organisms and the atmospheric environment; implications for modifications of microenvironments, physiological and behavioral responses, population dynamics, and geographical distribution. Prerequisite: Physics 101 and a college-level introduction to plant, animal, or human physiology; or consent of instructor. 4 hours or 1 unit.
321. **Regional Concepts of Geography.** Theories of regionalism; nature of the geographic region; unique position of regionalism in a total geographic philosophy; and regionalism in applied geography. 2 hours or $\frac{1}{2}$ unit.
323. **Geography of the North American Midwest.** The core of the North American continent; detailed analysis of the functions and patterns of the Midlands and their external relations. 3 hours or $\frac{3}{4}$ unit.
325. **Historical Geography of North America.** Changing patterns of spatial organization in the United States and Canada, circa 1400 A.D. to 1870; focus on changing landscape patterns through time, perception of relict landscapes in the present day, and contemporary preservation of historic areas. 3 hours or 1 unit.
326. **American Landscapes.** Reviews the values and technologies which underlie the structuring of the American environment; emphasizes the changing meaning of urban, suburban, small town, rural, and wilderness places in American life; and discusses the social implications of the man-made habitat. 4 hours or 1 unit.
331. **Geography of Caribbean America.** Survey of the physical elements and occupancy sequences that distinguish the geographic regions of Mexico, Central America, Panama, and the West Indies. 3 hours or $\frac{3}{4}$ unit.
332. **Geography of South America.** Regional geography of South America with emphasis on the southern hemisphere of that continent. 3 hours or $\frac{3}{4}$ unit.
342. **Geography of Europe.** Analysis of the changing social, economic, and political geography of western Europe; special consideration to population changes and labor migrations and to planning problems in the underdeveloped regions and conurbations of the continent. 3 hours or $\frac{3}{4}$ unit.
348. **The Air Pollution System.** Same as Agricultural Engineering, Civil Engineering, Environmental Studies, General Engineering, Mechanical Engineering, Urban and Regional Planning, and Veterinary Medical Science 348. Synthesis of current concepts on air pollution sources, meteorological dispersion, health effects, economic damage, and the political, legal, planning, and engineering implications for control and enforcement. In Part I, current concepts and applications utilizing recent information are presented. In Part II, implications are examined in small group discussions of several contemporary societal problems. Prerequisite: Senior or graduate standing. 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit. Consent of instructor is required for those students who wish to take this course for 1 hour or $\frac{1}{4}$ unit.
353. **Geography of the U.S.S.R.** Physical and cultural regionalism; a survey of natural resources and patterns of human occupancy including industry, agriculture, and transportation. 3 hours or $\frac{3}{4}$ unit.
355. **Geography of Central and South Africa.** Regional geography of Africa south of the Sahara. 3 hours or $\frac{3}{4}$ unit.
357. **Geography of the Middle East and North Africa.** Regional geography of an area with limits largely defined in terms of Arab and Moslem influence or closely related cultural

- and historical circumstances; oriented around the strategic centrality of the core of the territory as the crossroads of Europe, Asia, and Africa. 3 hours or $\frac{3}{4}$ unit.
361. **Geography of Agricultural Land Utilization.** Geographic consideration of the nature of agricultural land utilization from the world, continental, and regional viewpoints; special emphasis on the geographical implications of various types of agricultural land use and upon the interrelationships between areas of different types of land utilization. 3 hours or $\frac{3}{4}$ unit.
362. **Geography of Manufacturing.** Analysis of factors bringing about geographical concentration of industry; description and analysis of each of the major manufacturing regions of the world in terms of the geographic conditions which have influenced its location and products. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
363. **Geography of Mineral Resources.** An examination of the spatial aspects of the production and use of mineral resources; concerns the adequacy of supply and the environmental and economic consequences of mineral use. 3 hours or $\frac{3}{4}$ unit.
365. **Transportation Systems and Spatial Development.** Descriptors of transportation systems; allocation models; transportation as an industrial activity and public good; and transportation and spatial development, including the role of transportation in developing countries and in urban and regional development and problems involved in measuring the impact of transport investment. 3 hours or $\frac{3}{4}$ unit.
366. **Location of Industry and Other Economic Activities.** Industrial site selection in theory and practice; examines the effect of factors such as materials, markets, labor, transportation, and environmental constraints on industrial location; and evaluates urban commercial patterns and factors affecting the location of commercial activities. 3 hours or $\frac{3}{4}$ unit.
370. **Introduction to Quantitative Methods in Geography.** Introduction to statistical, numerical, and mathematical techniques used in geographic research; introduction to computer usage in geographic research. Prerequisite: Geography 185, one year of college mathematics, or one course in statistics, or equivalent. 4 hours or 1 unit.
371. **Introduction to Research.** Introductory training in bibliographical and cartographic techniques as source materials of geographic research. Prerequisite: Geography major. 3 hours or $\frac{3}{4}$ unit.
373. **Map Compilation and Construction.** Instruction and practice in the basic techniques of map making followed by a consideration of problems involved in the construction of maps for presentation in a reproduced form (i.e., printed, photographed); the selection of proper source materials for the base and body of the map, the compilation and correlation of these materials, and methods of mechanical and photographic reproduction. 4 hours or 1 unit.
378. **Descriptive Interpretation of Remote Sensors.** Descriptive interpretation of remote-sensing images with emphasis on interpretation of aerial photography; applications of aerial photography and photographic interpretation to the solution of problems in the major field of the individual student. Two half-day field trips on Saturdays. 4 hours or 1 unit.
381. **Russian Culture History and Ethnology.** Same as Anthropology 381. Historical and structural analysis of the development of Russian culture, especially the peasant traditions, from Danubian to contemporary times. 3 hours, or $\frac{1}{2}$ or 1 unit.
382. **Siberian Culture History and Ethnology.** Same as Anthropology 382. Ecological analysis of historic and present-day Siberian cultures, with comparisons to arctic America. 3 hours, or $\frac{1}{2}$ or 1 unit.
383. **Urban Geography.** Distribution, functions, and internal structures of cities; a geographic analysis and classification of urban centers and their tributary areas. 3 hours or $\frac{3}{4}$ unit.
384. **Interaction in the Geographical Environment.** Human interaction in social and geographic spaces; introduction to interaction models in social geography and to mechanisms of information flow that underlie the human spatial interaction processes; and

detailed consideration of the social and spatial dimensions of individual action spaces and of theories of migration. 3 hours or 1 unit.

385. **Perception of the Geographical Environment.** Introduction to the study of environmental perception, especially the parameters of human spatial awareness; focus on proxemic behavior and human space needs, space searching and locational decisions, and symbolic value in landscape and place preferences. 3 hours or 1 unit.
386. **Political Geography.** Territorial behavior of nation-states; boundary conflicts and influences; regional voting patterns in the United States; malapportionment and gerrymandering; voting behavior of American minorities; and metropolitan fragmentation and spatial access to public services. 3 hours or $\frac{3}{4}$ unit.
403. **Physical Systems in Landform Analysis.** Same as Geology 403. A study of the phenomena of the physical landscape in terms of the basic principles of mechanics and systems theory. Prerequisite: Geography 303 or equivalent, or consent of instructor. 1 unit.
405. **Seminar in Physical Geography.** Advanced study of one of several topics that vary from semester to semester and include: (a) paleogeography; (b) climatic change; (c) landform and climate; (d) numerical analysis of landforms; (e) research philosophy of physical geography; (f) quaternary problems; (g) urban physical environments; (h) ecological aspects of climatic change; (i) contemporary problems in physical geography; (j) economic impacts of weather and weather forecasting; and (k) laboratory and field methods in soils geography. Prerequisite: Advanced course work in physical geography and consent of instructor. $\frac{1}{2}$ to 1 unit.
412. **Analytical Climatology.** Detailed consideration of the character and causes of the climates of certain selected areas; the application of various criteria as bases for climatic differentiation. Prerequisite: Geography 102; Geography 313 or equivalent; consent of instructor. 1 unit.
429. **The Evolution of Agricultural Economies.** Same as Agronomy 429 and Anthropology 429. Problems concerning the development of the several basic food crop economies are studied from the point of view of geographical environment, the available archaeological and ethnographic evidence, and agronomy and plant genetics; regional emphasis varies from year to year. Prerequisite: Consent of instructor. 1 unit.
463. **Historical Geography.** History and philosophy of historical research in geography. Research strategies for the analysis of individual and aggregate spatial behavior in the past, derived geographical patterns, changing spatial behaviors and patterns through time, and historical values underlying contemporary geographical decision making. 1 unit.
471. **Advanced Research Concepts.** Development of research strategies for geographic studies; examination of contemporary geographic theory from the standpoint of both application and policy-oriented research. Prerequisite: Geography 371. $\frac{1}{2}$ unit.
473. **Problems in Cartography.** Subjects for map presentation are selected in the student's field of specialization or area of interest. Data are collected and maps compiled and carried to completion in final drafted form suitable for publication. Prerequisite: Geography 373 or consent of instructor. 1 unit.
477. **Area Analysis.** Individual analysis of areas in the vicinity of Urbana. 1 unit.
478. **Advanced Field Geography.** Graduate course in the theory and application of geographical field techniques to the analysis of areas, culminating in individual reports on assigned problems in the field course area. Prerequisite: Graduate standing in geography. 1 $\frac{1}{4}$ to 2 units. Offered in the summer session only.
495. **Advanced Studies in Geography.** Seminar and directed individual investigation of selected problems or regions; designed to develop ability to conduct independent investigation. All students are required to register each semester in section Z (the departmental colloquium) for 0 units in addition to other 495 work which may be selected. 0 to 2 units. Scheduled seminars and staff interests and availabilities are detailed in each semester's *Timetable*.
497. **Development of Geographic Thought.** Consideration of the various philosophies of geography and of the people who reflect them. $\frac{1}{2}$ unit.

499. **Thesis Research.** 0 to 4 units.

GEOLOGY

Head of Department: Professor F. A. Donath

Department Office: 249 Natural History Building, Urbana

101. **An Introduction to the Study of the Earth.** For nonscience students; integrates all aspects of geological science into a unified theory of the evolution and continuing dynamic behavior of the earth. No more than 8 hours of credit may be received for Geology 101, 102, 107, and 108. Students may not receive credit for Geology 101 and Geology/Liberal Arts and Sciences 143. 4 hours.
102. **History of the Earth.** For nonconcentrators in geology; history of the earth from the physical and biological points of view; and methods of determining earth history. One-day field trip may be required. No more than 8 hours of credit may be received for Geology 101, 102, 107, and 108. Students may not receive credit for both Geology 102 and 103. 4 hours.
103. **History of Life.** For nonconcentrators in geology; a survey of the diversity of organisms which have populated the earth, their origin, sequence in time, ecology, and the principles used in studying them. Students may not receive credit for Geology 103, and Geology 102 or 108. Prerequisite: Geology 101. 2 hours.
104. **Geology and Society.** For nonconcentrators in geology; considers aspects of geology of most significance to man and society, such as energy and natural resources, dynamic processes, geologic hazards, land use planning, and environmental concerns. Students may not receive credit for Geology 104, and Geology 107, Geology 108, or Geology/Liberal Arts and Sciences 143. Prerequisite: Geology 101 or 102. 2 hours.
105. **Geology of Energy.** Geological factors governing or affecting the occurrence, exploitation, and utilization of fossil fuels, nuclear energy, wind and water power, tidal energy, and exotic energy sources; methods, magnitude, and reliability of resource estimates. Prerequisite: Geology 101, 102, or 107, or Geology/Liberal Arts and Sciences 142 or 143. 2 hours.
106. **Exploring the Earth.** Selected examples of the application of geology to the exploration for oil and other mineral resources; intended primarily for nonscience students. Prerequisite: Geology 101 or 102. 2 hours.
107. **General Geology.** Primarily for science and science-oriented students; concerns the physical, chemical, and biological evolution of the earth. No more than 8 hours of credit may be received for Geology 101, 102, 107, and 108. Students may not receive credit for Geology 107 and Geology 104 or Geology/Liberal Arts and Sciences 143. 4 hours.
108. **General Geology.** Continuation of Geology 107; primarily for science and science-oriented students. Field trip required. No more than 8 hours of credit may be received for Geology 101, 102, 107, and 108. Students may not receive credit for Geology 108 and 103 or 104. Prerequisite: Geology 107 or consent of instructor. 4 hours.
115. **Regional Field Study.** Field observations in a region of diverse geology. One- to two-week field trip. Credit is given only on completion of a satisfactory written report. Prerequisite: Geology 101, 102, 107, 142, or 250. 2 hours.
142. **Physical Science in Modern Society.** Same as Liberal Arts and Sciences 142. Physical science for nonscience majors; emphasizes the basic chemical and physical aspects of the earth's environmental systems and the impact of modern technology on these systems. 3 hours.
143. **Environmental Physical Science.** Same as Liberal Arts and Sciences 143. Physical science for nonscience majors; emphasizes earth processes and resources relevant to mod-

ern society, including the availability and by-products of utilization of energy and water resources and the limitations imposed by earth processes on society. Students may not receive credit for Geology/Liberal Arts and Sciences 143, and Geology 101 or 104. 3 hours.

170. **Introduction to Oceanography.** Introduction to the physical, chemical, geological, and biological study of the oceans and the sea floor; intended for nonscience majors. Prerequisite: Geology 101 or 102, Geology/Liberal Arts and Sciences 142 or 143, or consent of instructor. 2 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
215. **Field Geology.** Field course to be conducted from a suitable geologic locality; introduction to field techniques, geologic mapping, and field training in stratigraphy, structure, and geomorphology. Prerequisite: Geology 108 or consent of instructor. 8 hours. Offered in the summer session only.
222. **Paleontology and Stratigraphy.** Systematic study of fossils, their classification and morphology, and general principles of stratigraphy. Students may not receive credit for both Geology 222 and 320. Prerequisite: Geology 102 or 108. 4 hours.
233. **Minerals and Rocks.** Systematic study of minerals and rocks with emphasis on their nature as crystalline materials, their occurrence and geologic relationships, and their economic significance. Field trip required. Prerequisite: Chemistry 101 or Geology 102 or 108, or consent of instructor. 4 hours.
250. **Geology for Engineers.** Physical geology with an emphasis on those aspects of the natural environment which are of importance to the engineer. Prerequisite: Theoretical and Applied Mechanics 150 or 152; sophomore standing in the College of Engineering. 3 hours.
290. **Individual Study.** Research and individual study. Students desiring honors designation for Geology 290 should complete an Honors Credit Learning Agreement with their supervising faculty member. Prerequisite: Consent of supervising faculty member. 2 to 4 hours. A maximum of 8 hours may be counted toward graduation.
292. **Senior Thesis.** Research, with thesis; a thesis must be presented for credit to be received. Students desiring honors designation for Geology 292 should complete an Honors Credit Learning Agreement with their supervising faculty member. Prerequisite: Consent of supervising faculty member. 2 to 8 hours. A maximum of 10 hours may be counted toward graduation.
301. **Geomorphology.** History, origin, and characteristics of land forms produced by fluvial, glacial, wind, and wave erosion or by a combination of these acting upon the major kinds of geologic materials and structures. Lectures, laboratory, and field trips. Prerequisite: Geology 108 or consent of instructor. 4 hours or 1 unit.
303. **History of Geology.** Development of the fundamental concepts of the geological sciences from classical to modern times. Prerequisite: Geology 108 or consent of instructor. 4 hours or 1 unit.
309. **Sedimentology.** Introduction to principles of sediment erosion, transport, and deposition; origin of sediment texture, sedimentary structures, sedimentary sequences, sediment mineralogy, and diagenesis; and sediment deposition in fluvial, deltaic, deep water, tidal flat, continental shelf, and beach and barrier island environments. Prerequisite: Geology 108 or consent of instructor. 2 hours or ½ unit.
310. **Field and Laboratory Procedures in Sedimentology.** Introduction to the field and laboratory study of Holocene sediments and sedimentary rocks, with emphasis on field sampling, sieve-size analysis, peel making of unconsolidated sediments and sedimentary rocks, x-ray radiography, disaggregation of sediments, heavy mineral analysis, mineral identification by staining, pH-Eh determinations, and thin-section preparation. Required field work. Must be taken concurrently with Geology 309. Prerequisite: Geology 108 or consent of instructor. 1 hour or ¼ unit.
311. **Structural Geology.** Rock deformation and its results. Lectures, laboratory, and required field trip. Prerequisite: Geology 108 or consent of instructor. 4 hours or 1 unit.

315. **Advanced Field Methods.** Mapping a structurally and/or stratigraphically significant area of moderate size and difficulty; preparation of a report. Prerequisite: Geology 215. 2 to 8 hours, or $\frac{1}{2}$ to 2 units.
320. **Invertebrate Paleontology.** Fossil groups in the biological sequence. Lectures, laboratory, and required field trip. Students may not receive credit for both Geology 320 and 222. Prerequisite: Geology 108 or consent of instructor. 4 hours or 1 unit.
321. **Principles of Stratigraphy.** Definition of stratigraphic units, correlation, facies, paleogeography, and historical inference; techniques of physical stratigraphy; and required field trips. Prerequisite: Geology 108 or consent of instructor. 4 hours or 1 unit.
325. **Paleobotany.** Same as Botany 325. Structure, phylogeny, and geological distribution of representative fossil plants. Two or three field trips. Prerequisite: Botany 100, or Biology 100 and 101; Geology 101 or 107; or consent of instructor. 5 hours or 1 unit.
328. **Introductory Micropaleontology.** Morphology, classification, biology, and ecologic-stratigraphic distribution of major microfossil groups of the Cenozoic, Mesozoic, and Paleozoic; applications to biostratigraphic and paleoecologic problems. Prerequisite: Geology 320 or consent of instructor. 4 hours or 1 unit.
332. **Mineralogy-Petrology.** Introduction to the structure, chemistry, and stability of the major silicate minerals and their occurrence in rocks; required field trip. Prerequisite: Geology 108 or consent of instructor; Chemistry 102 or 108. 4 hours or 1 unit.
335. **Optical Mineralogy.** Study of crystalline matter, especially minerals, by polarized light microscopy and powder x-ray diffractometry. Prerequisite: Geology 332. 4 hours or 1 unit.
336. **Igneous and Metamorphic Petrography.** Study of the constituents, composition, texture, structures, and classification of igneous and metamorphic rocks; laboratory study of rocks in hand specimen and thin section. Prerequisite: Geology 335. 4 hours or 1 unit.
338. **Introduction to Sedimentary Petrography.** Introduction to the microscopic study of sedimentary rocks in thin section with emphasis on their textural properties as a basis for their classification and environmental interpretation. Prerequisite: Geology 335. 2 hours or $\frac{1}{2}$ unit.
350. **Theoretical Geophysics.** Introduction to the major fields of theoretical geophysics: figure of the earth, thermodynamics of the earth, gravity, seismology, magnetism, and planetary geophysics. Prerequisite: Mathematics through calculus; one year of physics; Geology 311; consent of instructor. 4 hours or 1 unit.
351. **Geophysical Prospecting.** Same as Mining Engineering 351. Principles of geophysics and their application to mining processes. Prerequisite: Senior standing in engineering or geology, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
357. **Glacial and Pleistocene Geology.** Consideration of glacial flow, erosion, and deposition; stratigraphic analysis of glacial deposits and correlation of Pleistocene glacial successions with nonglacial sediments; and field trip and required field work. Prerequisite: Consent of instructor. 4 hours or 1 unit.
360. **Chemistry of the Earth.** Fundamental chemical and physical concepts applied to earth surface processes, the history of the earth as a chemical system, and the relation of the earth to the solar system and the universe. Background in both physical chemistry and geology would be helpful. Prerequisite: Consent of instructor. 4 hours or 1 unit.
370. **Oceanography.** Principles of biological, chemical, geological, and physical marine science. Prerequisite: Botany 100; Chemistry 101, Geology 101 or 107, and Physics 101; or consent of instructor. 4 hours or 1 unit.
403. **Physical Systems in Landform Analysis.** Same as Geography 403. A study of the phenomena of the physical landscape in terms of the basic principles of mechanics and systems theory. Prerequisite: Geography 303 or equivalent, or consent of instructor. 1 unit.
415. **Regional Field Geology.** Field study of critical localities within a geologic province during a period of two or three weeks; discussion of observations and preparation of reports in which the concepts and principles mastered in graduate study are applied to regional geologic synthesis. Prerequisite: Consent of instructor. 1 unit.

420. **Paleoecology.** Interpretation of life habit of fossil organisms from skeletal morphology and associated depositional features; reconstruction of marine ecosystem relationships from the study of assemblages of fossils. Prerequisite: Geology 320 or equivalent. 1 unit.
421. **Advanced Invertebrate Paleontology.** Intensive study of a selected invertebrate group. Prerequisite: Geology 320 or Zoology 320. 1 unit. May be repeated for credit.
422. **Advanced Stratigraphic Geology.** The concept of the Phanerozoic eras, periods, stages, and zones; evaluation of the type sequences and the succession of faunas; and problems of correlation and historical inference. Prerequisite: Consent of instructor. 1 unit.
428. **Advanced Micropaleontology.** Detailed study of the morphology, biology, and distribution in time and space of a major microfossil group, most commonly conodonts, ostracods, benthic foraminifers, or calcareous plankton; emphasizes biostratigraphic or paleoecologic applications. Prerequisite: Geology 328 or 320, Zoology 320, or equivalent; or consent of instructor. 1 unit. May be repeated to a maximum of 3 units.
431. **Structural Mineralogy.** Principles of the crystal chemistry and structural classification of minerals; survey of the current knowledge about the structures and structurally dependent properties and behavior of representative minerals and mineral groups. Prerequisite: Consent of instructor. 1 unit.
432. **Sedimentary Geochemistry.** Equilibrium assemblages among the principal organic and inorganic sedimentary solids and their associated liquids during weathering, deposition, and diagenesis; kinetics and mechanism of phase changes; and transport processes during diagenesis. Prerequisite: Geology 360 or equivalent, or consent of instructor; some background in physical chemistry desirable. 1 unit.
434. **Theoretical Petrology.** Use of thermodynamic and kinetic arguments in the solution of basic petrological problems. Prerequisite: Consent of instructor. 1 unit.
435. **Igneous and Metamorphic Petrology.** Application of chemistry and physics to the study of crystalline rocks, with emphasis on the integration of theory with field and laboratory observations; topics selected on the basis of student interest and training. Prerequisite: Geology 336. 1 unit. May be repeated for credit.
437. **Sedimentary Processes.** Application of fluid mechanics to quantitative analysis of erosion, transport, and deposition by open channel flow, waves, tidal currents, longshore currents, turbidity currents, wind, and ice; quantitative determination of origin of physical sedimentary parameters and sedimentary mineralogy; and processes of weathering and diagenesis. Field trip required. Prerequisite: Geology 335 or equivalent, or consent of instructor. 1 unit.
438. **Sedimentary Petrography.** Microscopic study of sedimentary rocks in thin section with emphasis on textures and structures as a basis for their detailed classification and genetic interpretation. Prerequisite: Geology 335 and 437. 1 unit.
443. **Mineral Deposits.** Principles of mineral deposition and genesis of mineral deposits; required field trip. Prerequisite: Geology 311. 1 unit.
450. **Principles of Engineering Geology.** Study of the effects that lithology, weathering, joints, faults, and ground water have upon engineering projects. The origin, exploration, description, analysis, and significance of geologic factors are studied and illustrated with case histories. A required field trip is an integral part of the course. Prerequisite: Geology 250 or equivalent, or consent of instructor. 1 unit.
451. **Practice of Engineering Geology.** Study of current and past case histories that illustrate the applications of the principles of engineering geology; includes studies where lithology, weathering, joints, faults, and ground water have influenced the exploration, design, construction, and maintenance phases of engineering projects. A required field trip to visit engineering construction projects is an integral part of the course. Prerequisite: Geology 450 and Civil Engineering 383, or consent of instructor. 1 unit.
455. **Hydrogeology.** Geology of the occurrence, storage, movement, and quality of water in the rocks of the earth's crust. Prerequisite: Consent of instructor. 1 unit.
461. **Mineralogy of Clays.** Same as Ceramic Engineering 461. Composition of various types of clays; the structure and properties of the clay minerals; and the origin and mode of

- occurrence of the clay minerals and clay materials. Field trip required. Prerequisite: Geology 336 or equivalent; consent of instructor. 1 unit.
462. **Mineralogy of Clays.** Same as Ceramic Engineering 462. Properties of clay materials, their relation to the structure of the clay minerals, and methods of determination and control; the utilization of clays in various arts and industries; and required field trip. Prerequisite: Geology 461. 1 unit.
471. **Submarine Geology.** General geology of the ocean basins and continental margins, with emphasis on the geological interpretation of marine geophysical investigations. Prerequisite: One year of physics or consent of instructor. 1 unit.
477. **Recent Sedimentary Environments.** Review of sedimentary processes, physical sedimentary parameters, and sedimentary mineralogy in fluvial, lake, dune, beach, barrier island, bar, deltaic, tidal flat, lagoonal, bay, marsh, continental shelf, continental margin, submarine fan, submarine canyon, and deep ocean floor environments; sedimentological aspects of land usage, and conservation and preservation of man's environment. Prerequisite: Geology 437 or consent of instructor. 1 unit.
479. **Mathematical Geology.** Analysis of the geologic assumptions necessary to fulfill mathematical requirements in numerical analysis of geologic problems. Prerequisite: Mathematics 161 or Agronomy 340; Computer Science 101; consent of instructor. 1 unit.
480. **Mathematical Methods in Geology.** Introduction to and application of the mathematical topics utilized in the geological sciences. Prerequisite: Mathematics 135 and 145, or equivalent. 1 unit.
481. **Transport Processes in Geology.** Introduction to the basic concepts of energy, mass, and momentum transport and their application to problems in the geological sciences. Prerequisite: Geology 480 or consent of instructor. 1 unit.
488. **Advanced Structural Geology.** Analysis of geologic deformation based upon the principles of mechanics and utilizing research data from laboratory and field investigations; methods in structural analysis. Prerequisite: Geology 311 or consent of instructor. 1 unit.
489. **Geotectonics.** Nature and distribution of major earth structures and geological and geophysical evidence bearing on their origin. Prerequisite: Geology 311 or consent of instructor. 1 unit.
493. **Advanced Studies in Geology.** $\frac{1}{4}$ to 2 units. Work may be taken in the following fields: (a) clay mineralogy; (b) engineering geology; (c) geomorphology and glacial geology; (d) general geology; (e) ground-water geology; (f) micropaleontology; (g) mineral deposits; (h) mineralogy and crystallography; (i) paleontology; (j) geochemistry; (k) geophysics; (l) petrography and petrology; (m) sedimentology; (n) stratigraphy; (o) oceanography; (p) submarine geology; (q) structural geology and geotectonics; and (r) mathematical geology.
499. **Thesis Research.** Individual work under supervision of members of the staff in their respective fields. 0 to 4 units.

HEALTH AND SAFETY EDUCATION

Head of Department: Professor W. H. Creswell, Jr.

Department Office: 121 Huff Gymnasium, Champaign

Health Education

110. **Public Health.** Basic principles of group living including epidemiology studies; scientific methods as applied to environmental health in urban and rural areas; and specialized programs. Field trips. Prerequisite: Two hours credit in health education or sophomore standing. 2 hours.
150. **Health and Modern Life.** Dynamics of health in modern life in a rapidly changing world; modern concepts of health, disease, and longevity; current health problems, issues, and trends; scientific health facts, principles, and theories related to personal, family, and community health; and health and longevity progress in the United States. Designed primarily as a professional course for prospective health and safety educators, coaches, physical educators, and recreation workers. Prerequisite: Consent of instructor. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Mental Health.** Introduction to the science of mental health and illness including personality development, the genesis and manifestations of mental illness, and the maintenance of mental health; taught by a psychiatrist with emphasis on the preventive and medical aspects of mental health. 2 hours.
206. **Sex Education and Family Life.** Offered to persons who are interested in becoming more critical and obtaining a larger perspective in their understanding of the problems of sex and family life. Prerequisite: Junior standing or consent of instructor. 2 hours.
216. **Medical Terminology Correlated with Community Health Problems.** A preprofessional course for those entering the occupational therapy curriculum, medical journalism, and paramedical fields. Occupational therapy students are given priority the fall semester. Prerequisite: Junior standing; enrollment in the occupational therapy curriculum. 3 hours.
233. **Observation and Participation in School Health and Safety Education.** Prerequisite: Health Education 150 and sophomore standing. 3 hours.
236. **Tomorrow's Environment.** Same as Environmental Studies 236. Introduction to the environmental problems of a finite world; temporal perspective on impacts on the nat-

ural ecosystem and the resulting limits on growth; and projections of environmental conditions based upon understanding relevant natural systems and human impacts under alternative management strategies. Prerequisite: One course in the life sciences and one course in the social sciences, or consent of instructor. 3 hours.

241. **Techniques of Teaching in the Secondary Schools.** Same as Secondary Education 241. Methods of teaching specific subject matter fields in the secondary school; special sections provided in the usual high school subjects. Prerequisite: History and Philosophy of Education 201; Secondary Education 240; concurrent registration in Educational Practice 242; consent of instructor. This course meets only during the first eight weeks of the semester. 3 to 5 hours.
250. **Special Problems.** Special projects in research and independent investigation in any phase of health, physical education, recreation, and related areas selected by the students. Prerequisite: Junior or senior standing; grade-point average of 3.5; consent of faculty adviser and instructor, and approval of the head of department. 2 or 3 hours. May be repeated for a total of 4 or 6 hours.
260. **Honors Seminar.** Same as Physical Education 290, and Leisure Studies 260. Lectures and discussions dealing with issues in physical education, dance, health education, recreation education, and related fields. Prerequisite: James Scholar or grade-point average of 4.0 the preceding semester; consent of faculty adviser, instructor, and head of department. 2 hours. May be repeated for a total of 6 hours.
281. **First Aid.** American Red Cross standard course in first aid. 2 hours.
282. **Organization of School Health Programs.** Developing school health programs, including health service, healthful school living, and health instruction based on the needs and problems of school children. 3 hours.
283. **Man and His Diseases.** Ecologic, including cultural, factors affecting disease in man; changing concepts of disease; epidemiology of communicable and noncommunicable diseases; and disease prevention and control. Designed primarily for prospective health teachers in the high schools and colleges and public health educators. Prerequisite: Health Education 110 and 150; Physiology 103. 2 hours.
285. **Sex Education for Teachers.** Theory and practice of family life and sex education. Includes basic issues, philosophy, and guiding principles; state laws and their implementation; needs, justification, and objectives; curriculum in human sexuality; content knowledge, microteaching and evaluation stressing classroom techniques appropriate to sex education at various levels K-12; resource materials and their use in the classroom; and coverage of controversial topics. Prerequisite: Junior standing. 4 hours.
288. **Curriculum Development and Evaluation in Health Education.** The application of principles of planning for and managing the health education classroom through the exploration of decision making and valuing strategies; includes planning for effective health instruction and evaluating the school health program. Prerequisite: Health Education 282. 3 hours.
289. **Public Health Field Work.** Supervised field experiences in official, voluntary, and professional health agencies; designed to give students in community health work experience in actual field situations. During the junior or senior year, students work for one semester in University-approved health agencies for a minimum of sixty hours of field work. Prerequisite: Junior standing in community health education. 2 hours.
303. **Delivery of Health Care: Problems and Perspectives.** Same as Social Work 303. The wide range of factors--ecological, social, cultural, medical, organizational, economic, and political--which influence health care in a complex nation like the United States; attention to perspectives from various fields of study. Prerequisite: Junior standing and consent of instructor. 3 hours or 1 unit.
345. **Family Planning and Population Policy.** Same as Social Work and Sociology 345. Background information for professionals involved in the field of family planning; includes historical and current trends in developing and developed nations, with emphasis on the United States; and examines family planning and population policies, and

- programs and contraceptive methods as related to service delivery and to professional roles. Prerequisite: Consent of instructor. 3 hours or 1 unit.
374. **General Epidemiology.** Same as Environmental Studies, Medical Sciences, Veterinary Medical Science, and Veterinary Pathology and Hygiene 374. The epidemiology and natural history of infectious and noninfectious diseases, including integrated vector control and host resistance, and mental health and public health. Prerequisite: Microbiology 326, Veterinary Medical Science 332, or equivalent, or consent of instructor. 4 hours or 1 unit.
390. **Public Health Education.** Theory and practice of community health education; adult health education through media such as radio, television, films, slides, posters, pamphlets, and newspapers; projects in preparing and using public health education materials; and evaluation of research in public health education. Prerequisite: Senior or graduate standing in health education, or consent of instructor. 3 hours or ½ unit.
391. **Health Data Analysis.** Introduction to public health statistics including collection and classification of data; rates and other indices; measures of central tendency and dispersion; tests of significance; and use of vital statistics in planning, conducting, and evaluating public and school health education programs. Prerequisite: Mathematics 161 or Educational Psychology 390, or equivalent. 2 hours or ½ unit.
392. **Health and Safety Education in the Elementary School.** Overview of the school health program to acquaint the teacher with modern concepts of health and safety education in the elementary school; consideration of the role of the classroom teacher in understanding and meeting the health needs of children; and focus on the legal requirements for Illinois schools, major health and safety problems of elementary children, the teacher's role in the school health program, and methods and materials in teaching modern health and safety education. Prerequisite: One year of biological science. 3 hours or ½ unit.
393. **Drug Abuse Education.** Psychosocial, pharmacological, and legal aspects of drug use and abuse; school and community responses to drug abuse; and the development of appropriate curricula, materials, and teaching strategies for combatting drug use and abuse. Prerequisite: Six hours of health education or consent of instructor. 2 hours or ½ unit.
400. **Scientific Foundations of Health Education.** Designed to reinforce and extend the student's knowledge of pertinent scientific health facts and principles as these apply to further improvement of personal, family, and community health. Prerequisite: Undergraduate courses beyond the elementary level in the biological and physical sciences and in health education. ½ or 1 unit.
401. **Problems in School Health Education.** History, philosophy, principles, and practices of school health education in its three main phases: health service, healthful school environment, and health instruction, including evaluation. ½ or 1 unit.
403. **Problems in Public Health.** Basic facts and principles of public health at the local, state, and national levels, including the relationships between public health departments, voluntary health agencies, and the school health program. ½ or 1 unit.
404. **Trends and Issues in Sex Education.** Critical analysis of current trends and basic issues of sex education; study of present status of sex education in the United States and selected foreign countries; and a critical analysis of philosophy, principles, methods, and current problems in sex education. Prerequisite: Undergraduate courses beyond the elementary level in the biological and social sciences, Health Education 285 or equivalent, or consent of instructor. ½ or 1 unit.
405. **School Health Administration.** Study of the principles of administrative theory in school health programs; includes extensive use of case and critical incident materials. 4 hours or 1 unit.
490. **Seminar.** Student presentation of thesis reports in health and safety education; informal discussions, lectures, and critical analysis of current problems in health and safety education. Prerequisite: Health Education 495. 0 credit.

493. **Special Projects.** Independent research on special projects. Prerequisite: Educational Psychology 390, Physical Education 495, and Health Education 400 or equivalent. $\frac{1}{2}$ to 2 units. May be repeated to a maximum of 2 units.
494. **Special Topics in Health Education.** Lectures on topics of current interest. $\frac{1}{2}$ or 1 unit.
495. **Research Methods in Health and Safety Education.** Special emphasis on research orientation and methods; experimental design; processing and analysis of data; selection of research problems and preparation of thesis; and current research literature in health and safety education. Prerequisite: Educational Psychology 390 or equivalent. $\frac{1}{2}$ or 1 unit.
499. **Thesis Research.** Preparation of theses in health and safety education. Prerequisite: Health Education 495. 0 to 4 units.

Safety Education

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
280. **Safety Education.** Understanding and appreciating the place of safety in modern life; the teaching of safety in the elementary and secondary schools; need for psychological considerations; planning and methods of teaching; safe school environment and liability; materials; safety education for elementary and secondary schools; a safety program for areas outside the school; human experience; and testing and evaluating. 3 hours.
284. **Driver Education.** Cause and extent of highway accidents; laws and regulations; method of instructing high school students in the proper attitudes, habits, and skill in driving; demonstrations and practice in the use of a dual control car; and psychophysical testing equipment. Prerequisite: Up-to-date driver's license; junior standing; proficiency in driving automatic and standard transmission vehicles. 3 hours.
289. **Safety Education Field Work.** Supervised field experiences in official, voluntary, and professional safety agencies; designed to give students in public safety education work experience in actual field situations. During the junior or senior year or during the summer, students work for one semester in University-approved safety agencies for a minimum of sixty hours of field work. Prerequisite: Senior standing in public safety education. 0 credit.
294. **Advanced Traffic Safety Education.** Designed to provide advanced preparation in principles and practices of driver and traffic safety education for teachers, supervisors, and administrators; includes a study of the relationship of psychology, sociology, and engineering to driver education and traffic safety; modern methods and materials; traffic legislation and enforcement; laboratory work with various psychophysical tests; and a critical consideration of current research findings. Field trip and two hours per week laboratory to be arranged. Prerequisite: Safety Education 284 or consent of instructor. 3 hours.
384. **Simulated Teaching Systems for Traffic Safety.** Development of conceptual foundations and the acquisition of skills in the use of multimedia teaching; includes laboratory experiences in the use of multiple-care driving facilities, simulated driving systems, and electronic classroom systems; analysis and review of the traffic safety education problem and its relationship to multimedia instruction programs; role of multimedia instruction in traffic safety; analysis and review of multimedia instruction techniques; use of multimedia in the teaching-learning process; research and analysis of research in the use of driving simulators and multiple-care driving range instruction; and development of conceptual foundations and acquisition of skills in the use of multimedia facilities. Prerequisite: Safety Education 284. 3 hours, or $\frac{1}{2}$ to 1 unit.
394. **Special Topics.** Lecture and laboratory experiences of current interests and issues; specific subject matter will be announced in the *Timetable*. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit. May be repeated to a maximum of 8 hours or 2 units.
402. **Problems in Safety Education.** Philosophy of safety; traffic, recreation, home, and industrial safety facts and figures; the safety problem and its relation to education; orga-

nization of safety education programs; methods of teaching; legal aspects; and research problems. $\frac{1}{2}$ or 1 unit.

494. **Special Topics in Safety.** Lectures on topics of current interest. $\frac{1}{2}$ or 1 unit.

HOME ECONOMICS

Director of School of Human Resources and Family Studies: Professor P. C. Paul
School Office: 260 Bevier Hall, Urbana

105. **Introduction to Human Development.** Systematic overview of the biological, psychological, familial, and cultural factors related to human growth and development throughout the life cycle. 3 hours.
106. **Observation and Analysis of Behavior.** Developmental criteria applied to observation data; inclusion of natural and laboratory settings to give students skill in recording and interpreting human behavior with emphasis on the child. Prerequisite: Credit or concurrent registration in Home Economics 105. 3 hours.
120. **Contemporary Nutrition.** Fundamental principles of human nutrition and their application to the selection of adequate diets; current topics of nutritional importance; for non-home economics majors. Prerequisite: Sophomore standing. 3 hours. No credit to home economics concentrators except by special approval.
125. **Food Selection and Preparation.** Elementary study of foods in relation to market selection, preparation methods, and standards; comparative costs and food values; and principles of meal planning. For non-home economics majors. Prerequisite: Sophomore standing. 3 hours.
132. **Foods and Nutrition.** An introductory course in foods and nutrition emphasizing the relationship of nutritional principles to food choices and food preparation techniques. Students may not receive credit for Home Economics 132, and Home Economics 120 or

125. Prerequisite: Chemistry 100 or placement by examination in Chemistry 101. 3 hours.
133. **Food Management.** Study of factors involved in management of food for the family; food costs and buying; and meal planning and service. Prerequisite: Home Economics 132. 2 hours.
143. **Biological Bases of Human Behavior.** Same as Anthropology, Psychology, and Zoology 143. Critical consideration of data and information bearing on current controversies and ideas concerning the antecedents of selected aspects of human behavior; topics include communication, social organization, and parental, sexual, and aggressive behavior. 3 hours.
160. **The Home and Its Furnishings.** Design fundamentals involved in the development and selection of family housing to meet human needs; consideration of the aesthetic, social, economic, and functional aspects of residential environment. 4 hours.
171. **Home Management.** Principles of management related to the resources of the student and of the family; emphasis on the use of time, energy, and money. 2 hours.
182. **Clothing Laboratory: Basic Construction.** Fundamental principles of clothing construction; developmental work with pattern, fabric, and equipment as related to fit, design, fabric, and garment assembly. For students with little or no formal experience in clothing construction. 2 hours.
183. **Consumer Textiles.** Analysis of textile products as a basis for consumer choice. 2 hours.
184. **Apparel Design and Selection.** Theory and practice in applying art principles and symbolism in dress to design and selection of apparel. Prerequisite: Art 185 or consent of instructor. 2 hours.
186. **Clothing Laboratory: Tailoring.** Comparisons of tailoring techniques in the construction of garments; comparison of standard construction and tailoring techniques appropriate to design and fabric. Prerequisite: Home Economics 182, or 4-H, or high school clothing construction course, or consent of instructor. 2 hours.
194. **Primary Structures in Weaving.** Exploration of basic elements in weaving and related processes; focus on primitive, traditional, and experimental methods of forming cloth. Prerequisite: Art 119 or 185, or equivalent. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
202. **Laboratory in Child Development.** Planning for educational experience in various preschool settings and at home; techniques of teaching and guiding the young child derived from developmental and educational research; and direct contact experience with young children in selected environments. Prerequisite: Home Economics 105, and Psychology 100 or 103. 3 or 4 hours.
203. **Child Development: Period of Infancy and Early Childhood.** Study of the growth and development of young children; their biological and psychological needs and the environmental influences affecting their development and relationships with others; gives an understanding of the developmental sequences and the basic principles of child care and training. Prerequisite: Home Economics 105 or Psychology 216. 4 hours.
204. **Motor Development in Childhood.** Same as Physical Education 262. Study of the selection of specific movement experiences for the elicitation and maintenance of developmental sequences in children and youths based on physical growth and motor development; observational experiences provided with children in a variety of settings. Prerequisite: Physical Education 250 or Home Economics 105. 3 hours.
210. **Family Relationships.** Same as Anthropology 210. Survey of trends in family structure, functions, roles, and values; evaluation of anthropological, psychological, and sociological findings relevant to family life; and examination of selected family adjustment problems. 3 hours.
220. **Principles of Nutrition.** Nutritive value of foods and metabolism of essential nutrients; application of principles of nutrition to the requirements of normal individuals throughout the life cycle. Prerequisite: Chemistry 102; Home Economics 132; Physiology 103. 3 hours.

231. **Foods.** Composition and behavior of foods; application of chemistry and other physical sciences to principles of food preparation. Prerequisite: Chemistry 102; Home Economics 133. 3 hours.
240. **Quantity Food Production and Service.** Application of the principles of food preparation and service to institutional and commercial feeding. Prerequisite: Food handlers certificate; Economics 101; Home Economics 231; consent of instructor. 2 to 5 hours.
260. **Interiors and Furniture, I.** Development of residential environments from prehistoric times to the nineteenth century as seen through the study of architecture and furniture design; consideration of the adaptation and use of period styles in contemporary interiors. Prerequisite: Art 119 or 185, or equivalent. 3 hours.
261. **Interiors and Furniture, II.** Continuation of Home Economics 260. Study of the development of residential environments of the nineteenth and twentieth centuries. Prerequisite: Home Economics 260. 3 hours.
262. **Interior Design.** Designing of interiors and their components; emphasis on design theory, presentation techniques, and evaluation of design concepts. Prerequisite: Home Economics 160 and 261; Art 118, 120, and 123. 3 hours.
263. **Textile Design: Printing.** Creative design developed from historical and traditional background; exploration of various printing techniques, such as block, stencil, and silk screen processes, on fabric; and an analysis of contemporary American design. Prerequisite: Art 120 or 186; consent of instructor. 3 hours.
270. **Family Financial Management.** Application of managerial principles to family finances; consideration of factors affecting the acquisition and use of income, plans for spending and saving during various periods in the family cycle, and the relationship of income to the economic situation. Prerequisite: Economics 101 or equivalent; Home Economics 171. 3 hours.
271. **Home Management.** Introduction to home management concepts; application of managerial principles to use of time, energy, and money; and emphasis on consumer goods and services accounting for some major costs of living. For non-home economics majors. 2 hours.
273. **Advanced Home Management.** Seminar course with field experience emphasizing an analytical approach to the study of managerial behavior of families. Prerequisite: Economics 101; Home Economics 171, 210, 220, and 231; Psychology 100 or 103; junior standing in home economics; consent of instructor. 3 hours.
280. **Household Textiles.** Selection of household textiles for consumer use. Prerequisite: Home Economics 183. 2 hours.
281. **Nontextile Apparel and Accessory Materials.** Consumer information about the selection and care of apparel and accessory items of leather, fur, plastic, and metal. Prerequisite: Home Economics 183. 2 hours.
284. **Costume Design.** Creative clothing design using art principles through the media of sketch and color; designing clothing suited to figure type and personality; and understanding the influence of design on contemporary clothing. Prerequisite: Art 120 or 186; Home Economics 184. 2 hours.
285. **History of Costume.** Costumes and their settings from the early Egyptian period through the nineteenth century. 2 hours.
286. **Clothing Design: Flat Pattern.** Designing by drafting patterns using sources of design inspiration appropriate for this process; fitting a basic pattern to use in designing and making a garment. Prerequisite: Art 120 or 186; Home Economics 182 or 186; Home Economics 183 and 184. 3 hours.
287. **Consumer Clothing Problems.** Psychological, sociological, economic, and hygienic aspects of consumer reactions to clothing. Prerequisite: Economics 101; Home Economics 183 or 184; Psychology 100 or 103; Sociology 100. 2 hours.
291. **Thesis.** Intended primarily for candidates for honors but open to other seniors. Prerequisite: Senior standing; approval of head of department. 3 to 5 hours.
292. **Thesis.** Intended primarily for candidates for honors but open to other seniors. Prerequisite: Senior standing; approval of head of department. 3 to 5 hours.

294. **Advanced Weaving.** Exploration of traditional and experimental methods of developing fabrics by means of the floor loom. Prerequisite: Home Economics 194. 3 hours.
301. **Advanced Problems in Home Guidance of Children.** Emphasis on the functions and relations of routine and creative activities and the interplay of personalities in the total behavior patterns with a view toward helping students understand the less obvious and more subtle aspects of child development, and to differentiate between desirable and undesirable guidance procedures practiced by adult members of the family. Prerequisite: Home Economics 202 and 203; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
313. **Economics of Consumption.** Same as Economics 313. Analysis of the macro and micro aspects of consumption. Prerequisite: Economics 101 or equivalent; a course in applied statistics; junior standing. 3 hours, or $\frac{3}{4}$ or 1 unit.
320. **Diet in Disease.** Application of the science of nutrition to the maintenance of optimum health and the role of nutrition in the prevention and treatment of disease. Prerequisite: Home Economics 220. 3 hours or $\frac{3}{4}$ unit.
322. **Physical Growth and Nutrition.** Lecture, readings, and discussions. Prerequisite: Home Economics 220; senior standing; consent of instructor. 2 hours or $\frac{1}{2}$ unit.
323. **Recent Advances in Foods and Nutrition.** New developments in foods and nutrition; readings, lectures, and discussions. Prerequisite: Chemistry 102; Home Economics 220 and 231; Physiology 103. 2 hours or $\frac{1}{2}$ unit. Offered in the summer session only.
324. **Biochemical Aspects of Human Nutrition.** Same as Food Science 324. Advanced treatment of human nutrition, with emphasis on the biochemical functions of nutrients essential for man. Prerequisite: Biochemistry 350, Biochemistry 352 and 353 and a course in nutrition, or consent of instructor. 3 hours or $\frac{3}{4}$ unit. Students may not receive credit for Food Science/Home Economics 324 and Food Science 320.
326. **Presentations: Principles and Techniques.** Selection of problems and organization of materials for demonstrations and other presentations in home economics subject-matter areas. Field trip; see *Timetable* for approximate cost. Prerequisite: Senior standing; consent of instructor. 3 hours or $\frac{1}{2}$ unit.
330. **Experimental Foods.** Consideration of the manner in which such variables as ingredients, proportions, and techniques in food preparation affect the quality of the product. Prerequisite: Home Economics 231; Microbiology 100 and 101. 3 hours, or $\frac{3}{4}$ or 1 unit.
331. **Problems in Foods.** Individual problems in food preparation and preservation. Prerequisite: Home Economics 330. 3 hours or $\frac{3}{4}$ unit.
345. **Institution and Restaurant Management: Food Purchasing and Equipment Selection.** Purchasing food and selecting equipment for quantity food service; factors affecting the purchase of food; and the relationship of floor plans and equipment to service. Field trip; see *Timetable* for approximate cost. Prerequisite: Credit or concurrent registration in Home Economics 240; Economics 101. 3 hours or $\frac{1}{2}$ unit.
349. **Music in Early Childhood.** Same as Music 349. Detailed consideration of the music program in nursery schools, kindergarten, and the primary grades; topics include the nature of early musical responses, objectives, experience levels of the program, methods of teaching, and materials; and inclusion of observation of music teaching at the Child Development Laboratory. Prerequisite: Senior or graduate standing in music or home economics, or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
350. **Institution and Restaurant Management: Organization and Administration.** Organization and administration of food service operations; management problems in various types of food service: personnel, costs, and sanitary control. Field trips; see *Timetable* for approximate cost. Prerequisite: Home Economics 220 and 240. 4 hours or 1 unit.
354. **Growth and Physical Development of Children.** Same as Physical Education 354. A study of the growth and physical development of children through adolescence with emphasis on those systems and body composition changes related to motor performance and exercise stress. Prerequisite: Physiology 103 and 234; Physical Education 270; or equivalent. 3 hours or 1 unit.
355. **Specialized Quantity Food Production and Management.** Advanced application of food production and management principles to specific food service demands; emphasis

- on artistry in preparation, serving, and merchandising high quality food in quantity. Prerequisite: Home Economics 240, credit or concurrent registration in Home Economics 350, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
361. **Development and Function of Family Housing.** Same as Agricultural Mechanization 361. Study of principles and problem solutions in family housing; basic functions, plan patterns, types, materials, and structure; economic influences, costs, and adaptations; and personal and public interests. Prerequisite: Home Economics 160 and 171, or consent of department (agricultural mechanization students, no prerequisite). 3 hours or $\frac{3}{4}$ unit.
370. **Family Economics.** Same as Agricultural Economics 370. Economic welfare of American families in terms of cost of living, standard of living, income, and net worth. Prerequisite: Economics 101 or equivalent; a course in applied statistics; senior standing. 3 hours, or $\frac{3}{4}$ or 1 unit.
371. **The Family as a Consuming Unit.** Analyzes the contributions of economics, sociology, psychology, anthropology, and areas in home economics to understanding the role of the family as a consuming unit; deals with the three aspects of consumer activities (choice making, buying, and using). Prerequisite: Six hours of social science. 3 hours, or $\frac{3}{4}$ or 1 unit.
375. **Home Equipment.** Consideration of basic principles related to the selection, use, and care of household equipment; individual problems including an evaluation of sources of information on equipment and equipment performance tests. Prerequisite: Home Economics 171; 6 advanced hours in home economics including one of the following: 231, 273, or 380; senior standing; consent of instructor. 3 hours or $\frac{1}{2}$ unit.
377. **Cooperative Extension: Home Economics.** The philosophy, history, and organization of the cooperative extension service; consideration of program development and methods of presentation and evaluation emphasizing socioeconomic characteristics of state and county. Prerequisite: Economics 101; Psychology 100 and Sociology 100, or Educational Psychology 211, or Agriculture 206; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
378. **Problems in Home Management, Housing, and Interior Design.** Individual investigations and reports of specific problems in the fields of home management, family housing, or interior design. Prerequisite: Home Economics 262 or 270; senior standing; consent of instructor. 3 hours, or $\frac{3}{4}$ to 1 unit.
379. **Problems in Family and Consumption Economics.** Individual investigations and reports of specific problems in the field of family and consumption economics. Prerequisite: Economics 101 or equivalent; a course in applied statistics; Home Economics 313, 370, 371, or consent of instructor; senior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
380. **Advanced Textiles.** Effects of the physical and chemical structures of textile fibers on their properties, manufacturing processes, use, and care. Prerequisite: Home Economics 183; Chemistry 102. 4 hours or 1 unit.
386. **Clothing Design: Draping.** Designing by draping inspired by appropriate design sources; understanding of fitting principles through fabric manipulation; and design effects maintained in garment construction. Prerequisite: Home Economics 285 or consent of instructor; Home Economics 286. 4 hours or 1 unit.
388. **Problems in Textiles and Clothing.** Individual problems in the field of textiles and clothing, retailing of clothing, or weaving. Prerequisite: Home Economics 286, 294, or 380, or Business Administration 212; minimum grade-point average of 3.5; senior standing; consent of instructor. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit.
395. **Fashion Analysis.** Study of fashion terminology, selected designers, garment-manufacturing techniques, and methods of fashion promotion used in retail outlets. Field trip; see *Timetable* for approximate cost. Prerequisite: Advertising 281 and senior standing, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
410. **Problems in Family Living.** Family relationships and their significance to the growth of family members. Prerequisite: Home Economics 210. 1 unit.

418. **Seminar in Child Development.** Advanced problems in child development. Prerequisite: Home Economics 301. 1 unit.
419. **Seminar in Family Relationships.** Critical evaluation of research literature in the field of marriage and family relationships. Prerequisite: Home Economics 410. 1 unit.
422. **Seminar in Nutrition.** Study of recent literature in nutrition. Prerequisite: Undergraduate degree in home economics, with emphasis on foods and nutrition, or comparable background in biochemistry, microbiology, physiology, or other biological science. $\frac{1}{2}$ or 1 unit.
423. **Problems in Human Nutrition.** Methods of assessing nutritional status of humans. Prerequisite: Home Economics 324 or equivalent. $\frac{1}{2}$ or 1 unit. Offered in alternate years.
432. **Seminar in Foods.** Review of current literature in foods research. Prerequisite: Undergraduate major in foods and nutrition, chemistry, microbiology, or physiology; consent of instructor. $\frac{1}{2}$ or 1 unit.
457. **Sensorimotor Development.** Same as Physical Education 457. Study of the development of spatially adapted movement behavior in man; emphasis on the nature of sensorimotor systems and development of perception; the role of proprioceptive feedback mechanisms and associated reflexes; and the neurogeometric principles basic to the study of man interpreting and acting on the environment. Prerequisite: Physical Education 357, or equivalent. 1 unit.
470. **Seminar in Family and Consumption Economics.** Same as Agricultural Economics 470. Discussion of current topics and review of the literature in family and consumption economics. Prerequisite: Economics 101 or equivalent; a course in applied statistics; Home Economics 313 or 370, or consent of instructor. $\frac{1}{2}$ or 1 unit.
480. **Seminar in Textiles.** Current literature related to development in the production, use, and care of textile fabrics. Prerequisite: Home Economics 380 or equivalent; consent of instructor. $\frac{1}{2}$ or 1 unit.
487. **Seminar in Clothing.** Study and discussion of research in clothing from the aspects of psychological and sociological factors contributing to the effect of clothing on the development of individuals, and on family and community group reactions. Prerequisite: Undergraduate curriculum with majors in textiles and clothing, home economics education, home economics extension, or general home economics. $\frac{1}{2}$ or 1 unit.
493. **Advanced Studies in Home Economics.** Library or experimental research on specific problems of limited scope. Work may be taken in the following subjects: (a) child and family; (b) family and consumption economics; (c) family housing; (d) foods; (e) nutrition; and (f) textiles and clothing. May be taken in addition to 8 units required for a master's degree by students who do not write a thesis. $\frac{1}{2}$ or 1 unit.
499. **Thesis Research.** Work may be taken in the following subjects: (a) child development and family relationships; (b) family and consumption economics; (c) family housing; (d) foods; (e) nutrition; and (f) textiles and clothing. 0 to 4 units.

HORTICULTURE

Head of Department: Professor C. J. Birkeland
Department Office: 124 Mumford Hall, Urbana

100. **Introductory Horticulture.** Principles and practices involved in the production of fruits, vegetables, and ornamental plants. Lectures and discussions. Prerequisite: Botany 100. 3 hours.
110. **Plant and Animal Genetics.** Same as Agronomy, Animal Science, and Dairy Science 110. Principles of heredity in relation to plant and animal improvement. Prerequisite: Biology 110 and 111, or Botany 100 or 101. 3 hours.

122. **Greenhouse Management.** Principles of greenhouse operation, soils, fertilizers, potting, watering, and ventilating. Lectures, reference readings, and greenhouse practice. Prerequisite: Credit or concurrent registration in Botany 100. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only.
190. **Organic and Traditional Vegetable Gardening.** A comparison of the philosophy, scientific principles, and practices of organic and traditional methods of home vegetable gardening; designed primarily for nonagricultural majors. 3 hours. Credit will not be given to students in the ornamental horticulture curriculum, and only open elective credit will be given to students in other agricultural curricula.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Identification and Use of Woody Ornamental Plants, I.** Systematic approach to the identification, ornamental characters, culture, propagation, production, and use of woody ornamental deciduous trees and shrubs; special emphasis on the cultivated varieties. Prerequisite: Botany 100 or consent of instructor. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only.
202. **Identification and Use of Woody Ornamental Plants, II.** Systematic approach to the identification, ornamental characters, culture, propagation, production and use of woody ornamental conifers, broadleaf evergreens, vines, ground covers and woody ornamental deciduous trees and shrubs; special emphasis on the cultivated varieties. Prerequisite: Botany 100 and Horticulture 201, or consent of instructor. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only.
210. **Home Grounds Planning and Design.** Practice of developing home grounds; emphasis on analysis and practical solutions of typical site problems; and evaluation of plants and garden structures as elements in home grounds planning and design. Prerequisite: Horticulture 202, Landscape Architecture 152, or consent of instructor. 4 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only. Credit allowed toward fulfilling requirement in Group III, ornamental horticulture curriculum, only if Horticulture 211 is also completed.
211. **Home Grounds Development and Construction.** Continuation of Horticulture 210, with emphasis on development of home grounds and construction methods and techniques. Prerequisite: Horticulture 202 and 210, or consent of instructor. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only.
212. **Landscape Contracting.** Interpretation of the landscape architect's plans and specifications; estimating quantities of materials; and computing costs and procedures for bidding and executing landscape construction. Prerequisite: Horticulture 211. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only.
221. **Plant Propagation.** Principles, methods, and practices employed in the propagation of plants, emphasizing anatomical features and physiological principles involved in sexual propagation (seeds) and asexual propagation (division, cuttings, budding, grafting, etc.). Prerequisite: Botany 100 or equivalent. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agriculture occupations for secondary teachers curriculum only.
223. **Floricultural Crops Production, I.** Commercial production of major cut-flower crops in the greenhouse and field. Prerequisite: Horticulture 122. 3 hours. Offered in alternate years.
224. **Floricultural Crops Production, II.** Commercial production of pot plants and minor

- greenhouse and field-grown cut flowers. Prerequisite: Horticulture 223. 3 hours. Offered in alternate years.
225. **Ornamental Gardening.** Theory and practice of planting and maintaining ornamental plants in public and private landscaped areas; the functional use of ornamental woody plants, flowers, and turf in the landscape. Not open to students in the ornamental horticulture curriculum. 3 hours.
226. **Bedding and Foliage Plants.** Commercial production and use of tender ornamental plants (grown for outdoor bedding purposes), and of foliage plants (suitable for indoor decorative uses). Prerequisite: Horticulture 122 or Botany 100. 3 hours. Offered in 1974-75 and in alternate years. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agricultural occupations for secondary teachers curriculum only.
230. **Garden Flowers.** The place of herbaceous flowers in the landscape and their cultural requirements and uses; the planning of perennial borders for continuous bloom; and survey of some of the genera contributing importantly to our flower gardens. Of value to nonfloriculture students interested in the home grounds. Prerequisite: Botany 100. 3 hours. Offered in 1974-75 and in alternate years. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agricultural occupations for secondary teachers curriculum only.
231. **Floral Decorations.** Principles of design as applied to the composition and decorative use of flowers, foliages, and accessories. Prerequisite: Junior standing. 3 hours.
232. **Advanced Floral Decorations and Flower Shop Management.** Continuation of Horticulture 231. Flower shop management. Prerequisite: Horticulture 231. 3 hours. Offered in alternate years.
233. **Floriculture for the Home.** Fundamentals of home gardening and the effective use of ornamentals as a part of the home environment; subjects include the selection, culture, and use of garden annuals, biennials, perennials, bulbs, and house plants; garden tools and equipment; soil preparation; plant propagation; principles of design and planting methods; garden maintenance; use of fertilizers; pest control; training and pruning; lawn care; hybridizing; growing structures; and care of cut flowers. Not open to students in the ornamental horticulture curriculum. 3 hours.
234. **Nursery Management.** Study of the various practices and methods of operating a commercial nursery for the production of ornamental woody plants used in landscaping. Lectures, assigned reading, and laboratory exercises. Prerequisite: Botany 100. 3 hours. Offered in 1975-76 and in alternate years. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agricultural occupations for secondary teachers curriculum only.
236. **Turfgrass Management.** Principles and practices used in management of the turf grasses in areas of general and special use; of value to students interested in one or more aspects of turf grass utilization. Lectures, assigned readings, and laboratory exercises. Prerequisite: Botany 100. 3 hours.
242. **Vegetable Crops Production.** Introduction to the growth habits, soil and climatic requirements, culture, storage, varietal characteristics, and pests of vegetable crops. Prerequisite: Horticulture 100 or consent of instructor. 3 hours. Offered in alternate years.
251. **Arboriculture.** Principles in the care and maintenance of ornamental trees and shrubs in the established landscape; consideration of environmental factors, soils, nutrition, pruning, tree surgery, and insect and disease control. Prerequisite: Agronomy 101. 3 hours. Registration limited to horticulture majors, students in the ornamental horticulture curriculum, or students in the agricultural occupations for secondary teachers curriculum only.
262. **Fruit Science, I.** Technological application of biological principles to the culture of temperate fruit plants. Prerequisite: Botany 100. 3 hours. Offered in alternate years.
300. **Special Problems.** Supervised research on individual problems in any phase of horticulture; includes anatomy, breeding, physiology, ecology, or general culture of fruit, vegetable, or ornamental plants. Prerequisite: Not open to students on probation; written

consent of the instructor and authorized departmental approval required prior to advanced enrollment and registration. 1 to 5 hours, or $\frac{1}{2}$ to 2 units.

307. **International Food Crops.** Same as Plant Pathology 307. Various international food crops studied; production and problems created by diseases and insects emphasized; tropical and subtropical crops stressed; temperate food crops of international importance included; and ecological factors affecting fundamentals of food crop production and plant protection examined. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
321. **Floricultural Physiology.** Study of the physiology and metabolism of floricultural crops during their development from seeds through flowering. Lectures and discussion. Prerequisite: Agronomy 101, Botany 100, or consent of instructor. 4 hours or 1 unit.
322. **Plant Nutrition.** Study of the mechanisms of and factors affecting the absorption, transport, and functions of the essential elements required by higher plants. Lectures, discussions, and laboratory. Prerequisite: Agronomy 101; Botany 234 or 330, or consent of instructor. 4 hours or 1 unit.
323. **Principles of Plant Breeding.** Same as Agronomy 323. Genetic and cytological variation in crop plants; the production and control of such variation in developing varieties and hybrids; and the maintenance of high quality seed stocks. Field trips; see *Timetable* for approximate cost. Prerequisite: Agronomy 110 or equivalent; Botany 100. 4 hours or 1 unit.
333. **Plant Physiology Laboratory.** Same as Agronomy 333 and Botany 333. A laboratory course in plant physiology; a supplement to Botany 330 which serves the needs of those interested in acquiring familiarity with techniques of plant physiology. Prerequisite: Credit or concurrent registration in Botany 330 or equivalent. 4 hours or 1 unit.
335. **Economics of Food Distribution.** Same as Agricultural Economics 335. Analysis of (a) marketing structures and operations in the manufacture and wholesale and retail distribution of food; (b) effects of industry organization and government regulations on marketing functions and efficiency; and (c) consumer demand for food. Prerequisite: Economics 101; Agricultural Economics 230 or an elementary marketing course. 3 hours, or $\frac{3}{4}$ or 1 unit.
340. **Introduction to Applied Statistics.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Food Science, Forestry, and Veterinary Medical Science 340. Statistical methods involving relationships between populations and samples; collection, organization, and analysis of data; and techniques in testing hypotheses with an introduction to regression, correlation, and analyses of variance limited to the completely randomized design and the randomized complete-block design. Prerequisite: Mathematics 104, 111, or 112, or equivalent. 4 hours or $\frac{3}{4}$ unit.
345. **Growth and Development of Horticultural Crops.** Factors affecting growth, development, and quality of horticultural crops, such as photoperiodism, growth regulators, carbon dioxide levels, etc. Lecture and discussion. Prerequisite: One year of general chemistry and one semester of general or plant physiology, or consent of instructor. 4 hours or 1 unit.
361. **Individual and Group Behavior of Honey Bees.** Same as Entomology 361 and Zoology 361. Study of individual and group behavior of honey bees, their biological value, physical basis, and evolution. Lectures and discussions, one or more local field trips, term paper, and assigned readings. Prerequisite: One semester of entomology or zoology. 2 hours or $\frac{1}{2}$ unit.
398. **Postharvest Physiology of Horticultural Crops.** Physiology, biochemistry, and anatomy of fruits and vegetables during development, maturation, and ripening *in situ* and in storage. Prerequisite: Botany 100 and Chemistry 102 or 103, or equivalent. 4 hours or 1 unit.
424. **Mineral Nutrition of Plants.** Same as Agronomy 424 and Botany 424. Study of uptake, transport, and metabolic utilization of mineral nutrients by plants; the essentiality of various anions and cations in the light of metabolic activity and constituency in func-

tional plant compounds; and major emphasis on metabolic activity and function of the elements. Prerequisite: Botany 330 or consent of instructor. 1 unit.

431. **Plant Cell Metabolism.** Same as Agronomy, Biology, Forestry, and Plant Pathology 431. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the biochemistry of mature seeds and metabolic processes occurring during seed germination and heterotrophic growth. Meets during the first half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
432. **Plant Cell Energetics.** Same as Agronomy, Biology, Forestry, and Plant Pathology 432. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the energy coupling processes in plant cells (respiration, photosynthesis, photorespiration); and discusses current literature relating to mechanisms of electron transport, phosphorylation, and carbon fixation. Meets during the second half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
433. **Environmental Regulation of Plant Growth.** Same as Agronomy, Biology, Forestry, and Plant Pathology 433. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns mechanisms of plant response to the environment, including ion uptake and transport, water relationships, gas exchange, and photosynthesis of whole plants. Meets during the first half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
434. **Regulation of Plant Development and Reproduction.** Same as Agronomy, Biology, Forestry, and Plant Pathology 434. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the hormonal regulation of growth, development, and reproduction and the metabolism of seed and fruit formation. Meets during the second half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
440. **Design and Analysis of Biological Experiments.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Food Science, Forestry, and Veterinary Medical Science 440. Statistical methods as tools for research; principles of designing experiments and methods of analysis for various kinds of designs, including factorial experiments, considered from the viewpoint of when and how to use them. Prerequisite: Horticulture 340 or equivalent. $\frac{3}{4}$ unit.
447. **Horticulture Seminar.** Discussion of current research and literature pertaining to problems of horticulture and related fields. Prerequisite: Graduate standing in horticulture or related fields. $\frac{1}{4}$ unit.
488. **Plant Pigments.** Same as Botany 488. A comprehensive presentation of the nature, function, distribution, biosynthesis, degradation, separation, and spectroscopic properties of pyrrole, carotenoid, quinone, and anthocyanin pigments. Prerequisite: Botany 330 or consent of instructor. 1 unit. Offered in alternate years.
490. **Research Methods in Horticulture.** Lectures, discussions, demonstrations, and laboratory exercises dealing with methods and apparatus used in horticultural research. Prerequisite: One year of general chemistry and one semester of general or plant physiology, or consent of instructor. 1 unit.
492. **Special Topics in Horticulture.** Readings and discussion in selected phases of horticulture including such topics as genetics, physiology, anatomy, morphology, and ecology of horticultural crops. Prerequisite: Twenty hours of undergraduate work in horticulture and allied subjects for a major and 12 hours for a minor. $\frac{1}{2}$ to 2 units.
499. **Thesis Research.** Research on problems in floriculture, fruit breeding, pomology, and vegetable crops. Required in horticulture major. Prerequisite: Twenty hours of undergraduate work in horticulture and allied subjects for a major and 12 hours for a minor. 0 to 4 units.

HUMANITIES, SCHOOL OF

(Including Classics, Comparative Literature, English, French, Germanic Languages and Literatures, History, Humanities, Linguistics, Philosophy, Religious Studies, Slavic Languages and Literatures, Spanish, Italian, and Portuguese, and Speech Communication)

Director of School: Professor N. Baym

School Office: 210 Lincoln Hall, Urbana

Classics

(Including Classical Archaeology, Classical Civilization, Coptic, Greek, Latin, and Modern Greek)

Head of Department: Professor M. Marcovich

Department Office: 4072 Foreign Languages Building, Urbana

CLASSICAL ARCHAEOLOGY

The following courses presuppose no knowledge of the Greek and Latin languages and are open to all students.

331. **The Archaeology of Greece.** Monuments and material remains illustrating the development of Greek civilization to 323 B.C. Prerequisite: A course in ancient history, art, or language, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
332. **The Archaeology of Italy.** Monuments and material remains illustrating the development of Graeco-Roman and other ancient Italian civilizations to 330 A.D. Prerequisite: A course in ancient history, art, or language, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
433. **The Archaeology of Magna Graecia and Sicily.** Problems in the archaeology of Magna Graecia and Sicily. Prerequisite: Classical Archaeology 331 and 332, or equivalent. 1 unit.
435. **Field Work.** Participation in archaeological excavation; discussion of methods and procedures and practice in actual working conditions. Prerequisite: Consent of instructor. 1 unit.

CLASSICAL CIVILIZATION

The following courses presuppose no knowledge of the Greek and Latin languages and are open to all students. For other courses in the area of classical civilization, see Architecture 211 and 310; Art and Design 217, 218, 301, 303, 304, and 305; Classical Archaeology 331 and 332; History 181, 182, 381, 382, 383, and 384; Philosophy 303, 309, and 310; Political Science 393; and Religious Studies 201, 202, 210, and 340.

100. **Vocabulary Building from Greek and Latin Roots.** Vocabulary building assistance for students through an analysis of Greek and Latin roots, prefixes, and suffixes found in English. 2 hours.
110. **Introduction to Greek Culture.** Study of social and cultural life in Greece during the classical period. 2 hours.
111. **Mythology of Greece and Rome.** A study of the major myths of Greece and Rome and their impact upon later art, music, and literature. 2 hours.

112. **The Roman Achievement.** Introduction to Roman civilization through the study of the social and cultural life of ancient Rome. 2 hours.
150. **Sports in Greece and Rome.** Athletics and sports in ancient Greece and Rome from 776 B.C. to 393 A.D. 2 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Greek Literature in Translation.** Introduction to Greek literature, from Homer to the Hellenistic age, and its cultural and historical background. 3 hours.
202. **Latin Literature in Translation.** Introduction to Latin literature of the classical period and to its cultural and historical background. 3 hours.
221. **The Heroic Tradition.** Study of ancient epics and their relation to the social consciousness of their period; introductory and background lectures; and readings in the epic tradition of antiquity and its successors. Prerequisite: Sophomore standing or consent of instructor. 3 hours.
222. **The Tragic Spirit.** Readings in the tragic drama of Greece and Rome: a systematic study of the contents and development of this classical literary/dramatic genre. Prerequisite: Sophomore standing or consent of instructor. 3 hours.
315. **Greek, Roman, and Medieval Rhetorical Theory.** Same as Speech Communication 315. Examination of the development of rhetorical theory, criticism, and pedagogy in Western thought; an analysis of the contribution of major figures and works from Homer to the Renaissance. Prerequisite: Junior standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Graduate students registered for 1 unit will be expected to do additional work.
331. **Satire and Social Criticism.** Same as Comparative Literature 331. Reading and discussion of literary documents which question current social values, either by ridiculing personal traits and social trends, as in the Greek old comedy and Roman satire, or by suggesting escape, as in the new comedy of manners and the prose romances; some attention to the tradition of satire in medieval and modern literature. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
332. **The Ancient Ideal in Art and Literature.** Study of the aesthetic standards and theories of the Graeco-Roman world and the ways in which these ideals are expressed in the literature, art, and architecture of antiquity. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
347. **The Age of Charlemagne.** Same as History 347. The Age of Charlemagne and its intellectual, political, social, and cultural significance for Western civilization. Prerequisite: Junior standing or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
382. **Language Laboratory Techniques.** Same as English as a Second Language, French, German, Humanities, Slavic, and Spanish 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
390. **Topics in Classical Literature.** Study of selected topics in Greek and Latin literature in translation; content is variable. Prerequisite: Classical Civilization 201 or 202, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated for credit.
391. **Aspects of Greek and Roman Civilization.** Study of selected aspects of Greek and Roman civilization by treating particular topics as they appear in both civilizations; content is variable. Prerequisite: Classical Civilization 110 and 112, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated for credit.

COPTIC

301. **Introductory Coptic, I.** Same as Religious Studies 301. Introduction to the principles of Coptic grammar and to the reading of biblical and gnostic texts. A knowledge of classical or koine Greek, though useful, is not required. 3 hours or $\frac{3}{4}$ unit.

302. **Introductory Coptic, II.** Same as Religious Studies 302. Continuation of Coptic/Religious Studies 301; reading of gnostic and postbiblical texts. Prerequisite: Coptic/Religious Studies 301. 3 hours or $\frac{3}{4}$ unit.

GREEK

101. **Elementary Greek.** Introduction to the fundamentals of classical Greek, including the reading of simple prose. 4 hours.
102. **Elementary Greek.** Continuation of Greek 101. Grammar and reading. Prerequisite: Greek 101 or equivalent. 4 hours.
111. **Elementary Koine Greek.** Same as Religious Studies 111. Introduction to the fundamentals of Koine Greek, including reading from the New Testament. 4 hours.
112. **Elementary Koine Greek.** Same as Religious Studies 112. Continuation of Greek 111. Grammar and reading. Prerequisite: Greek 111 or equivalent. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Intermediate Koine Greek.** Same as Religious Studies 200. Reading of narrative and epistolary New Testament Greek. Prerequisite: Greek 112 or equivalent. 4 hours.
201. **Second-Year Greek.** Reading of Attic prose. Prerequisite: Greek 102 or equivalent. 4 hours.
202. **Second-Year Greek.** Continuation of Greek 201. Introduction to epic Greek; reading of Homer. Prerequisite: Greek 201 or equivalent. 4 hours.
292. **Senior Thesis.** Open to candidates for distinction in Greek. Prerequisite: Senior standing. 2 to 4 hours.
298. **Senior Survey.** Thesis and honors. For candidates for honors in Greek and for other seniors. Prerequisite: Senior standing. 2 or 4 hours.
301. **Third-Year Greek.** Readings in Attic prose. Prerequisite: Greek 202. 3 hours or $\frac{1}{2}$ unit.
302. **Third-Year Greek.** Continuation of Greek 301. Readings in Greek tragedy. Prerequisite: Greek 301. 3 hours or $\frac{1}{2}$ unit.
308. **Comparative Grammar of Greek and Latin.** Same as Latin 308 and Linguistics 308. Historical study of the Greek and Latin languages through use of the comparative method. Prerequisite: Latin 202 or equivalent; credit or concurrent registration in Greek 202. 3 hours or $\frac{3}{4}$ unit.
309. **The Structure of Greek and Latin.** Same as Latin 309 and Linguistics 311. Linguistic analysis of the morphology and syntax of the Greek and Latin languages. Prerequisite: Credit or concurrent registration in Greek 202 and Latin 202, or their equivalent. 3 hours or $\frac{3}{4}$ unit.
310. **Introduction to Indo-European Linguistics.** Same as Latin 310 and Linguistics 309. Introductory survey of Indo-European languages and their mutual relations; exemplification of methods of reconstruction; principles of comparative phonology and introductory survey of morphology; and discussion of theories about the original home, culture, and society of the Indo-Europeans. Prerequisite: Fulfillment of the language requirement of the College of Liberal Arts and Sciences. 3 hours or 1 unit.
311. **Greek Prose Composition.** Practice in the writing of Greek prose. Prerequisite: Greek 201 or equivalent. 3 hours or $\frac{3}{4}$ unit.
312. **Sight Translation.** Exercise in the sight translation of passages of Greek authors. Prerequisite: Greek 202 or equivalent. 3 hours or $\frac{3}{4}$ unit.
371. **The Gospels.** Same as Religious Studies 371. Reading and analysis of the Greek Gospels following literary-critical, form-critical, and redaction-critical approaches. Prerequisite: Greek 201 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
391. **Readings in Greek Literature.** Readings in authors or special topics chosen by the instructor from the entire extant literature in Greek. Prerequisite: Greek 302 or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated for credit.
411. **Hellenistic Literature (Proseminar).** Study primarily of post classical poetry in the

- context of cultural and literary developments between the fourth century B.C. and the first century A.D. Prerequisite: Greek 391 or equivalent. 1 unit.
413. **Greek Lyric Poetry (Proseminar).** Study of one or more lyric poets with emphasis on the background and the particular literary achievement of the poet(s) chosen. Prerequisite: Greek 391 or equivalent. 1 unit. May be repeated for credit.
415. **Homer (Proseminar).** Textual, metrical, and literary analysis of the *Iliad* and the *Odyssey*, and their transmission; select problems in Homeric scholarship. Prerequisite: Greek 391 or equivalent. 1 unit.
416. **Thucydides (Proseminar).** Study of Thucydides' historical method in conjunction with the literary merits of his work and the problems of its composition. Prerequisite: Greek 391 or equivalent. 1 unit.
420. **Plato (Proseminar).** Life, writings, and philosophy of Plato; transmission of the *Corpus Platonicum*; reading and philosophical analysis of select dialogues. 1 unit.
424. **Greek Drama: Tragedy (Proseminar).** Textual, metrical, and literary analysis of the extant plays of Aeschylus, Sophocles, or Euripides, and their transmission and significance. Prerequisite: Greek 391 or equivalent. 1 unit. May be repeated as topic varies.
425. **Greek Drama: Comedy (Proseminar).** Textual, metrical, and literary analysis of the extant comedies of Aristophanes or Meander, including their transmission and significance. Prerequisite: Greek 391 or equivalent. 1 unit.
440. **Papyrology.** Introduction to the editing of Greek papyri; students work on both published and unpublished material. Prerequisite: Greek 302. 1 unit.
441. **Greek Palaeography.** History and development of Greek writing from the third century B.C. to the end of the fifteenth century A.D. Prerequisite: Three years of college Greek. 1 unit.
460. **Studies in Patristic Greek Literature (Seminar).** Aspects of the religious and social history of early Christianity on the basis of Greek Patristic texts. Prerequisite: Three years of college Greek. 1 unit.
480. **Greek Seminar.** Research on special problems of Greek literature; required of all majors in classical philology. Prerequisite: A Greek proseminar. 1 unit.
493. **Independent Reading.** Prerequisite: Consent of the student's advisor and of the instructor. $\frac{1}{4}$ to 2 units. May be repeated but no more than 1 unit of credit may be applied toward the minimum requirement for the M.A. degree, and no more than 2 units of credit may be applied toward the minimum requirement for the Ph.D. degree.
495. **Bibliography and Criticism.** Same as Latin 495. Introduction to the methods and techniques of scholarship. Prerequisite: Three years of college Greek. $\frac{1}{2}$ unit.
496. **Bibliography and Criticism.** Same as Latin 496. Continuation of Greek/Latin 495. Prerequisite: Greek or Latin 495. $\frac{1}{2}$ unit.
499. **Thesis Research.** Guidance in writing theses for advanced degrees. 0 to 4 units.

LATIN

101. **Elementary Latin.** Grammar and reading for students who have had no work in Latin. 4 hours.
102. **Elementary Latin.** Grammar and reading of easy prose. Prerequisite: Latin 101 or one year of high school Latin. 4 hours.
103. **Intermediate Latin.** Review of grammar; reading of easy narrative prose. Prerequisite: Latin 102 or two years of high school Latin. 4 hours.
104. **Introduction to Latin Literature.** Continuation of Latin 103, with readings chiefly in Latin poetic literature. 4 hours.
105. **Intensive Elementary Latin.** Equivalent to Latin 101 and 102. Introduction to basic grammar and syntax for students who have had no previous Latin and want to learn at a rapid rate; use of computer-assisted individual mastery lessons. 8 hours.
106. **Intensive Intermediate Latin.** Equivalent to Latin 103 and 104. Review of grammar and syntax and reading of easy prose and poetry for students who have attained 102

proficiency and wish to advance more rapidly; use of computer-assisted program materials. Prerequisite: Latin 102 or 105, or a placement score showing high school achievement equivalent to Latin 102. 8 hours.

113. **Latin Composition.** Grammatical drill and practice in the simpler forms of expression. Required of those receiving the recommendation of the department as teachers. Prerequisite: Credit or concurrent registration in Latin 103 or three years of high school Latin. 2 hours.
114. **Latin Composition.** Continuation of Latin 113. Grammatical drill and practice in the simpler forms of expression. Required of those receiving the recommendation of the department as teachers. Prerequisite: Latin 113. 2 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Survey of Latin Literature.** The republican period. Prerequisite: Latin 104 or four years of high school Latin. 3 hours.
202. **Survey of Latin Literature.** The imperial period. Prerequisite: Latin 104 or four years of high school Latin. 3 hours.
203. **Cicero and the Roman Republic.** Study of the political writings of Cicero, emphasizing the events of his consular year. Prerequisite: Latin 201 and 202, or equivalent. 3 hours.
204. **Vergil and the Augustan Age.** Study of the poetry of Vergil emphasizing the ancient epic as a literary genre and as the historical background to the *Aeneid*. Prerequisite: Latin 201 and 202, or equivalent. 3 hours.
280. **Teachers' Course.** Introduction to the problems of the teaching of Latin and a study of textbooks. Required of teacher-training majors in Latin. This course will not meet during the six-week student teaching period. Prerequisite: Latin 202; senior standing. 4 hours.
292. **Senior Thesis.** Thesis and honors. For candidates for honors in Latin and for other seniors. Prerequisite: Senior standing. 2 or 4 hours.
298. **Senior Survey.** Thesis and honors. For candidates for honors in Latin and for other seniors. 2 or 4 hours.
308. **Comparative Grammar of Greek and Latin.** Same as Linguistics 308 and Greek 308. Historical study of the Greek and Latin languages through use of the comparative method. Prerequisite: Latin 202 or equivalent; credit or concurrent registration in Greek 202. 3 hours or $\frac{3}{4}$ unit.
309. **The Structure of Greek and Latin.** Same as Greek 309 and Linguistics 311. Linguistic analysis of the morphology and syntax of the Greek and Latin languages. Prerequisite: Credit or concurrent registration in Greek 202 and Latin 202, or their equivalent. 3 hours or $\frac{3}{4}$ unit.
310. **Introduction to Indo-European Linguistics.** Same as Greek 310 and Linguistics 309. Introductory survey of Indo-European languages and their mutual relations; exemplification of methods of reconstruction; principles of comparative phonology and introductory survey of morphology; and discussion of theories about the original home, culture, and society of the Indo-Europeans. Prerequisite: Fulfillment of the language requirement of the College of Liberal Arts and Sciences. 3 hours or 1 unit.
311. **Intermediate Prose Composition.** Practice in the writing of Latin prose. Prerequisite: Latin 114 or equivalent. 3 hours or $\frac{3}{4}$ unit.
312. **Advanced Composition.** Practice in the writing of Latin prose. Prerequisite: Latin 114 or equivalent. 3 hours or $\frac{3}{4}$ unit.
313. **Oral Latin.** Introduction to the use of Latin as a means of oral communication, with particular reference to instruction in secondary schools. Offered in summer session only. Prerequisite: Latin 312 or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
361. **Medieval Latin.** Literary and historical texts in prose and poetry from Cassiodorus to Roger Bacon. Prerequisite: Two years of college Latin or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
391. **Readings in Latin Literature.** Readings in authors or special topics chosen by the instructor from the entire extant literature in Latin. Prerequisite: Three years of college

- Latin or equivalent; consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated for credit.
400. **Beginning Latin for Graduate Students.** Basic grammar, syntax, and vocabulary; reading practice. Designed for graduate students who need to use Latin in their research. 4 hours. No graduate credit.
 401. **Readings in Latin for Graduate Students.** Directed readings, largely in medieval and modern Latin. Designed for graduate students who need to use Latin in their research. Prerequisite: Latin 400 or two years of high school Latin, or equivalent. 4 hours. No graduate credit.
 402. **Teaching College Latin.** Designed for new graduate teaching assistants in the Classics Department; examination of new techniques for teaching pronunciation, vocabulary, grammar, and the reading of Latin; closely correlated with the teaching assignments of the graduate students. May not be counted toward 400 level requirement in Latin. $\frac{1}{4}$ unit.
 409. **History of the Latin Language.** Development of sounds, forms, syntax, and stylistics from the earliest times through the classical, medieval, and early modern periods; reading and discussion of selected documents, literary and otherwise. Prerequisite: Two years of college Latin or equivalent; two years of modern foreign language. 1 unit.
 411. **Latin Epigraphy.** Inscriptions studied as evidence for both the structure of Roman society and the evolution of Latin. Prerequisite: Three years of college Latin or equivalent; one year of ancient history. 1 unit.
 412. **Latin Elegy (Proseminar).** Critical study of Tibullus or Propertius or selected major works of Ovid. Prerequisite: Latin 391 or equivalent. 1 unit.
 414. **Lucan (Proseminar).** Critical study of the historical significance and text of his epic. Prerequisite: Latin 391 or equivalent. 1 unit.
 415. **Lucretius (Proseminar).** Study of the *De Rerum Natura* with emphasis on philosophical context, philological and literary problems, and Lucretius' relationship to his poetic and philosophical predecessors. Prerequisite: Latin 391 or equivalent. 1 unit.
 416. **Vergil (Proseminar).** Examination of Vergil's place in the development of the Latin poetic tradition with particular emphasis on the literary background of the *Aeneid*. Prerequisite: Latin 391 or equivalent. 1 unit.
 421. **Horace (Proseminar).** The satires, epistles, and lyric poems of Horace and the beginnings of literary criticism. Prerequisite: Latin 391 or equivalent. 1 unit.
 422. **Roman Comedy (Proseminar).** Selected plays of Plautus and Terence; Italian and New Attic comedy. Prerequisite: Latin 391 or equivalent. 1 unit. May be repeated for credit.
 425. **Cicero (Proseminar).** Study of Cicero's life and literary activities. Prerequisite: Latin 391 or equivalent. 1 unit.
 427. **Roman Satire (Proseminar).** Development of formal satire, concentrating on Horace, Juvenal, and the Apocolocyntosis of Seneca; some consideration of Catullus, Persius, Martial, and Petronius. Prerequisite: Latin 391 or equivalent. 1 unit.
 430. **The Roman Historians (Proseminar).** Selections from one or more of the following, with reference to specific literary and historical topics: Caesar, Sallust, Livy, Tacitus, and Ammianus Marcellinus. Prerequisite: Latin 391 or equivalent, or consent of instructor. 1 unit. May be repeated as topic varies.
 441. **Latin Palaeography.** History of the Latin script from the Romans to the national hands of western Europe. Prerequisite: Latin 391 or equivalent, or consent of instructor. 1 unit.
 461. **The Medieval Latin Bible (Seminar).** Study of the Vulgate and earlier Latin versions of the Bible and of the commentaries of the Latin Fathers. Prerequisite: Latin 361 or 391, or equivalent. 1 unit.
 462. **The Carolingian Renaissance (Seminar).** Same as Comparative Literature 454. Study of the Latin literature of the Carolingian period with emphasis on the work of Alcuin and Charlemagne. Prerequisite: Latin 361 or 391, or equivalent. 1 unit.

480. **Latin Seminar.** Research on special problems of Latin literature; required of all concentrators in classical philology. Prerequisite: A Latin proseminar. 1 unit.
493. **Independent Reading.** Prerequisite: Consent of the student's adviser and of the instructor. $\frac{1}{4}$ to 2 units. May be repeated but no more than 1 unit of credit may be applied toward the minimum requirement for the M.A. degree, and no more than 2 units of credit may be applied toward the minimum requirement for the Ph.D. degree.
495. **Bibliography and Criticism.** Same as Greek 495. Introduction to the methods and techniques of scholarship. Prerequisite: Latin 391 or equivalent. $\frac{1}{2}$ unit.
496. **Bibliography and Criticism.** Same as Greek 496. Continuation of Greek/Latin 495. Prerequisite: Greek/Latin 495. $\frac{1}{2}$ unit.
499. **Thesis Research.** Guidance in writing theses for advanced degrees. 0 to 4 units.

MODERN GREEK

201. **Elementary Modern Greek, I.** An introduction to Modern Greek, in its spoken and written forms, including the elements of formal grammar. All students in this course are required to register for one hour per week in the language laboratory. 5 hours.
202. **Elementary Modern Greek, II.** Second term of spoken Modern Greek; formal grammar based on graded lesson materials; and work in written Greek. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Modern Greek 201. 5 hours.
303. **Intermediate Modern Greek, I.** First term of second year of work in Modern Greek; drill for more advanced conversational fluency; introduction to a greater variety of styles and levels of discourse and usage; increasing study of the written language; and more formal grammar. All students in this course are required to register for one hour of work weekly in the language laboratory. Prerequisite: Modern Greek 202 or equivalent. 5 hours or 1 unit.
304. **Intermediate Modern Greek, II.** Continuation of Modern Greek 303. All students in this course are required to register for one hour of work weekly in the language laboratory. Prerequisite: Modern Greek 303 or equivalent. 5 hours or 1 unit.

Comparative Literature

Director of Graduate Program: Professor F. J. Jost

Office: 2070 Foreign Languages Building, Urbana

203. **Goethe in Translation.** Same as German 203. Introduction to the life and works of Johann Wolfgang von Goethe; focus on his poetic work and treatment of his major contributions to science as imaginative literature. 3 hours.
204. **Medieval Literature in Translation.** Same as German 204. German medieval precourtly and courtly literature in the European context; readings in the works of Hartmann von Aue, Gottfried von Strassburg, Wolfram von Eschenbach, and others, including the following epics: *Nibelungenlied*, *Gregorius*, *Tristan*, and *Parzival*. 3 hours.
313. **The Divine Comedy.** Same as Italian 313. Interpretation of Dante's *Divine Comedy* with special attention to its position in the medieval world. A knowledge of Italian is not required. Prerequisite: Junior standing. 2 hours or $\frac{1}{2}$ unit.
331. **Satire and Social Criticism.** Same as Classical Civilization 331. Reading and discussion of literary documents which question current social values, either by ridiculing personal traits and social trends, as in Greek old comedy and Roman satire, or by suggesting escape, as in the new comedy of manners and the prose romances; some attention to the tradition of satire in medieval and modern literature. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.

359. **The International Folk Tale.** Same as English 367. Study of the origin, distribution, and nature of the folk tale. 3 hours or $\frac{3}{4}$ unit.
363. **Introduction to Comparative Literature, I.** One-year course in two parts, offering a survey of methods and goals of comparative literature illustrated by representative examples taken from several literatures and studies of modern criticism. 3 hours or $\frac{3}{4}$ unit.
364. **Introduction to Comparative Literature, II.** Continuation of Comparative Literature 363. 3 hours or $\frac{3}{4}$ unit.
370. **Vladimir Nabokov.** Same as Russian 370 and English 370. The major contribution of Vladimir Nabokov to world literature. No knowledge of Russian required. Prerequisite: Junior standing or consent of instructor. 3 hours or 1 unit.
387. **Introduction to Myth and Folklore.** Same as English, German, Slavic and Speech Communication 387. Prerequisite: One year of college literature, or consent of instructor; reading knowledge of one modern foreign language recommended. 3 hours or $\frac{3}{4}$ unit.
396. **Special Topics in Comparative Literature.** Selected literary topics of international significance in relation to other cultural expressions. Prerequisite: Consent of instructor. 3 hours, or $\frac{3}{4}$ to 1 unit. May be repeated for a maximum of six hours or two units.
401. **Theory of Literature.** Methods and objectives of the discipline of comparative literature. Prerequisite: Reading knowledge of two foreign languages; consent of instructor. 1 unit.
415. **Dostoevsky.** Same as Russian 415. Dostoevsky: historical background, textual analysis, structure, philosophy, artistic evaluation, and influence on French, English, American, and German literatures. 1 unit.
419. **Tolstoy.** Same as Russian 419. Tolstoy: historical background, textual analysis, structure, philosophy, aesthetic evaluation, and influence on French, English, American and German literatures. 1 unit.
420. **Chekhov.** Same as Russian 420. Chekhov: historical background, textual analysis, structure, philosophy, artistic evaluation, and interrelationship with English, French, German (and Scandinavian), and American literatures. 1 unit.
431. **Comparative Slavic Literature.** Same as Slavic 431. Survey of Slavic literature, especially Czech, Polish, and Yugoslav, and their connection with Russian and Western traditions. 1 unit.
441. **Naturalism, Symbolism, and Expressionism.** Same as German 451. Comparative analysis of German literature from the 1880s to the 1920s within the European context. 1 unit.
451. **Seminar in Literary Movements and Periods.** Investigation of the development and mutation of literary movements (classicism, romanticism, symbolism, etc.) through a study of critical texts and their reception in various countries. The subject of the seminar varies each semester; may be taken more than once for a total of 3 units. 1 unit.
452. **Seminar in Romantic Literature.** Same as English 433. Prerequisite: A college course devoted entirely to an aspect of Romantic studies, or consent of instructor. 1 unit. May be repeated as topic varies.
454. **The Carolingian Renaissance.** Same as Latin 462. Study of the Latin literature of the Carolingian period with emphasis on the work of Alcuin and Charlemagne. Prerequisite: Latin 361 or 391, or equivalent. 1 unit.
461. **Seminar in Literary Genres and Forms.** Same as German 462. Study of a form (the lyric, the novel, the drama, etc.) to discover its essential components in all the literatures studied and the significance of national variations. 1 unit. May be repeated to a maximum of 3 units as topic varies.
462. **Seminar in Spanish-American Novel.** Same as Spanish 436. Special problems in methodology and research, including other prose fiction. Prerequisite: Spanish 433 or 434. 1 unit.
471. **Seminar in Literary Relations.** Investigation of the impact of one literature upon another, or of some specific works upon others (the role of English literature in continen-

tal Europe, the influence of Russian novelists on French and German writers, etc.). The subject of the seminar varies each semester; may be taken more than once for a total of 3 units. 1 unit.

472. **Studies in French and Comparative Cinema.** Same as French 452. Historical, aesthetic, social, and technical studies of the French cinema and its development and relation to world cinema and to literature. 1 unit. May be repeated to a maximum of 3 units credit.
473. **Seminar in French and Comparative Cinema.** Same as French 482. Study of several major French directors within the context of French and international cinema; comparison with selected non-French directors; and the relationship of films to other literary forms. 1 unit.
478. **Seminar in Twentieth-Century French Literature.** Same as French 478. Discussion and research on some specialized topic in twentieth-century French literature. See *Timetable* for current topics. 1 unit. May be repeated for credit.
481. **Seminar in Literary Themes and Types.** Study of a theme or type (the Faust myth, the romantic hero, etc.) to discover its essential components in all the literatures studied and the significance of national variations. The subject of the seminar varies each semester. May be repeated to a maximum of 3 units. 1 unit.
482. **Seminar in Modern German Literature.** Same as German 461. Topics range from the Enlightenment to the present. Prerequisite: German 411 and 495. 1 unit. May be repeated as topics vary.
493. **Special Studies.** $\frac{1}{4}$ to 1 unit.
499. **Thesis Research.** Intended for students engaged in writing a thesis as a partial requirement for the M.A. or Ph.D. degree in comparative literature. Maximum credit for master's candidates is 2 units. 0 to 4 units.

English

(Including Business and Technical Writing and Rhetoric and Composition)

Head of Department: Professor G. Hendrick

Department Office: 100 English Building, Urbana

BUSINESS AND TECHNICAL WRITING

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
251. **Business and Administrative Communication.** Study of communication as a tool of administration and management; practice in writing a wide variety of types and forms of communication; and inclusion of oral and visual communication with the written to provide an integrated approach. For the student whose career will be in administration and management requiring a broad range of communication skills. Prerequisite: Completion of campus rhetoric requirement and sophomore standing. 3 hours.
271. **Sales Writing.** Same as Advertising 288. Direct mail campaigns and company magazine copy. Prerequisite: Sophomore standing. 3 hours.
272. **Report Writing.** Personal direction in a report writing project which can be integrated with research in another course; study of report-writing principles and practices. Classes meet for the first month after which the student and the instructor arrange a conference schedule. Small group meetings are arranged for presentation of proposals, progress reports, and summary reports. Prerequisite: Completion of campus rhetoric requirement and sophomore standing. 3 hours.
290. **Individual Study.** Independent research with a chosen tutor leading to the writing of a formal report or preparation of some other type of major presentation of information. Prerequisite: Completion of campus rhetoric requirement and sophomore standing. 3 hours.

ENGLISH

101. **Introduction to Poetry.** Reading and discussion of representative poems of several periods and types. 3 hours.
102. **Introduction to the Drama.** Reading and discussion of representative plays of several periods and types. 3 hours.
103. **Introduction to Fiction.** Reading and discussion of representative fiction of several periods and types. 3 hours.
104. **Introduction to Film.** Understanding of narrative films through the viewing and discussion of a representative body of film classics drawn from the entire range of world cinema; emphasizes the basic elements of cinematic expression, and concerns major movements, periods, and genres. 3 hours.
106. **Literature and Experience.** Understanding of the relationship between literature and human experience through the study of significant, recurrent themes. 3 hours. May be repeated to a total of 6 hours.
115. **Masterpieces of English Literature.** Study of selected major writings. 3 hours.
116. **Masterpieces of American Literature.** Study of selected major writings. 3 hours.
180. **Drama in Production.** Study, discussion, and production of a dramatic text. 3 hours.
198. **Freshman Honors Seminar.** Introduction to the study of literature, with emphasis on individual work in fundamental problems of literary analysis; works studied are usually a combination either of short poems and short stories or of novels and plays. Prerequisite: James Scholar standing or other designation as a superior student. 4 hours. May be repeated once as topics vary.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
202. **Medieval Literature and Culture.** British and continental authors (including Chaucer) read in modern English. Prerequisite: Sophomore standing or consent of instructor. 3 hours.
204. **Renaissance Literature and Culture.** Readings in English and continental literary masterpieces with attention to the significant cultural influences of the period. 3 hours.
205. **Introduction to Shakespeare.** 3 hours.
206. **Literature and Culture of the Enlightenment.** Readings in English and continental literature of the eighteenth century, with attention to significant cultural influences. 3 hours.
207. **Nineteenth-Century Literature and Culture.** English and continental literature of the nineteenth century, with attention to major intellectual and social movements. 3 hours.
209. **English Literature from the Beginning to 1798.** Historical and critical study of selected works of English literature to 1798 in chronological sequence. 3 hours.
210. **English Literature from 1798 to Present.** Historical and critical study of selected works of English literature after 1798 in chronological sequence. 3 hours.
240. **The English Romantic Poets.** Wordsworth, Scott, Coleridge, Byron, Shelley, and Keats. 3 hours.
241. **The Beginnings of Modern Poetry.** American and British poets including Frost, Robinson, Sandburg, Lindsay, Hardy, Hopkins, Housman, Yeats, Lawrence, the Imagists, and the early Pound and Eliot. 3 hours.
242. **Poetry Since 1940.** 3 hours.
243. **Development of the Modern Drama.** Ibsen to O'Neill. 3 hours.
244. **Development of the Modern Drama.** Pirandello to the present. 3 hours.
245. **The Short Story.** Historical and critical study of the short story (American and European) from the early nineteenth century to World War I; major emphasis on such authors as Hawthorne, James, Crane, Gogol, Chekhov, Maupassant, Flaubert, Joyce, and Mansfield. Prerequisite: One course in English or American literature. 3 hours.
246. **The Short Story.** Historical and critical study of the short story (American and European) from World War I to the present; major emphasis on such authors as Anderson, Hemingway, Faulkner, Porter, Kafka, Mann, Maugham, Lawrence, Salinger, and Camus. Prerequisite: One course in English or American literature. 3 hours.

247. **The British Novel.** Critical study of representative British novels from different literary periods. 3 hours.
248. **The European Novel.** Thematic interrelationships and contemporary relevance of such writers as Gogol, Turgenev, Dostoevsky, Flaubert, Tolstoy, Zola, Mann, Hesse, Kafka, and Camus. 3 hours.
249. **The American Novel.** Study of major and representative novels from the beginnings to the present. 3 hours.
255. **Survey of American Literature, I.** American literature and its cultural backgrounds to 1900. 3 hours.
256. **Survey of American Literature, II.** American literature and its cultural backgrounds in the twentieth century. 3 hours.
259. **Afro-American Literature, I.** Historical and critical study of Afro-American literature in its social and cultural context from the beginning to 1915. 3 hours.
260. **Afro-American Literature, II.** Historical and critical study of Afro-American literature in its social and cultural context since 1915. 3 hours.
273. **Film as Literature.** Critical study of narrative films, with viewing and discussion of a major film each week; in-depth study of selected directors, genres, and themes; emphasis on aspects of film aesthetics, criticism, and history. Prerequisite: English 104 or a college-level course in literature or film. 3 hours.
274. **Literature in Its Cultural Contexts.** Studies of literature from the point of view of other disciplines. See *Timetable* for current topics. 3 hours.
275. **Literature and Psychology.** Psychological and psychoanalytical theories in their bearings on the interpretation of literature. 3 hours.
277. **Modern Literary Criticism.** Important modern theories and methods of literary criticism and their relations to the study of literary texts. 3 hours.
290. **Individual Study.** Study of selected topics. Prerequisite: Consent of instructor. 0 to 3 hours. May be repeated for a total of 6 hours. Students may register in this course more than once in the same term.
291. **Honors Individual Study.** Study of selected topics. Restricted to English and English education concentrators with a 4.25 average who are working towards the degree with Distinction in English or in English education. Enrollment in appropriate honors office necessary. Prerequisite: Consent of English honors or English education honors adviser. 1 to 3 hours. May be repeated to a maximum of 6 hours.
293. **Honors Senior Thesis.** Independent research with a chosen tutor leading to the writing of a thesis. Candidates for distinction in English must take either English 290 or English 293; they may take both. Restricted to English or English education majors with a 4.25 average who have satisfied all other requirements towards the degree with distinction; enrollment in the English Honors Office necessary. 3 hours.
296. **Honors Seminar, I: Themes, Movements, and Forms in British and American Literature.** Restricted to English, rhetoric, and English education concentrators with a grade-point average of 4.25; enrollment through the English Honors Office necessary. Offered every semester with varying topics; may be repeated as topic varies. 3 hours.
297. **Honors Seminar, II: Periods in British and American Literature.** Restricted to English, rhetoric, and English education concentrators with a grade-point average of 4.25; enrollment through the English Honors Office necessary. Offered every semester with varying topics; may be repeated as topic varies. 3 hours.
298. **Honors Seminar, III: Major British and American Authors.** Each seminar considers one or two major authors. Restricted to English, rhetoric, and English education concentrators with a grade-point average of 4.25; enrollment through the English Honors Office necessary. May be repeated as topic varies. 3 hours.
301. **Introduction to the Study of the English Language.** Language theories and modes of language study applied to English. 3 hours or 1 unit.
302. **Descriptive English Grammar.** Same as English as a Second Language 302. 3 hours or 1 unit.

303. **Historical Introduction to the English Language.** Credit is not given for both English 303 and 403. 3 hours or 1 unit.
311. **Chaucer.** A selection read in Middle English. 3 hours or 1 unit.
315. **Poetry and Prose of the English Renaissance, 1500-1600.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
316. **Tudor Drama Exclusive of Shakespeare.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
317. **Spenser.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
318. **Shakespeare, I.** Earlier tragedies, comedies, and history plays. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
319. **Shakespeare, II.** Mature tragedies, dark comedies, and late romances. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
321. **Poetry and Prose from the Metaphysicals to 1660.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
322. **English Drama, 1603-42.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
323. **Milton.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
326. **English Literature of the Restoration and Early Eighteenth Century.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
327. **English Literature of the Later Eighteenth Century.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
328. **English Drama of the Restoration and Eighteenth Century.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
329. **Restoration and Eighteenth-Century Fiction.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
331. **English Romantic Literature.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
333. **Early Victorian Literature.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
334. **Later Victorian Literature.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
335. **Nineteenth-Century British Fiction.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
341. **British Literature in the Twentieth Century to 1930.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
342. **British Literature in the Twentieth Century Since 1930.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
343. **The Plays of Bernard Shaw.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
346. **American Literature of the Colonies and Early Republic.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
347. **Literature of the American Renaissance.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
350. **American Literature from the Civil War to the First World War.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
351. **American Literature from the First World War to the Present.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
355. **Major Authors.** Intensive study of the work of one or two major authors. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit. May be repeated as topic varies.
361. **Topics in English Literature.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit. May be repeated once as topic varies.

362. **Topics in American Literature.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit. May be repeated once for credit.
363. **Special Topics in the Study of Literature.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit. May be repeated once for credit.
364. **Tragedy.** History and theory of stage tragedy. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
365. **Comedy.** History and theory of stage comedy. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
366. **Topics in Modern Drama.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
367. **The International Folk Tale.** Same as Comparative Literature 359. Origin, nature, and distribution of the folk tale. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
368. **The Ballad and Folksong in the United States.** English-language traditional songs and ballads, transplanted and native. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
370. **Vladimir Nabokov.** Same as Russian 370 and Comparative Literature 370. The major contribution of Vladimir Nabokov to world literature. No knowledge of Russian required. Prerequisite: Junior standing or consent of instructor. 3 hours or 1 unit.
375. **Topics in the Relation of Other Disciplines to the Study of Literature.** See *Timetable* for current topics. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit. May be repeated once as topic varies.
381. **Theory and Practice of Written Composition.** History and theory of written composition; basic rhetorical principles; and guidance and criticism of student writing. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
382. **Literary Criticism from Plato to 1800.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
383. **Literary Criticism from 1800 to the Present.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
385. **Literature for the High School.** Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
387. **Introduction to Myth and Folklore.** Same as Comparative Literature, German, Slavic and Speech Communication 387. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
400. **Introduction to Research and Critical Techniques.** Introductory course in methods and techniques in research and literary criticism; strongly recommended for all students seeking the Ph.D. 1 unit.
403. **History of the English Language.** Study of the development of the language from the earliest stages to the present. Credit is not given for both English 403 and 303. 1 unit.
404. **Seminar in the English Language.** Prerequisite: Consent of instructor. 1 unit.
407. **Old English.** Introduction to the language before 1000 A.D. 1 unit.
408. **Beowulf.** Prerequisite: English 407 or consent of instructor. 1 unit.
409. **Old English Literature and Its Cultural Background.** Prerequisite: English 407 or consent of instructor. 1 unit. May be repeated as topic varies.
411. **Chaucer: *Troilus and Criseyde* and the Minor Poems.** 1 unit.
412. **Chaucer: *The Canterbury Tales*.** 1 unit.
413. **Middle English Literature and Its Cultural Background.** 1 unit. May be repeated as topic varies.
414. **Seminar in Medieval Literature.** Prerequisite: A college course devoted entirely to an aspect of medieval studies, or consent of instructor. 1 unit. May be repeated as topic varies.
419. **Seminar in Shakespeare.** Prerequisite: A college course devoted entirely to an aspect of Shakespeare's work, or consent of instructor. 1 unit. May be repeated as topic varies.
420. **Seminar in Sixteenth-Century Literature.** Prerequisite: A college course devoted en-

- tirely to an aspect of Renaissance studies, or consent of instructor. 1 unit. May be repeated as topic varies.
424. **Seminar in Seventeenth-Century Literature.** Prerequisite: A college course devoted entirely to an aspect of Renaissance studies, or consent of instructor. 1 unit. May be repeated as topic varies.
427. **Seminar in Restoration and Eighteenth-Century Literature.** Prerequisite: A college course devoted entirely to an aspect of eighteenth-century studies, or consent of instructor. 1 unit. May be repeated as topic varies.
433. **Seminar in Romantic Literature.** Same as Comparative Literature 452. Prerequisite: A college course devoted entirely to an aspect of Romantic studies, or consent of instructor. 1 unit. May be repeated as topic varies.
437. **Seminar in Victorian Literature.** Prerequisite: A college course devoted entirely to an aspect of Victorian studies, or consent of instructor. 1 unit. May be repeated as topic varies.
443. **Seminar in Modern British Literature.** Prerequisite: One college course devoted entirely to an aspect of modern British studies, or consent of instructor. 1 unit. May be repeated as topic varies.
447. **Seminar in Earlier American Literature.** Prerequisite: One college course devoted entirely to an aspect of American studies, or consent of instructor. 1 unit. May be repeated as topic varies.
453. **Seminar in Later American Literature.** Prerequisite: One college course devoted entirely to an aspect of American studies, or consent of instructor. 1 unit. May be repeated as topic varies.
463. **Seminar in Literary Themes and Movements.** Prerequisite: One year of graduate study of literature, or consent of instructor. 1 unit. May be repeated as topic varies.
464. **Seminar in Literary Modes and Genres.** Prerequisite: One year of graduate study of literature, or consent of instructor. 1 unit. May be repeated as topic varies.
469. **Seminar in the Stage History of Classic English Plays.** Same as Speech Communication 469 and Theatre 405. Analysis and reconstruction of past productions of classic plays, with special reference to Shakespeare. Prerequisite: One year of work in dramatic literature or theatre history, or consent of instructor. 1 unit.
478. **Seminar in the Relation of Other Disciplines to the Study of Literature.** Prerequisite: One year of graduate study of literature, or consent of instructor. 1 unit. May be repeated as topic varies.
481. **Seminar in Literary Theory and Criticism.** Prerequisite: A college course devoted entirely to criticism, or consent of instructor. 1 unit. May be repeated as topic varies.
487. **Seminar in the Teaching of English.** Prerequisite: One year of college study of literature, or consent of instructor. 1 unit. May be repeated as topic varies.
491. **Research in Special Topics.** Independent study under the guidance of a member of the graduate faculty. 1 unit. May be repeated for a total of 2 units.
493. **Professional Seminar in the Teaching of College English.** Prerequisite: Doctoral candidate standing or consent of instructor. 0 or 1 unit. May be repeated as topic varies but for 0 unit only. Students taking their first proseminar will be given priority in enrollment.
499. **Thesis Research.** Guidance in writing theses for doctoral degrees. Prerequisite: Doctoral candidate standing. 0 to 4 units.

RHETORIC AND COMPOSITION

103. **Writing Laboratory.** Intensive tutoring in basic writing skills to be scheduled at the Writing Laboratory. Prerequisite: Concurrent registration in Rhetoric 104 or 105, or Speech Communication 111 or 112, or written consent from the English Undergraduate Office. 1 hour. May be repeated for a total of 2 hours.

104. **EOP Rhetoric.** An introductory writing course designed for EOP students and with concentration on exposition; must be taken concurrently with Rhetoric 103, a 1-hour course offered at the Writing Laboratory. 3 hours.
105. **Principles of Composition.** Study of the methods of exposition, the problems of argument, the use of evidence, and style; practice in writing with primary emphasis on exposition. This course fulfills the campus rhetoric requirement. 4 hours.
108. **Forms of Composition.** Study of the methods of exposition, the problems of argument, the use of evidence, and style; examination of verbal and nonverbal composition through use of a thematic approach. See *Timetable* for current topics. This course fulfills the campus rhetoric requirement. 4 hours.
133. **Principles of Composition.** Practice in exposition, with emphasis on organization, paragraphing, and sentence structure. For the student whose career will require competence in writing clear, precise prose as an adjunct to other professional activity. Credit is not given for Rhetoric 133 and Rhetoric 143. Prerequisite: Fulfillment of campus rhetoric requirement, or consent of instructor. 3 hours.
143. **Intermediate Expository Writing.** Practice in expository types, with emphasis on style and critical analysis. Recommended for rhetoric majors. Credit is not given for Rhetoric 143 and Rhetoric 133. Prerequisite: Fulfillment of campus rhetoric requirement, or consent of instructor. 3 hours.
144. **Narrative Writing.** Practice in description, narrative sketches, and story writing. Prerequisite: Fulfillment of campus rhetoric requirement, or consent of instructor. 3 hours.
145. **Poetry Writing.** Practice in the writing of poetry; experimentation with a number of fixed forms and free verse, but emphasis mainly on the student's freedom to develop a personal style. Prerequisite: Fulfillment of campus rhetoric requirement, or consent of instructor. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
202. **Communications Workshop.** Independent writing projects and examination of literature as the cultural basis of the student's specialized fields. 3 hours.
205. **Advanced Narrative Writing, I.** Practice in the writing of fiction, with emphasis on the short story. Prerequisite: Rhetoric 144 or equivalent. 3 hours.
227. **Advanced Expository Writing.** Types of nonfiction prose, including the essay, criticism, biography, and historical writing. Prerequisite: Rhetoric 133 or 143, or consent of instructor. 3 hours.
263. **Fundamentals of Dramatic Writing and Structure.** Same as Speech Communication 263, Theatre 280, and Radio and Television 280. Study of basic structure of drama; writing of scenes and analysis of short and long dramatic works; and a term project consisting of a play analysis paper or original short play. Individual students may be given permission to work in areas of film or television. Prerequisite: Consent of instructor. 3 hours.
302. **Advanced Writing Topics.** Practice in various literary genres and in their combinations for mature students who have some writing experience and a background of data and impressions which they wish to develop in writing of near-professional quality. Individual conferences at hours to be arranged. Prerequisite: Consent of instructor. 3 hours or 1 unit.
305. **Advanced Narrative Writing, II.** Continued practice in the writing of fiction, with emphasis on the longer story and novelette. Prerequisite: Rhetoric 205. 3 hours or 1 unit.
306. **The Writing of Poetry.** Practice of the writing of poetry aided by intensive study of examples. Prerequisite: Rhetoric 145. 3 to 6 hours, or 1 or 2 units. May be repeated for a maximum of 6 hours or 2 units.
355. **Creative Writing Tutorial.** Personal direction in a writing project: fiction (novel or short stories), drama, poetry, criticism, nonfiction, narrative, etc. Frequency of conference to be determined by the type of project. Prerequisite: A preparatory course in advanced writing (Rhetoric 205, 227, 305, or 306; or Speech Communication 263 or 363). 3 to 6 hours, or 1 to 2 units. May be repeated for a maximum of 6 hours or 2 units.

French

Acting Head of Department: Professor E. Talbot

Department Office: 2090 Foreign Languages Building, Urbana

101. **Elementary Course, I.** Grammar, pronunciation, reading of modern authors, composition, and conversation. For students who have had no work in French. All students are required to attend two twenty-minute laboratory sessions per week. 4 hours.
102. **Elementary Course, II.** Continuation of French 101. All students are required to attend two twenty-minute laboratory sessions per week. Prerequisite: French 101 or one year of high school French. 4 hours.
103. **Modern French.** Reading of modern authors; conversation and pronunciation; and syntax and some composition. Students planning to major or minor in French should take French 133 in lieu of French 103. Prerequisite: French 102 or equivalent, or a placement score showing high school achievement equivalent to French 102. 4 hours.
104. **Modern French Literature and Civilization.** Continuation of French 103. Reading of modern authors and an introduction to French civilization; some syntax and composition; and conversational practice. Completion satisfies graduation requirements in the College of Liberal Arts and Sciences. Students planning to take advanced French courses are to take French 134 in lieu of French 104. Prerequisite: French 103 or equivalent, or a placement score showing high school achievement equivalent to French 103. 4 hours.
105. **Intensive Elementary French.** Equivalent to French 101 and 102. Oral comprehension, speaking, reading, and writing skills approached by the audiolingual method; some reading of literary texts. For students who have had no previous French and who want to learn at a rapid rate. All students are required to register for two hours of work weekly in the language laboratory. 8 hours.
106. **Intensive Elementary and Intermediate French.** Combines French 102 and 103 for students having attained 101 proficiency and who wish to advance more rapidly. Prerequisite: French 101 or equivalent, or a placement score showing high school achievement equivalent to French 101. 8 hours.
107. **Intensive Intermediate French.** Combines French 103 and 104 for students having attained 102 proficiency and who wish to advance more rapidly. Prerequisite: French 102 or 105, or equivalent. 8 hours.
113. **Conversational Practice.** Oral practice for the development of elementary conversational skill and the improvement of pronunciation. Designed as a supplement to French 103 or 104, and open only to students concurrently enrolled in either French 103 or 104. Prerequisite: French 102 or two years of high school French. 1 hour.
114. **Conversational French.** Practice in spoken French. May be substituted for French 104 to satisfy the graduation requirements in the College of Liberal Arts and Sciences; does not serve as a prerequisite for advanced courses in French without departmental approval which usually requires a proficiency examination at the 104 level. Prerequisite: French 103 or 123, or equivalent, or a placement score showing high school achievement equivalent to French 103. 4 hours.
123. **Readings in French Literature.** Readings in French literature (texts in French with discussion in English); some grammar essential to development of reading skill; and additional readings in English of authors treated assigned according to demonstrated interest. Serves as prerequisite to French 124; students planning to take advanced French courses should enroll in French 133. Prerequisite: French 102 or equivalent, or a placement score showing high school achievement equivalent to French 102. 4 hours.
124. **Readings in French Literature.** Additional readings in English of authors treated will be assigned according to demonstrated interest. May be substituted for French 104 to satisfy the graduation requirements in the College of Liberal Arts and Sciences; does not serve as a prerequisite for advanced courses in French without departmental approval which usually requires a proficiency examination at the 104 level. Prerequisite:

- French 103; French 123; placement by virtue of high school units (usually three years). 4 hours.
133. **Accelerated Modern French.** Same as French 103, but accelerated for those interested in pursuing French in advanced courses. Prerequisite: French 102 or two semesters of college French, or a placement score showing high school achievement equivalent to French 102. Normally for students with a B average in French or with consent of instructor. 4 hours.
134. **Accelerated Modern French Literature and Civilization.** Reading of major French writers from several centuries, and introduction to French civilization, syntax and composition, and conversational practice. An accelerated course for those intending to take advanced courses in French. Prerequisite: French 133, or French 103 with department approval, or three semesters of college French, or a placement score showing high school achievement equivalent to French 103. 4 hours.
144. **France and the French in the Twentieth Century.** Contemporary French life and institutions reflected in modern writing; some syntax, composition, and conversational practice. May be substituted for French 104 to satisfy the graduation requirements in the College of Liberal Arts and Sciences; does not serve as a prerequisite for advanced courses in French without departmental approval which usually requires a proficiency examination at the 104 level. Prerequisite: French 103, three semesters of college French, or a placement score showing high school achievement equivalent to French 103. 4 hours.
154. **Contrastive Studies of French and American Culture.** Provocative commentaries on aspects of American life and institutions by contemporary French writers and intellectuals; some syntax, composition, and conversational practice. May be substituted for French 104 to satisfy the graduation requirements in the College of Liberal Arts and Sciences; does not serve as a prerequisite for advanced courses in French without departmental approval which usually requires a proficiency examination at the 104 level. Prerequisite: French 103 or three semesters of college French, or a placement score showing high school achievement equivalent to French 103. 4 hours.
164. **French Readings in the General Sciences.** Designed for those interested in a reading background in general scientific works. May be substituted for French 104 to satisfy the graduation requirements in the College of Liberal Arts and Sciences; does not serve as a prerequisite to advanced courses in French without departmental approval which usually requires a proficiency examination at the 104 level. Prerequisite: French 103 or equivalent, or a placement score showing high school achievement equivalent to French 103. 4 hours.
174. **Readings in French Newspapers and Magazines.** Study of current events and contemporary French life from the reading of newspapers and magazines specially ordered from France; requires fee of \$5.00 to cover subscription cost. May be substituted for French 104 to satisfy graduation requirements of the College of Liberal Arts and Sciences; does not serve as a prerequisite to advanced courses in French without departmental approval which usually requires examination at the 104 level. Prerequisite: French 103 or equivalent, or a placement score showing high school achievement equivalent to French 103. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Introduction to French Literature.** Prerequisite: French 104 or 107, or four years of high school French, or equivalent. 3 hours.
202. **Introduction to French Literature.** Continuation of French 201. Prerequisite: French 104 or 107, or four years of high school French, or equivalent. 3 hours.
211. **Oral French, I.** Training for the development of oral facility; exercises for the improvement of pronunciation and diction; and optional practice in the language laboratory. Prerequisite: French 104 or 107, or 103 and 113, or four years of high school French. 3 hours.
212. **Oral French, II.** Continuation of French 211; optional practice in the language laboratory. Prerequisite: French 211. 3 hours.

215. **Grammar and Composition.** Training in French syntax, translation from English into written French, and directed composition. Prerequisite: Four years of high school French or equivalent, or French 134 or, with departmental approval, French 104 or 107. 3 hours.
217. **Advanced Oral French.** An intensive course stressing comprehension, pronunciation, diction, and fluency; work includes conversation, oral reports, and group discussions. Required of French teacher-education majors. Prerequisite: French 212. 4 hours.
218. **Conversation dirigée.** Directed conversation stressing fluency and accuracy in French through conversations, reports, and discussions specifically centered around contemporary French life and culture. May not be used to satisfy major requirements. Prerequisite: French 217 or equivalent. 2 hours.
220. **Sixteenth-Century Literature.** General survey of the literature of the French Renaissance. Prerequisite: French 201 and 202. 3 hours.
223. **French Literature of the Seventeenth Century, I.** Major French writers of the preclassical period. Prerequisite: French 201 and 202. 3 hours.
224. **French Literature of the Seventeenth Century, II.** Major French writers of the classical period. Prerequisite: French 201 and 202. 3 hours.
227. **French Literature of the Eighteenth Century, I.** Montesquieu, Voltaire, and their contemporaries. Prerequisite: French 201 and 202. 3 hours.
228. **French Literature of the Eighteenth Century, II.** Diderot, Rousseau, and their contemporaries. Prerequisite: French 201 and 202. 3 hours.
230. **French Literature of the Nineteenth Century, I: 1800-1850.** Major prerealist and romantic writers. Prerequisite: French 202 or equivalent, or consent of instructor. 3 hours.
231. **French Literature of the Nineteenth Century, II: 1850-1900.** The evolution of romanticism and realism into the naturalist and symbolist movements. Prerequisite: French 202 or equivalent, or consent of instructor. 3 hours.
233. **French Literature of the Contemporary Period, I.** Modern poetry from Baudelaire to Valéry; prose writers from 1900 to 1940. Prerequisite: French 201 and 202. 3 hours.
234. **French Literature of the Contemporary Period, II.** Continuation of French 233. Prerequisite: French 201 and 202. 3 hours.
255. **Introduction to French Literature in Translation, I.** Study of selected major works of French literature from the Renaissance to the Enlightenment. Texts and lectures in English; not open to students majoring in French. 4 hours.
256. **Introduction to French Literature in Translation, II.** Study of selected major works of French literature from the romantic period to the present. Texts and lectures in English; not open to students majoring in French. 4 hours.
270. **Parateaching in French.** Parateaching prior to the practicum in local schools under the direct supervision of University of Illinois French faculty and the teaching staff of participating public schools. Prerequisite: French 212 and 215, or equivalent; permission of French teaching education adviser. 2 hours. May be repeated for credit.
280. **Teachers Course.** Survey of resources, classroom materials, standard practices, and problems in the teaching of French with practical application to actual classroom situations. Required for teacher training majors in French. This course does not meet during the period teacher-training majors are off campus. Prerequisite: French 201 and 202, and 211 and 212, and 215, or equivalent. 4 hours.
288. **French and Comparative Cinema, I.** Selected world cinema trends to approximately 1960, with emphasis on French directors (Clair, Vigo, Renoir, Carne, Clouzot, etc.); aesthetic, sociopolitical, historical, literary, and technical aspects; meets six hours a week. No knowledge of French necessary. Prerequisite: One University-level film studies course or consent of instructor. 4 hours.
289. **French and Comparative Cinema, II.** Continuation of French 288. Selected world cinema trends since approximately 1960, with emphasis on French directors (Chabrol, Godard, Truffaut, Resnais, Marker, Rohmer, etc.); meets six hours a week. No knowl-

edge of French necessary. Prerequisite: One University-level film studies course or consent of instructor. 4 hours.

290. **Individual Study: Major Tutorial.** A tutorial taken by students in the course of two of their last four semesters of undergraduate study. Students read the works on a departmental reading list with the guidance of a tutor, repeating enrollment for a total of 2 hours credit, normally at the rate of 1 hour per semester. Prerequisite: French 201, 202, 211, and 215, or equivalent; a declared field of concentration in French; junior standing. 1 to 2 hours.
292. **Senior Thesis.** For candidates for honors in French and for other seniors. Prerequisite: Senior standing. 2 hours. May be repeated for a maximum of 4 hours credit.
298. **Senior Seminar.** Studies in authors, genres, themes, and movements in French literature; conducted entirely in French. Prerequisite: Senior standing. 3 hours. May be repeated for credit.
299. **Study Abroad.** Lectures, seminars, and practical work in French language, literature, and civilization, in France. Prerequisite: French 201 and two of the following: French 211, 212, or 215; 3.75 overall average; 4.0 average in French courses. 0 to 16 hours per semester, to a total of 32 hours.
311. **Diction.** Training in the improvement of French pronunciation, with special attention to the problems of teachers. It is recommended that French 311 and 313 be taken concurrently. Prerequisite: French 211 or equivalent. 2 hours or $\frac{1}{2}$ unit.
313. **Phonetics.** Systematic study of the sounds and sound patterns of French. It is recommended that French 313 and 311 be taken concurrently. Prerequisite: French 212 or equivalent. 3 hours or $\frac{3}{4}$ unit.
314. **Advanced Grammar and Style.** Advanced theoretical and practical study of present-day French, with free composition and some consideration of stylistics. Prerequisite: French 215 or equivalent. 3 hours or $\frac{3}{4}$ unit.
315. **Style and Translation.** Linguistic analysis of a variety of French prose styles to illustrate the range of expressions for the same or similar ideas; translation into French of fairly difficult English prose. Prerequisite: French 314. 3 hours or $\frac{3}{4}$ unit.
316. **Structure of the French Language.** Same as Linguistics 316. General survey of the linguistic structure of modern standard French, including phonology, morphology, and syntax; emphasis on the differences between its spoken and written forms. Prerequisite: French 313 or equivalent training in phonetics. 3 hours or $\frac{3}{4}$ unit.
321. **Studies in French Literature in Translation.** Major writers or themes of French literature studied in English translation; see *Timetable* for current topics. Prerequisite: Junior standing or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated to a maximum of 6 hours or 2 units. Credit not applicable to degree programs in French.
335. **French Civilization, I.** Survey of French life and French institutions, intended as a background for literary studies and as a preparation for the teaching of French; given in French. Prerequisite: French 201, 202, 211, and 215, or equivalent. 3 hours or $\frac{3}{4}$ unit.
336. **French Civilization, II.** Continuation of French 335. Prerequisite: French 201, 202, 211, and 215, or equivalent. 3 hours or $\frac{3}{4}$ unit.
343. **Studies in French Literature.** See *Timetable* for current topics. Prerequisite: Junior standing. 3 hours, or $\frac{3}{4}$ to 1 unit.
355. **France Today, I.** Social structures of France today and their manifestation in daily life and culture; study of the workings of various institutions and systems (political, judicial, economic, educational, etc.) for an understanding of current problems, providing background for closer study, in the second semester, of the forces affecting daily life. 3 hours, or $\frac{3}{4}$ to 1 unit.
356. **France Today, II.** Study of the conditions of daily life in France today, its organization, the major forces and issues affecting it; topics include class structure, youth culture, urban and minority problems, the press, media, and popular culture and the arts. 3 hours, or $\frac{3}{4}$ to 1 unit.

362. **Introduction to Romance Linguistics.** Same as Italian, Linguistics, Portuguese, Romance Linguistics, and Spanish 362. Comparative and historical analysis of the Romance languages. Prerequisite: Four semesters of a Romance language or Latin, or equivalent. 3 hours or $\frac{3}{4}$ unit.
379. **Studies in Francophonie.** Studies of various genres, periods, and topics of French literature outside of France, with a different geographical emphasis each semester. Regions include black Africa, the Caribbean, Canada, North Africa, the Middle East, and Switzerland. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated to a maximum of 12 hours or 4 units.
382. **Language Laboratory Techniques.** Same as Classical Civilization, English as a Second Language, German, Humanities, Slavic, and Spanish 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
399. **Study Abroad.** Lectures, seminars, and practical work in francophone literature and civilization, in a French-speaking country. Prerequisite: French 201 and 202, and two of the following: French 211, 212, and 215; or equivalent. Not open to undergraduates in the Paris program. 0 to 16 hours, or 0 to 4 units.
400. **Beginning French for Graduate Students.** Basic grammar, vocabulary, and reading practice; designed for graduate students desiring help in preparing for the French reading requirements for the Ph.D. 4 hours. No graduate credit.
401. **Reading French for Graduate Students.** Grammar, vocabulary, and general and special reading; designed for graduate students desiring help in preparing for the French reading requirements for the Ph.D. Prerequisite: French 400, or French 101 and 102, or equivalent. 4 hours. No graduate credit.
403. **The Study of Culture: Fine Arts, History, and Literature, I.** Master works studied with a special view to their presentation in foreign language programs in secondary schools and in junior colleges; designed for students in the program for the Master of Arts in the Teaching of French. 1 unit.
404. **The Study of Culture: Fine Arts, History, and Literature, II.** Continuation of French 403. Prerequisite: French 403 or consent of instructor. 1 unit.
405. **Techniques in Teaching College and Secondary French.** Examination and discussion of classroom procedures and language laboratory techniques in teaching French at the college and secondary level, associated with demonstration class and supervision of teaching practice. Required of new teaching assistants in the Department of French. 0 credit.
427. **History of the French Language.** A study of the development of the French language from Vulgar Latin to the present day. 1 unit.
430. **Introduction to Research and Textual Criticism.** Proseminar in literary studies: research and methods; approaches to the literary text. Required of all M.A. and Ph.D. candidates. 1 unit.
431. **Introduction to Old French Language.** Outline of Old French grammar and training in reading Old French (twelfth and thirteenth centuries). 1 unit.
432. **Studies in Medieval French Literature.** Close study of one or more topics in Old French literature. See *Timetable* for current topics. Prerequisite: French 431 or consent of instructor. 1 unit.
433. **Studies in Sixteenth-Century French Literature, I.** Major writers of the sixteenth century studied with reference to the most important intellectual and religious preoccupations of their century. 1 unit.
434. **Studies in Sixteenth-Century French Literature, II.** Themes and techniques of major poets and poetic schools of the sixteenth century. 1 unit.
435. **Studies in Seventeenth-Century French Literature, I.** 1 unit.
436. **Studies in Seventeenth-Century French Literature, II.** 1 unit.

437. **Studies in Eighteenth-Century French Literature, I.** 1 unit.
438. **Studies in Eighteenth-Century French Literature, II.** 1 unit.
439. **Studies in Nineteenth-Century French Literature.** Close study of one or more topics in nineteenth-century French literature; see *Timetable* for current topics. 1 unit. May be repeated to a maximum of 2 units.
441. **Studies in Twentieth-Century French Literature, I.** 1 unit.
442. **Studies in Twentieth-Century French Literature, II.** 1 unit.
443. **French Studies.** A flexible course limited only by the concentration of its material in French; may be activated by student request or faculty proposal. 1 unit.
447. **Introduction to Romance Stylistics.** Same as Italian, Portuguese and Spanish 447. A brief history of the schools and theories of Romance stylistics, especially the French-Swiss *stylistique* (Bally, Marouzeau, and Cressot) and the German-Spanish *Stilforschungen* (Spitzer, Hatzfeld, Kayser, A. Alonso, and D. Alonso); includes a study of representative works and assigned topics for analysis. Prerequisite: Graduate standing in one of the Romance languages; reading knowledge of French and Spanish or consent of instructor. 1 unit.
448. **Studies in French Descriptive Linguistics.** Selected specialized topics in the morphology, derivation, and syntax of contemporary standard French; topics vary each semester, e.g., verb morphology, noun derivation, interrogative systems, and nominal phrases. Prerequisite: French 316. 1 unit.
452. **Studies in French and Comparative Cinema.** Same as Comparative Literature 472. Historical, aesthetic, social, and technical studies of the French cinema; its development and relation to world cinema and to literature. 1 unit. May be repeated to a maximum of 3 units credit.
462. **Seminar in Romance Linguistics.** Same as Italian, Linguistics, Portuguese, Romance Linguistics, and Spanish 462. Selected topics in comparative Romance linguistics. Prerequisite: French 362 and consent of instructor. 1 unit.
463. **College Teaching of Foreign Languages.** Same as English as a Second Language, German, Russian, and Spanish 463. Rationale for curricular objectives for college courses in foreign languages; the teaching and testing of pronunciation, listening comprehension, speaking, reading, writing, cultural understanding, and literary appreciation; the use of technology; and recent experimentation. 1 unit.
468. **Old Provençal Literature.** Selected readings of various genres, emphasizing lyric poetry and with attention to its position in European literature; lectures in English. Prerequisite: Consent of instructor. 1 unit.
470. **Seminar in Old French Literature.** Discussion and research on some specialized topic in Old French literature. See *Timetable* for current topic. Prerequisite: French 431 or consent of instructor. 1 unit. May be repeated for credit.
471. **Seminar in Sixteenth-Century French Literature.** Discussion and research on some specialized topic in sixteenth-century French literature. See *Timetable* for current topic. 1 unit. May be repeated for credit.
472. **Seminar in Seventeenth-Century French Literature.** Discussion and research on some specialized topic in seventeenth-century French literature. See *Timetable* for current topic. 1 unit. May be repeated for credit.
473. **Seminar in Eighteenth-Century French Literature.** Discussion and research on some specialized topic in eighteenth-century French literature. See *Timetable* for current topic. 1 unit. May be repeated for credit.
474. **Seminar in Nineteenth-Century French Literature.** Discussion and research on some specialized topic in nineteenth-century French literature. See *Timetable* for current topic. 1 unit. May be repeated for credit.
478. **Seminar in Twentieth-Century French Literature.** Same as Comparative Literature 478. Discussion and research on some specialized topic in twentieth-century French literature. See *Timetable* for current topic. 1 unit. May be repeated for credit.
479. **Seminar in French Literature.** Discussion and research on some specialized area in French literature. See *Timetable* for current topic. 1 unit. May be repeated for credit.

- 481. **Seminar in Linguistic and Psychological Foundations of Language Teaching.** Same as English as a Second Language, German, Russian, and Spanish 481. Language teaching problems considered in the light of theoretical and experimental work in language acquisition, verbal learning and memory, motivation, speech perception, reading, error analysis, and language as an aspect of culture and societal relations. Prerequisite: Consent of instructor. 1 unit.
- 482. **Seminar in French and Comparative Cinema.** Same as Comparative Literature 473. Study of major French directors within the context of French and international cinema; their comparison with selected non-French directors; and the relationships of films and other literary forms. 1 unit.
- 491. **Individual Topics.** Prerequisite: Graduate standing with a major or minor in French. $\frac{1}{4}$ to 1 unit.
- 499. **Thesis Research.** 0 to 4 units.

Germanic Languages and Literatures

(Including German, Germanic, and Scandinavian)

Head of Department: Professor E. H. Antonsen

Department Office: 3072 Foreign Languages Building, Urbana

GERMAN

- 101. **Elementary Course.** Oral practice, reading, and grammar for beginners. 4 hours.
- 102. **Elementary Course.** Continuation of German 101. Prerequisite: One semester of college German or equivalent. 4 hours.
- 103. **Intermediate Course.** Continuation of German 102. Prerequisite: Two semesters of college German or equivalent. 4 hours.
- 104. **Intermediate Course.** Continuation of German 103. Prerequisite: Three semesters of college German or equivalent. 4 hours.
- 112. **Elementary Speaking.** Practice in speaking idiomatic German; emphasis on spontaneous expression. Prerequisite: One semester of college German or equivalent. 4 hours.
- 113. **Intermediate Speaking.** Continuation of German 112. Prerequisite: Two semesters of college German or equivalent. 4 hours.
- 114. **Intermediate Speaking.** Continuation of German 113. Prerequisite: Three semesters of college German or equivalent. 4 hours.
- 122. **Elementary Reading.** Practice in reading German, with emphasis on expository prose. Prerequisite: One semester of college German or equivalent. 4 hours.
- 123. **Intermediate Reading.** Continuation of German 122. Prerequisite: Two semesters of college German or equivalent. 4 hours.
- 124. **Intermediate Reading.** Continuation of German 123. Prerequisite: Three semesters of college German or equivalent. 4 hours.
- 153. **Practice in Conversation.** Emphasis on learning to converse in German in an everyday manner. Prerequisite: Two semesters of college German or equivalent. 2 hours.
- 189. **Living German--German Living.** Practice in speaking German for students living in the German House. Prerequisite: Elementary speaking knowledge of German. 1 hour. May be repeated to a maximum of 3 hours.
- 199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
- 201. **German Literature Since 1648 in English Translation.** Important trends in German literature since 1648; reading of some important prose works. For students with no knowledge of German. 3 hours.
- 202. **Society in the Novel.** No knowledge of German required. Portrayal of society in German novels from 1648 to the present; reading and discussion of works by Grimmelshausen, Goethe, Hoffmann, Fontane, Thomas Mann, Hesse, Kafka, and Grass. 3 hours.

203. **Goethe in Translation.** Same as Comparative Literature 203. Introduction to the life and works of Johann Wolfgang von Goethe; focus on his poetic work and treatment of his major contributions to science as imaginative literature. 3 hours.
204. **Medieval Literature in Translation.** Same as Comparative Literature 204. German medieval precourtly and courtly literature in the European context; readings in the works of Hartmann von Aue, Gottfried von Strassburg, Wolfram von Eschenbach, and others, including the following epics: *Nibelungenlied*, *Gregorius*, *Tristan*, and *Parzival*. 3 hours.
208. **German Source Readings from the History of Science.** Reading and discussion of eighteenth- and nineteenth-century contributions to physics, chemistry, and biology which are basic in the respective disciplines. Prerequisite: German 104 or 124, or consent of instructor. 3 hours.
210. **Masterpieces of German Literature.** Introduction to German literature, its subjects, forms, movements, and ideas. Prerequisite: Two years of college German or equivalent. 3 hours.
211. **Conversation and Writing.** Prerequisite: German 104 or equivalent, or consent of instructor. 3 hours.
212. **Conversation and Writing.** Continuation of German 211. Prerequisite: German 211 or equivalent, or consent of instructor. 3 hours.
250. **The German Novelle of the Nineteenth Century.** Selected works of representative writers (such as Brentano, Droste-Hulshoff, Hoffmann, Hauptmann, Kleist, Meyer, Stifter, Storm). Prerequisite: German 210 or equivalent. 3 hours.
251. **The German Novelle of the Twentieth Century.** Selected works of representative writers (such as Brecht, Boll, Grass, Hesse, Kafka, Mann). Prerequisite: German 210 or equivalent. 3 hours.
252. **Nineteenth-Century German Drama.** Selected works of representative playwrights (such as Buchner, Grillparzer, Hebbel, Kleist), including their eighteenth-century roots and their background in classical drama. Prerequisite: German 210 or equivalent. 3 hours.
253. **Twentieth-Century German Drama.** Modern German drama from Hauptmann to the present (such as Brecht, Borchert, Durrenmatt, Frisch, Kaiser, Weiss). Prerequisite: German 210 or equivalent. 3 hours.
260. **Lyrics and Ballads.** Poetical and metrical survey of German lyric verse from its beginnings to modern times, with a critical analysis of representative poems. Prerequisite: German 210 or equivalent. 3 hours.
270. **Twentieth-Century German Literature.** Introduction to trends of modern civilization as reflected in contemporary German literature. Prerequisite: German 210 or equivalent. 3 hours.
280. **Teachers' Course.** Introduction into the problems of the teaching of German and a study of textbooks. Prerequisite: Senior standing or consent of instructor. 4 hours.
293. **Honors Senior Thesis.** Intended primarily for candidates for honors in German, but open to other seniors. Prerequisite: Senior standing; consent of instructor. 2 to 4 hours. May be repeated.
296. **Special Topics in German Literature.** Introductory study in such topics as individual authors, selected literary movements or periods, modes of inquiry in literary study, minor genres, subgenres, extraliterary influences, etc. Prerequisite: Reading fluency in German beyond the fourth-semester college level. 3 hours.
299. **Study Abroad.** Lectures, seminars, and practical work in language, literature, education, and civilization, in Austria. Prerequisite: German 211 or equivalent; 3.75 overall average; 4.0 in German courses. 0 to 16 hours per semester to a maximum of 32 hours, all of which must be earned in two semesters.
300. **German Literature 750-1450.** Literary, thematic, cultural, and bibliographical analysis of the major authors, works, genres, and movements in German literature from 750 to 1450. Prerequisite: German 210 and one other course in German literature or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.

301. **German Literature 1450-1700.** A literary, thematic, cultural, and bibliographical analysis of the major authors, works, genres, and movements in German literature from 1450 to 1700. Prerequisite: German 210 and one other 300-level course in German literature, or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
302. **German Literature Since 1700.** Prerequisite: German 210 and one other course in German literature, or equivalent. 3 hours or $\frac{3}{4}$ unit.
303. **Advanced Conversation, Composition, and Syntax.** Intensive study of advanced problems of grammar, syntax, and style. Prerequisite: German 211 and 212, or equivalent. 3 hours or $\frac{1}{2}$ unit.
304. **Advanced Conversation.** Practice in free conversation with native speaker. Prerequisite: German 303 or equivalent. 1 hour or 0 unit.
305. **Modern German Poetry.** A poetical and metrical survey of modern German lyric verse. Prerequisite: German 210 and one other course in German literature, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
306. **Contemporary German Poetry.** Poetical and metrical survey of contemporary German lyric verse. Prerequisite: German 305 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
311. **Goethe.** Introduction to Goethe's life and works. Prerequisite: German 210 and one other course in German literature, or equivalent. 3 hours or $\frac{3}{4}$ unit.
312. **Goethe's Faust.** Intensive study of Goethe's *Faust*, parts I and II, with an examination of the theme's evolution in literature. Prerequisite: German 210 and one other course in German literature, or equivalent. 3 hours or $\frac{3}{4}$ unit.
320. **History of German Civilization.** Selected topical, historical, and pictorial analysis of Germany's culture and civilization. Prerequisite: German 210 and one other course in German literature, or equivalent. 4 hours or $\frac{3}{4}$ unit.
330. **Martin Luther.** Same as Religious Studies 330. Special attention to Luther as an artist, and to his importance for the development of German language and literature; attention also paid to the historical and intellectual trends of the fifteenth and sixteenth centuries as well as to the significance of Luther in modern psychological and sociological thought. Prerequisite: A reading knowledge of German. 3 hours or $\frac{3}{4}$ unit.
331. **The Age of Lessing.** The life and works of Gotthold Ephraim Lessing and his contemporaries. Prerequisite: German 210 and one other course in German literature, or equivalent. 3 hours or $\frac{3}{4}$ unit.
332. **Schiller.** Introduction to Friedrich Schiller's life and works; reading and discussion of selected dramas, ballads, philosophical poems, and major essays. Prerequisite: German 210 and one other course in German literature, or equivalent. 3 hours or $\frac{3}{4}$ unit.
365. **German Phonology and Morphology.** Introductory survey of the phonological and morphological structure of the German language. Prerequisite: Three years of college German or equivalent. 3 hours or $\frac{3}{4}$ unit.
382. **Language Laboratory Techniques.** Same as Classical Civilization, English as a Second Language, French, Humanities, Slavic, and Spanish 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
387. **Introduction to Myth and Folklore.** Same as Comparative Literature, English, Slavic, and Speech Communication 387. Prerequisite: One year of college literature or consent of instructor. 3 hours or 1 unit.
390. **The German Cinema.** History and criticism of the German film from its beginnings through Expressionism and the New Objectivity of the 1920s, the Third Reich and the period of decline, to the young German film of the 1960s; weekly film screenings, lectures, and discussions. Knowledge of German useful but not required. 3 hours or $\frac{3}{4}$ unit.
396. **Special Topics in German Literature.** Intensive study of individual authors or other restricted topics in German literature. Prerequisite: Two advanced courses in German literature. 4 hours, or $\frac{3}{4}$ or 1 unit.

400. **Beginning German for Graduate Students.** Introduction to the reading of German texts in the sciences and the humanities. 4 semester hours. No graduate credit.
401. **Readings in German for Graduate Students.** Designed for graduate students preparing for the German reading requirements for the Ph.D. Prerequisite: German 400 or equivalent. 4 semester hours. No graduate credit.
411. **Proseminar.** Methods of literary criticism and research. To be taken concurrently with German 495. 1 unit.
412. **Proseminar.** Methods in German language study. Prerequisite: German 365 or equivalent. 1 unit.
415. **Middle High German.** Prerequisite: German 365. 1 unit.
416. **Middle High German Literature.** Prerequisite: German 415 or equivalent. 1 unit.
420. **History of the German Language.** The internal and external history of German from prehistoric times to the present. Prerequisite: German 365 or equivalent. 1 unit.
441. **German Romanticism.** 1 unit.
442. **Nineteenth-Century German Realism.** German realism as manifested in the literature between romanticism and naturalism, with emphasis on so-called poetic realism. Prerequisite: German 301 and 302, or equivalent. 1 unit.
445. **Old High German.** Grammar and interpretation of the oldest literary documents. Prerequisite: German 365. 1 unit.
447. **Old Saxon.** Synchronic-diachronic treatment of the language of the *Heliand* and *Genesis*; the position of Old Saxon in the Germanic languages with particular reference to Old High German and Old English. Prerequisite: German 445 or English 401, or consent of instructor. 1 unit.
451. **Naturalism, Symbolism, and Expressionism.** Same as Comparative Literature 441. Comparative analysis of German literature from the 1880s to the 1920s within the European context. 1 unit.
452. **German Literature from the Twenties to the Present.** Trends, problems, and personalities in recent German literature, including exile literature and literature of the Third Reich. Prerequisite: German 301 and 302, or equivalent. 1 unit.
460. **Seminar in Older German Literature.** Topics range from the earliest known literature to the Enlightenment. Prerequisite: German 411 and 495. 1 unit. May be repeated as topics vary.
461. **Seminar in Modern German Literature.** Same as Comparative Literature 482. Topics range from the Enlightenment to the present. Prerequisite: German 411 and 495. 1 unit. May be repeated as topics vary.
462. **Seminar in Literary Genres and Forms.** Same as Comparative Literature 461. Study of a form (the lyric, the novel, the drama, etc.) to discover its essential components in all the literatures studied and the significance of national variations. 1 unit. May be repeated to a maximum of 3 units as topic varies.
463. **College Teaching of Foreign Languages.** Same as French, Russian, Spanish, and English as a Second Language 463. Rationale for curricular objectives for college courses in foreign languages; the teaching and testing of pronunciation, listening comprehension, speaking, reading, writing, cultural understanding, and literary appreciation; the use of technology; and recent experimentation. 1 unit.
480. **Teaching German in College.** Introduction to the problems of teaching German in college. 1 unit.
481. **Seminar in Linguistic and Psychological Foundations of Language Teaching.** Same as French, Russian, Spanish, and English as a Second Language 481. Language teaching problems considered in the light of theoretical and experimental work in language acquisition, verbal learning and memory, motivation, speech perception, reading, error analysis, and language as an aspect of culture and societal relations. Prerequisite: Consent of instructor. 1 unit.
493. **Research in Special Topics.** $\frac{1}{4}$ to 2 units. May be repeated for a maximum of 2 units.
495. **Bibliography and Methods in Literary Research.** To be taken concurrently with German 411. $\frac{1}{2}$ unit.

499. **Thesis Research.** 0 to 4 units (summer session, 0 to 2 ½ units).

GERMANIC

367. **Introduction to Germanic Linguistics.** Same as Linguistics 367. Comparative and historical survey of the Germanic languages. Prerequisite: Completion of the foreign language requirement in the College of Liberal Arts and Sciences, or equivalent; some knowledge of German desirable. 2 hours or ½ unit.
426. **Gothic.** Synchronic and diachronic study of the Gothic language and its relationship to other Germanic and Indo-European languages; extensive reading of extant texts. Prerequisite: Germanic 367 or consent of instructor. 1 unit.
462. **Seminar in Germanic Linguistics.** Varying topics dealing with problems in diachronic and synchronic Germanic linguistics. Prerequisite: Consent of instructor. 1 or 2 units. May be repeated as topics vary.
465. **Comparative Germanic Phonology and Morphology.** Reconstruction of the phonological and morphological systems of Proto-Germanic and their development into the Germanic languages and dialects. Prerequisite: Germanic 426 or consent of instructor. 1 unit.
467. **Runology.** Detailed analysis of inscriptions in the "older" Germanic futhark, the Anglo-Frisian futhorc, and the Scandinavian "younger" futharks; their relationships and the correlation between phonological and orthographic developments. Prerequisite: Germanic 465 or consent of instructor. 1 unit.

SCANDINAVIAN

101. **Elementary Scandinavian, I.** The first of four semesters leading to a reading knowledge of Danish, Norwegian, and Swedish, and to an oral command of one of these languages; linguistic structure, reading, and oral practice. 4 hours.
102. **Elementary Scandinavian, II.** Continuation of Scandinavian 101. Structural differences between Danish or Swedish and Norwegian; oral practice and reading of simple texts. Prerequisite: Scandinavian 101. 4 hours.
103. **Intermediate Scandinavian, I.** Readings in Danish and Norwegian (or Swedish) literature; structure of Swedish (or Danish and Norwegian), with stress on the differences between Swedish and Danish. Prerequisite: Scandinavian 102 or equivalent. 4 hours.
104. **Intermediate Scandinavian, II.** Continuation of Scandinavian 103. Readings in classical and modern Danish, Norwegian, and Swedish texts. Prerequisite: Scandinavian 103. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
216. **Conversation and Writing.** Oral practice and composition in one of the Scandinavian languages. Prerequisite: Scandinavian 104. 2 hours.
293. **Honors Senior Thesis.** Prerequisite: Senior standing; consent of instructor. 1 to 2 hours.
361. **Ibsen in Translation.** Dramas in English translation; selected works of Ibsen's Scandinavian contemporaries. 3 hours or 1 unit.
362. **Strindberg and the Later Scandinavian Dramatists in Translation.** Major dramas and prose works of August Strindberg; selected plays by Kaj Munk, Kjeld Abell, Nordahl Grieg, and Par Lagerkvist. 3 hours or 1 unit.
405. **Old Norse-Icelandic, I.** Grammar and selected readings. 1 unit. Offered in alternate years.
406. **Old Norse-Icelandic, II.** Readings; selections from the Elder Edda and the sagas. Prerequisite: Scandinavian 405. 1 unit. Offered in alternate years.

History

Chairperson of Department: Professor W. L. Arnstein

Department Office: 309 Gregory Hall

111. **History of Western Civilization to 1815.** Europe from the age of the great discoveries to the close of the Napoleonic Wars. 4 hours.
112. **History of Western Civilization, 1815 to the Present.** Development of European nationalism, liberalism, and imperialism; world wars; and reconstruction. 4 hours.
131. **History of England to 1688.** Survey of the political and constitutional, social and economic, church and cultural, and imperial history of the British people from the beginning of English history through the revolution of 1688. 4 hours.
132. **History of England, 1688 to the Present.** Survey of the political and constitutional, social and economic, diplomatic and imperial, and cultural history of the British people from 1688 to the present. 4 hours.
151. **History of the United States to 1877.** Colonial foundations, movement for independence, and early years of the republic. Students are not given credit for both History 151, and History 260 and 261. 4 hours.
152. **History of the United States, 1877 to the Present.** A century of national life and organization. Students are not given credit for both History 152 and 262. 4 hours.
161. **Man and Society in East Asia, I.** Same as Asian Studies 161. A topical approach to the major themes of Chinese and Japanese civilizations through an examination of how people in these civilizations approached basic human and social problems. 3 hours.
162. **Man and Society in East Asia, II.** Same as Asian Studies 162. Continuation of Asian Studies/History 161. Prerequisite: Asian Studies/History 161. 3 hours.
168. **Indian Civilization and Society.** Same as Anthropology 168. Introductory survey course on an interdisciplinary basis dealing with the evolution of Indian religion, politics, culture, and social organization. 4 hours.
169. **South Asia in the Modern Period.** Same as Anthropology 169. Interdisciplinary introduction to modern South Asian history and society. 4 hours.
171. **History of East Asia, I.** Survey of the development of Chinese and Japanese history, civilization, and institutions prior to the seventeenth century. 4 hours.
172. **History of East Asia, II.** Survey of China and Japan in modern times with particular reference to the modernization and revolutionary processes in East Asia. Prerequisite: History 171. 4 hours.
173. **Islamic History and Civilization in the Near and Middle East to 1770.** Development of Islamic beliefs, institutions, and culture in the nuclear Islamic region (the present area of the Arab countries and Israel, Iran, and Turkey) from Mohammed to the age of European expansion. 4 hours.
174. **Islamic History and Civilization in the Near and Middle East Since 1700.** Islamic civilization since the age of European expansion; imperialism, Westernization, nationalism, and modernization. Arab countries, Israel, Iran, and Turkey are covered. 4 hours.
175. **Latin America from Conquest to Independence.** Survey of Latin American history from the discovery of America to 1824. 3 hours. Credit may not be received for both History 175 and 275.
176. **Modern and Contemporary Latin America.** History of the Latin American republics from their independence to the present; emphasis on Argentina, Brazil, Chile, Colombia, Cuba, and Mexico. 3 hours. Credit may not be received for both History 176 and 275.
181. **The Ancient World.** Ancient empires and Greece. Prerequisite: Sophomore standing, or freshman standing with designation as James Scholar. 3 hours.
182. **The Ancient World.** Rome. Prerequisite: Sophomore standing, or freshman standing with designation as James Scholar. 3 hours.
198. **Freshman Seminar.** Through research, reports, and discussion in a selected field of historical study, the seminar provides an in-depth understanding of the problems of that

field and of the methodology of history as a discipline. Prerequisite: James Scholar standing or other designation as a superior student; consent of instructor. 3 to 4 hours. May be repeated to a total of 6 hours.

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
203. **The Age of Localism: The Early Middle Ages.** The failure of imperial Rome and the rise of the Church; the organization of European society on a local basis through manorialism and feudalism. 3 hours.
204. **The Revival of Europe: The High and Later Middle Ages.** The revival of the economy; the expansion of Europe; and the rise of national states. 3 hours.
211. **The Contemporary World: Political, Ideological, and International Forces.** Interpretation of the contemporary world covering the legacy of imperialism, militarism, and world politics, the revolt of the masses, the totalitarian state, nationalism, internationalism, and such related topics. 3 hours.
212. **The Contemporary World: Economic, Social, and Cultural Aspects.** Interpretation of the contemporary world covering the economics of global power, ideological and social forces, the individual and the modern mind, the collective society, the personality in history, and such related topics. 3 hours.
215. **History of North and West Africa.** Survey of major themes and events in the history of North and West Africa from prehistoric times and the peopling of Africa through the advent of Islam; North and West African empires and states in the medieval period; the arrival and departure of European colonial powers; and the re-emergence of independent African states. 3 hours.
216. **History of East and Southern Africa.** Survey of major themes and events from the Bantu migrations and the rise of Aksum through the development of states and empires, Islam, the expansion of trade, European colonial rule, nationalism, and the persistence of white domination in the south. 3 hours.
219. **Survey of Russian History from Early Times to the Present.** Main themes and problems of Russian history from earliest times to the present. 3 hours.
247. **Science in Western Civilization, I.** The intellectual and social history of science from antiquity through the Enlightenment; special emphasis on the scientific revolution of the seventeenth century. 3 hours.
248. **Science in Western Civilization, II.** Topics in the intellectual and social history of modern science, 1789 to the present. 3 hours.
249. **History of Medicine.** Rise and development of medicine in the West since the sixteenth century; interrelations of physiology, pathology, and social demands with the theory and practice of medicine; patterns of professionalization; social role of the physician; conflict among ideas of medicine as an art, a science, and a social service; and problems of mental illness, medical ethics, and nontraditional forms of practice. Prerequisite: One year of college biology or chemistry, one year of college history, or consent of instructor. 3 hours.
253. **Afro-American History to 1877.** History of Africans in the Americas, surveying the African slave trade, slavery in the European colonies of the Americas, early United States slavery, and the Afro-American in the Civil War and Reconstruction. 3 hours.
254. **Afro-American History Since 1877.** History of Afro-Americans in the age of white supremacy; the rise of modern protest organizations; the era of integration; and the black power movement. 3 hours.
260. **Colonial Beginnings and Early United States History to 1815.** Social, economic, and political survey of the region and its relation to the evolving Atlantic community. Credit is not given for both History 260 and 151. 3 hours.
261. **The United States in the Nineteenth Century.** History of the United States from 1815 to 1900. Credit is not given for both History 261 and 151. 3 hours.
262. **The United States in the Twentieth Century.** One major emphasis on foreign policy, including the emergence of the United States as a great power after 1898; a second emphasis on the Progressive movement and recurrent attempts at the reform of American

society; and racial and urban problems and the conservation of natural resources included. Credit is not given for both History 262 and 152. 3 hours.

264. **Social History of Rural America.** Rural life in America from colonial settlement to the present, focusing on the nineteenth century; considers social, political, and economic aspects of rural society, emphasizing social themes such as the family community and responses to industrialization. 3 hours.
271. **French Colonization of North America, 1500-1778.** French, Indian, British, and Americans in Canada and the Trans-Appalachian West from the sixteenth century to the eighteenth century. Prerequisite: One year of college history. 3 hours.
272. **History of European Women.** Status of women in Europe, cross-culturally and by class, from ancient to modern times; exploration of the contributions of women as individuals and as groups to the distinctive development of Europe's national cultures. Prerequisite: One year of European history or consent of instructor. 3 hours.
274. **U. S. and World Crisis, 1917 to Present.** History of American foreign relations since World War I. 3 hours.
275. **Themes and Issues in Latin American History.** A thematic survey of major Latin American issues, trends, and events from the colonial period through the modern era. 3 hours. Credit may not be received for both History 275 and 175 or 176.
281. **History of Land Warfare.** A chronological survey of the history of war in the western world from ancient Greece to the present; designed to give a broad understanding of the interactions of military organizations and society in both war and peace. 3 hours.
282. **History of Naval Warfare.** A study of the development of naval warfare in the western world from ancient times to the present, with emphasis on naval developments and operations in the nineteenth and twentieth centuries. 3 hours.
290. **Individual Study.** Readings in selected fields in consultation with the instructor. Prerequisite: Junior or senior of high standing; written consent of the honors adviser. 2 to 4 hours.
293. **Honors Senior Thesis.** Two-semester research project. Prerequisite: History concentrator with senior standing and 4.25 average in history courses; written consent of honors adviser. May be taken by honors students in partial fulfillment of department honors requirements. 3 hours. Must be repeated for a total of 6 hours.
294. **Teaching of History.** Prerequisite: One year of college history; senior standing. 2 hours.
296. **Special Topics.** Topics are given on an experimental one-time-only basis. 3 hours.
298. **Colloquium in History.** Prerequisite: Junior standing. History concentrators and social studies teacher trainees have priority in enrolling for this course. 3 hours. May be repeated as topics vary to a maximum of 6 hours.
300. **Evolutionary and Social Thought Since 1800.** Studies evolutionary theory, the scientific and social contexts in which it has developed, and the inferences drawn from it concerning man's nature and function. 3 hours, or $\frac{1}{2}$ or 1 unit.
301. **History of Poland to 1795.** Comprehensive survey from prehistoric beginnings through the Golden Age to the disappearance of the Polish state; attention to economic, social, and cultural as well as political themes. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
302. **History of Poland Since 1795.** Comprehensive survey of the era of partitions from 1795 to 1918 and of subsequent political independence; attention to economic, social, and cultural as well as political themes. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
303. **The Near and Middle East in the Twentieth Century.** Great power diplomacy, imperialism, nationalism, and problems of modernization studied through coverage of Arab states and Israel, Turkey, and Iran. Prerequisite: One year of college history or political science, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
304. **Medieval Civilization.** Same as Religious Studies 304. The architectural, artistic, philosophical, political, and religious components of medieval culture, thought, and

- patterns of behavior; includes monasticism and society and the individual. Prerequisite: Sophomore standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
305. **The Age of the Renaissance.** Same as Religious Studies 305. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
306. **The Age of the Protestant and Catholic Reformation, 1500-1648.** Same as Religious Studies 306. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
307. **Islam and the Near East, from Mohammed to 1258.** Same as Religious Studies 307. The Near East under the Arab caliphs; political, institutional, and intellectual development of Islam. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
308. **The Europeanization of the Near East, 1768-1914.** Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
309. **Development of Modern Europe: Absolutism and Colonial Expansion, 1648-1789.** Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
310. **Europe in the Age of the French Revolution and Napoleon.** Comparative survey of Western countries in the age of democratic upheavals: America, England, and Prussia as well as France; the rise of Napoleon and the response of Europe; and the fate of innovation and reform in the immediate aftermath of the Napoleonic Wars. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
311. **European History from 1815 to 1871.** Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
312. **European History from 1871 to 1918.** Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
313. **European History from 1918 to 1939.** Survey of European society from 1918 to 1939, with emphasis on the impact of World War I, the Russian Revolution, fascism, and the intellectual trends of the twenties and thirties. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
314. **European History from 1939 to the Present.** Survey of European society since 1939, with emphasis on the impact of World War II, the Cold War, the establishment of the welfare state, and social developments. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
315. **Economic and Social History of Europe to 1815.** History and analysis of the development of European economy and society from the Middle Ages to the Industrial Revolution; evolving agrarian systems; growth of commercial economies; industrial and technical progress; and colonial expansion. Prerequisite: One year of college history or economics, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
316. **The Industrial Revolution in Europe, 1780-1900.** Comparative analytic study of industrial development in England, France, Germany, and Russia; social, cultural, and demographic consequences of rapid economic change. 3 hours, or $\frac{1}{2}$ or 1 unit.
317. **Europe and the World Economy Since 1880.** Economic development of Europe within world economy to the present; topics include imperialism and international finance; World War I and Great Depression; Soviet development; recovery since 1945; and Europe and the underdeveloped world. 3 hours, or $\frac{1}{2}$ or 1 unit.
318. **Modern European Diplomatic History, 1789-1890.** Diplomatic history of Europe from the French Revolution to the fall of Bismarck. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
319. **Modern European Diplomatic History, 1890 to the Present.** Diplomatic history of Europe from the fall of Bismarck to the present day. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
320. **Russia from the Earliest Times to Peter the Great.** Political, economic, cultural, and social development of Russia during the Kievan and Muscovite periods. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
321. **Russia from Peter the Great to 1855.** Political, economic, cultural, diplomatic, and social development of Russia during Imperial times. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.

322. **European History, 1918 to the Present.** Major intellectual, social, economic, and political forces which have shaped the experience of twentieth-century Europeans. Credit is not given for History 322 and either History 313 or 314. Prerequisite: One year of college history, political science, or economics. 3 hours, or $\frac{1}{2}$ or 1 unit.
323. **Intellectual History of Modern Europe, 1513-1770.** Survey of the seminal ideas in the fields of political, social, and economic thought which have influenced the development of modern Europe. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
324. **Intellectual History of Modern Europe, 1770 to the Present.** Survey of the seminal ideas in the fields of political, social, and economic thought which have influenced the development of modern Europe. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
325. **Intellectual and Cultural History of Russia to 1825.** Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
326. **Intellectual and Cultural History of Russia from 1825 to the Present.** Prerequisite: One year of college history or political science, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
327. **Russia from 1855 to the Bolshevik Revolution of 1917.** Prerequisite: One year of college history or political science, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
328. **History of Soviet Russia, 1917 to the Present.** The founding and development of the Soviet regime, with emphasis on political, social, and institutional change since the Russian Revolution. Prerequisite: One year of college history or political science, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
329. **History of Southeastern Europe from the Fourteenth to the Eighteenth Century.** The Byzantine heritage; the Ottoman conquest and its impact on the peoples of the Balkans; and the internal political and cultural history of the Rumanians, South Slavs, Greeks, and Albanians to 1804. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
330. **History of Southeastern Europe Since 1804.** The rise of nationalism and the formation of national states in the Balkans; the decline of the Ottoman Empire; and the political and cultural history of Rumania, Yugoslavia, Bulgaria, Greece, and Albania in the nineteenth and twentieth centuries. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
331. **Medieval Economic and Social History.** Includes the decline of Roman society, the age of localism, the revival of commerce and urbanism, medieval capitalism, and economic decline and social turmoil. 3 hours or 1 unit.
332. **Medieval England.** Economic, intellectual, religious, and social developments as reflected in the art and architecture of medieval England from the time of the German invasions to about the fifteenth century. Prerequisite: Sophomore standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
333. **England under the Tudors and Stuarts, 1485-1660.** Politics, religion, and society in the era of the Protestant Reformation and the Civil War. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
334. **Great Britain Under the Later Stuarts and the Hanoverians, 1660-1815.** Principal political, economic, social, religious, and cultural developments in British history from the Restoration to the end of the Napoleonic wars. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
335. **France, 1815-1900.** The development of France in its various aspects, with special attention to social problems. 3 hours, or $\frac{1}{2}$ or 1 unit.
336. **France, 1900 to the Present.** Political, diplomatic, economic, social, and intellectual developments in France from 1900 to the present. Prerequisite: One year of history or political science. 3 hours, or $\frac{1}{2}$ or 1 unit.
337. **Economic History of American Agriculture.** Same as Agricultural Economics and Economics 337. The development of American agriculture from early colonial times to the present; emphasis on regional development, evolution of methods and equipment,

- trends in marketing and credit, and the making of federal farm policy. Prerequisite: College-level course in basic economics or American history. 3 hours, or $\frac{3}{4}$ or 1 unit.
338. **History of Biology.** Same as Biology 338. Development of biological thought from antiquity to the present, emphasizing evolutionary theory and physiology in the nineteenth century and genetics in the twentieth century. Prerequisite: One year of college biology or history, or consent of instructor. 3 hours or 1 unit.
339. **Scientific Thought, I.** Same as Philosophy 317. A historical and critical survey of the development of science and its philosophical interpretation to the death of Newton. 3 hours or 1 unit.
340. **Scientific Thought, II.** Same as Philosophy 318. A historical and critical survey of the development of science and its philosophical interpretation from the death of Newton to the early twentieth century. Prerequisite: Philosophy 317. 3 hours or 1 unit.
341. **Modern Britain: the Victorian Era, 1815-1900.** History of the political, constitutional, social, economic, and diplomatic developments of the United Kingdom, including Ireland. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
342. **Modern Britain Since 1900.** History of the political, constitutional, social, economic, and diplomatic developments of the United Kingdom, including Ireland. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
343. **The Turks and the Ottoman Empire, 1200-1566.** The Seljuk establishment; the Mongols and Ilhanids; Turkish principalities; the rise and conquests of the Ottomans; changing social and economic conditions; foreign relations with special attention to the Mamluks and Safavids; and the Ottoman establishment. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
344. **The High Ottoman Empire, 1566-1924.** The Ottomans and Islamic society; the Ottomans and Mediterranean society; Ottoman foreign relations and the development of diplomacy; the decline and dismemberment of the Empire; and traditional and westernizing attempts at revival. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
345. **Constitutional and Legal History of Medieval England.** The origin and development of fundamental English legal and constitutional ideas and institutions in response to changing social needs: the inquest, the grand and petty juries, civil and criminal procedures, and the beginnings of representative government. Valuable for those who intend to study law. Prerequisite: Sophomore standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
346. **Constitutional and Legal History of Modern Britain.** The impact of continuing industrial and social change on English law and the constitution; marriage; civil liberties; from women's burden to women's rights; adaptation of English legal ideas to the American scene; and evolution to the present democracy. Valuable for those who intend to study law. Prerequisite: Sophomore standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
347. **The Age of Charlemagne.** Same as Classical Civilization 347. The age of Charlemagne and its intellectual, political, social, and cultural significance for western Europe. Prerequisite: Junior standing or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
348. **Technology in American Life.** General, historical survey, including science and its interaction with American technology; emphasis on sources of technological innovation and the impact of technology on the economy, culture, and thought of America, from the colonial era to the present. 3 hours, or $\frac{1}{2}$ or 1 unit.
349. **The Scientific Revolution, 1543-1727.** Intellectual and social factors involved in the emergence of science in the late sixteenth and seventeenth centuries. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
350. **History of American Immigration to 1880.** The migrations which peopled Colonial America and the United States and their role in the shaping of American society and culture; research opportunities provided. Prerequisite: Junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.

351. **History of American Immigration Since 1880.** The migrations of the late nineteenth and twentieth centuries and their impact on American society and culture. Prerequisite: Junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
352. **Colonial Beginnings of American Life and Institutions.** Study of the seventeenth- and eighteenth-century colonies to 1763. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
353. **Afro-American Intellectual History.** Africa's importance in Afro-American thought; the ideology of liberation strategies; religion; education; and artistic expression, particularly the Harlem Renaissance, New Deal, and cultural manifestations of the 1960s and 1970s. Prerequisite: History 253 or 254, or one year of American history, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
354. **The Era of the American Revolution, 1763-89.** Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
355. **Federalists, Jeffersonians, and the Era of Good Feeling.** United States history from 1789 to 1828, with emphasis on the conflict between nationalism and sectional interests. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
356. **America in the Age of Jackson.** Political, social, and cultural study of the United States from the 1820s to the 1850s, including the humanitarian reform movements, manifest destiny, and the Mexican War. 3 hours, or $\frac{1}{2}$ or 1 unit.
357. **Economic History of the United States, 1775-1860.** Growth of American economic life and institutions from the Revolution to the outbreak of the Civil War. 3 hours, or $\frac{1}{2}$ or 1 unit.
358. **Economic History of the United States Since 1860.** Growth of American economic life and institutions since 1860. 3 hours, or $\frac{1}{2}$ or 1 unit.
359. **Civil War and Reconstruction.** The United States between 1850 and 1877, with emphasis on the causes of the war, wartime problems of the North and South, and efforts to create a new Union after the war. 3 hours, or $\frac{1}{2}$ or 1 unit.
360. **History of the United States, 1877-1909.** Prerequisite: One year of college history, political science, or economics. 3 hours, or $\frac{1}{2}$ or 1 unit.
361. **History of the United States, 1909-32.** Prerequisite: One year of college history, political science, or economics. 3 hours, or $\frac{1}{2}$ or 1 unit.
362. **History of the United States since 1932.** Discusses the New Deal, the Cold War, all the presidents since Roosevelt, the structure of American imperialism, and America's role in world politics. Prerequisite: One year of college history, political science, or economics. 3 hours, or $\frac{1}{2}$ or 1 unit.
363. **Social History of Industrial America to 1918.** The impact of industrialization, immigration, and urbanization on American society to the end of World War I. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
364. **Social History of Industrial America Since World War I.** Study of the impact of industrial technology, business enterprise, immigration, and urbanization of American society. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
365. **The History of Illinois to 1900.** The development of Illinois, first as a region and then as a state, with emphasis upon its political, economic, social, religious, and cultural growth in the eighteenth and nineteenth centuries. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
366. **The History of Illinois in the Twentieth Century.** The development of a modern American state in the twentieth century with emphasis upon its political life, economic growth, social and intellectual problems, and contribution to the nation. Includes Chicago's expanding role in the history of Illinois. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
367. **The Trans-Mississippi West.** The West in American history since the Louisiana Purchase; western stereotypes, order and violence, racial minorities, the urban sector, natural resources, and environmental policy. 3 hours, or $\frac{1}{2}$ or 1 unit.

368. **The South in American History.** Exploration of the history of the American South identifying and explaining differences between the South and the rest of the nation; examines the correlates of economic change in the realms of politics, social structure, and cultural values. Race relations provides a central theme of the course. 3 hours, or $\frac{1}{2}$ or 1 unit.
369. **Constitutional Development of the United States to 1865.** Prerequisite: One year of college history or political science. 3 hours, or $\frac{1}{2}$ or 1 unit.
370. **Constitutional Development of the United States Since 1865.** Prerequisite: One year of college history or political science. 3 hours, or $\frac{1}{2}$ or 1 unit.
371. **American Intellectual and Cultural History to 1865.** Same as Religious Studies 381. The development of American thought to the mid-nineteenth century, emphasizing the interplay between imported ideas (religious, scientific, political, social, educational, and artistic) and the material and social environment in shaping American life. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
372. **American Intellectual and Cultural History since 1859.** Same as Religious Studies 382. The development of American thought and culture since 1859, emphasizing Darwinism and naturalist thought, religious and cultural events, the impact of science and technology, the American university, and recent cultural conflicts. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
373. **History of American Foreign Relations to 1917.** 3 hours, or $\frac{1}{2}$ or 1 unit.
374. **Imperialism, 1870-1919.** Study of the origins and nature of pre-World War I imperialism, using the comparative approach, with emphasis on Great Britain, the United States, and Japan. Prerequisite: One-year survey course in history. 3 hours, or $\frac{1}{2}$ or 1 unit.
375. **Andean Countries of South America, 1532 to the Present.** The history of Colombia, Ecuador, Peru, Bolivia, and Chile; emphasizes common problems and diverse responses, from the conquest in the sixteenth century to the struggles for development in the twentieth. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
376. **History of Mass Politics in Latin America.** Comparative historical treatment of mass political movements in twentieth-century Latin America stressing Chile, Peru, Brazil, Argentina, Mexico, Bolivia, and Cuba; social science concepts supplement the historical analysis of causes, leaders, followers, programs, tactics, and results of these movements. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
377. **History of Modern Brazil, 1808 to the Present.** Problems of a neocolonial society; themes include family structure, slavery, imperialism, modernization, and the crisis of traditional institutions. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
378. **History of Mexico, 1519 to the Present.** The development of Mexico from the conquest to the postrevolutionary present. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
379. **Slavery and Race Relations in Latin America.** Selected topics on Indians and Spaniards, white and blacks, emphasizing Mexico, the Caribbean, and Brazil. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
380. **Europe and the 'Scramble for Africa.'** Analysis of the politics and economics of the European partition of Africa with particular reference to Britain, France, and Germany (1870-1900) and African responses to alien rule. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
381. **Ancient Greek States.** History of the Greek states from the earliest times to 334 B.C. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
382. **Alexander and His Successors.** Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
383. **History of the Roman Republic to 44 B.C.** Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.

384. **The Roman Empire.** Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
385. **African Independence and Underdevelopment: 1945 to the Present.** Historical investigation of African political economies based on selected case studies; includes development of the colonial economy, economic bases of African nationalism, and postindependence underdevelopment and attempts to escape from it. Prerequisite: One year of college history or enrollment in the African Studies program. 3 hours, or $\frac{1}{2}$ or 1 unit.
386. **Topics in African History.** Considers specific problems such as traditional histories, social structure and state formation, religious movements, elites and reactions to European occupation, urbanization, nationalism, and the colonial legacy. Prerequisite: One year of college history or enrollment in the African Studies program. 3 hours or 1 unit.
387. **Indian History and Civilization to 1707.** Development of Indian civilization to the British conquest; political evolution, religious and philosophical systems, society, art, and literature during Hindu and Muslim periods. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
388. **India in the Age of Imperialism.** Western impact on India from 1498 to 1900; rise of British raj; and national awakening and social change in Victorian India. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
389. **India From Ghandi to Independence.** Growth of nationalism, emergence of Muslim separatism, and struggle for independence under Ghandi and Nehru. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
390. **China Under the Ch'ing Dynasty.** The period of Manchu domination in China (1644-1912); emphasis on Chinese reactions to Western influences during the nineteenth century. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
391. **A History of China to 906 A.D.** History of the formative period of the Chinese state, society, and economy. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
392. **A History of China, 907-1644.** History of the early modern Chinese state and society prior to the Western impact. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
394. **Twentieth-Century China.** Chinese state and society in revolutionary transition; emphasis on the Nationalist and Communist revolutions and their results. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
395. **Premodern Japan.** Japanese history from its origins to 1800; evolution of the traditional society, stressing institutional and cultural problems of ancient and "feudal" Japan. 3 hours, or $\frac{1}{2}$ or 1 unit.
396. **Modern Japan.** Japanese history since 1800; institutional and cultural problems connected with modernization; continuity and change in the traditional order; Western pressure; the Meiji restoration; rise and fall of empire; and creation of a modern society. 3 hours, or $\frac{1}{2}$ or 1 unit.
411. **Seminar in Ancient History: Greece.** 1 unit.
413. **Seminar in Ancient History: Rome.** 1 unit.
415. **Seminar in Medieval History.** 1 unit.
417. **Seminar in Renaissance History.** 1 unit.
418. **Seminar in Reformation History.** 1 unit.
419. **Seminar in European History, 1648 to 1815.** 1 unit.
421. **Seminar in European History Since 1815.** 1 unit.
423. **Seminar in English History to 1688.** 1 unit.
425. **Seminar in English and British Empire History Since 1688.** 1 unit.
427. **Seminar in Russian History.** 1 unit.
441. **Seminar in Near and Middle Eastern History.** 1 unit.
443. **Seminar in South Asian History.** 1 unit.
445. **Seminar in East Asian History.** 1 unit.
448. **Seminar in African History.** Prerequisite: History 215, 216, and one upper-level African history course. 1 unit.

- 451. Seminar in Early American History to 1789. 1 unit.
- 453. Seminar in American History Since 1789. 1 unit.
- 461. Seminar in Latin American History. 1 unit.
- 471. Seminar in the History of Science. 1 unit.
- 475. Problems in Ancient History. 1 unit.
- 476. Problems in Medieval History. 1 unit.
- 477. Problems in Early Modern European History, 1300-1815. 1 unit.
- 478. Problems in European History since 1815. 1 unit.
- 479. Problems in English History before 1688. 1 unit.
- 480. Problems in English History since 1688. 1 unit.
- 481. Problems in Russian History. 1 unit.
- 482. Problems in Near and Middle Eastern History. 1 unit.
- 483. Problems in Chinese History. 1 unit.
- 484. Problems in Japanese History. 1 unit.
- 485. Problems in South Asian History. 1 unit.
- 486. Problems in American History to 1830. 1 unit.
- 487. Problems in American History since 1815. 1 unit.
- 488. Problems in Latin American History. 1 unit.
- 496. History of Historiography. Introduction to the great historians from early times to the present. 1 unit.
- 497. Reading Course. Directed reading in special fields. Open only to students with a master's degree or equivalent, who are preparing for the preliminary examination in history and who need instruction in areas not provided by current course offerings. Prerequisite: Master's degree or equivalent; consent of instructor. 1 unit.
- 498. Problems in the Teaching of College History. Prerequisite: Candidate for Ph.D. degree in history. ½ unit.
- 499. Thesis Research. Individual direction in research and guidance in writing theses for advanced degrees. 0 to 4 units.

Humanities

Director of School: Professor N. Baym

School Office: 210 Lincoln Hall, Urbana

- 151. **The Humanities in Western Culture.** Comparative study of selected works representative of classical Greek, Judeo-Christian, and modern European thought; emphasis on history and the novel: for example, Well's *Outline of History*, Thucydides, *Third and Fourth Kings* (Knox version), *The Odyssey*, *Don Quixote*, and *The History of Tom Jones*. Prerequisite: Sophomore standing, James Scholar freshman, or freshman standing with exemption from Rhetoric 105. 4 hours.
- 152. **The Humanities in Western Culture.** Comparative study of selected works representative of classical Greek, Judeo-Christian, and modern European thought; emphasis on drama, philosophic essay, and poetry: for example, Sophocles, Shakespeare, Plato, Nietzsche, St. Augustine, Ecclesiastes, the New Testament, and Whitman. Prerequisite: Humanities 151. 4 hours.
- 199. Undergraduate Open Seminar. 1 to 5 hours. May be repeated.
- 211. **The Growth of American Culture, I.** Social, intellectual, and spiritual foundations and development of American life and modes of cultural expression. Prerequisite: Junior standing. 4 hours.
- 212. **The Growth of American Culture, II.** Social, intellectual, and spiritual foundations and development of American life and modes of cultural expression. Prerequisite: Junior standing. 4 hours.
- 215. **Literature and Other Arts, I.** Consideration of literature and other arts in the context

of a particular historical period, and in relationship to the movement of ideas within that period. Prerequisite: Junior standing or consent of instructor. 3 hours.

216. **Literature and Other Arts, II.** Continuation of Humanities 215. Prerequisite: Humanities 215. 3 hours.
290. **Individual Study.** Supervised reading and research on interdisciplinary humanities topics chosen by the student in consultation with a faculty member. Prerequisite: Consent of director of School of Humanities. 2 to 4 hours. May be repeated to a maximum of 8 hours.
292. **Senior Thesis.** Individual research for concentrators in humanities leading to the completion of a thesis. Prerequisite: Senior standing, consent of director of School of Humanities, and a declared option in humanities field of concentration. 2 to 4 hours. May be repeated to a maximum of 8 hours.
295. **Special Topics: Interdisciplinary.** Interdisciplinary topics in the humanities; topics vary, but are normally related to one of the options in the humanities field of concentration. Prerequisite: Declared option in humanities field of concentration or consent of director of School of Humanities; consent of instructor. 3 hours. May be repeated as topics vary; students may register for two different topics in the same semester.
297. **Special Topics: Junior Seminar and Tutorial.** Interdisciplinary seminar and tutorial in selected topics related to one of the options in the humanities field of concentration. Prerequisite: Declared option in humanities field of concentration; junior standing; and consent of instructor. 3 hours. May be repeated to a maximum of 6 hours.
298. **Special Topics: Senior Seminar and Tutorial.** Interdisciplinary seminar and tutorial in selected topics related to one of the options in the humanities field of concentration. Prerequisite: Declared option in humanities field of concentration; senior standing; consent of instructor; and Humanities 297. 3 hours. May be repeated to a maximum of 6 hours.
382. **Language Laboratory Techniques.** Same as Classical Civilization, English as a Second Language, French, German, Slavic, and Spanish 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or ½ or 1 unit.

Linguistics

(Including Arabic, Hebrew, Hindi, Modern Hebrew, Persian, Swahili, and Yoruba)

Head of Department: Professor B. B. Kachru

Department Office: 4088 Foreign Languages Building, Urbana

ARABIC

201. **Elementary Arabic, I.** An introduction to Arabic in one of its standard national forms; includes conversation with a native Arabic-speaking tutor under the direction of a linguist-instructor, and a minimum of formal grammar and writing. All students in this course are required to register for one hour per week in the language laboratory. 5 hours.
202. **Elementary Arabic, II.** Second term of spoken Arabic; includes conversation with a native Arabic-speaking tutor under the direction of a linguist-instructor; formal grammar based on conversational materials; and work on written Arabic. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Arabic 201. 5 hours.
303. **Intermediate Arabic, I.** First term of second year of the Arabic language, with drill for more advanced conversational fluency; introduction to a greater variety of styles and

levels of discourse and usage; and increasing study of written language and more formal grammar. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Arabic 202 or equivalent. 5 hours or 1 unit.

304. **Intermediate Arabic, II.** Concentration on ability to engage in reasonably fluent discourse in Arabic, on comprehensive knowledge of formal grammar, and on ability to read ordinary written Arabic. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Arabic 303 or equivalent. 5 hours or 1 unit.
305. **Advanced Arabic, I.** Reading selections from literary works; selections from political, social, historical, and economic writings. Prerequisite: Arabic 304 or equivalent. 5 hours or 1 unit.
306. **Advanced Arabic, II.** Continuation of Arabic 305. Further reading in literary sources as well as in history, economics, and politics. Prerequisite: Arabic 305 or equivalent. 5 hours or 1 unit.

HEBREW

110. **Introduction to Biblical Hebrew.** Same as Religious Studies 108. Stress on mastery of grammar, reading, writing, and simple prose composition; reading of simple Biblical prose. 4 hours.
111. **Introduction to Biblical Hebrew.** Same as Religious Studies 109. Syntax and reading of simple classics' prose narrative. Prerequisite: Hebrew 110 or Religious Studies 108. 4 hours.
210. **Biblical Prose.** Same as Religious Studies 210. Reading and discussion of selections from the Books of Samuel with emphasis on grammar and exegesis; exercises in prose composition. Prerequisite: Hebrew 110 and 111, or Religious Studies 108 and 109. 4 hours.
311. **Hebrew Poetry.** Same as Religious Studies 311. Translation and analysis of ancient Hebrew poetry, with emphasis on the development of Hebrew prosodic style and on textual criticism; research paper required for graduate credit. Prerequisite: Religious Studies 210 or equivalent. 4 hours or 1 unit.

HINDI

201. **Elementary Hindi/Urdu, I.** An introduction to the Hindi/Urdu language; includes conversation with a native Hindi/Urdu-speaking tutor under the direction of a linguist instructor, and a minimum of formal grammar and Devanagari writing; introduction to Arabic-Persian script by arrangement. All students are required to register for one hour per week in the language laboratory. 5 hours.
202. **Elementary Hindi/Urdu, II.** Second term of spoken Hindi/Urdu; includes conversation with a native Hindi/Urdu-speaking tutor under the direction of a linguist instructor, formal grammar based on conversational materials, and work on written Hindi; concentration on written Urdu by arrangement. All students are required to register for one hour per week in the language laboratory. Prerequisite: Hindi 201. 5 hours.
301. **Intensive Hindi, I.** An intensive course on the Hindi language including conversation with a native Hindi-speaking tutor under the direction of a linguist-instructor; study of the formal grammar and the Devanagari script. 10 hours or 2 units.
302. **Intensive Hindi, II.** Includes drill for more advanced conversational fluency; introduction to a greater variety of styles and levels of discourse and usage; increasing study of the written language and more formal grammar; and concentration on ability to engage in reasonably fluent discourse in Hindi, on comprehensive knowledge of formal grammar, and on ability to read ordinary texts in Hindi. All students are required to

- register for one hour per week in the language laboratory. Prerequisite: Hindi 301 or equivalent, or consent of instructor. 10 hours or 2 units.
303. **Intermediate Hindi, I.** First term of second year of the Hindi language, including drill for more advanced conversational fluency; introduction to a greater variety of styles and levels of discourse and usage; and increasing study of the written language and more formal grammar. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Hindi 202 or equivalent. 5 hours or 1 unit.
304. **Intermediate Hindi, II.** Concentration on ability to engage in reasonably fluent discourse in Hindi, on comprehensive knowledge of formal grammar, and on ability to read ordinary texts in Hindi. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Hindi 303 or equivalent. 5 hours or 1 unit.
305. **Advanced Hindi, I.** A course for advanced knowledge of spoken and written Hindi. All students are required to work at least one hour each week with a native informant and/or in the language laboratory. Prerequisite: Hindi 304 or consent of instructor. 5 hours or 1 unit.
306. **Advanced Hindi, II.** A course for advanced knowledge of spoken and written Hindi with emphasis on modern Hindi literature and language. All students are required to work at least one hour each week with a native informant and/or in the language laboratory. Prerequisite: Hindi 305 or consent of instructor. 5 hours or 1 unit.
307. **Advanced Hindi, III.** A course for detailed analysis of formal grammar of Hindi with concentration on readings from Hindi literature. Prerequisite: Hindi 306 or consent of instructor. 5 hours or 1 unit.
308. **Advanced Hindi, IV.** A survey of the history of Hindi literature and readings from different periods of Hindi literature. Prerequisite: Hindi 307 or consent of instructor. 5 hours or 1 unit.
309. **Readings in Hindi Literature in Translation.** Introduction to Hindi literature since 1400 A.D.; concentration on major works in poetry and prose available in English translation. Prerequisite: Consent of instructor. 3 hours or 1 unit.
310. **Readings in Hindi Literature in English Translation.** Introduction to Hindi literature of the modern period; concentration on major works in poetry, prose, and novel available in English translation. Prerequisite: Consent of instructor. 3 hours or 1 unit.

LINGUISTICS

198. **Freshman Seminar.** Special seminar for honors students on linguistic theory, methodology, and application. Prerequisite: James Scholar standing or other designation as a superior student. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Introduction to Language Science.** Same as Anthropology 200. An introduction to the theory and methodology of general linguistics; includes the various branches and applications of linguistics. 3 hours.
201. **Elements of Phonology.** Introduction to the formal description of phonological structure, including study of articulatory phonetics, the phonological feature framework, and fundamental concepts of generative phonological theory. Prerequisite: Credit or concurrent registration in Linguistics 200, or consent of instructor. 3 hours.
202. **Elements of Syntax.** Introduction to the types of syntactic and semantic phenomena found in natural language, with material drawn from a variety of languages; emphasis on the implications of such phenomena for linguistic theory; formalism and application of generative grammar. Prerequisite: Credit or concurrent registration in Linguistics 200, or consent of instructor. 3 hours.
220. **Language in African Culture and Society.** Introduction to the sociolinguistic context of Africa; special emphasis on the study of selected African languages for understand-

- ing the African cultural heritage; and a critical discussion of African oral literary tradition, language variety, language attitude, language standardization, and other linguistically relevant language problems. 3 hours.
225. **Elements of Psycholinguistics.** Introduction to the theory and methodology of psycholinguistics with emphasis on language acquisition and linguistic behavior. 3 hours.
232. **Sex-related Differences in Language.** Same as Speech Communication 232. A survey of perceived and actual differences between the uses of language by men and by women; emphasizes vocal language, although some attention is given to written expression. Prerequisite: A course in speech communication or in linguistics, or equivalent. 3 hours.
300. **Introduction to Linguistic Structure.** Same as Anthropology 300. Introduction to the theory and methodology of the science of linguistics with special reference to phonology and syntax. 3 hours or ½ unit.
301. **Introduction to General Phonetics.** Introduction to the main branches of general phonetics and phonological theory; emphasis on analysis of non-Western languages and research techniques. 3 hours or ½ unit.
302. **Introduction to Historical Linguistics.** Introduction to the theory and methodology of historical linguistics. Prerequisite: Fulfillment of the foreign language requirement in the College of Liberal Arts and Sciences, or equivalent, or consent of instructor. 3 hours or ½ unit.
303. **Non-Western Linguistic Structures.** Intensive study of linguistic structure of a selected non-Western language. 3 hours or 1 unit. With consent of instructor, this course may be repeated for credit.
304. **Tutorials in Nonwestern Languages.** Advanced or intensive language instruction in a selected nonwestern language; does not cover instruction in East or Southeast Asian languages. Prerequisite: Consent of instructor. 1 to 5 hours, or ½ to 1 unit. May be repeated with consent of instructor.
305. **Introduction to Applied Linguistics.** Same as English as a Second Language 305. Introduction to the applications of general linguistic theory to the specific fields of stylistics, theory of translation, contrastive analyses, and the teaching and learning of foreign and second languages; practical assignment work. Prerequisite: Consent of instructor. 3 hours, or ½ or 1 unit.
306. **Introduction to Computational Linguistics.** Introduction to the use of computers in grammatical rule testing, computer-assisted language instruction, experimental phonetics, historical and comparative linguistics, quantitative study of language, and stylistic analysis; includes SNOBOL programming language, PLATO, dialectology, and automatic translation. Prerequisite: Linguistics 300 and Computer Science 106, or consent of instructor. 3 hours or 1 unit.
307. **Introduction to Mathematical Linguistics.** Same as Anthropology 307. Principles of set theory, logic and formal systems, group theory, and automata theory; introduction to the formal theory of grammars. Prerequisite: Linguistics 300. 3 hours or 1 unit.
308. **Comparative Grammar of Greek and Latin.** Same as Greek 308 and Latin 308. Historical study of the Greek and Latin languages through use of the comparative method. Prerequisite: Latin 202 or equivalent; credit or concurrent registration in Greek 202. 3 hours or ¾ unit.
309. **Introduction to Indo-European Linguistics.** Same as Greek 310 and Latin 310. Introductory survey of Indo-European languages and their mutual relations; exemplification of methods of reconstruction; principles of comparative phonology and introductory survey of morphology; and discussion of theories about the original home, culture, and society of the Indo-Europeans. Prerequisite: Fulfillment of the language requirement of the College of Liberal Arts and Sciences. 3 hours or 1 unit.
310. **Topics in Indo-European Linguistics.** Principles of Indo-European morphology; paper and discussion on selected topics of Indo-European linguistics such as phonology, morphology, migrations, and antiquities. Prerequisite: Linguistics 309 or equivalent. 3 hours or 1 unit.

311. **The Structure of Greek and Latin.** Same as Greek 309 and Latin 309. Linguistic analysis of the morphology and syntax of the Greek and Latin languages. Prerequisite: Credit or concurrent registration in Greek 202 and Latin 202, or their equivalent. 3 hours or $\frac{3}{4}$ unit.
316. **Structure of the French Language.** Same as French 316. General survey of the linguistic structure of modern standard French including phonology, morphology, and syntax; emphasis on the differences between its spoken and written forms. Prerequisite: French 313 or equivalent training in phonetics. 3 hours or $\frac{3}{4}$ unit.
320. **Introduction to African Linguistics.** Introduction to genetic and typological classification of the main language families of Africa; concentration on grammatical and phonological characteristics. Prerequisite: Linguistics 200 or 300; consent of instructor. 3 hours or 1 unit.
325. **Introduction to Psycholinguistics.** Same as Communications 325. Introductory survey of psychological and linguistic approaches to the study of communication. Credit is not given for both Psychology 325 and Linguistics 325. Prerequisite: Credit or concurrent registration in Linguistics 300. 3 hours or 1 unit.
330. **Introduction to Far Eastern Linguistics.** Same as Chinese, Japanese, and Korean 330. Introduction to genetic relation of the Far Eastern languages with other languages; concentration on synchronic analysis of phonology and syntax. Prerequisite: Linguistics 300; consent of instructor. 3 hours or 1 unit.
338. **Philosophies of Language.** Same as Philosophy 338. Study of the development of philosophical problems about language and their treatment from antiquity through the nineteenth century. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
340. **History of Linguistics.** Survey of linguistic theories from ancient to modern times; special emphasis on comparative grammar and the development of structural linguistics; and extended discussion of at least one other period. 3 hours or 1 unit.
350. **Sociolinguistics.** Same as English as a Second Language 350. Critical study of the sociologically oriented general linguistic theories; special reference to language varieties, language attitudes, language diversity, language standardization, linguistic geography, and language and political roles (language loyalty); emphasis on research methodology and techniques. Prerequisite: Introductory course in linguistics or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
353. **Spanish Structure.** Same as Spanish 353. Comprehensive analysis of Spanish phonology and syntax based on present-day linguistic theory. Prerequisite: Linguistics 300; Spanish 351; Spanish 352. 3 hours or $\frac{1}{2}$ unit.
360. **Introduction to South Asian Linguistics.** Introduction to genetic and typological classification of the main language families of South Asia; concentration on phonology or syntax. Topics vary. 3 hours or 1 unit. May be repeated to a maximum of 6 hours or 2 units with consent of instructor.
362. **Introduction to Romance Linguistics.** Same as French, Italian, Portuguese, Romance Linguistics, and Spanish 362. Comparative and historical analysis of the Romance languages. Prerequisite: Four semesters of a Romance language or Latin, or equivalent. 3 hours or $\frac{3}{4}$ unit.
367. **Introduction to Germanic Linguistics.** Same as Germanic 367. Comparative and historical survey of the Germanic languages. Prerequisite: Completion of the foreign language requirement in the College of Liberal Arts and Sciences, or equivalent; some knowledge of German desirable. 2 hours or $\frac{1}{2}$ unit.
370. **Language, Culture, and Society.** Same as Anthropology 370 and Communications 370. Examination of the social and cultural functions of language with particular emphasis on the application of linguistic methods and findings to selected problems in the social sciences. Prerequisite: Anthropology 230 or one course in communications or linguistics, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
375. **Speech Science, I.** Same as Speech and Hearing Science 375 and Speech Communication 375. Introduction to the anatomical and physiological characteristics of the normal speech and hearing mechanisms and to fundamental acoustics of speech. Prerequisite:

- site: Speech and Hearing Science 109 or 301, or consent of instructor. 4 hours or 1 unit.
376. **Speech Science, II.** Same as Speech and Hearing Science 376 and Speech Communication 376. Consideration of the physiology of the speaking act, the acoustical characteristics of voice and of speech sounds, and the hearing of speech. Prerequisite: Linguistics 375. 4 hours or 1 unit.
380. **Introduction to Slavic Linguistics.** Same as Slavic 380. The development of Common Slavic from Indo-European and its relationship to contemporary Slavic languages. Prerequisite: Reading knowledge of at least one Slavic language. 3 hours or $\frac{3}{4}$ unit.
382. **Introduction to Sanskrit Linguistics, I.** The sounds and alphabet of Sanskrit; introduction to grammar, with drill and readings; and sandhi rules. Reading: *Nala* and *Damayanti*. Prerequisite: Linguistics 300; consent of instructor. 3 hours or 1 unit.
383. **Introduction to Sanskrit Linguistics, II.** Further grammar and reading; consideration of Sanskrit from one or more of the following points of view: (a) comparative Indo-European linguistics, (b) Indology, (c) Paninian linguistics, (d) Western linguistic theories, and (e) transformational-generative grammar. Prerequisite: Linguistics 382. 3 hours or 1 unit.
386. **Language Laboratory Techniques.** Same as Classical Civilization, English as a Second Language, French, German, Humanities, Slavic, and Spanish 382. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
387. **The Structure of English.** Critical evaluation of traditional and structuralist grammatical descriptions; introduction to transformational grammatical studies; detailed survey of a transformational syntax of English; and brief introduction to generative phonology and morphophonemic analysis of English, especially stress. 3 hours or $\frac{3}{4}$ unit.
388. **Linguistics in Language Learning, I.** Same as English as a Second Language 388. Application of linguistics to language learning with special emphasis on the learning of English as a second language. Prerequisite: Two years of a foreign language or equivalent; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
389. **Linguistics in Language Learning, II.** Same as English as a Second Language 389. Applied linguistics in teaching and learning English as a second language with special emphasis on the applications of some principles of psycholinguistics, sociolinguistics, and ethno-linguistics along with the related disciplines of education, psychology, and anthropology to structured teaching and learning situations. Prerequisite: Linguistics 388; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
400. **Introduction to General Linguistics.** Same as Anthropology 400 and English as a Second Language 402. Introduction to the linguistic sciences; linguistic theory and methodology; and branches of linguistics and their application. 1 unit. Credit may not be applied toward a graduate degree in linguistics.
401. **Syntax.** Critique of traditional and contemporary theories of syntactic structure; systematic introduction to transformational grammar. Prerequisite: Linguistics 300 or equivalent. 1 unit.
402. **Phonology.** Examination of language-specific phonological problems with a view toward formulating a language-independent theory of phonology. Prerequisite: Linguistics 301 or consent of instructor. 1 unit.
403. **Seminar in Linguistic Analysis.** Discussion of advanced topics of current interest in descriptive linguistics. Prerequisite: Linguistics 401. 1 unit. May be repeated for credit with consent of instructor.
404. **Practicum.** Classroom- and homework-solving of assorted problems in syntactic and phonological analysis of many languages. Prerequisite: Linguistics 401 and 402. 1 unit.
405. **Seminar in Stylistics.** Seminar designed to evaluate and discuss earlier and current linguistically motivated stylistic theories; emphasis on the theoretical and methodological problems in application of linguistics to stylistic analysis of literary texts. Prerequisite: Linguistics 300 or 305; consent of instructor. 1 unit.

407. **Advanced Topics in Mathematical Linguistics.** The hierarchy of automata and the hierarchy of grammars; equivalence theorems and undecidability theorems; and recognition procedures. Prerequisite: Linguistics 307 or equivalent. 1 unit.
408. **Russian Phonology.** Same as Russian 408. The sound pattern of Russian in its synchronic and diachronic aspects. Prerequisite: Consent of instructor. 1 unit.
411. **Methods in Historical Linguistics.** Advanced analysis of genetic comparison and reconstruction, linguistic borrowing, linguistic geography, etymology, and related topics. Prerequisite: Linguistics 302. 1 unit.
412. **Research Seminar in Historical Linguistics.** Research work in etymology, linguistic geography, and historical syntax. Prerequisite: Linguistics 411 or consent of instructor. 1 unit.
419. **Contrastive Linguistics.** Same as English as a Second Language 419. Critical survey of contemporary linguistic models; special reference to their relevance in preparing contrastive analyses of languages; and detailed discussion on contrastive analysis of English and selected non-Western languages at different linguistic levels. Prerequisite: Linguistics 300 or consent of instructor. $\frac{1}{2}$ or 1 unit.
420. **Linguistic Phonetics.** Principles of scientific description of the phonic aspect of language; distinctive features and phonetic alphabets; relations between phonetics and other linguistic levels; and inventory of speech sounds. Prerequisite: Linguistics 301 or equivalent. 1 unit.
421. **Seminar in Phonetic Theories.** Theories of speech production; motor theory and linguistic change; acoustical correlates of vocal-tract configurations; theories of speech perception; and a model of universal phonetics. Prerequisite: Linguistics 301 or equivalent. 1 unit.
424. **Developmental Psycholinguistics.** Same as Communications 424 and Psychology 424. An advanced course on the acquisition of language. Prerequisite: Linguistics 325 or equivalent. 1 unit.
425. **Psycholinguistics.** Same as Communications 425 and Psychology 425. Critical survey of methods and theories in the psychological study of the communication process with emphasis upon linguistic approaches, information-theory and learning-theory approaches, psycholinguistic analysis of language decoding and encoding, and the development and measurement of symbolic processes, including meaning. Prerequisite: Consent of instructor. 1 unit.
426. **Research Seminar in Psycholinguistics.** Same as Communications 426 and Psychology 426. Critical discussion of research problems to which psycholinguistic theories and techniques can be applied. Students taking this course are expected to plan, execute, and report an original piece of research in this area. Prerequisite: Linguistics 425; consent of instructor. $\frac{1}{2}$ or 1 unit.
429. **Second Language Acquisition and Bilingualism.** Same as Psychology 429. Examination of the field from a psycholinguistic perspective; topics discussed include first versus second language acquisition; the nature of language aptitude and competence; methods of second language teaching; the nature of bilingualism; and comparative psycholinguistics. Prerequisite: Consent of instructor. 1 unit.
440. **Seminar in History of Linguistics.** Analysis of recent theoretical approaches. Prerequisite: Linguistics 340. 1 unit.
441. **Syntax, II.** Advanced analysis and critique of syntactic descriptions, with special attention to implications for universal grammar. Prerequisite: Linguistics 401 or consent of instructor. 1 unit.
442. **Phonology, II.** Continuation of Linguistics 402. Prerequisite: Linguistics 402. 1 unit.
450. **Linguistics and the Study of Meaning.** Consideration of those aspects of meaning which are the concern of linguistic theory. Prerequisite: Linguistics 300. 1 unit.
462. **Seminar in Romance Linguistics.** Same as French, Italian, Portuguese, Romance Linguistics, and Spanish 462. Selected topics in comparative Romance linguistics. Prerequisite: Linguistics 362 and consent of instructor. 1 unit.

475. **Experimental Phonetics, I.** Same as Speech and Hearing Science 475. Theoretical consideration of speech as motor behavior; special reference to physiological investigations of normal respiration, phonation, and articulation; and survey of the experimental literature. Prerequisite: Consent of instructor. 1 unit.
476. **Experimental Phonetics, II.** Same as Speech and Hearing Science 476. Theoretical consideration of speech as an acoustical phenomenon; special reference to acoustical investigations of voice and speech sounds; and survey of the experimental literature. Prerequisite: Consent of instructor. 1 unit.
477. **Measurement of Speech, I.** Same as Speech and Hearing Science 477. Principles and methods of measuring speech action; special action recorders and transducers; techniques of analysis; problems of experimental design; and laboratory experimentation. Prerequisite: Consent of instructor; credit or concurrent registration in Linguistics 475. 1 unit.
478. **Measurement of Speech, II.** Same as Speech and Hearing Science 478. Principles and methods of measuring the acoustical phenomena of speech; oscillographic measurement of vocal variables; special instruments and media for automatic graphic recording; analysis of data; problems of experimental design; and laboratory experimentation. Prerequisite: Consent of instructor; credit or concurrent registration in Linguistics 476. 1 unit.
481. **Topics in Syntactic Theory.** Investigation of syntactic universals; recent developments in the theory of syntax. Prerequisite: Linguistics 387 or 401; consent of instructor. 1 unit.
482. **Topics in Phonological Theory.** Continuation of Linguistics 402; special topics and individual papers assigned. Prerequisite: Linguistics 402 or equivalent. 1 unit.
490. **Special Topics in Linguistics.** Individual studies in the areas of linguistics not covered by regular course offerings. $\frac{1}{2}$ to 2 units.
499. **Thesis Research.** 0 to 4 units.

MODERN HEBREW

201. **Elementary Modern Hebrew, I.** Introduction to Hebrew; includes conversation with a native speaker under the direction of a linguist-instructor, and a minimum of formal grammar and writing. Students are required to register for one hour weekly in the language laboratory. 5 hours.
202. **Elementary Modern Hebrew, II.** Continuation of Modern Hebrew 201, with introduction of more advanced grammar, and with emphasis on more fluency in speaking and reading. Prerequisite: Modern Hebrew 201. 5 hours.
303. **Intermediate Modern Hebrew, I.** First term of the second year of the Hebrew language, including drill for more advanced conversational fluency, increased study of the written language, and more formal grammar. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Modern Hebrew 202 or equivalent. 5 hours or 1 unit.
304. **Intermediate Modern Hebrew, II.** Concentration on ability to engage in reasonable fluent discourse in Hebrew, comprehensive knowledge of formal grammar, and an ability to read ordinary written Hebrew. All students in this course are required to register for one hour per week in the language laboratory. Prerequisite: Modern Hebrew 303 or equivalent. 5 hours or 1 unit.
305. **Advanced Modern Hebrew, I.** Advanced spoken and written standard modern Hebrew; introduction to modern Hebrew literature. Prerequisite: Modern Hebrew 304 or equivalent. 3 to 5 hours or $\frac{3}{4}$ to 1 unit.
306. **Advanced Modern Hebrew, II.** A course for advanced knowledge of spoken and written standard Modern Hebrew with emphasis on Modern Hebrew literature and language. Prerequisite: Modern Hebrew 305 or equivalent. 3 to 5 hours, or $\frac{3}{4}$ to 1 unit.

307. **Topics in Modern Hebrew Language and Literature, I.** Selected readings from modern Hebrew authors, with emphasis on the novel and short story; lectures and discussions on Hebrew literature and aesthetics; and detailed analysis of formal Hebrew grammar. Prerequisite: Modern Hebrew 306 or consent of instructor. 3 hours or $\frac{3}{4}$ unit. May be repeated with consent of instructor.
308. **Topics in Modern Hebrew Language and Literature, II.** Selected readings from modern Hebrew authors, with special emphasis on Eastern European Revival literature; lectures and discussions on Hebrew literature and aesthetics; and detailed analysis of formal Hebrew grammar. Prerequisite: Modern Hebrew 307 or consent of instructor. 3 hours or $\frac{3}{4}$ unit. May be repeated with consent of instructor.

PERSIAN

201. **Elementary Persian, I.** Introduction to Persian, including conversation with a native speaker under the direction of a linguist-instructor, and a minimum of formal grammar and writing. 5 hours.
202. **Elementary Persian, II.** Continuation of Persian 201, with introduction of more advanced grammar and with emphasis on more fluency in speaking and reading. Prerequisite: Persian 201 or equivalent. 5 hours.
205. **Introduction to Persian Culture and Literature, I.** A survey of Persian civilization with emphasis on Persian literary and aesthetic expression. Knowledge of Persian is not required. 3 hours.
206. **Introduction to Persian Culture and Literature, II.** Continuation of Persian 205. A survey of Persian civilization with emphasis on Persian literary and aesthetic expression. Knowledge of Persian is not required. 3 hours.
303. **Intermediate Persian, I.** A general review of the essentials of grammar, selected reading of materials emphasizing Iranian life and culture, compositions, and practice in speech. Prerequisite: Persian 202. 5 hours or 1 unit.
304. **Intermediate Persian, II.** A general review of the essentials of grammar, selected reading of materials emphasizing Iranian life and culture, compositions, and practice in speech. Prerequisite: Persian 303. 5 hours or 1 unit.
305. **Advanced Persian, I.** Designed to improve competence in speaking, writing, and reading Persian; includes reading in modern and classical Persian prose and poetry. Prerequisite: Persian 304. 3 hours or 1 unit.
306. **Advanced Persian, II.** Continuation of Persian 305. Designed to improve competence in speaking, writing, and reading Persian; includes reading in modern and classical Persian prose and poetry. Prerequisite: Persian 305. 3 hours or 1 unit.

SWAHILI

201. **Elementary Swahili, I.** Same as African Studies 201. Beginning spoken Swahili with minimum of formal grammar; conversation with a native Swahili tutor under the supervision of a linguist-instructor. 5 hours.
202. **Elementary Swahili, II.** Same as African Studies 202. Second semester of spoken Swahili; more conversation with a native tutor; and further grammar. Prerequisite: Swahili 201. 5 hours.
303. **Intermediate Swahili, I.** Same as African Studies 303. Second-year Swahili with emphasis on developing conversational fluency; some readings on Swahili culture and customs. Prerequisite: One year of Swahili. 5 hours or 1 unit.
304. **Intermediate Swahili, II.** Same as African Studies 304. More of second-year Swahili with emphasis on conversational fluency; some readings in Swahili literature. Prerequisite: One year of Swahili. 5 hours or 1 unit.

305. **Advanced Swahili, I.** Same as African Studies 305. Third-year Swahili with emphasis on conversational fluency and on increased facility in reading Swahili texts, including current newspaper prose and (East) African culture materials. Prerequisite: Swahili 304 or equivalent. 5 hours or 1 unit.
306. **Advanced Swahili, II.** Same as African Studies 306. Third-year Swahili with emphasis on conversational fluency and on increased facility in reading Swahili texts, including current newspaper prose and (East) African culture materials. Prerequisite: Swahili 305 or equivalent. 5 hours or 1 unit.

YORUBA

201. **Elementary Yoruba, I.** Same as African Studies 205. An introduction to Yoruba; includes conversation with a native Yoruba-speaking tutor under the direction of a linguist-instructor, and essentials of formal grammar. All students are required to register for three hours per week in the language laboratory. 5 hours.
202. **Elementary Yoruba, II.** Same as African Studies 206. Second term of spoken Yoruba; includes conversation with a native Yoruba-speaking tutor under the direction of a linguist-instructor; and further formal grammar based on conversational materials. All students are required to register for three hours per week in the language laboratory. Prerequisite: Yoruba 201 or consent of instructor. 5 hours.
303. **Intermediate Yoruba, I.** Same as African Studies 307. Continued study of Yoruban grammar with emphasis on developing conversational fluency; readings on Yoruban culture and current affairs. All students are required to register for three hours per week in the language laboratory. Prerequisite: Yoruba 202 or consent of instructor. 5 hours or 1 unit.
304. **Intermediate Yoruba, II.** Same as African Studies 308. Concentration on attaining conversational fluency; further readings in Yoruban newspapers and magazines and simpler portions from contemporary Yoruban plays and novels. All students are required to register for three hours per week in the language laboratory. Prerequisite: Yoruba 303 or consent of instructor. 5 hours or 1 unit.

Philosophy

Acting Chairperson of Department: Professor F. W. Neely
Department Office: 105 Gregory Hall, Urbana

101. **Introduction to Philosophy.** 3 hours.
102. **Logic.** Reasoning, detection of fallacies, and evidence. 3 hours.
103. **Ethics and Social Policy.** An examination of the moral aspects of social problems, and a survey of ethical principles formulated to validate social policy. Credit is not given for both Philosophy 103 and 105. 4 hours.
104. **Philosophy of Democracy.** An examination of the philosophical bases of democracy and some of its opponents. 4 hours.
105. **Introduction to Ethics.** Some basic questions of ethics, discussed in the light of influential ethical theories and with reference to specific moral problems, such as: what makes an action morally right? are moral standards absolute or relative? what is the relation between personal morality and social morality, and between social morality and law? 3 hours. Credit is not given for both Philosophy 105 and 103.
110. **World Religions.** Same as Religious Studies 110. Survey of the leading living religions, including Hinduism, Buddhism, Taoism, Mohammedanism, Judaism, and Christianity; examination of basic texts and of philosophic theological elaborations of each religion. 3 hours.

198. **Freshman Seminar.** Investigation of selected fundamental topics of philosophical inquiry. See *Timetable* for current topics. Prerequisite: Freshman James Scholar. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
202. **Logic, Semantics, and Critical Thinking.** An intensive study of basic deductive and inductive inference, the varieties and vagaries of meaning, fallacies in reasoning, and related topics, with special emphasis on the analysis and criticism of argumentative writing. 4 hours. Students may not receive credit for both Philosophy 202 and 102.
205. **Recent European Philosophy.** Introduction to the major recent philosophical movements in Europe, such as phenomenology, existentialism, philosophical anthropology, and neo-Marxism. 3 hours.
210. **Ethics.** Problems in ethical theory; the nature of right and wrong, justice, conscience, moral feelings, etc. 3 hours.
230. **Philosophy of Religion: Introduction.** Same as Religious Studies 230. A critical study of theories about the nature of religion. 3 hours.
250. **Philosophical Conceptions of Human Nature.** A comparative examination of important historical and contemporary conceptions of human nature. 3 hours.
270. **Philosophy of Science.** Investigation of the nature of scientific knowledge by examining archetypal examples from physical science (e.g., Ptolemaic and Copernican astronomy); nature of scientific truth, validation of theories, nature of scientific theories, evolution of theories, experimental procedure, role of presuppositions, scientific revolutions, etc. 3 hours.
290. **Individual Study.** Readings in selected philosophical topics. This course may be taken by honors students in partial fulfillment of department honors requirements. Prerequisite: Open to juniors and seniors with a general grade-point average of 4.0 only by prior arrangement with a regular member of the staff and with consent of the chairman of the department. 2 to 4 hours. May be repeated for a maximum of 4 hours.
292. **Thesis.** Special training in philosophical investigation. This course may be taken by honors students in partial fulfillment of department honors requirements. Prerequisite: Open to seniors with a general grade-point average of 4.0 only by prior arrangement with a regular member of the staff and with consent of the chairman of the department. 2 to 4 hours. May be repeated for a maximum of 4 hours.
298. **Senior Seminar.** Seminar on selected philosophical topics. Prerequisite: Open to senior philosophy concentrators with a general grade-point average of 4.0 only with consent of instructor. 3 hours. May be repeated for a maximum of 6 hours.
303. **History of Ancient Philosophy.** A survey primarily of the Greeks, dealing with such topics as knowledge, metaphysics, ethics, theory of nature, and mysticism. 4 hours or 1 unit.
304. **History of Medieval Philosophy.** Lectures and readings in the history of philosophy from St. Augustine to William of Ockham. Prerequisite: Philosophy 101 or 303. 3 hours, or $\frac{3}{4}$ or 1 unit.
306. **History of Modern Philosophy.** 4 hours or 1 unit.
307. **History of Modern Philosophy.** Bacon, Hobbes, Locke, Berkeley, and Hume. Philosophy 307 and 308 taken concurrently in the summer session are the equivalent of Philosophy 306. 2 hours or $\frac{1}{2}$ unit. Offered in the summer session only.
308. **History of Modern Philosophy.** Descartes, Spinoza, Leibniz, and Kant. Philosophy 307 and 308 taken concurrently in the summer session are the equivalent of Philosophy 306. 2 hours or $\frac{1}{2}$ unit. Offered in the summer session only.
309. **The Philosophy of Plato.** Prerequisite: Philosophy 101 or 303. 3 hours, or $\frac{3}{4}$ or 1 unit.
310. **The Philosophy of Aristotle.** An intensive study of major works in Aristotle or of some aspect of his philosophy. Prerequisite: Philosophy 101 or 303. 3 hours, or $\frac{3}{4}$ or 1 unit.
311. **Nineteenth Century Philosophy.** Prerequisite: One course in philosophy (preferably Philosophy 101 or 306). 3 hours, or $\frac{3}{4}$ or 1 unit.
312. **Classical Modern Philosophers.** Intensive study of one, or in special cases, two major philosophers of the period 1600-1900, e.g., Descartes, Hume, Kant, or Hegel. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit. May be repeated for credit.

313. **American Philosophy.** The history of philosophy in America from colonial times to the present. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
316. **Anglo-American Philosophy Since 1900.** Introduction to the major philosophical developments in England and America in the present century, focusing on such writers as G. E. Moore, Bertrand Russell, A. J. Ayer, Ludwig Wittgenstein, and W. V. Quine. Prerequisite: One course in philosophy. 3 hours or 1 unit.
317. **Scientific Thought, I.** Same as History 339. A historical and critical survey of the development of science and its philosophical interpretation to the death of Newton. 3 hours or 1 unit.
318. **Scientific Thought, II.** Same as History 340. A historical and critical survey of the development of science and its philosophical interpretation from the death of Newton to the early twentieth century. Prerequisite: Philosophy 317. 3 hours or 1 unit.
321. **Ethics and Value Theory.** Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
322. **Recent Developments in Ethics.** Ethical theories of the last fifty years; intuitionism, naturalism, pragmatism, emotivism, existentialism, and analytic ethics. Prerequisite: Philosophy 103, 105, or 321. 3 hours, or $\frac{3}{4}$ or 1 unit.
323. **Philosophy of Art.** 3 hours, or $\frac{3}{4}$ or 1 unit.
324. **Philosophy of Religion.** Same as Religious Studies 362. A critical consideration of central arguments in the philosophy of religion, both in their traditional forms and in their modern appearance: the justification of religious belief, the nature of God, religious experience, etc. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
325. **Philosophy of Mind.** Philosophical problems arising in connection with mental phenomena; the relation of mind and body; free will and determinism; our knowledge of other minds; and the self and personal identity. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
326. **Metaphysics.** Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
329. **The Philosophy of Social Science.** Same as Anthropology 329 and Sociology 325. A survey of philosophical problems encountered in the disciplines concerned with man and society, with particular emphasis on the extent to which questions and subject matter in these fields are amenable to scientific treatment. 3 hours or 1 unit.
330. **Theory of Knowledge.** The relative acceptability of authority, intuition, and the method of hypothesis as ways of establishing belief; logical and empirical truth; pragmatism and positivism; and other selected contemporary topics. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
331. **Analytic Philosophy.** Advanced treatment of problems of knowledge and method, and introduction to contemporary techniques of philosophical analysis; meaning and verification; inductive and deductive method; perceptual knowledge; certainty; and other selected topics. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
332. **Perception and Knowledge.** A systematic study of basic problems in the philosophy of perception; perceiving as a mental state; the objects of perception; sensing, sensation, and sensedata; perception and the external world; and perception as the basis for empirical knowledge. Traditional empiricist philosophies of perception are examined, and contemporary criticisms and defenses are assessed. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
333. **Symbolic Logic.** Study of the elementary principles of symbolic analysis as applied to logical problems. 3 hours, or $\frac{3}{4}$ or 1 unit.
334. **Symbolic Logic.** A general study of the more refined methods of symbolic analysis as applied to logical problems; particular attention to proof procedures as they relate to the question of consistency and completeness. Prerequisite: Philosophy 333. 3 hours, or $\frac{3}{4}$ or 1 unit.
335. **Social Philosophy.** Selected topics from the nature of social organization, nature and convention, utility, justice, equality, liberty, rights, and duties. Prerequisite: Philosophy 103, 105, or 321, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.

336. **Philosophy of Law and of the State.** Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
337. **Semantics.** An investigation of semantical concepts such as denoting and truth; a study of the functions of language; definition, meaning and verification, and semantical paradoxes. Prerequisite: A course in logic. 3 hours, or $\frac{3}{4}$ or 1 unit.
338. **Philosophies of Language.** Same as Linguistics 338. Study of the development of philosophical problems about language and their treatment from antiquity through the nineteenth century. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
339. **Philosophy of Mathematics.** Introduction to some of the main philosophical problems and contemporary viewpoints concerning mathematical concepts, mathematical methods, and the nature of mathematical truths; the concept of infinity; conventionalism and formalism; the distinction between analytic and synthetic truths; necessity; mathematics and the problem of universals; and other related topics. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
340. **The Philosophy of Alfred North Whitehead.** Examination of the mature thought of A. N. Whitehead, primarily as contained in *Process and Reality* and *Adventures of Ideas*, taking into account both the cosmological scheme and the application of his technical philosophy to social philosophy, to ethics, and to philosophy of religion. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
341. **Existential Philosophy.** Study of a selection of the major writings of the more important existential philosophers, e.g., Heidegger, Jaspers, and Sartre. Prerequisite: One course in philosophy (preferably Philosophy 311), or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
343. **Phenomenology.** Study of the development of phenomenology from Husserl to the present. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
345. **Marxist Philosophy.** Examination of the philosophical writings of a number of Marxist writers, from Marx himself to such neo-Marxists as Schaff, Petrovic, Sartre, and Marcuse. 3 hours, or $\frac{3}{4}$ or 1 unit.
353. **Formal Logic: Advanced Survey.** Techniques and results of symbolic logic, with special attention to topics of philosophical importance. Prerequisite: Philosophy 102, graduate standing, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
355. **Inductive Logic.** Philosophical foundations of probability theory; formal development and applications of the frequency and logical, and subjective interpretations to the philosophical problems of induction and confirmation. Prerequisite: Philosophy 333 or 353, or Mathematics 410, or consent of instructor. 3 hours or 1 unit.
361. **Comparative Religion.** A comparative study of classical high religions. 3 hours, or $\frac{3}{4}$ or 1 unit.
363. **Contemporary Religious Thought.** Same as Religious Studies 369. An analysis of contemporary philosophical developments in Judaism, Christianity, and Islam, with particular emphasis upon "neoorthodox" Protestant thought. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
369. **Indian Philosophy.** Survey of Indian philosophy; emphasizes readings in the fundamental texts of Indian thought; and develops basic familiarity with the wide range of Indian philosophies and theologies. Prerequisite: A previous course in philosophy, Religious Studies 297, or History 387. 3 hours, or $\frac{3}{4}$ or 1 unit.
371. **Philosophy of Science II: Contemporary Issues.** A comprehensive survey of the main developments in philosophy of science this century; concentration on the views of logical positivism, subjectivism, and scientific realism; and topics including the nature of theories, laws and counter-factuals, inductive logic and confirmation theory, experimental methodology, concept formation, and scientific revolutions. Prerequisite: Philosophy 270 or consent of instructor. 3 hours or 1 unit.
403. **Seminar in Medieval Philosophy.** 1 unit. May be repeated for credit.
405. **Seventeenth-Century Continental Thought (Descartes, Spinoza, Leibniz).** Study of the basic philosophical works of the three leading continental thinkers of the century. 1 unit. May be repeated for credit.

- 407. **British Empiricism.** 1 unit. May be repeated for credit.
- 408. **Seminar in Kant.** 1 unit. May be repeated for credit.
- 409. **American Philosophy.** Major American philosophers and movements. Reports and discussions. 1 unit. May be repeated for credit.
- 410. **Seminar in Nineteenth-Century Philosophy.** 1 unit. May be repeated for credit.
- 411. **Seminar in Ethical Theory.** 1 unit. May be repeated for credit.
- 412. **Seminar in Social Philosophy.** A seminar designed to study special problems in social philosophy; particular attention given to the contributions of the social sciences to social philosophy. See *Timetable* for current topics. 1 unit. May be repeated for credit.
- 413. **Logical Theory.** Logical syntax and semantics. Prerequisite: A course in logic or consent of instructor. 1 unit. May be repeated for credit.
- 415. **Seminar in Metaphysics.** Intensive study of a selected topic of major importance in the field of metaphysics. 1 unit. May be repeated for credit.
- 417. **Seminar in the Philosophy of Science.** Various problems arising from specific studies in philosophy pertaining to science and vice versa. To be offered with varying topics. 1 unit. May be repeated for credit.
- 420. **Seminar in Semantics.** Same as Communications 420. Intensive study of important contemporary contributions in the fields of semantics, analytic philosophy, and the philosophy of language. Prerequisite: Graduate standing in philosophy or equivalent. 1 unit. May be repeated for credit.
- 421. **Seminar in Contemporary Problems.** Intensive study of selected problems or topics in contemporary philosophy, with particular emphasis on questions of knowledge and value. 1 unit. May be repeated for credit.
- 423. **Seminar in the Theory of Knowledge.** Selected topics and writings of major importance in the contemporary philosophy of knowledge. 1 unit. May be repeated for credit.
- 425. **Seminar in the Philosophy of Mind.** Selected topics from major writings in the philosophy of mind. 1 unit. May be repeated for credit.
- 483. **Individual Topics.** Individual study and oral and written reports on topics not covered in other courses. Topics and plan of study must be approved by the candidate's adviser and by the staff member who directs the work. ½ or 1 unit (summer session, ½ to 2 units).
- 499. **Thesis Research.** 0 to 4 units.

Religious Studies

Director of Program: Professor W. R. Schoedel

Office: 4016c Foreign Languages Building, Urbana

- 100. **Patterns in the Religions of Mankind.** Study of elementary religious forms, turning points in the history of religions, and problems of religion and society. 3 hours.
- 101. **The Bible as Literature.** Themes and literary genres in the Bible, emphasizing content important in Western culture. 3 hours. No more than 6 hours of credit may be received for Religious Studies 101, 201, and 202.
- 102. **Issues in Modern Religion.** Theological reflection on contemporary intellectual issues, including the dialogue between religion and aspects of social theory, psychology, history, and the natural sciences. 3 hours.
- 108. **Introduction to Biblical Hebrew.** Same as Hebrew 110. Stress on mastery of grammar, reading, writing, and simple prose composition; reading of simple Biblical prose. 4 hours.
- 109. **Introduction to Biblical Hebrew.** Same as Hebrew 111. Syntax and reading of simple classics' prose narrative. Prerequisite: Hebrew 110. 4 hours.
- 110. **World Religions.** Same as Philosophy 110. Survey of the leading living religions, including Hinduism, Buddhism, Taoism, Mohammedanism, Judaism, and Christianity;

examination of basic texts and of philosophic theological elaborations of each religion. 3 hours.

111. **Elementary Koine Greek.** Same as Greek 111. Introduction to the fundamentals of Koine Greek, including reading from the New Testament. 4 hours.
112. **Elementary Koine Greek.** Same as Greek 112. Continuation of Religious Studies 111. Grammar and reading. Prerequisite: Religious Studies 111 or equivalent. 4 hours.
120. **Judaism: An Introduction.** Conceptions of the Holy Man and of Holiness within the Judaic tradition: the man of God, the worldly scribe, and the philosopher-king; holiness within and outside society; holiness through the heart, the mind, and the law; holiness through study; and the holy land, the holy tradition, and the new holy man. 3 hours.
121. **Christianity: An Introduction.** Typological approach to the major contemporary forms of Christianity: Eastern Orthodoxy, Catholicism, and Protestantism. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Intermediate Koine Greek.** Same as Greek 200. Reading of narrative and epistolary New Testament Greek. Prerequisite: Religious Studies 112 or equivalent. 4 hours.
201. **Ancient Israel: History and Literature.** The major literary works of the Old Testament as classic expressions of ancient Israelite culture and religion; the function of dramatic forms and literary structures in articulating perennial human problems, specific cultural values, and the relation of religion to social life. Open to sophomores in good standing. 3 hours. No more than 6 hours of credit may be received for Religious Studies 101, 201, and 202.
202. **Earliest Christianity: The New Testament Period.** The ministry and teaching of Jesus within the historical context of ancient Judaism; the development of the Christian church from its beginnings as a sect within ancient Judaism to its independent existence in the Hellenistic world. Open to sophomores in good standing. 3 hours. No more than 6 hours of credit may be received for Religious Studies 101, 201, and 202.
204. **Prophecy in Israel and the Ancient Near East.** Prophetic performance in the ancient Near East; Israelite prophetic traditions; and general theories about prophecy. 3 hours.
208. **The Dead Sea Scrolls.** The literary works discovered in 1947 which were collected or written by a sect within Judaism near Wadi Qumran prior to the destruction of the Temple of Solomon in the first century of our era; their significance for understanding Judaism and Christianity. Prerequisite: Religious Studies 201 or 202. 3 hours.
210. **Biblical Prose.** Same as Hebrew 210. Reading and discussion of selections from the Books of Samuel with emphasis on grammar and exegesis; exercises in prose composition. Prerequisite: Religious Studies 108 and 109. 4 hours.
220. **Judaism in Modern Europe.** European Judaism from 1648 to 1917: Sabbatism, Hasidism, Zionism, birth of Jewish studies, birth of Reform Judaism, Neo-Orthodoxy, anti-Semitism, birth of modern Hebrew literature, and Secularism. 3 hours.
221. **American Judaism.** Forms of Judaism in America: Reform, Conservative, Reconstructionist, Orthodox, and Hasidic Judaism; the American rabbi; Zionism in American Jewish communal life; national Jewish organizations; the American synagogue; and the secular Jew. 3 hours.
229. **Sociology of Religion.** Same as Sociology 229. The functions of religious institutions in societies; religious leaders and leadership; religious groups in American society; and adaptations of religious institutions to modern needs and conditions. Prerequisite: A course in introductory sociology. 3 hours.
230. **Philosophy of Religion: Introduction.** Same as Philosophy 230. A critical study of theories about the nature of religion. 3 hours.
235. **Religion, Identity, and Meaning.** A psychohistorical approach to the study of religion. 3 hours.
240. **Judaism in Antiquity: From Ezra to Destruction of the Second Temple.** Judaism from 586 B.C. to A.D. 70: Nehemiah; the Samaritans; Jewish Apocalyptic; Ben Sira; Philo; the Pharisees; the Dead Sea Sect; the Zealots; the Sicarii; the Sadducees; and Judaism and Hellenism. 3 hours.

241. **Judaism in Antiquity: The Rabbinic Period.** Judaism from the destruction of the Second Temple until the Moslem conquest: the religion of the ordinary folk; the synagogue; the literary products of the period; the social forms of rabbinic Judaism; and the theology of the rabbis. 3 hours.
288. **Chinese Religion: An Introduction.** Introduction to the Chinese religious traditions from classical to modern times; emphasis on the ideals of Confucianism, Taoism, and Buddhism, and their historical interactions; for students interested in gaining sympathy with Eastern faith. 3 hours.
290. **Independent Study.** Special topics not treated in regularly scheduled courses; designed primarily for upperclassmen. Prerequisite: Evidence of adequate preparation for such study; consent of staff member supervising the work. 2 to 6 hours. May be repeated.
296. **Special Topics in the History of Judaism.** 3 hours. May be repeated for a maximum of 6 hours.
297. **Special Topics in Hinduism.** Elements of Hindu thought and practice; selected topics presented in historical order and in the context of Indian cultural history (including the present). 3 hours.
298. **Special Topics in Biblical Interpretation.** Detailed interpretation of selected books of the Bible. Prerequisite: Religious Studies 201 or 202. 3 hours.
301. **Introductory Coptic, I.** Same as Coptic 301. Introduction to the principles of Coptic grammar and to the reading of biblical and gnostic texts. A knowledge of classical or koine Greek, though useful, is not required. 3 hours or $\frac{3}{4}$ unit.
302. **Introductory Coptic, II.** Same as Coptic 302. Continuation of Coptic/Religious Studies 301; reading of gnostic and postbiblical texts. Prerequisite: Coptic/Religious Studies 301. 3 hours or $\frac{3}{4}$ unit.
304. **Medieval Civilization.** Same as History 304. The architectural, artistic, philosophical, political, and religious components of medieval culture, thought, and patterns of behavior; includes monasticism and society and the individual. Prerequisite: Sophomore standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
305. **The Age of the Renaissance.** Same as History 305. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
306. **The Age of the Protestant and Catholic Reformation, 1500-1648.** Same as History 306. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
307. **Islam and the Near East, from Mohammed to 1258.** Same as History 307. The Near East under the Arab caliphs; the political, institutional, and intellectual development of Islam. Prerequisite: One year of college history. 3 hours, or $\frac{1}{2}$ or 1 unit.
311. **Hebrew Poetry.** Same as Hebrew 311. Translation and analysis of ancient Hebrew poetry, with emphasis on the development of Hebrew prosodic style and on textual criticism; research paper required for graduate credit. Prerequisite: Religious Studies 210 or equivalent. 4 hours or 1 unit.
328. **Sociology of Asian Religions.** Same as Sociology 328. A comparative study of the influences of religion on the societies of Asia, and vice-versa; focus on the problems of social change and development; and concentration on the religious and social systems of Iran, India, Thailand, China, and Japan. Prerequisite: Religious Studies 229 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
330. **Martin Luther.** Same as German 330. Special attention to Luther as an artist and to his importance for the development of German language and literature; attention also paid to the historical and intellectual trends of the fifteenth and sixteenth centuries as well as to the significance of Luther in modern psychological and sociological thought. Prerequisite: A reading knowledge of German or Latin, or consent of the instructor. 3 hours or $\frac{3}{4}$ unit.
340. **The Formation of Christian Thought.** Study of major developments in early Christian thought (first four centuries) through discussion of primary texts in translation. Prerequisite: Religious Studies 201 and 202, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
362. **Philosophy of Religion.** Same as Philosophy 324. A critical consideration of central arguments in the philosophy of religion, both in their traditional forms and in their mod-

- ern appearance: the justification of religious belief, the nature of God, religious experience, etc. Prerequisite: One course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
363. **Religion in Anthropological Perspective.** Same as Anthropology 363. Introduction to the study of magical and religious beliefs and practices in tribal and peasant societies; consideration of theories of the nature, origin, and function of magic and religion; myth, ritual, and symbolism; the relationship between great folk religious traditions; and socioreligious movements. Prerequisite: Anthropology 230 or 260, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
369. **Contemporary Religious Thought.** Same as Philosophy 363. An analysis of contemporary philosophical developments in Judaism, Christianity, and Islam, with particular emphasis upon "Neoorthodox" Protestant thought. Prerequisite: One 5course in philosophy. 3 hours, or $\frac{3}{4}$ or 1 unit.
371. **The Gospels.** Same as Greek 371. Reading and analysis of the Greek Gospels following literary-critical, form-critical, and redaction-critical approaches. Prerequisite: Greek 201 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
381. **American Intellectual and Cultural History to 1865.** Same as History 371. The development of American thought to the mid-nineteenth century, emphasizing the interplay between imported ideas (religious, scientific, political, social, educational, and artistic) and the material and social environment in shaping American life. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
382. **American Intellectual and Cultural History since 1859.** Same as History 372. The development of American thought and culture since 1859, emphasizing Darwinism and naturalist thought, religious and cultural events, the impact of science and technology, the American university, and recent cultural conflicts. Prerequisite: One year of college history or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
387. **History of Indian Buddhism.** The history of Buddhism in India from the Buddha to the Tantra, with emphasis on religious thought and practices. 3 hours, or $\frac{3}{4}$ or 1 unit.
388. **History and Thought of Chinese Buddhism.** Survey of the history of Chinese Buddhism since its introduction; analysis of Buddhological trends and styles; and the sociocultural milieu of Chinese Buddhism and its place in the total history of ideas and lifestyles. Prerequisite: Religious Studies 288 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
389. **Religion and Society in Japan.** Historical analysis of the interrelationship between religion and society in Japan from ancient to recent times; Shinto, Confucianism, Buddhism, and the unique expressions of various periods in art, architecture, and literature; includes primitivism, aesthetics, syncretism, reformation, and modernization. 3 hours, or $\frac{3}{4}$ or 1 unit.
490. **Independent Study.** Special topics not treated in regularly scheduled courses; for graduates. Prerequisite: Evidence of adequate preparation for such study and consent of staff member supervising the work. $\frac{1}{2}$ to 1 $\frac{1}{2}$ units. May be repeated.

Slavic Languages and Literatures

(Including Czech, Polish, Russian, Serbo-Croatian, Slavic, and Ukrainian)

Head of Department: Professor M. Friedberg

Department Office: 3092 Foreign Languages Building, Urbana

CZECH

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
383. **The Structure of Modern Czech.** Analysis of the sound system and grammar of the contemporary Czech language with some reference to its historical development. Pre-

quisite: A knowledge of another Slavic language, preferably Russian, or consent of department. 3 hours or $\frac{3}{4}$ unit.

384. **Readings in Czech Literature.** Representative works of modern Czech literature and their historical and cultural background. Prerequisite: Czech 383 or consent of department. 3 hours or $\frac{3}{4}$ unit.

POLISH

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
345. **Polish Literature in Translation, I.** A critical survey, in translation, of Polish literature from the Middle Ages to the end of the nineteenth century illustrating the continuity of certain trends of thought and genre; special attention given to the works in their cultural context. 3 hours or 1 unit.
346. **Polish Literature in Translation, II.** A critical study, in translation, of modern Polish fiction, drama, poetry and essay, from young Poland to the New Wave ; their contribution to literary styles and genres in Poland and abroad; and special emphasis on Wyspianski, Witkiewicz, and Gombrowicz. 3 hours or 1 unit.
385. **The Structure of Modern Polish.** Analysis of the sound system and grammar of the contemporary Polish language. Prerequisite: Knowledge of another Slavic language or consent of department. 3 hours or $\frac{3}{4}$ unit.
386. **Readings in Polish Literature.** Analysis of selected literary texts. Prerequisite: Polish 385 or consent of department. 3 hours or $\frac{3}{4}$ unit.

RUSSIAN

Courses taught in Russian are 211, 212, 213, 214, 215, 216, 217, 301, 302, 303, 304, 313, and 314.

101. **First-Year Russian.** Oral-aural practice and elements of grammar, reading, and writing. For students who have no credit in Russian. 4 hours.
102. **First-Year Russian.** Continuation of Russian 101. Oral-aural practice and elements of grammar, reading, and writing. Prerequisite: Russian 101. 4 hours.
103. **Second-Year Russian.** Oral-aural practice, systematic functional grammar, reading, and writing. Prerequisite: Russian 102 or equivalent. 4 hours.
104. **Grammar Review and Conversation.** Systematic review of the structure of Russian covered in Russian 101-103 through class lectures, drills, and homework sheets; special attention paid to improving listening and speaking skills through class discussions and oral reports in Russian. Prerequisite: Russian 103. 4 hours.
105. **Grammar Review and Readings in Russian Culture.** Systematic review of the structure of Russian covered in Russian 101-103 through class lectures, drills, and homework sheets, as well as readings on various topics aimed at increasing the student's vocabulary and broadening cultural awareness of the Russian people. Prerequisite: Russian 103. 4 hours.
106. **Grammar Review and Readings in Russian Literature.** Identical to Russian 105, except that the readings are selected from Russian artistic literature. Prerequisite: Russian 103. 4 hours.
111. **Intensive First-Year Russian.** Oral-aural practice and elements of grammar, reading, and writing. Equivalent to Russian 101 and 102; for students who have no credit in Russian. 8 hours.
114. **Russian Civilization.** Survey of Russian civilization and culture with special emphasis on the people, national and social institutions, religion, and the arts (architecture,

- sculpture, painting, music, theatre, ballet). No knowledge of Russian required. 4 hours.
115. **Russian Masterpieces: The Modern Hero.** Readings in English translation selected from the nineteenth and twentieth centuries to illustrate the Russian contribution to man's perception of himself in literature during the modern era; Dostoevsky, Tolstoy, Chekhov, Solzhenitsyn, and others. No knowledge of Russian required. 3 hours.
116. **Russian Masterpieces: The Writer and Society.** Readings in English translation emphasizing the relationship between writer and state, the special bond between many Russian writers and the Russian land and people, and the persistent concern with the historical destiny of Russia and of mankind in general; Dostoevsky, Chekhov, Solzhenitsyn, Nabokov, and others. No knowledge of Russian required. 3 hours.
121. **Beginning Reading Course, I.** Russian basic grammar and vocabulary for recognition purposes; prepares students to read Russian for meaning and to translate into English. This course, taken in sequence with Russian 122, 123, and 124, meets the same requirements and can be taken in place of Russian 101, 102, 103, and 104. 4 hours.
122. **Beginning Reading Course, II.** Practice in reading and translating Russian texts of a general and specialized nature; emphasis on increasing speed, accuracy, and vocabulary. Prerequisite: Russian 121. 4 hours.
123. **Intermediate Reading Course, I.** Practice in reading and translating Russian texts of a general and specialized nature; emphasis on increasing speed, accuracy, and vocabulary. Prerequisite: Russian 122. 4 hours.
124. **Intermediate Reading Course, II.** Continuation of Russian 123. Prerequisite: Russian 123. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
211. **Oral Russian, I.** Conversational practice for the development of oral facility with emphasis on contemporary usage. Prerequisite: Russian 104 or consent of instructor. 3 hours.
212. **Oral Russian, II.** Conversational practice for the development of oral facility with emphasis on contemporary usage. Prerequisite: Russian 211 or consent of instructor. 3 hours.
213. **Russian Composition, I.** Training in writing Russian; translation from English and free composition. Prerequisite: Russian 104 or consent of instructor. 3 hours.
214. **Russian Composition, II.** Training in writing Russian; translation from English and free composition. Prerequisite: Russian 213 or consent of instructor. 3 hours.
215. **Introduction to Russian Literature, I.** Reading and close analysis of texts selected from Russian literature. Prerequisite: Two years of college Russian or consent of instructor. 3 hours.
216. **Introduction to Russian Literature, II.** Reading and close analysis of texts selected from Russian literature. Prerequisite: Russian 215 or consent of instructor. 3 hours.
217. **Introduction to Contemporary Russian Literature.** Reading and critical analysis of selected readings from post-thaw (1956) Russian literature. Prerequisite: Russian 215. 3 hours.
280. **Teachers Course.** An introduction to the problems of the teaching of Russian and a study of textbooks. Prerequisite: Three years of college Russian or equivalent. 4 hours.
290. **Readings in Russian.** Individual topics or projects chosen in consultation with a Slavic Department representative. Prerequisite: Russian 104, 105, 106, or 124, or equivalent proficiency. 1 to 4 hours. May be repeated for a maximum of 8 hours.
293. **Honors Senior Thesis.** Intended primarily for candidates for honors in Russian, but open to other seniors. Prerequisite: Senior standing. 2 hours. May be repeated.
301. **Russian Prose Fiction, I.** An introduction to the short story as a genre in nineteenth- and twentieth-century Russian literature; emphasis on fundamental techniques of literary criticism. Prerequisite: Russian 216 or equivalent. 3 hours or $\frac{3}{4}$ unit.
302. **Russian Prose Fiction, II.** An introduction to the short story as a genre in nineteenth- and twentieth-century Russian literature; emphasis on fundamental techniques of literary criticism. Prerequisite: Russian 301. 3 hours or $\frac{3}{4}$ unit.

303. **Advanced Reading and Conversation, I.** Practice in conversation with a native speaker, based on reading materials from Russian literature and culture. Prerequisite: Three years of college-level Russian. 3 hours or $\frac{1}{2}$ unit.
304. **Advanced Reading and Conversation, II.** Practice in conversation with a native speaker, based on reading materials from Russian literature and culture. Prerequisite: Russian 303 or equivalent. 3 hours or $\frac{1}{2}$ unit.
307. **Structure of Russian.** The morphology, syntax, and lexicon of modern Russian contrasted with English; attention to problems of teaching. Prerequisite: Russian 214 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
308. **Russian Phonetics and Pronunciation.** Study of the Russian sound system; training in the improvement of pronunciation and intonation. Prerequisite: Russian 212 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
313. **Advanced Composition and Usage, I.** Practice in advanced composition and study of advanced problems of grammatical structure; emphasis on morphological categories in Russian grammar. Prerequisite: Three years of college Russian including Russian 214, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
314. **Advanced Composition and Usage, II.** Further practice in advanced composition and study of advanced problems of grammatical structure; emphasis on syntax, usage, and style. Prerequisite: Russian 313 or consent of department. 3 hours or $\frac{3}{4}$ unit.
315. **Nineteenth-Century Literature in Translation.** A study of major Russian writers from Pushkin through Chekhov; no knowledge of Russian required. 3 hours or 1 unit.
317. **Twentieth-Century Literature in Translation.** A study of major Russian writers from 1900 to the present; no knowledge of Russian required. 3 hours or 1 unit.
321. **Russian Romanticism.** Representative works of the period 1810 to 1845, with emphasis on Pushkin, Lermontov, and Gogol; readings in English for nonconcentrators; classroom discussions in English. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
322. **Dostoevsky and Tolstoy.** Representative works in their historical and cultural contexts; readings in English for nonconcentrators; classroom discussions in English. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
323. **Russian Realism.** Representative works of the period 1845 to 1880, with emphasis on Turgenev, Dostoevsky, and Tolstoy; readings in English for nonconcentrators; classroom discussions in English. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
324. **Russian Modernism.** Representative works of the period 1880 to 1917, with emphasis on Chekhov, Gorky, and Blok; readings for nonconcentrators and class discussions in English. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
325. **Soviet Russian Literature.** Representative works of Russian literature since 1917, including Mayakovsky, Pasternak, Solzhenitsyn, and others; readings in English for nonconcentrators; classroom discussions in English. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
335. **Russian Drama.** Historical survey of Russian dramatists and their works, from the origins in folk and liturgical playlets through classicism, Gogol, Ostrovsky, Chekhov, and Stanslavsky to Meierhold and the Soviet drama. Prerequisite: Junior standing or consent of instructor. 3 hours or 1 unit.
337. **Russian Poetry.** A study of significant Russian poets and their works from Zhukovsky through the twentieth century. Prerequisite: Russian 216 or equivalent. 3 hours or 1 unit.
370. **Vladimir Nabokov.** Same as Comparative Literature 370 and English 370. The major contribution of Vladimir Nabokov to world literature; no knowledge of Russian required. Prerequisite: Junior standing or consent of instructor. 3 hours or 1 unit.
400. **Beginning Russian for Graduate Students.** Basic grammar and vocabulary; introduction to the reading of Russian texts in the sciences and the humanities. Designed for graduate students preparing to offer a reading knowledge of Russian for the Ph.D. 4 hours.

401. **Readings in Russian for Graduate Students.** Reading and translation of general and individually specialized materials, to increase speed, accuracy, and vocabulary; designed for graduate students preparing to offer a reading knowledge of Russian for the Ph.D. Prerequisite: Russian 400 or equivalent. 4 hours.
406. **Russian Morphology.** Survey of the various parts of speech of modern standard literary Russian with special emphasis on the nominal and verbal systems. 1 unit.
407. **Russian Syntax.** Survey of historical and contemporary Russian syntax. Prerequisite: Consent of instructor or head of department. 1 unit.
408. **Russian Phonology.** Same as Linguistics 408. The sound pattern of Russian in its synchronic and diachronic aspects. Prerequisite: Consent of instructor. 1 unit.
410. **Old Russian Literature.** Reading and analysis of texts with historical and literary commentary. Prerequisite: Slavic 405. 1 unit.
412. **Literature of the Eighteenth Century.** Reading of texts; historical and literary background of the period. 1 unit.
414. **Pushkin.** The age of Pushkin; Pushkin's works in historical and comparative perspective; textual criticism, linguistic and structural analysis, intellectual interpretation, and aesthetic evaluation. Prerequisite: Consent of instructor or head of department. 1 unit.
415. **Dostoevsky.** Same as Comparative Literature 415. Dostoevsky: historical background, textual analysis, structure, philosophy, artistic evaluation, and influence on French, English, American, and German literatures. 1 unit.
417. **History of the Russian Language.** Historical grammar, origin, and development of the literary language. Prerequisite: Slavic 405 or consent of instructor. 1 unit.
419. **Tolstoy.** Same as Comparative Literature 419. Tolstoy: historical background, textual analysis, structure, philosophy, aesthetic evaluation, and influence on French, English, American, and German literatures. 1 unit.
420. **Chekhov.** Same as Comparative Literature 420. Chekhov: historical background, textual criticism, structural analysis, philosophy, artistic evaluation, and interrelationship with English, French, German (and Scandinavian), and American literatures. 1 unit.
421. **Seminar in the Russian Novel.** Dostoevsky, Tolstoy, the nineteenth-century novel, and the twentieth-century novel. Prerequisite: Consent of instructor or head of department. 1 unit. May be repeated for a maximum of 3 units.
422. **Russian Literature in Exile.** Bunin, Merezhkovsky, Kuprin, Zaitsev, Remizov, Teffi, Aldanov, Shmelev, Z. Hippus, V. Ivanov, Khodasevich, Tsvetaeva, Varshavsky, Odoevtseva, G. Ivanov, and Adamovich: prose writers, poets, and critics. 1 unit.
423. **Seminar in Russian Poetry.** Pushkin, narrative verse, lyric verse, and symbolism. Prerequisite: Russian 337 or consent of department. 1 unit. May be repeated for a maximum of 3 units.
424. **Gogol.** Historical background, textual criticism, structural analysis, philosophy and ideology, and aesthetic evaluation. Prerequisite: Consent of instructor or head of department. 1 unit.
425. **Seminar in Russian Drama.** Intensive analysis and discussion of specific genres, periods, and dramatists in the light of dramatic theories; subject varies each year. Prerequisite: Russian 335 or consent of department. 1 unit. May be repeated for a maximum of 3 units.
463. **College Teaching of Foreign Languages.** Same as English as a Second Language, French, German, and Spanish 463. Rationale for curricular objectives for college courses in foreign languages; the teaching and testing of pronunciation, listening comprehension, speaking, reading, writing, cultural understanding, and literary appreciation; the use of technology; and recent experimentation. 1 unit.
481. **Seminar in Linguistic and Psychological Foundations of Language Teaching.** Same as English as a Second Language, French, German, and Spanish 481. Language teaching problems considered in the light of theoretical and experimental work in language acquisition, verbal learning and memory, motivation, speech perception, reading, error analysis, and language as an aspect of culture and societal relations. Prerequisite: Consent of instructor. 1 unit.

SERBO-CROATIAN

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
392. **Structure of Modern Serbo-Croatian.** Analysis of the sound system and grammar of the contemporary Serbo-Croatian language. Prerequisite: Knowledge of another Slavic language or consent of department. 3 hours or $\frac{3}{4}$ unit.
393. **Reading in Serbo-Croatian Literature.** Reading, analysis, and discussion of selected excerpts from Serbo-Croatian literature, scientific prose, and current press. Prerequisite: Serbo-Croatian 392 or consent of department. 3 hours or $\frac{3}{4}$ unit.

SLAVIC

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
319. **Russian and East European Cinema.** Same as Communications and Speech Communication 319. Artistic, literary, and social aspects of cinema history, particularly Russian, Czech, Polish, and Yugoslavian. No reading knowledge of Russian is required, except for Department of Slavic Languages and Literatures majors. 3 hours or $\frac{3}{4}$ unit.
380. **Introduction to Slavic Linguistics.** Same as Linguistics 380. The development of Common Slavic from Indo-European and its relationship to contemporary Slavic languages. Prerequisite: Reading knowledge of at least one Slavic language. 3 hours or $\frac{3}{4}$ unit.
381. **Introduction to Study and Research in Slavic Languages and Literatures.** Introduction to methods and resources for study and research in Slavic languages, Russian literature, and Russian language teaching. 2 hours or $\frac{1}{2}$ unit.
382. **Language Laboratory Techniques.** Same as Classical Civilization, English as a Second Language, French, German, Humanities, and Spanish 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
387. **Introduction to Myth and Folklore.** Same as Comparative Literature, English, German and Speech Communication 387. Prerequisite: One year of college literature, or consent of instructor. 3 hours or 1 unit.
405. **Old Church Slavonic.** Analysis of grammar and reading of texts. Prerequisite: Slavic 380 or consent of instructor. 1 unit.
431. **Comparative Slavic Literature.** Same as Comparative Literature 431. Survey of Slavic literatures, especially Czech, Polish, and Yugoslav, and their connection with Russian and Western traditions. 1 unit.
460. **Comparative Slavic Linguistics.** A comparative analysis of the structure of contemporary Slavic languages in the light of their common Slavic origin. Prerequisite: Slavic 380. 1 unit.
485. **The Structure of West Slavic Languages.** Linguistic survey of the West Slavic languages: Polish, Czech, Slovak, Lusatian, and Kashubian; focus on one of the major West Slavic languages (Czech or Polish) as compared with the other West Slavic languages and languages of the East and South groups. Prerequisite: Slavic 380. 1 unit.
491. **Individual Topics.** Prerequisite: Graduate standing with a major or minor in Russian. $\frac{1}{4}$ to 2 units.
492. **The Structure of South Slavic Languages.** Linguistic survey of the South Slavic languages: Serbo-Croatian, Bulgarian, Slovenian, and Macedonian; focus on Serbo-Croatian as compared with the other South Slavic languages and the languages of the East and West Slavic groups. Prerequisite: Slavic 380. 1 unit.
499. **Thesis Research.** 0 to 4 units.

UKRAINIAN

118. **Ukrainian Literature in Translation.** Critical survey of major works in Ukrainian literature from the beginnings to the modern period in light of their historical and cultural background; lectures and readings in English. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
396. **The Structure of Ukrainian.** Ukrainian phonology, morphology, and syntax, presented against Russian as a background and basis for comparison of these two East Slavic languages. Prerequisite: Russian 104 or equivalent. 3 hours or $\frac{3}{4}$ unit.
398. **Ukrainian Literature in Translation.** Critical survey of major works in Ukrainian literature from the beginnings to the modern period in light of their historical and cultural background; lectures and readings in English. 3 hours or $\frac{3}{4}$ unit.

Spanish, Italian, and Portuguese

(Including Catalan and Romance Linguistics)

Head of Department: Professor A. M. Pasquariello

Department Office: 4080 Foreign Languages Building, Urbana

CATALAN

301. **Studies in Catalan Language.** An introductory study of the Catalan language. Prerequisite: Eight hours of Latin or any Romance language. 2 hours or $\frac{1}{2}$ unit.
302. **Studies in Catalan Literature.** An introductory study to major works of Catalan literature. Prerequisite: Catalan 301. 2 hours or $\frac{1}{2}$ unit.

ITALIAN

101. **Elementary Italian.** For students who have no credit in Italian. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. 4 hours.
102. **Elementary Italian.** Continuation of Italian 101. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. Prerequisite: Italian 101 or one year of high school Italian. 4 hours.
103. **Intermediate Italian.** Rapid reading, review of grammar, composition, and conversation. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. Prerequisite: Italian 102 or two years of high school Italian. 4 hours.
104. **Intermediate Italian.** Continuation of Italian 103. Prerequisite: Italian 103 or three years of high school Italian. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
209. **Italian Syntax and Phonetics.** Italian composition and conversation; syntax and phonetics. Prerequisite: Italian 104 or consent of instructor. 3 hours.
211. **Composition and Conversation, I.** Training in oral-aural skill and in writing; practice in the language laboratory required. Prerequisite: Italian 209 or consent of instructor. 3 hours.
212. **Composition and Conversation, II.** Continuation of Italian 211. Prerequisite: Italian 211 or consent of instructor. 3 hours.
221. **Introduction to Italian Literature, I.** Introduction to representative works and movements of Italian literature since the Renaissance. Prerequisite: Italian 104 or consent of instructor. 3 hours.

222. **Introduction to Italian Literature, II.** Introduction to representative works and movements of Italian literature in the Middle Ages and the Renaissance. Prerequisite: Italian 221 or consent of instructor. 3 hours.
290. **Readings in Italian.** Readings chosen in consultation with an adviser. Prerequisite: Italian 104 or consent of instructor. 2 to 4 hours. May be repeated for credit.
293. **Honors Senior Thesis.** For candidates for honors in Italian. 2 hours. May be repeated.
309. **Petrarch and Boccaccio: Literature of the Italian Middle Ages.** Studies in Petrarch and Boccaccio; nonconcentrators in Italian may read the works in translation; lectures are in English. Prerequisite: Fulfillment of campus rhetoric requirement. 3 hours or $\frac{3}{4}$ unit.
311. **Dante: *La Divina Commedia*, I.** Prerequisite: Italian 222 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
312. **Dante: *La Divina Commedia*, II.** Prerequisite: Italian 311 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
313. ***The Divine Comedy*.** Same as Comparative Literature 313. An interpretation of Dante's *Divine Comedy* with special attention to its position in the medieval world; a knowledge of Italian not required. Prerequisite: Junior standing. 2 hours or $\frac{1}{2}$ unit.
321. **Modern Italian Literature, I.** Prerequisite: Italian 222 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
322. **Modern Italian Literature, II.** Prerequisite: Italian 321 or 222, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
331. **Italian Culture.** Introduction to factors that have shaped present-day Italy; basic concepts contributing to understanding its present social and cultural development. Prerequisite: Italian 211 or 221, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
333. **Masterpieces of Italian Renaissance Literature.** A reading of masterpieces of the 1400 and 1500s and a study of their predecessors and influence; nonconcentrators in Italian may read the works in translation; lectures are in English. Content rotates. Prerequisite: Fulfillment of campus rhetoric requirement. 3 hours or $\frac{3}{4}$ unit. May be repeated to a maximum of 6 hours or 1 $\frac{1}{2}$ units with consent of instructor.
362. **Introduction to Romance Linguistics.** Same as French, Linguistics, Portuguese, Romance Linguistics, and Spanish 362. Comparative and historical analysis of the Romance languages. Prerequisite: Four semesters of a Romance language or Latin, or equivalent. 3 hours or $\frac{3}{4}$ unit.
400. **Beginning Course for Graduate Students.** Basic grammar and vocabulary; reading practice. 4 hours. No graduate credit.
401. **Readings in Italian for Graduate Students.** An intensive language course designed to teach reading skills to graduate students; a continuation of Italian 400. Prerequisite: Italian 400 or consent of instructor. 4 hours. No graduate credit.
411. **Italian Literature in the Middle Ages: Petrarch and Boccaccio.** 1 unit.
412. **Italian Literature in the Middle Ages: Petrarch and Boccaccio.** 1 unit.
415. **Italian Literature of the Renaissance.** 1 unit.
416. **Italian Literature of the Renaissance.** 1 unit.
422. **Manzoni e il romanticismo europeo.** Manzoni and the romantic movement. Prerequisite: Italian 321 and 322, or equivalent. 1 unit.
447. **Introduction to Romance Stylistics.** Same as French, Portuguese and Spanish 447. A brief history of the schools and theories of Romance stylistics, especially the French-Swiss *stylistique* (Bally, Marouzeau, and Cressot) and the German-Spanish *Stilforschungen* (Spitzer, Hatzfeld, Kayser, A. Alonso, and D. Alonso); includes a study of representative works and assigned topics for analysis. Prerequisite: Graduate standing in one of the Romance languages; reading knowledge of French and Spanish or consent of instructor. 1 unit.
451. **History of the Italian Language.** 1 unit.
452. **Seminar in Italian Linguistics.** 1 unit.
462. **Seminar in Romance Linguistics.** Same as French, Linguistics, Portuguese, Romance

Linguistics, and Spanish 462. Selected topics in comparative Romance linguistics. Prerequisite: Italian 362 and consent of instructor. 1 unit.

491. **Special Topics in Italian.** $\frac{1}{2}$ or 1 unit.

499. **Thesis Research.** 0 to 4 units.

PORTUGUESE

101. **Elementary Portuguese, I.** For students who have no credit in Portuguese. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. 4 hours.

102. **Elementary Portuguese, II.** Continuation of Portuguese 101. Prerequisite: Portuguese 101. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. 4 hours.

103. **Intermediate Portuguese.** Rapid reading, review of grammar, composition, and conversation. Prerequisite: Portuguese 102 or 111, or two years of high school Portuguese. 4 hours.

104. **Intermediate Portuguese.** Continuation of Portuguese 103. Prerequisite: Portuguese 103 or three years of high school Portuguese. 4 hours.

111. **Elementary Portuguese.** For students who have no credit in Portuguese. All students in this course are required to register for two hours per week in the language laboratory. 8 hours.

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.

209. **Portuguese Syntax and Phonetics.** An introduction to the advanced study of the language with basic elements of applied phonetics and syntax. Must be taken with Portuguese 211. Prerequisite: Portuguese 104 or consent of instructor. 3 hours.

211. **Composition and Conversation, I.** Prerequisite: Portuguese 104 or consent of instructor. 3 hours.

212. **Composition and Conversation, II.** Prerequisite: Portuguese 211 or consent of instructor. 3 hours.

221. **Introduction to Portuguese Literature.** Survey of the most representative works from the Middle Ages to the present with emphasis on the evolution of the country's literary history. Prerequisite: Portuguese 104 or consent of instructor upon demonstrating competency in reading Portuguese. 3 hours.

222. **Introduction to Brazilian Literature.** Survey of the most representative works from the sixteenth century to the present with emphasis on the evolution of the country's literary history. Prerequisite: Portuguese 221 or consent of instructor. 3 hours.

290. **Readings in Portuguese.** Readings chosen in consultation with a departmental adviser. Prerequisite: Portuguese 104 or consent of instructor. 2 to 4 hours.

301. **Brazilian Literature.** Prerequisite: Portuguese 222 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.

302. **Portuguese Literature.** Prerequisite: Portuguese 222 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.

303. **Luso-Brazilian Culture.** Affords a broad understanding of the origins of Luso-Brazilian civilization and culture. Prerequisite: Portuguese 211 or 221, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.

304. **Brazilian Culture.** Affords a broad understanding of contemporary Brazilian civilization and culture. Prerequisite: Portuguese 211 or 221, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.

305. **Reading Portuguese.** An accelerated course based on Portuguese-Spanish contrastive analysis; designed to enable students who can already read Spanish to read nonliterary and literary works in Portuguese and to develop a modicum of listening comprehension. Prerequisite: Spanish 104 or equivalent, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.

362. **Introduction to Romance Linguistics.** Same as French, Italian, Linguistics, Romance Linguistics, and Spanish 362. Comparative and historical analysis of the Romance languages. Prerequisite: Four semesters of a Romance language or Latin, or equivalent. 3 hours or $\frac{3}{4}$ unit.
405. **Structure of Brazilian Portuguese: Phonology.** Phonetics and phonemics of modern Brazilian Portuguese. Prerequisite: Portuguese 104 or consent of instructor. 1 unit.
406. **Structure of Brazilian Portuguese: Morphology and Syntax.** Morphemics and syntax of modern Brazilian Portuguese. Prerequisite: Portuguese 405 or consent of instructor. 1 unit.
407. **Studies in Brazilian Literature.** Advanced study of literary movements, major writers, and intellectual and cultural ideas in Brazilian literature; subject matter varies each time the course is offered. Prerequisite: Portuguese 301 or consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
408. **Studies in Portuguese Literature.** Advanced study of literary movements, major writers, and intellectual and cultural ideas in Portuguese literature; subject matter varies each time the course is offered. Prerequisite: Portuguese 302 or consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
447. **Introduction to Romance Stylistics.** Same as French, Italian and Spanish 447. A brief history of the schools and theories of Romance stylistics, especially the French-Swiss *stylistique* (Bally, Marouzeau, and Cressot) and the German-Spanish *Stilforschungen* (Spitzer, Hatzfeld, Kayser, A. Alonso, and D. Alonso); includes a study of representative works and assigned topics for analysis. Prerequisite: Graduate standing in one of the Romance languages; reading knowledge of French and Spanish or consent of instructor. 1 unit.
462. **Seminar in Romance Linguistics.** Same as French, Italian, Linguistics, Romance Linguistics, and Spanish 462. Selected topics in comparative Romance linguistics. Prerequisite: Portuguese 362 and consent of instructor. 1 unit.
491. **Special Topics in Portuguese.** $\frac{1}{2}$ or 1 unit.
499. **Thesis Research.** 0 to 4 units.

ROMANCE LINGUISTICS

362. **Introduction to Romance Linguistics.** Same as French, Italian, Linguistics, Portuguese, and Spanish 362. Comparative and historical analysis of the Romance languages. Prerequisite: Four semesters of a Romance language or Latin, or equivalent. 3 hours or $\frac{3}{4}$ unit.
462. **Seminar in Romance Linguistics.** Same as French, Italian, Linguistics, Portuguese, and Spanish 462. Selected topics in comparative Romance linguistics. Prerequisite: Romance Linguistics 362 and consent of instructor. 1 unit.

SPANISH

101. **Elementary Spanish.** For students who have no credit in Spanish. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. 4 hours.
102. **Elementary Spanish.** Continuation of Spanish 101. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. Prerequisite: Spanish 101 at the University of Illinois at Urbana-Champaign. All other second semester Spanish students should enroll in Spanish 122. 4 hours.
103. **Intermediate Spanish, I.** Rapid reading review of grammar, composition, conversation, and reading for students who may be interested in pursuing Spanish in advanced courses. There will be a series of supplementary lectures and audio-visual presentations on Hispanic topics with background readings in Spanish and English. With Spanish

- 104, 124, 134, or 114, this course fulfills the foreign language requirement. Prerequisite: Spanish 102 or 105 or 122, or assignment by placement test. 4 hours.
- 104. Intermediate Spanish, II.** Continuation of Spanish 103 for students who may be interested in pursuing Spanish in more advanced courses. Completion of this course fulfills the college foreign language requirement. There is a series of supplementary lectures and audio-visual presentations on Hispanic topics. Prerequisite: Spanish 103 or 123, or assignment by placement test. 4 hours.
- 105. Intensive Beginning Spanish.** Equivalent to Spanish 101 and 102, for students with no prior Spanish credit who wish to learn at a rapid rate; speaking, reading, writing, and aural comprehension. All students in this course are required to attend four twenty-minute laboratory sessions per week in the language laboratory. 8 hours.
- 107. Intensive Intermediate Spanish.** For students who wish to complete Spanish 103 and 104 at a rapid rate. Grammar review, readings, and cultural history; conducted in Spanish. There is a series of supplementary lectures and audio-visual presentations on Hispanic topics. Prerequisite: Spanish 102 or 122, or equivalent placement score. 8 hours.
- 114. Conversational Spanish.** Conversation in Spanish on topics of current interest; brief grammar review as necessary to improve oral skills; and some reading required in preparation for classroom discussions. Fulfills the foreign language requirement but does not serve as prerequisite for advanced courses in Spanish without departmental approval. There is a series of supplementary lectures and audio-visual presentations on Hispanic topics, with background readings in Spanish and English. Prerequisite: Spanish 103 or 123, or equivalent placement score. 4 hours.
- 122. Elementary Spanish.** Second-semester Spanish course for all students who did not take Spanish 101 at this University. All students in this course are required to attend two twenty-minute laboratory sessions per week in the language laboratory. Prerequisite: Spanish 101 elsewhere or assignment by placement exam. 4 hours.
- 123. Reading and Speaking Spanish, I.** Readings in Spanish of literary and cultural texts with discussion in Spanish; some grammar essential to development of reading and oral skills; and supplementary lectures and audio-visual presentations on Hispanic topics with background readings in Spanish and English. With Spanish 104, 124, 134, or 114, this course fulfills the foreign language requirement. Students planning to take advanced courses in Spanish should enroll in Spanish 103. Prerequisite: Spanish 102, 122, or 105, or equivalent placement score. 4 hours.
- 124. Reading and Speaking Spanish, II.** Continuation of Spanish 123; readings in Spanish literary and cultural texts with discussion in Spanish; includes some grammar essential to the development of reading and oral skills; and supplementary lectures and audio-visual presentations on Hispanic topics with background readings in Spanish and English. Fulfills the foreign language requirement, but does not serve as a prerequisite for more advanced courses in Spanish without departmental approval. Prerequisite: Spanish 103 or 123, or equivalent placement score. 4 hours.
- 134. Reading Spanish.** Readings in Spanish texts with discussion in English; some grammar essential to development of reading skills; and supplementary lectures and audio-visual presentations on Hispanic topics with background readings in Spanish and English. Fulfills the foreign language requirement, but does not serve as a prerequisite for advanced courses in Spanish without departmental approval. Readings will focus on Latin American politics, Spanish institutions, twentieth century Hispanic literature, twentieth century concerns in Hispanic societies, etc. Prerequisite: Spanish 103 or 123, or equivalent placement score. 4 hours.
- 199. Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
- 200. Literary Analysis.** Study of literary styles and techniques of analysis as applied to major genres of Hispanic literature. Prerequisite: Spanish 104 or consent of instructor. 2 hours.
- 209. Spanish Language.** A practical course on Spanish phonology and morphology; inten-

- sive drill in Spanish sound and verb systems, and analysis of sentence structure. Prerequisite: Spanish 104 or consent of instructor. 3 hours.
211. **Oral Spanish.** Practice in speaking Spanish; to be taken concurrently with or subsequent to Spanish 209. Meets four hours per week. Prerequisite: Spanish 104. 2 hours.
215. **Intensive Spoken Spanish.** Intensive oral contact with Spanish; meets five hours per week. Prerequisite: Spanish 211 or consent of instructor. 2 hours. May be repeated once for credit.
217. **Spanish Composition, I.** Basic composition course; problems of written Spanish and principles of Spanish rhetorical patterns; introduction to Spanish metrics and poetic forms; and weekly written exercises. Prerequisite: Spanish 209 and junior standing, or consent of instructor. 3 hours.
225. **Spanish for Near Native Speakers.** Review of Spanish pronunciation, orthography, syntax, and vocabulary for students of Hispanic background who have little or no formal training in the Spanish language. Prerequisite: Consent of advisor and instructor. 3 hours.
232. **Culture of Spain.** Prerequisite: Spanish 200, 209, and 211, or consent of instructor. 2 hours.
233. **Culture of Spanish America.** Prerequisite: Spanish 200, 209, and 211, or consent of instructor. 2 hours.
240. **Spanish Literature: Medieval and Golden Age.** Introduction to major works and movements of the Middle Ages and the Golden Age. Prerequisite: Spanish 200, 209, and 211, or consent of instructor. 3 hours.
241. **Spanish Literature: Eighteenth Century to the Present.** Study of representative masterpieces within the context of major periods and trends. Prerequisite: Spanish 200, 209, and 211, or consent of instructor. 3 hours.
242. **Spanish-American Literature.** Introduction to major literary movements and works in Spanish America. Prerequisite: Spanish 200, 209, and 211, or consent of instructor. 3 hours.
250. **The Worlds of Jorge Luis Borges and Julio Cortazar.** The major works of two of the most important contemporary writers of Spanish-American fiction will be read in translation and analyzed in English. 3 hours.
255. **The World of Cervantes.** An analysis entirely in English of Cervantes' masterpiece *Don Quixote* and of his *Exemplary Stories*; designed to convey an appreciation of the cultural significance of the baroque period as the end of the Renaissance and the beginning of the modern epoch; no knowledge of Spanish required. 3 hours.
260. **Spanish for Industry and Commerce.** Introduction to vocabulary of Hispanic commerce; composition of business letters and similar texts. Prerequisite: Spanish 104 or consent of instructor. 3 hours.
280. **Teachers Course.** Required for teacher-training majors in Spanish. Prerequisite: Spanish 209 or 211, or consent of instructor. 4 hours.
293. **Honors Senior Thesis.** For candidates for honors in Spanish. 2 hours. May be repeated.
298. **Senior Seminar.** Intensive study of Hispanic linguistics or literature. Prerequisite: Senior standing. 2 hours. May be repeated for credit with adviser's consent.
305. **Romanticism and Realism in Nineteenth-Century Spanish Literature.** A study of representative authors and genres of the nineteenth century; particular emphasis on the romantic drama and the realistic novel. Prerequisite: Spanish 241 or equivalent. 3 hours or $\frac{3}{4}$ unit.
306. **The Generation of 1898.** A study of representative works of Baroja, Azorin, Unamuno, Macztu, Valle Inclan, Benavente, A. Machado, and others. Prerequisite: Spanish 241 or equivalent. 3 hours or $\frac{3}{4}$ unit.
307. **Spanish-American Literature to 1888.** Study of the development of Spanish-American literature from the sixteenth century through the end of the romantic period. Prerequisite: Spanish 242 or equivalent. 3 hours or $\frac{1}{2}$ unit.
308. **Spanish-American Modernismo.** A study of Spanish-American literature from 1888 to the end of World War I. Prerequisite: Spanish 242 or equivalent. 3 hours or $\frac{3}{4}$ unit.

309. **Introduction to Medieval Spanish Literature.** Historical and cultural background for the Middle Ages; selected readings in medieval literature from the *Jarchas* to *Corbacho*. Prerequisite: Spanish 240 or equivalent. 3 hours or $\frac{3}{4}$ unit.
310. **Contemporary Spanish-American Literature.** A study of Spanish-American literature from World War I to the present. Prerequisite: Spanish 242 or equivalent. 3 hours or $\frac{3}{4}$ unit.
311. *Don Quixote* and the Prose of the Golden Age. Introduction to *Don Quixote*, to its relationship to other selected masterpieces of the Golden Age, and to the main currents and forms of Golden Age prose. Prerequisite: Spanish 240 or equivalent. 3 hours or $\frac{3}{4}$ unit.
314. **Spanish Drama and Poetry of the Golden Age.** Prerequisite: Spanish 240 or equivalent. 3 hours or $\frac{3}{4}$ unit.
351. **Phonetics.** Prerequisite: Spanish 209 or equivalent. 3 hours or $\frac{1}{2}$ unit.
352. **Syntax.** Required for teacher-training majors in Spanish. Prerequisite: Spanish 209 or equivalent. 3 hours or $\frac{1}{2}$ unit.
353. **Spanish Structure.** Same as Linguistics 353. Comprehensive analysis of Spanish phonology and syntax based on present-day linguistic theory. Prerequisite: Linguistics 300; Spanish 351; Spanish 352. 3 hours or $\frac{1}{2}$ unit.
362. **Introduction to Romance Linguistics.** Same as French, Italian, Linguistics, Portuguese, and Romance Linguistics 362. Comparative and historical analysis of the Romance languages. Prerequisite: Four semesters of a Romance language or Latin, or equivalent. 3 hours or $\frac{3}{4}$ unit.
371. **Spanish for Teachers.** A consideration of language problems suggested by teaching experience. Prerequisite: Spanish 209 or equivalent. 2 hours or $\frac{1}{2}$ unit. Offered in the summer session only.
382. **Language Laboratory Techniques.** Same as Classical Civilization, English as a Second Language, French, German, Humanities, and Slavic 382, and Linguistics 386. Instruction and practice in the techniques of making foreign language tapes and integrating them with classroom activity; instruction in the problems of planning and operating a language laboratory. Prerequisite: Three years of a modern foreign language at the college level, or equivalent. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
399. **Study Abroad.** Lectures, seminars, and practical work in Spanish language, literature, and civilization, in Spain. Prerequisite: Spanish 211 or equivalent; Spanish 200 or equivalent; 3.5 overall average; 4.0 average in Spanish courses. 0 to 15 hours per semester, up to 30 hours, all of which must be earned in two semesters; or 0 to 8 units, all of which must be earned in two semesters (may be repeated to a maximum of 8 units).
400. **Beginning Spanish for Graduate Students.** Basic grammar and vocabulary; reading practice. 4 hours. No graduate credit.
401. **Readings in Spanish for Graduate Students.** Continuation of Spanish 400; special readings in the critical literature of several disciplines. Prerequisite: Spanish 400 or consent of instructor. 4 hours. No graduate credit.
405. **Spanish Bibliography.** An introduction to bibliographical method and to the principal bibliographical resources for the study of Spanish and Latin American literature. $\frac{1}{2}$ unit.
411. **Medieval Literature to 1300.** Survey of medieval Spanish literature to 1300; special attention to relationship with other medieval literatures of western Europe. Prerequisite: Spanish 309. 1 unit.
412. **Medieval Literature, 1300-1500.** Survey of medieval Spanish literature from 1300 to 1500; special attention to relationship with other medieval literatures of western Europe. Prerequisite: Spanish 309. 1 unit.
415. **Renaissance and Baroque Prose in Spain.** Prerequisite: Spanish 311 and 314, or equivalent. 1 unit.
417. **Renaissance and Baroque Drama in Spain.** Prerequisite: Spanish 311 and 314, or equivalent. 1 unit.
418. **Seminar in Renaissance and Baroque Literature.** 1 unit. May be repeated for credit.

419. Cervantes. *Don Quixote* and representative minor works. Prerequisite: Spanish 311 and 314, or equivalent. 1 unit.
421. Modern Spanish Novel and Essay. 1 unit.
422. Contemporary Spanish Novel and Essay. 1 unit.
423. Modern Spanish Drama. Dramatic literature of Spain in the eighteenth and nineteenth centuries. 1 unit.
424. Contemporary Spanish Drama. Dramatic literature of Spain in the twentieth century. 1 unit.
425. Renaissance and Baroque Poetry in Spain. 1 unit.
426. Spanish Poetry of the Nineteenth and Twentieth Centuries. 1 unit.
427. Studies in Twentieth-Century Spanish Literature. Advanced study of major literary movements, genres, or authors in twentieth-century Spanish literature; subject matter varies. Prerequisite: Spanish 306 or any survey of contemporary Spanish literature, or equivalent. 1 unit. May be repeated for a maximum of 2 units.
428. Studies in Nineteenth-Century Spanish Literature. Advanced study of major literary movements, genres, or authors in nineteenth-century Spanish literature; subject matter varies. Prerequisite: Spanish 305 or equivalent. 1 unit. May be repeated for a maximum of 2 units.
429. Studies in Golden Age. Advanced study of major literary movements, genres, or authors in sixteenth- and seventeenth-century Spanish literature; subject matter varies. Prerequisite: Spanish 311 or 314, or any survey of Spanish literature. 1 unit. May be repeated for a maximum of 2 units.
430. Studies in Twentieth-Century Spanish-American Literature. Advanced study of major literary movements, genres, or authors in twentieth-century Spanish-American literature; subject matter varies. Prerequisite: Spanish 307, 308, or 310, or equivalent. 1 unit. May be repeated for a maximum of 2 units.
431. Spanish-American Poetry to 1920. Prerequisite: Spanish 307, 308, and 310, or equivalent. 1 unit.
432. Contemporary Spanish-American Poetry. Prerequisite: Spanish 307, 308, and 310, or equivalent. 1 unit.
433. Spanish-American Novel to 1945. Prerequisite: Spanish 307, 308, and 310, or equivalent. 1 unit.
434. Spanish-American Novel Since 1945. Prerequisite: Spanish 307, 308, and 310, or equivalent. 1 unit.
435. Seminar in Spanish-American Poetry. Prerequisite: Spanish 431 or 432. 1 unit.
436. Seminar in Spanish-American Novel. Same as Comparative Literature 462. Special problems in methodology and research; includes other prose fiction. Prerequisite: Spanish 433 or 434. 1 unit.
437. Spanish-American Drama. Prerequisite: Spanish 307, 308, or 310. 1 unit.
438. Spanish-American Essay. Prerequisite: Spanish 307, 308, or 310. 1 unit.
439. The Spanish-American Short Story. Intensive and analytical study of the principal *cuentistas* of Spanish America. Prerequisite: Spanish 307, 308, and 310, or equivalent. 1 unit.
442. Seminar in Modern Spanish Literature. Study of problems in the works of a major writer or group of writers of the eighteenth or nineteenth centuries. Prerequisite: Spanish 305; Spanish 421 or 423, or equivalent. 1 unit.
444. Seminar in Spanish Realism and Naturalism. Research work in nineteenth-century literary theory and practice in novel and drama. Prerequisite: Spanish 421 and 442. 1 unit.
445. Seminar in Twentieth-Century Spanish Literature. Investigation of literary problems presented by the Spanish novel, drama, and/or essay since 1900. Prerequisite: Spanish 421, 422, 423, or 424, or equivalent. 1 unit.
447. Introduction to Romance Stylistics. Same as Italian, Portuguese and French 447. A brief history of the schools and theories of Romance stylistics, especially the French-Swiss *stylistique* (Bally, Marouzeau, and Cressot) and the German-Spanish *Stilforschungen*

- (Spitzer, Hatzfeld, Kayser, A. Alonso, and D. Alonso); includes a study of representative works and assigned topics for analysis. Prerequisite: Graduate standing in one of the Romance languages; reading knowledge of French and Spanish or consent of instructor. 1 unit.
451. **Seminar in Spanish Descriptive Linguistics.** Selected topics of Spanish phonology and syntax in the light of present-day linguistic theory. Prerequisite: Consent of instructor. 1 unit.
452. **Seminar in Spanish Historical Linguistics.** Selected topics on the development of Spanish and its dialects in the light of present-day historical methods. Prerequisite: Consent of instructor. 1 unit.
453. **History of the Spanish Language.** 1 unit.
454. **Old Spanish.** 1 unit.
455. **Historical Spanish Grammar.** Internal history of the Spanish language; phonological, morphological, and syntactic evolution from Latin to modern Spanish. Prerequisite: Two semesters of college Latin or equivalent. 1 unit.
462. **Seminar in Romance Linguistics.** Same as French, Italian, Linguistics, Portuguese, and Romance Linguistics 462. Selected topics in comparative Romance linguistics. Prerequisite: Spanish 362 and consent of instructor. 1 unit.
463. **College Teaching of Foreign Languages.** Same as English as a Second Language, French, German, and Russian 463. Rationale for curricular objectives for college courses in foreign languages; the teaching and testing of pronunciation, listening comprehension, speaking, reading, writing, cultural understanding, and literary appreciation; the use of technology; and recent experimentation. 1 unit.
471. **Applied Linguistics and Teaching College Spanish.** Study of the structure of Spanish with special emphasis on the teaching situation in elementary Spanish courses. 1 unit.
481. **Seminar in Linguistic and Psychological Foundations of Language Teaching.** Same as English as a Second Language, French, German, and Russian 481. Language teaching problems considered in the light of theoretical and experimental work in language acquisition, verbal learning and memory, motivation, speech perception, reading, error analysis, and language as an aspect of culture and societal relations. Prerequisite: Consent of instructor. 1 unit.
491. **Special Topics in Spanish.** ½ or 1 unit.
499. **Thesis Research.** 0 to 4 units.

Speech Communication

Head of Department: Professor R. E. Nebergall

Department Office: 244 Lincoln Hall, Urbana

101. **Principles of Effective Speaking.** Preparation and presentation of short informative and persuasive speeches; emphasis on the selection and organization of material, methods of securing interest and attention, and the elements of delivery. 3 hours.
102. **Introduction to Speech Communication.** Survey of the questions probed, the methods employed, and the current status of knowledge in the speech communication discipline; provides opportunities to understand the range of concerns and to explore specific areas of interest of the field. 4 hours.
105. **Voice and Articulation.** Same as Speech and Hearing Science 105. Basic factors of voice and speech sound production; analysis of faults that result in minor speech deviations or inadequacies; and individual analysis and guided practice toward improvement of speech habits. 2 hours.
107. **Parliamentary Procedure.** Principles and practice of parliamentary procedure. 2 hours.
111. **Verbal Communication.** Principles and practice in communication; stress on fundamentals of exposition in writing and speaking. The University rhetoric requirement is

fulfilled by this course in conjunction with Speech Communication 112. Credit is not given for both Speech Communication 111 and 101. 3 hours.

112. **Verbal Communication.** Theory and practice of communication; stress on deliberation and fundamentals of persuasion through speaking and writing. The University rhetoric requirement is fulfilled by this course. Credit is not granted for both Speech Communication 112 and 101. Prerequisite: Speech Communication 111. 3 hours.
113. **Group Discussion and Conference Leadership.** Study of leadership, group process, and interpersonal relations in the small group, conference, and the public forum; emphasis on practice in leading and participation in various types of public discussion and conference, with materials drawn from current public questions. Prerequisite: Sophomore standing. By permission of the head of the department the prerequisite may be waived for superior students, including James Scholars. 3 hours.
120. **Advanced Oral Communication.** Advanced principles of speech preparation and presentation; special problems and types of speeches; and considerable practice in composition and delivery of speeches. Prerequisite: Speech Communication 101 or equivalent. 3 hours.
123. **Public Discussion and Debate.** Study of and participation in public discussion and debate with emphasis on thorough preparation and research, principles of analysis, reasoning, evidence, and persuasive presentation of well-founded convictions; previous debate experience not required. 2 hours. May be repeated for a maximum of 4 hours.
141. **Oral Interpretation.** Oral reading for understanding, appreciation, and communication. 3 hours.
142. **Group Oral Interpretation of Literature.** Study of modern modes of group presentation of literature; emphasis on practice in script preparation, directing, and performance in chamber theatre and readers' theatre. Prerequisite: Speech Communication 141 or consent of instructor. 2 hours.
157. **Elements of Stagecraft.** Same as Theatre 120. The design of stage scenery; the materials and methods of stage scenery construction and stage lighting. Lectures, readings, and practical problems. Not open to theatre majors. 4 hours.
161. **Fundamentals of Acting.** Same as Theatre 170. Study of the methods of acting, with emphasis on basic techniques; the role of the character in relation to the play as a whole, and the intellectual and emotional values of the play and their interpretation by means of voice and action. 3 hours.
177. **The Arts of Public Discourse.** The nature and forms of practical and artistic public speech, including adaptations for the mass audience. 4 hours.
178. **The Arts of the Theatre and Interpretative Speech.** The nature and forms of performing speech arts of theatre, interpretation, and film, including adaptations for the mass audience. 4 hours.
198. **Freshman Seminar.** Survey of the role of the screen media in contemporary American culture; discussions, reports, and papers on topics of individual concern. Prerequisite: James Scholar standing or other designation as a superior student; consent of instructor. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
203. **Dramatics for Teachers.** Survey of methods and procedures of play production in the secondary school. 3 hours.
204. **Speech for Teachers.** A course in teaching methods designed for prospective teachers who are non-speech communication majors; discussion of methods and materials available for teaching speech and directing extracurricular speech activities. 3 hours.
207. **The Art of the Screen: Humor.** Study of selected comedies and other specimens of film and television humor in relation to theories of humor. Prerequisite: Consent of instructor. 3 hours.
210. **The Rhetorical Tradition.** Survey of major trends in the development of rhetorical theory from Homer to the present. 3 hours.
211. **Business and Professional Speaking.** Study, preparation, and presentation of the chief

- types of business speeches; special attention to conferences, sales talks, interviews, and job applications. Prerequisite: Speech Communication 101. 2 hours.
213. **Persuasion and the Arts.** Introduction to the study of narrative films, theatre, fiction, and poetry as vehicles of indirect and overt persuasion. 3 hours.
221. **Persuasion.** Study of the processes of motivation as applied to speeches intended to influence group opinion and action; practice in the preparation and delivery of short persuasive speeches. Prerequisite: Speech Communication 101; junior standing. 3 hours.
223. **Argumentation: Theory and Practice.** Study of the theory of argument, e.g., evidence, reasoning, and construction of briefs; practice in formal and informal forms of debate and public discourse on current public questions. Prerequisite: Speech Communication 101; sophomore standing. By permission of the head of the department the prerequisite may be waived for superior students, including James Scholars. 3 hours.
230. **Interpersonal Communication.** Study of communication theory and its application to interpersonal relations; extensive discussion of problems of conflict and misunderstanding in personal affairs to facilitate the development of knowledge, insights, and skills in the processes of face-to-face interaction. Prerequisite: Speech Communication 101 and sophomore standing; by permission of the head of the department, the prerequisite may be waived for superior students, including James Scholars. 3 hours.
232. **Sex-related Differences in Language.** Same as Linguistics 232. A survey of perceived and actual differences between the uses of language by men and by women; emphasizes vocal language, although some attention is given to written expression. Prerequisite: A course in speech communication or in linguistics, or equivalent. 3 hours.
243. **The Oral Interpretation of Shakespeare.** Analysis and oral presentation of selections from Shakespeare's plays. Prerequisite: Junior standing; Speech Communication 141. 2 hours.
247. **Teaching of Speech.** Same as Secondary Education 247. Study of methods and materials used in teaching speech in the high school. Prerequisite: Senior standing; 3.5 grade-point average. 5 hours.
252. **The Rhetoric of Dissent.** A study of the rhetorical strategies and tactics employed in selected cases of dissent in American political and social life. Prerequisite: Speech Communication 101 or 102, or consent of instructor. 3 hours.
253. **Case Studies in Public Discourse.** Detailed examination of selected cases of significant public discourse. Prerequisite: Speech Communication 101 or 102, or consent of instructor. 3 hours.
254. **Freedom of Speech and the Ethics of Speech Communication.** Examination of the nature and variety of responses to value questions concerning communication; includes a survey of the evolution of and current controversies in freedom of speech. Prerequisite: Speech Communication 101 or 102, or consent of instructor. 3 hours.
255. **Directing, I.** Same as Theatre 281. Problems of script selection and interpretation, casting, rehearsing, and performances; techniques of composition, movement, and business for the proscenium stage; and direction of appropriate scenes for class presentation. Prerequisite: Theatre 170 or 176; junior standing. 3 hours.
263. **Fundamentals of Dramatic Writing and Structure.** Same as Rhetoric 263, Radio and Television 280, and Theatre 280. Study of basic structure of drama; writing of scenes and analysis of short and long dramatic works; and a term project consisting of a play analysis paper or original short play. Individual students may be given permission to work in areas of film or television. Prerequisite: Consent of instructor. 3 hours.
290. **Individual Study.** Individual investigation of special problems. Prerequisite: Twelve hours of speech communication; a grade-point average of 4.25; and consent of head of department. 2 hours. May be repeated for a maximum of 4 hours.
291. **Honors Individual Study.** Individual investigation of special problems. Prerequisite: Twelve hours of speech communication; a grade-point average of 4.50; and consent of head of department. 2 hours. May be repeated for a maximum of 4 hours.
293. **Honors Senior Thesis.** Individual study leading to a thesis for honors in the Department of Speech Communication. Prerequisite: Senior standing; a grade-point average

of 4.50; and consent of head of department. 2 hours. May be repeated for a maximum of 4 hours.

301. **General Phonetics.** Same as Speech and Hearing Science 301. Basic principles of phonetic study, including observation and representation of pronunciation, ear training, and practice in transcription. Prerequisite: Junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
307. **The Art of the Screen: Narration.** Same as Communications 307. Critical study of the adaptation and synthesis of principles of drama, literature, the graphic arts, and music in the evolution of the screen narrative; lectures, discussions, and reports; and viewing of selected films and television programs. Prerequisite: Training in critical approaches to literature, drama, art, or music; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
308. **The Art of the Screen: Exposition and Persuasion.** Same as Communications 308. Critical study of the application of the eclectic principles of the screen narrative to the transmission of information and the influencing of attitude, opinion, and action; lectures, discussions, and reports; and viewing of selected films and television programs. Prerequisite: Speech Communication 307 or consent of instructor. The prerequisite does not apply to students of library science who have obtained the necessary background through independent reading. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
313. **Interpersonal Communication: Discussion and Interview.** Advanced study of theory, research, techniques, and training methods in interviewing and group discussion; emphasis on empirical research findings concerning communication processes in face-to-face groups. Prerequisite: Junior standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
315. **Greek, Roman, and Medieval Rhetorical Theory.** Same as Classical Civilization 315. Examination of the development of rhetorical theory, criticism, and pedagogy in Western thought; analysis of the contributions of major figures and works from Homer to the Renaissance. Prerequisite: Junior standing or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
317. **Contemporary Rhetorical Theory.** Coverage of the major contributors to rhetorical theory from James and Winans to the present. 3 hours, or $\frac{1}{2}$ or 1 unit.
319. **Russian and East European Cinema.** Same as Communications and Slavic 319. Artistic, literary, and social aspects of cinema history, particularly Russian, Czech, Polish, and Yugoslavian; no reading knowledge of Russian required, except for Department of Slavic Languages and Literatures majors. 3 hours or $\frac{3}{4}$ unit.
320. **Argumentation and Public Decision Making.** Study of the philosophical, logical, and psychological bases of public decision making through discussion and debate. Prerequisite: Speech Communication 223 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
321. **Theories of Persuasion.** Survey of theories of persuasion derived from rhetorical, philosophical, and psychological sources and their application to persuasive discourse. Prerequisite: Speech Communication 221 or graduate standing. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
322. **Renaissance and Modern Rhetorical Theory.** Significant movements in the development of rhetorical theory in England, France, and America from 1500 to the present. Prerequisite: Senior standing. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
323. **Rhetorical Criticism.** Methods of interpreting and judging persuasive discourse with emphasis on political speaking and writing; lectures and practice in criticism. Prerequisite: Credit or concurrent registration in Speech Communication 322 or 350. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
324. **Persuasion in the Campaign and Movement.** Consideration of factors central to the sustained persuasive campaign or movement; special attention to the nature and functions of persuasion in the political campaign. Prerequisite: Speech Communication 221

- or 321, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
335. **Interpersonal Communication Processes.** Same as Communications 335. Study of the major processes involved in an individual's adjustment to the communication situations of everyday life; emphasis on the development of interpersonal competency and orientations, social perception, interpersonal sentiment and hostility, trust, and the social context as factors influencing the understanding and evaluation of interpersonal messages. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
342. **Oral Interpretation of Poetry.** Analysis and oral presentation of literature representative of various poetic forms. Prerequisite: Speech Communication 141. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
344. **Criticism of the Oral Interpretation of Literature.** Examination of theories of aesthetics and practical criticism and their application to the criticism of specific examples of the oral performance of literature. Prerequisite: Speech Communication 141 or graduate standing, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
345. **Oral Interpretation of Prose Fiction.** Modern concepts underlying the relationship of interpretation to the reader's experience of literature; discussions, reports, and oral interpretations of prose forms (including chamber theatre and readers' theatre). Prerequisite: Speech Communication 141 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
350. **Selected Topics in the History and Criticism of Public Discourse.** Study of selected periods and genres of public discourse in historical context, including British, American, French, Russian, German, Chinese, and Japanese. Prerequisite: One course in rhetorical criticism or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit. Additional work required for 1 unit credit. May be repeated with different context to a maximum of 12 hours or 4 units.
353. **Criticism of Contemporary Public Discourse.** Rhetorical criticism of selected aspects of contemporary public communication. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
363. **Advanced Dramatic Writing.** Same as Radio and Television 363 and Theatre 380. Application of principles of dramatic form and structure to the more complex problems of playwriting; practice in writing in sustained dramatic forms. Prerequisite: Speech Communication 263 or Theatre 280; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit. May be repeated for a maximum of 6 hours or 2 units.
374. **Introduction to Empirical Research Methods in Speech Communication.** Introduction to descriptive and experimental methods in speech communication; intended to produce understanding and critical evaluation of research designs. 3 hours or $\frac{1}{2}$ unit.
375. **Speech Science, I.** Same as Linguistics 375 and Speech and Hearing Science 375. Introduction to the anatomical and physiological characteristics of the normal speech and hearing mechanisms and to fundamental acoustics of speech. Prerequisite: Speech and Hearing Science 109 or 301, or Speech Communication 301, or consent of instructor. 4 hours or 1 unit.
376. **Speech Science, II.** Same as Linguistics 376 and Speech and Hearing Science 376. Consideration of the physiology of the speaking act, the acoustical characteristics of voice and of speech sounds, and the hearing of speech. Prerequisite: Speech and Hearing Science 375. 4 hours or 1 unit.
383. **Development of Spoken Language.** Same as Speech and Hearing Science 383. Study of the correlates of language development from the prelinguistic period to adulthood. Prerequisite: Senior standing; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
387. **Introduction to Myth and Folklore.** Same as Comparative Literature, English, German and Slavic 387. Prerequisite: One year of college literature or consent of instructor. 3 hours or 1 unit.

400. **Studies in Dramatic Form and Structure.** Same as Theatre 401. Studies in the relationship of dramatic form and structure to the contemporary production of historical and modern plays. Prerequisite: Consent of instructor. 1 unit.
403. **Seminar for Teachers of Speech.** Investigation of current principles, materials, and developments in the field of speech communication and of their relationship to the teacher. 1 unit.
417. **Contemporary Viewpoints in Speech Communication Theory.** Same as Communications 417. A readings seminar comparing the principal approaches to communication and rhetorical theory in the twentieth century along with a consideration of their philosophical assumptions. 1 unit.
429. **Seminar in Speech Communication.** Special topics in speech communication. Prerequisite: Consent of instructor. 1 unit. May be repeated to a maximum of 4 units.
430. **Contemporary Theories of Oral Communication.** Systematic study of speech making and discussion as related to contemporary views of communication; examination of the theoretical literature and experimental evidence. Prerequisite: Consent of instructor. 1 unit.
436. **Seminar in Theories and Procedures of Discussion.** Intensive examination of selected problems of communication in small, task-oriented groups; evaluation of special instrumental forms, such as the unstructured group, the work group, the panel, and the lecture-forum; critical analysis of recent research in group communication as a means of making decisions and of changing attitudes and behavior. Prerequisite: Speech Communication 313 or equivalent. 1 unit.
437. **The Analysis of Interpersonal Interaction.** Same as Communications 437. Exploration of theory, methodology, and empirical findings of descriptive and experimental approaches to the analysis of verbal and nonverbal interaction processes, in both laboratory and naturalistic settings. Prerequisite: Speech Communication 335 or consent of instructor. 1 unit.
438. **Seminar in Rhetorical Theory.** Study of special topics in the history of rhetorical theory. 1 unit. May be repeated for a maximum of 4 units.
441. **Historical Background of Oral Interpretation.** Historical survey of British and American theories of interpretation. 1 unit.
442. **Seminar in Oral Interpretation.** Investigation of basic problems in the history, nature, and function of oral interpretation. Prerequisite: Speech Communication 441; consent of instructor. 1 unit.
443. **Seminar in the Oral Interpretation of Individual Literary Styles.** Examination of the literary style of an individual writer or selected writers, through research, discussion, and oral readings. See *Timetable* for current topics. 1 unit. May be repeated with a change in content to a maximum of 4 units.
465. **Seminar in Theatre Art.** Same as Theatre 407. Studies in the aesthetics of the theatre. Prerequisite: Consent of instructor. 1 unit.
468. **Seminar in Theatre History.** Same as Theatre 406. Studies in the history of the theatre. Prerequisite: Consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
469. **Seminar in the Stage History of Classic English Plays.** Same as English 469 and Theatre 405. Analysis and reconstruction of past productions of classic plays, with special reference to Shakespeare. Prerequisite: One year of work in dramatic literature or theatre history; consent of instructor. 1 unit.
474. **Experimental Design in Speech Communication Research.** Detailed treatment of major issues and options in designs employed in speech communication research. Prerequisite: Speech Communication 374 or equivalent; introductory statistics course. $\frac{1}{2}$ or 1 unit. Additional work required for 1 unit credit.
495. **Special Problems.** Individual investigation of special projects not included in theses. Prerequisite: Consent of head of department. $\frac{1}{2}$ to 2 units. Open to master's candidates for a maximum of 1 unit, and to doctoral candidates for 1 or 2 units.
499. **Thesis Research.** 0 to 4 units.

JOURNALISM

Head of Department: Professor J. W. Jensen

Department Office: 119 Gregory Hall, Urbana

114. **Agricultural Communications Media and Methods.** Same as Agricultural Communications 114. Introduction to print, broadcast, visual, and other major communications media used to convey agricultural information; development of basic skills in communicating through those media. Prerequisite: Completion of campus rhetoric requirement. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
204. **Typography.** Study of type lore and design; type dimensions; printer's arithmetic and copyfitting; platemaking; printing processes; shop organization; and terminology. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours. News-editorial majors do not receive credit for this course.
211. **Newswriting.** Fundamentals of journalistic writing. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours. News-editorial majors do not receive credit for this course.
212. **Reporting.** News of public affairs. Prerequisite: Journalism 211; registration in the College of Communications or consent of the college. 3 hours. News-editorial majors do not receive credit for this course.
214. **Agricultural Communications Strategy.** Same as Agricultural Communications 214. Coordinated approach to planning and carrying out programs of agricultural information and education using a variety of communications media. Students apply principles of strategy to actual communications problems of their choice. Prerequisite: Agricultural Communications 114 or consent of instructor. 3 hours.
215. **Contemporary Affairs.** Major news developments and their background; current political, economic, social, and scientific developments. Prerequisite: Journalism 212 or 350; registration in the College of Communications or consent of the college. 2 hours.
217. **History of Communications.** Same as Communications 217. Nature and development of communication systems; history of communication media; history of journalism, ad-

- vertising, and broadcasting; and communications in the modern world. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
218. **Communications and Public Opinion.** Same as Communications 218. Theory of public opinion and of communications; relation of communication systems to public opinion, social systems, and the political order. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
220. **Processes and Systems of Communications.** Same as Communications 220. Analysis of various psychological and sociological approaches to communication; examination of the relationship between interpersonal and mass communication; and analysis of the structure and development of systems of mass communications. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
223. **Photojournalism.** A basic photography course designed to give students a proficiency in picture taking and processing and to acquaint them with picture editing and other illustrative problems. For current fees, see *Timetable*; cameras provided by the college. Prerequisite: Registration in the College of Communications or consent of instructor. 3 hours. News-editorial majors do not receive credit for this course.
231. **Mass Communication in a Democratic Society.** Same as Communications 231. Study of the philosophical bases of the functions and the responsibilities of mass communications. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
233. **Publication Design and Production.** Theory of publication design; techniques of graphic production; and relationship of design and graphics to the realities of commercial printing. Prerequisite: Journalism 204 or consent of instructor. 2 hours.
241. **Law and Communications.** Same as Communications 241. Historical background of the nature and meaning of the law as it relates to journalism and contemporary problems of freedom of expression. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
251. **Social Aspects of Mass Communications.** Same as Communications 251 and Sociology 251. Media structures related to cultural content and functions; problems of life and society as treated in mass-produced communications. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
291. **Special Problems.** Special projects, research, and independent reading in journalism for students capable of individual work under the guidance of a faculty adviser. Prerequisite: Consent of head of department. 1 or 3 hours.
321. **Editing.** Newspaper desk work; editing the news; correction of faulty news stories; handling wire copy; and attention to headwriting, news pictures, and makeup and design of newspaper pages. Prerequisite: Cr dit or concurrent registration in Journalism 204 and 212; registration in the College of Communications or consent of the college. 3 hours, or    to 1 unit. News-editorial majors do not receive credit for this course.
326. **Magazine Article Writing.** Preparation of feature stories and articles; techniques of marketing, market analysis, and publishing articles written in the course. Prerequisite: Journalism 211 or 350; registration in the College of Communications or consent of the college. 3 hours or    unit.
329. **The Rhetoric of Journalism.** Studies in journalistic method involving principally the analysis of structure and writing style as related to purpose; materials drawn from English and American journalism from the seventeenth century to the present; and emphasis on work published in twentieth-century American newspapers and periodicals. Prerequisite: Journalism 211 or 350, or consent of instructor. 2 hours or    unit.
330. **Magazine Editing.** Basic principles of editing for consumer, business, trade, and company magazines; communications theory, market analysis, editorial process, design process, production process, and distribution process as they relate to magazine publishing. Prerequisite: Credit or registration in Journalism 326 or consent of instructor. 3 hours or    unit.
350. **Journalism, I.** Fundamentals of journalistic writing; reporting news of public affairs.

Prerequisite: Enrollment as a major in the Department of Journalism or consent of department. 4 hours or 1 unit.

360. **Journalism, II.** Rational and aesthetic standards of visual communications; principles and techniques of making visual statements; and uses of visual technology in wedding verbal and nonverbal languages. For current fees, see *Timetable*. Prerequisite: Enrollment as a major in the Department of Journalism or consent of department. 4 hours or 1 unit.
370. **Journalism, III.** Developing a journalistic depth report; writing a depth report with a view to its final visual and graphic form; and conceptually editing the material of the depth report. Prerequisite: Journalism 350 and 360; enrollment as a major in the Department of Journalism or consent of the department. 3 hours, or $\frac{1}{2}$ to 1 unit.
380. **Journalism, IV.** Planning, researching, writing, and editing of depth reports; packaging depth reportage and reproducing for publication as a professional and public service. Prerequisite: Journalism 350 and 360; enrollment as a major in the Department of Journalism or consent of the department. 3 hours, or $\frac{1}{2}$ to 1 unit.
390. **Journalism, V.** Individually produced, in-depth, enterprise journalism as independent projects under minimal faculty supervision. Prerequisite: Journalism 350, 360, 370, and credit or registration in 380. 2 hours or $\frac{1}{2}$ unit.
468. **The Political Economy of Communications.** Same as Communications 468. Analysis of the structure, policy, and behavior of such media of communication as newspapers, magazines, books, postal service, telegraph, telephone, broadcasting, and film; special emphasis on their relationships to political order and the economy. Prerequisite: Consent of College of Communications. 1 unit.
470. **Communications and Popular Culture.** Same as Communications 470. Problems of cultural analysis related to the media of communications; social implications of communications research. Prerequisite: Consent of College of Communications. 1 unit.
471. **Proseminar in Communications, I.** Same as Communications 471. General discussion of the mass media of communications, their role as social institutions, and their control and support; content, audience, and effect of the mass media. Prerequisite: Consent of College of Communications. 1 unit.
472. **Proseminar in Communications, II.** Same as Communications 472. General discussion of the problem of communications, including the individual as a communicating system, symbolic processes, analysis of messages, psycholinguistics, and language as social behavior. Prerequisite: Consent of College of Communications. 1 unit.
473. **History and Theory of Freedom of the Press.** Same as Communications 473. Development of the Anglo-American press system and the idea of freedom of the press; contemporary mass media and their implications for freedom and democracy. Prerequisite: Consent of College of Communications. 1 unit.
474. **Communications Systems.** Same as Communications 474. Analysis of the structure and development of communications systems; examination of the role of communication in social change, political movements, and formal organizations. Prerequisite: Consent of College of Communications. 1 unit.
490. **Special Topics in Journalism.** Prerequisite: Consent of head of department. $\frac{1}{2}$ or 1 unit.
492. **Research Methods in Communications.** Same as Communications 492. Introduction to the methods of empirical research in the behavioral sciences applicable to research problems in human communication; emphasis on studies of mass communication. Lectures, readings, and laboratory practice. Prerequisite: Consent of College of Communications. 1 unit.
499. **Thesis Research.** Prerequisite: Graduate standing in journalism. 1 to 2 units.

KOREAN

(See Asian Studies)

LABOR AND INDUSTRIAL RELATIONS

Director of Institute: Professor M. Rathbaum

Institute Office: 247 Labor and Industrial Relations Building, Champaign

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
315. **The Economics of Poverty and Income Maintenance.** Same as Economics 315. Economic analysis of the nature and causes of poverty with special emphasis on critical evaluation of programs to combat poverty in the United States. Prerequisite: Economics 101 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
318. **Industry and Society.** Same as Sociology 318. Introduction to the social analysis of economic institutions; selected problems of industrialization and technological change; the labor force; occupations and professions; the meanings of work; the factory as a social system; corporate organization and the corporate society; and the changing bases of managerial authority. Prerequisite: Sociology 100 or 6 hours of social science, or consent of instructor; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
341. **The Economics of Labor Markets.** Same as Economics 341. Study of the theory and empirical research in wage determination, wage structure, economic effects of unions and macroeconomic labor market problems; topics include determinants of interindustry and occupational wage differentials; aggregate labor supply functions; effects of unions on relative wages; cost-push inflation; wage-price-unemployment dilemma models; disguised and structural unemployment; and employment and income policies. Prerequisite: Economics 101 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
343. **Unions, Bargaining, and Public Policy.** Same as Economics 343. Analysis of the legal background and economic issues associated with unions and collective bargaining in the United States, including theory of the labor movement; processes of union wage determination; analysis of strikes; background, strategies, and principal issues in collective bargaining; and problems and policies of government intervention. Prerequisite: Economics 101 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
345. **Economics of Manpower.** Same as Economics 345. Manpower training in economic growth; labor force characteristics; occupational structure and future manpower requirements; job information networks; economics of discrimination and underutilization; national manpower policies and programs; and private industry and union manpower planning. Graduate credit is not given for both Labor and Industrial Relations/Economics 345 and 444. Prerequisite: Economics 101 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
347. **Labor Law, I.** Same as Law 347. A study of the National Labor Relations Act as amended, the preact history of the labor movement, and the judiciary's response thereto, with emphasis on understanding the problems, experiments, and forces leading to the enactment; includes the negotiation and administration of the collective bargaining agreement, especially the grievance arbitration procedure, its operation and place in national labor policy; and explores the relationship of the individual and the union. Prerequisite: Graduate standing or completion of first year of law curriculum. 3 hours or 1 unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
355. **Industrial Social Psychology.** Same as Psychology 355. Social psychological research and theory applied to industrial problems; emphasis on interaction and communication theory, role theory, leadership theory, motivational and perceptual theory, and

- group structure theory as aids in understanding and analyzing industrial problems. Prerequisite: Psychology 201 or 357. 3 hours, or $\frac{1}{2}$ or 1 unit.
357. **Psychology of Industrial Conflict.** Same as Psychology 357. Analysis of the causes and possible solutions of industrial conflict in terms of the behavior of individuals. Offered for industrial relations, commerce, and engineering students. Prerequisite: Psychology 100 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
360. **Employee Benefit Plans.** Same as Finance 360. Analysis of the economic and financial issues involved in designing and administering employee benefit plans; major emphasis on group life, disability income, and medical care plans, and on qualified pensions and profit-sharing plans for regular employees; and some attention to special supplementary plans for the executive employees. Prerequisite: Finance 260, Economics 240, or Business Administration 351, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
409. **Organizational Behavior.** Same as Business Administration 409. Examination and analysis of the organization as a social system and the impact of its various components on work attitudes and behavior; topics include the development of organizational structures, organizational effectiveness, decision making and policy formulation, leadership, and change. Prerequisite: Business Administration 408. 1 unit.
418. **Seminar in Industrial and Economic Sociology.** Same as Sociology 418. Discussion and individual research on such topics as industrialization, labor-management relations as group relations, the interrelations of industry and community, technology and the structure of controls in industry, and the problem of a social economics. Prerequisite: Labor and Industrial Relations 318 or consent of instructor. 1 unit.
420. **Formation of Public Policy.** Same as Political Science 420. Examination of the institutional and dynamic forces that shape the making of policy and its administration in the United States; separation of powers, pressure groups, administrative and legislative procedures, and judicial activity. 1 unit.
435. **Motivation and Morale in Industry.** Same as Psychology 435. Concepts and methods in the study of motivation of employees; determinants of employee attitudes and job satisfaction; and modification of attitudes and morale. Prerequisite: Four units of graduate credit in psychology or consent of instructor. 1 unit.
440. **Labor Economics.** Same as Economics 440. Survey of recent trends in the labor force, of real and money earnings, and of the distribution of national income; review of recent trends in these areas used as the basis for a critical economic analysis of contemporary English and American wage theory. Prerequisite: Economics 300 and 301. 1 unit.
441. **Labor Economics.** Same as Economics 441. Economic issues and implications involved in hours of work, employment and unemployment, and trade union institutionalism (the impact of the trade union upon the basic institution of a free enterprise economy); emphasis in all cases on the development of appropriate public policy. Prerequisite: Economics 300 and 301. 1 unit.
442. **Collective Bargaining.** Same as Economics 442. Development of a theory of the continuing interactions between union and management which define and modify the role of each and the terms of employment; use of appropriate social science concepts; and emphasis on the negotiating process, the structure of bargaining, and such issues as wages, worker security, and management authority, and on the interactions between the parties and the governmental process. Prerequisite: Consent of instructor. 1 unit. Graduate credit is not given for both Economics 343 and Economics/Labor and Industrial Relations 442.
443. **Problems and Practices of Labor Dispute Settlement.** Same as Economics 443. Seminar in the policies and practices of labor contract administration; comparative study of the fundamentals of grievance handling; analysis of mediation and fact-finding techniques; and special emphasis on the use of arbitration as a means of reducing industrial conflict. Prerequisite: Consent of instructor. 1 unit.
444. **Economics of Manpower Resources.** Same as Economics 444. Emergence of the manpower resource issue; population as a resource base; the labor force: measurement and characteristics, behavior under changing income, employment, and technology; women

as the dynamic factor in labor force growth; problems of utilization of labor force components: intellectual resources, older workers, and manual, white collar, Negro, and marginal forces; and issues of national manpower policy. Graduate credit is not given for both Labor and Industrial Relations/Economics 345 and 444. Prerequisite: Consent of instructor. 1 unit.

445. **Investment in Human Resources.** Same as Vocational and Technical Education 445. Activities which influence future monetary and psychic income by improving the resources in people; coverage of investments, including schooling, on-the-job training, medical care, migration, and the search for information on prices and incomes; main emphasis on education; and a last section covering educational planning. Prerequisite: An introductory course in economics and in quantitative methods. 1 unit.
447. **Labor Union Organization and Administration.** Same as Economics 447. Analysis of the structure, functions, and government of the modern American trade union movement; survey of the environmental factors, objectives, and action programs with considerable emphasis on economic and internal institutional factors, including the roles of leaders, policy determination and execution, jurisdictional disputes, and governmental regulations. Prerequisite: Major in social science or consent of instructor. 1 unit.
448. **Problems of Personnel Management.** Same as Business Administration 411. Examination of the organization and administration of the personnel function in management; the relations of personnel administration to operating departments, and the scope of business and industrial personnel services; and an analytical appraisal of policies and practices in selected areas of personnel administration, such as selection and training, carried out through case studies and direct industrial contacts. Specific consideration is given to problems up to and including placing the person on a job. Prerequisite: Consent of instructor. 1 unit.
450. **Management and Industrial Relations.** An analysis of the industrial relations function in management. Using case problems, research reports, and theoretical analyses, an examination is made of the development of the industrial relations function, alternate organizational approaches in dealing with employees and unions, the formation of labor relations policies, and management responsibilities in industrial relations. Prerequisite: Consent of instructor. 1 unit.
451. **Labor Law and Public Policy.** Same as Law 376. Analysis of current major policy issues in labor law and administration through the concepts and techniques of the lawyer and the labor relations specialist. Prerequisite: For law students, Law 347 or consent of instructor; for Institute of Labor and Industrial Relations and other graduate students, one semester of labor and industrial relations course work or consent of instructor. 2 hours or 1 unit.
454. **Foreign and International Labor Movements.** History and organization, economic and political policies of the major labor movements in the world; their international organizations; comparative analysis of particular problems confronting these movements; labor movements in underdeveloped areas; labor and economic development; and labor under totalitarian regimes. Prerequisite: Consent of instructor. 1 unit.
455. **Labor in Less Developed Countries.** The labor problem in economic development; the development of institutions and systems of industrial relations. Prerequisite: Consent of instructor. 1 unit.
456. **Industrial Relations Theory, I.** An integrated analysis of the principles of labor relations through the study of the works of the major theorists and their critics. Prerequisite: Consent of instructor. 1 unit.
457. **Industrial Relations Theory, II.** Continuation of Labor and Industrial Relations 456. Prerequisite: Labor and Industrial Relations 456. 1 unit.
458. **Faculty-Student Workshop.** Training and experience for Ph.D. students in the application of social science and industrial relations theory and research methodology to contemporary industrial relations problems through presentation and discussion of faculty and student research. Ph.D. students are required to give at least one paper, lecture, or other acceptable workshop presentation and to participate in workshop discus-

sions during the entire period of their campus residency for a total of 1 unit of credit. Prerequisite: Labor and Industrial Relations 456 and 457. 0 to 1 unit.

490. **Individual Topics.** A student in labor and industrial relations may register for this unit with the consent of the curriculum adviser and the adviser under whom the student will perform individual study or research. Such individual work may include special study in a subject matter for which no course is available or an individual research project, including on-the-job research in industry, which is not being undertaken for a thesis. 0 to 2 units.
492. **Research Seminar in Labor and Industrial Relations.** Systematic analysis of theories and procedures of the various social and physical sciences bearing on research in labor and industrial relations; primary emphasis on the process of integrating the approaches and techniques of the various social sciences with respect to the study of problems in labor and industrial relations as met in practice in management, the union, and government service, as well as in teaching and research in the field. Prerequisite: Major in social sciences or consent of instructor. 1 unit.
493. **Quantitative Methods in Labor and Industrial Relations.** Introduction to statistical concepts and methods in the social sciences and their application to industrial relations problems; familiarizes the student with modern methods of probability sampling, statistical inference, and multivariate analysis, and their application to current research problems in labor and industrial relations. Prerequisite: Any elementary statistics course. 1 unit.
496. **The Evolution of Labor-Management Relations in America.** Analysis and interpretation of the development of labor-management relations at the plant and industry levels from the stages of master and servant and master and journeyman in colonial times to the stage of constitutional government and industrial democracy in the present day. Prerequisite: Graduate standing in labor and industrial relations or consent of instructor. 1 unit.
497. **Collective Bargaining in Public Employment.** Same as Social Work 497, Administration, Higher, and Continuing Education 497, and Political Science 469. Development of employee organization, collective bargaining, and public policies in the public sector: federal, state, and local; analysis of contemporary bargaining relations, procedures, problems, and consequences. Prerequisite: Consent of instructor. 1 unit.
498. **Analysis of Organizations in Industrial Relations.** Intensive analysis of organizational behavior, with the main focus upon the theory of organizations as social institutions; concepts drawn from the various social sciences and applied to the principal organizations concerned with industrial relations; and examination of the internal dynamics of unions, managements, and government agencies, with special reference to decision-making processes, and their individual relations to the interactions among them. Prerequisite: Consent of instructor. 1 unit.
499. **Thesis Seminar.** For all students writing theses in labor and industrial relations at the M.A. and Ph.D. levels. 0 to 4 units (summer session, 0 to 2 units).

LANDSCAPE ARCHITECTURE

Head of Department: Professor R. B. Riley

Department Office: 205 Mumford Hall, Urbana

100. **Introduction to Landscape Architecture.** Survey of the practice and philosophy of landscape architecture. 1 hour.
101. **Introduction to Landscape Architecture.** Survey of the practice and philosophy of landscape architecture. 1 hour.

133. **Landscape Design.** Introduction to the fundamentals of design, including studies in two- and three-dimensional abstract and applied problems, basic elements and procedures of landscape design, and principles of landscape composition. Prerequisite: Credit or concurrent registration in Landscape Architecture 180, or consent of instructor. 5 hours.
134. **Site Design.** Principles and practices of site planning; orientation, circulation, and land use definitions and relationships applied to site scale problems; and application of site design process. Field trip required; see *Timetable* for current fees. Prerequisite: Landscape Architecture 133 or consent of instructor. 5 hours.
142. **Landform Design and Construction.** Introduction to the fundamentals of the earth's surface as a design element; limitations and uses of landforms; and methods of grading, surface drainage, and land surveying. 3 hours.
150. **Landscape Surveys.** Principles and practices of identifying, analyzing, and recording landscape resources. Field trip required; see *Timetable* for current fees. Prerequisite: Geography 103 or consent of instructor. 3 hours.
180. **General Drafting and Graphics.** Basic techniques and standards of drafting; lettering, views and projections, dimensioning, and shades and shadows. Prerequisite: Open to landscape architecture majors only. 2 hours.
181. **Visual Communications, I.** Principles of basic design and techniques in landscape architectural rendering. Prerequisite: Landscape Architecture 180 or consent of instructor. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Senior Honors Course.** Independent guided study and research in a selected area of landscape architecture; for candidates for honors in landscape architecture. Prerequisite: Senior standing in landscape architecture, a university grade-point average of 4.0, and consent of head of department. 1 to 6 hours. May be repeated to a maximum of 9 hours.
213. **People, Land, and Environment.** Nontechnical study of the landscape and the environment as products of a natural base worked upon by people, their technologies, and their beliefs; approach is both historical (from prehistory to science fiction) and problem oriented (the use of land, resources, and energy). 2 to 4 hours.
214. **History of Landscape Architecture.** Analysis of the development of landscape architecture as a result of environmental and cultural influences. 3 hours.
226. **Principles of Park Design.** Introduction to the theory of master planning and site design as related to recreation area development, administration, and operations. 2 hours.
235. **Recreation and Community Design.** Development of design solutions at site and master plan scale relative to community and recreational problems; emphasizes development of analysis and design techniques. Field trip required; see *Timetable* for current fees. Prerequisite: Landscape Architecture 134 or consent of instructor. 5 hours.
236. **Design Workshops, I.** Project design at various scales utilizing problems of a wide range of complexity and subject matter; concerns rural, community, and urban problems, housing, recreation, and open space; and emphasizes problem analysis and generation of innovative design alternatives. Students select from several sections depending on specific interests. Prerequisite: Landscape Architecture 235 or consent of instructor. 5 hours.
243. **Site Engineering.** Principles of design and layout of drainage, circulation, and utility systems. Prerequisite: Landscape Architecture 142 or consent of instructor. 3 hours.
244. **Landscape Construction.** Construction methods, materials, and procedures related to the design of landscape structures; development of design details and cost estimating. Prerequisite: Landscape Architecture 243 or consent of instructor. 3 hours.
246. **Professional Practice.** Professional responsibilities of the landscape architect; methods of practice; and preparation and execution of contracts and specifications. Prerequisite: Junior standing in landscape architecture or consent of instructor. 3 hours.
251. **Plant Materials and Design, I.** Ecological principles, study of plant communities, identification of native flora and perennials, and uses of plants in the landscape; introduc-

- tion to planting design. Field trips required. Prerequisite: Landscape Architecture 150, Botany 100 or 101, and Geography 103. 4 hours.
252. **Plant Materials and Design, II.** Biogeography; identification of native species, evergreens, and exotics; uses of plants in the landscape; and planting design projects. Field trips required. Prerequisite: Landscape Architecture 251. 4 hours.
253. **Planting Design.** Planting design philosophies; detailed and comprehensive design projects; management practices; technical documents; and plant identification. Field trips required. Prerequisite: Landscape Architecture 252. 4 hours.
282. **Visual Communications, II.** Continuation of Landscape Architecture 181, with emphasis on advanced rendering techniques; further exploration of the media and method of visual communication. Prerequisite: Landscape Architecture 181 or consent of instructor. 3 hours.
290. **Special Problems.** Supervised independent study, research, or special project in a selected area related to landscape architecture. Prerequisite: Junior or senior standing; consent of instructor and head of department prior to advance enrollment and registration. 1 to 6 hours. May be repeated to a maximum of 9 hours.
315. **Environmental Change and Public Policy.** Same as Urban Planning 315. Introduction to the applicability of social and political theory, methods, and techniques to environmental issues and problems; surveys federal, state, and local conditions related to changing patterns in environmental attitudes and natural resource obligations. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
337. **Regional Landscape Design.** Introduction to the process of physical planning, emphasizing land use policy and plan formulation; a regional case study is undertaken to develop analytical skills, to introduce the relationship between cultural and natural processes, and to explore the need for responsible political action. Prerequisite: Landscape Architecture 236 or consent of instructor. 5 hours or $1\frac{1}{2}$ unit.
338. **Thesis Design Project.** Terminal project; comprehensive landscape architectural development. Prerequisite: Landscape Architecture 337 or consent of instructor. 5 hours, or 1 to 2 units.
370. **Design-Behavior Interaction.** Critical discussion of notions and theories pertaining to the reciprocal effects of landscape architectural design and human behavior. 3 hours or $\frac{3}{4}$ unit.
417. **Land and Society: History, Theories, and Problems.** Historical and cross-cultural investigation of the use, shaping, and perception of the land-based environment; case studies, critical problems and issues, and theories of social-environmental interaction. Prerequisite: Consent of instructor. 1 unit.
436. **Advanced Landscape Design.** Comprehensive master planning and site design for large public, semipublic, and private properties; encouragement of special problems in collaboration with students from other disciplines. Prerequisite: Passage of special design examination or consent of instructor. 1 unit.
437. **Regional Landscape Design.** Detailed investigation of landscape resources and characteristics of large geographical areas; determination of land-use design proposals. Prerequisite: Landscape Architecture 441 or consent of instructor. 1 unit.
441. **Suburban Land Use Patterns.** Same as Urban Planning 441. Theoretical basis for land use plan design, including site qualities, offsite environmental impacts, relative location of activities, and sequences of development. $\frac{3}{4}$ unit.
442. **Spatial Design Methods.** Same as Urban Planning 442. Representations and solution procedures for problems involving the arrangement of land use activities in space; optimizing, approximate, and graphic methods, their applications, effectiveness, and efficiency; and experiments with computerized procedures. Prerequisite: Landscape Architecture 441 or consent of instructor. 1 unit.
457. **Landscape Management.** Investigation of management theories, policies, and practices which influence landscape preservation and development; emphasis on their cumula-

tive effects upon natural processes and aesthetic qualities. Prerequisite: Consent of instructor. 1 unit.

471. **Design-Behavior Fieldwork.** Preparation and application of field strategies to identify and to analyze behavioral trends as they relate to the physical environment; emphasis on user behavior in parks and playgrounds. Prerequisite: Landscape Architecture 370 recommended. 1 unit.
481. **Urban Design Studio, I.** Same as Architecture 481. Design of large building types and building complexes; megastructures; and collaboration with other disciplines in research related to urban development. Prerequisite: Architecture 374; credit or concurrent registration in Urban Planning 384 or consent of instructor. 1 to 2 units.
482. **Urban Design Studio, II.** Same as Architecture 482. Design development studies of central business districts, movement systems, and residential communities; collaboration with other disciplines in research related to urban development. Prerequisite: Architecture 481, Urban Planning 384, or consent of instructor. 1 to 2 units.
487. **Seminar.** Preparation, presentation, and discussion of research papers on current and future areas of landscape architectural application. Prerequisite: Consent of instructor. ½ unit.
490. **Special Problems.** Nature and scope of projects to be determined by consultation between student and faculty adviser; open to landscape architecture majors as well as those from other disciplines who wish to engage in interdisciplinary work. Prerequisite: Consent of instructor. ½ to 2 units.
499. **Thesis Research.** Prerequisite: Graduate standing in landscape architecture. 0 to 2 units.

LATIN

(See Classics under Humanities, School of)

LATIN AMERICAN AND CARIBBEAN STUDIES

Director of Center: Professor M. H. Forster

Center Office: Room 250, 1208 West California Avenue, Urbana

195. **Freshman Seminar.** An intensive review of domestic and foreign factors influencing violence and social change in Latin America. Each semester a particular topic is selected. Prerequisite: Freshman James Scholar or other designation as a superior student. 3 hours.
295. **Special Topics: Conflict in Latin America.** A topical survey of social, economic, and political factors influencing conflict and violence in Latin American life. Each semester a particular topic is considered. Prerequisite: A basic course in a social science discipline. 3 hours.

LAW

Dean of College: Professor E. J. Cribbet

College Office: 209 Law Building, Champaign

301. **Contracts-Sales, I.** What promises are enforceable including unjust enrichment and reliance, offer and acceptance, mistake, unfairness and overreaching, unconscionability, Statute of Frauds, interpretation of contract language, conditions, and third party beneficiaries. 4 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
302. **Contracts-Sales, II.** Introduction to the Uniform Commercial Code, its interpretation and application; performance of contracts, including warranty obligations, breach, remedies for breach, impossibility and frustration of purpose, assignment and delegation, and third party rights in sold goods. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
303. **Torts, I.** Civil wrongs, including intentional torts (such as assault and battery), negligence, strict liability, medical malpractice, products liability, liability of owners and occupiers of land, libel and slander, unfair commercial practices, and the impact of insurance. 4 hours or 1 unit (summer session, 2 ½ hours or ½ unit).
307. **Property, I.** This is the basic first-year course in property law and is required of all students. Provides an overview of the law of land, with incidental coverage of personal property; includes the concept of property, acquisition of private property, recognized property interests, gratuitous transfer of property interests, commercial transfers (sale, lease), the use of property, and an introduction to environmental law. 3 hours or 1 unit.
308. **Property, II.** Continuation of Law 307. 2 hours or ½ unit.
309. **Criminal Law and Procedure.** The sources and purposes of the criminal law; the meaning of criminal responsibility; the characteristics of particular crimes; problems in the administration of criminal justice, with emphasis upon right to counsel, arrest, search, interrogation, lineups, and the scope and administration of exclusionary rules. 5 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
310. **Constitutional Law.** The apportionment of governmental power between the United States and the states, and the limitations on power resulting from the contract, equal protection, and due process clauses. 4 hours or 1 unit.
311. **Civil Litigation, I.** A study of modern civil courts and their historical development, including the structure of the judicial system, with particular emphasis upon the bases for adjudicatory power and upon remedies which may be afforded to and imposed upon civil litigants. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
315. **Legal Writing and Research.** Emphasis on development and improvement of skills in legal writing; assignments may include brief writing and preparation of legal memoranda and opinions; and training in legal bibliography. 2 hours.
316. **Moot Court.** A required first-year course. Students work in teams of two or three on an appellate brief of an actual case currently pending in the Illinois Court of Appeals. Two teams brief each case, one for the appellate and one for the appellee. Then, under the supervision of teaching assistants, students argue the merits of their case, in typical appellate argument fashion, before a panel of senior students, community lawyers, and professors. 1 hour. No graduate credit.
317. **Moot Court Board.** Preparation of an appellate brief; presentation of an appellate oral argument; participation in intramural, state, national, or international moot court competition. Prerequisite: Law 315 and 316. 1 hour. May be repeated to a maximum of 4 hours. No graduate credit.
319. **Civil Litigation, II.** Continuation of Law 311. Modern civil litigation, with emphasis upon pleading and parties, pre-trial proceedings, trial practice (except evidence), relationship between judge and jury, verdicts and judgments, and appellate review. Prerequisite: Second or third year of J.D. candidacy. 3 hours or 1 unit (summer session, 2 ½ hours or ½ unit).

320. **Organizations.** The basic legal consequences for individuals, organizations, and society, of the formation, control, and financing of organizations; includes the agency and employment relationship, unincorporated association, general partnership, limited partnership, closed corporation, public corporation, and non-business organizations. 4 hours or 1 unit (summer session, 5 hours or 1 unit).
322. **Commercial Law, I.** A study of major problems involved in commercial paper with special emphasis on the history and interpretation of the Uniform Commercial Code. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
323. **Administrative Law.** The functions of administrative tribunals in federal, state, and municipal government; the procedure before such administrative tribunals; and judicial relief from administrative decisions. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
326. **Evidence.** The law governing the proof of disputed issues of fact; function of the court and jury; competence and examination of witness; standards of relevancy; privileged communications; illegal evidence; hearsay rule; best evidence rule; presumptions; and judicial notice. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
328. **Taxation of Income and Wealth.** Introduction to federal income, estate and gift taxes, and Illinois inheritance tax; treats with income tax problems of individuals and business enterprise, and transfer taxes upon inter vivos and testamentary dispositions of wealth. Prerequisite: Second or third year of J.D. candidacy. 5 hours or 1 ½ unit.
329. **Family Property Transactions.** The means of transferring wealth, with primary emphasis on gratuitous transfers; the means available for making gratuitous transfers, including the validity and effect of testamentary instruments and trust deeds; and problems concerning the dispositive provisions of any type of instrument which transfers wealth. Prerequisite: Second or third year of J.D. candidacy. 4 hours or 1 unit (summer session, 5 hours or 1 unit).
330. **Restitution.** The legal and equitable remedies affording restitution of unjust enrichment, including the grant of money judgments in quasi-contractual actions and the imposition of constructive trusts and equitable liens in actions involving equitable wrongs. Unjust enrichment is considered in the context of the receipt of unsolicited benefits, benefits deriving from the commission of tortious acts, benefits deriving from wrongful appropriation of another's ideas, and benefits deriving from consensual transactions tainted by fraud or mistake. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
331. **Legislation.** The first division of the course deals with federal and state constitutional limitations upon the exercise of legislative power in a procedural sense, e.g., investigative powers, legislative structure, requirements relating to enactment of legislation, and role of courts in overseeing legislative action in these areas. The second division of the course deals with the formulation of legislative policy, the relationship of common law principles to legislative policy, and particularly the problems, rules, and methods employed by courts in the interpretation of legislation. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
332. **Patent Law.** Historical development of protection of ideas, inventions, and discoveries; patentability; securing the patent; amendment and correction of patents; and infringement remedies, defenses, and procedures. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
333. **Family Law.** The creation and dissolution of the family, legal relationships within the family, and related topics, such as the legal relationship between illegitimate and natural parent and legal relationships created by adoption; includes the law of marriage, divorce, annulment, separation, illegitimacy, custody, support, property, inheritance, and related rights; and also considers family law aspects of the movement for women's equality, the suitability in family litigation of the adversary system, and legal ethics as applicable to and practiced in the field of family law. 3 hours or 1 unit (summer session, 2 ½ hours or ½ unit).
335. **Securities Regulation.** Problems arising under federal securities laws administered by the Securities and Exchange Commission, as well as blue sky or state securities laws;

emphasis upon statutory and regulatory requirements imposed in connection with corporate financing. Prerequisite: Law 320. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).

336. **Unfair Trade Practices.** The regulation of competitive business behavior at common law and under federal and state statutes; trademarks, copyrights, design patents, trade secrets, protection of ideas, commercial disparagement, false advertising, and price discrimination. 2 to 3 hours, or ½ to 1 unit (summer session, 2 ½ hours or ½ unit).
337. **Commercial Law, II.** Secured transactions (personal property securities) under the Uniform Commercial Code. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
339. **Conflict of Laws.** The study of problems having relationship with two or more states or nations involving individual litigants or potential litigants; includes such matters as jurisdiction of courts, judgments, torts, workmen's compensation, contracts, property, family relationships, trusts and estates, business organizations, and governmental activities. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
340. **Urban Government.** History and functions; judicial, legislative, and administrative control; creation, dissolution, and changes in structure; law-making powers; finance; planning and development functions; regulatory powers; contracts; tort liabilities; and federal-local and interlocal relations. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
341. **Natural Resources.** Legal problems associated with the use of certain land, water, and mineral resources, including energy resources; principal emphasis on public management and regulation. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
342. **Real Estate Financing.** A study of real estate mortgages. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
344. **Creditors' Rights.** Remedies of the delinquent debtor and his creditors under the Bankruptcy Act; liquidation and rehabilitation; and exercises in bankruptcy procedure. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
345. **Civil and Political Rights.** Basic problems in the relation of the individual to government and in the protection of the rights of minority groups. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
347. **Labor Law, I.** Same as Labor and Industrial Relations 347. A study of the National Labor Relations Act as amended, the preact history of the labor movement, and the judiciary's response thereto, with emphasis on understanding the problems, experiments, and forces leading to the enactment; includes the negotiation and administration of the collective bargaining agreement, especially the grievance arbitration procedure, its operation and place in national labor policy; and explores the relationship of the individual and the union. Prerequisite: Graduate standing or completion of first year of law curriculum. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
348. **International Law.** The nature, sources, and subjects of international law and its place in the control of international society; includes an examination of the law of jurisdiction, territory, recognition and succession of states, rights and immunities of states in foreign courts, diplomatic immunities, treaties, protection of citizens abroad, settlement of international disputes, war and neutrality, the United Nations, and the International Court of Justice. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
349. **State and Local Taxation.** A survey which stresses the constitutional and statutory bases of state and local tax systems; considers the fiscal and economic policy aspects of the tax structure; and includes the power and purposes of taxation, the operation and administration of the general property tax, jurisdiction of the states to impose various types of taxes, and special problems relating to the operation of income, sales, and business excise taxes. 2 hours or ½ unit (summer session, 2 ½ hours or 1 unit).
350. **Government Regulation.** Regulatory control of business activity; restriction of entry; price, service and wage regulation; and control of price and service discrimination under the Robinson-Patman Act. 3 hours or 1 unit (summer session, 2 ½ hours or ½ unit).
351. **Jurisprudence.** The place of law in society; the nature, goals, and methods of law; and

the relation of law and social science. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).

353. **Business Planning.** Examination of planning situations wherein tax, corporations, corporate finance, securities regulation, and accounting materials are interrelated; organization of close corporations and public companies, corporate distributions and recapitalizations, sale of corporate businesses, corporate acquisitions and mergers, and corporate separations; and problems requiring written opinions and solutions. 4 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
354. **Empirical Evidence in Discrimination.** The determination and proof of discrimination in employment and other areas by means of statistical evidence. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
355. **Antitrust Law.** Study of anticompetitive practices by business firms, including price-fixing, monopolization, mergers, exclusive dealing, price discrimination, and incipient restraints of trade. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
356. **Federal Courts.** Examination of the relationship of federal courts to other organs and federal government, particularly congressional control over jurisdiction, including availability, appropriateness, and extent of judicial review. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
357. **Legal Accounting.** Introduction to the basic concepts of double-entry and accrual accounting, followed by a critical and comparative appraisal of generally accepted accounting principles in relation to legal concepts governing various business transactions. 2 hours or ½ unit (summer session, 2 ½ hours or 1 unit).
358. **Modern Social Legislation.** Examination of the legal structure and underlying economic and social policies of income maintenance programs and proposed reform; includes old age and survivor's insurance under the Social Security Act, governmental regulation of private pension systems supplementing public provision for old age, aid to families with dependent children under the Social Security Act, child welfare provisions, health maintenance provisions, and various other welfare, social entitlement, and related income redistribution programs. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
360. **Legal Drafting and Law Office Practice.** A practical course on the drafting of legal documents; a study of the organization and management of a law office. 2 hours. No graduate credit.
362. **Trial Advocacy.** Examination of the problems of advocacy and tactics at the trial level. Students engage in actual trial work, including witness preparation, opening and closing statements, direct and cross examination, and jury instructions; demonstrations are conducted by staff and visiting judges and practitioners; and the course culminates with students conducting trials before a judge and a jury. Prerequisite: Second or third year of J.D. candidacy. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
363. **Environmental Law.** The regulatory aspects of environmental law; examination of the major areas of governmental control (air pollution, water pollution, noise pollution, solid waste disposal); the roles of federal and state governments; the operation of environmental impact statement procedures; citizen participation; and private remedies. Prerequisite: Second or third year of J.D. candidacy. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
364. **Urban Planning and Land Use Regulation.** The legal and administrative aspects of land development and regulation in an urban society; the techniques and problems of planning; the tools of plan effectuation, such as zoning, subdivision regulation, renewal and redevelopment, housing programs; and the allocation of decision-making functions among various levels of government. 3 hours or 1 unit (summer session, 2 ½ hours or ½ unit).
365. **Taxation of Business Enterprises.** Federal income tax law related to taxation of corporations, shareholders, partnerships, and partners. Prerequisite: Law 320 and 328. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).

369. **Soviet Law.** Soviet conceptions of the role of law as evidenced both in theory and in practice; emphasis on highlights of Soviet law, with comparison to the common-law and civil-law traditions; and study of Soviet court and legislative materials to determine characteristic patterns with respect to: constitution and administration, the relation of the individual to the state and to society, legal regulation of property and productive institutions, private relationships, and international law. 2 to 3 hours, or ½ to 1 unit (summer session, 2 ½ hours or 1 unit).
370. **Labor Law, II.** Advanced problems in the law of industrial relations, with particular emphasis on the negotiation and administration of the collective bargaining agreement; the relation between the individual and the union. Prerequisite: Law 347 or consent of instructor. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
371. **Seminar in Selected Legal Problems.** Introduction to the methods and materials of legal research; discussion of selected topics; each student investigates a topic approved by the instructor and presents the results of the investigation orally to the class and in writing to the instructor. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit). May be repeated.
372. **Problems in Estate Planning.** Selected problems in the planning of estates which will serve to integrate the basic materials in property, trusts, wills, income, estate, and gift taxation. Prerequisite: Law 328 and 329. 2 hours or ½ unit (summer session, 2 ½ hours or ½ unit).
373. **Advanced Criminal Procedure.** Problems in the administration of criminal justice, with emphasis upon the commencement of formal proceedings (bail, decision to prosecute, grand jury, preliminary hearing, location of prosecution, scope of prosecution, speedy trial); the adversary system (pleas, discovery, jury trials, prejudicial publicity, ethical problems, double jeopardy); and post-conviction review (post-trial motions, appeals, habeas corpus, related post-conviction remedies). Prerequisite: Law 309 and 310. 3 hours or 1 unit (summer session, 2 ½ hours or ½ unit).
374. **Torts, II.** Focuses on the traffic victim and his claim for compensation; compares the present common law method with various schemes of social insurance, both public and private; explores problems of coordinating, as well as comparing, any such scheme of social legislation with the tort system and with other social and private insurance arrangements, such as workmen's compensation, accident and health insurance, Social Security, etc.; and considers both broad questions of social policy and technical drafting problems. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
375. **Government Contracts.** A study of the way the United States does business; differences in dealing with the government as compared to private parties; awarding of contracts and contractual clauses, especially those allocating risks; and adjudication of contract disputes. 3 hours or 1 unit (summer session, 2 ½ hours or 1 unit).
376. **Labor Law and Public Policy.** Same as Labor and Industrial Relations 451. Analysis of current major policy issues in labor law and administration through the concepts and techniques of the lawyer and the labor relations specialist. Prerequisite: For law students, Law 347 or consent of instructor; for Institute of Labor and Industrial Relations and other graduate students, one semester of labor and industrial relations course work or consent of instructor. 2 hours or 1 unit.
377. **Consumer Credit.** Existing patterns and proposed changes in consumer credit law; finance charge regulations, special licensing for merchandisers of consumer credit, disclosure of finance charges, door to door selling, home improvement financing, cutting off defenses, creditor remedies problems including garnishment, wage assignments, and deficiency judgments, and administrative control of creditor practices. Prerequisite: Law 322. 2 hours or ½ unit.
378. **Juvenile Courts.** The laws relating to juveniles, including the historical relationship of the criminal law with children; the evolution of state and federal decisional law providing for the special handling of children under specified ages who engage in conduct deemed to be delinquent; emphasis on the procedural and constitutional rights of

children accused of wrongful conduct. Prerequisite: Law 309. 2 hours or $\frac{1}{2}$ unit (summer session, 2 $\frac{1}{2}$ hours or $\frac{1}{2}$ unit).

379. **Law of Corrections and Prisoners' Rights.** An examination of the present system of corrections, including a study of procedural and substantive rights of incarcerated persons; the sentencing process; post-conviction remedies and programs, focusing on probation and parole; and alternatives to the present system. Prerequisite: A basic course in criminal law and procedure. 2 hours or $\frac{1}{2}$ unit.
382. **Comparative Law.** Comparative law is a method, an approach to legal problem solving, rather than a subject matter in the traditional sense. The course attempts to sharpen students' perceptions of their own law by providing them with a measuring stick; it is not primarily concerned with specific rules of foreign law or with proficiency in a specific foreign legal system. 2 hours or $\frac{1}{2}$ unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
383. **Law of Professional Responsibility.** A study of ethical issues arising in the practice of law with particular reference to the requirements of the American Bar Association Code of Professional Responsibility. Prerequisite: Second year of J.D. candidacy. 1 or 2 hours, or $\frac{1}{2}$ unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
384. **Current Legal Problems.** Intensive study of current legal problems; based upon recent court decisions, recent legislation, pending law reform proposals, or empirical studies; subject matter varies from semester to semester. 3 hours or 1 unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
385. **International Business Transactions.** Doing business abroad: export-import regulations, use of foreign commission merchants, licensing of patents and know-how, investment and exchange problems, establishing a foreign operation (including forms of business organization available abroad), and application of United States and foreign antitrust law to the business operation. Prerequisite: Law 322. 2 hours or $\frac{1}{2}$ unit (summer session, 2 $\frac{1}{2}$ hours or $\frac{1}{2}$ unit).
386. **Taxation of International Transactions.** Survey of the problems in U.S. taxation of foreign persons and foreign income, with special emphasis upon foreign business transactions of U.S. corporations. Prerequisite: Law 328. 2 hours or $\frac{1}{2}$ unit (summer session, 2 $\frac{1}{2}$ hours or $\frac{1}{2}$ unit).
387. **International Economic Organizations.** A survey of the principal international economic organizations (GATT, OECD, ECE) and of international monetary and investment institutions (IMF, IBRD, AID); an intensive study of the European Common Market, particularly of its laws relating to trade barriers, establishment of companies, and antitrust; and United States legislation in the field of international trade (Trade Expansion Act of 1962). 3 hours or 1 unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
388. **Law and Psychiatry.** Contemporary psychiatric theory and its relevance to various legal issues; psychiatric disorders, their etiology and treatment; and problems of prediction and prevention of deviant behavior in the context of the administration of the criminal and mental health laws. 3 hours or 1 unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
389. **Corporate Finance.** The impact of legal regulation and financial theory on the formation, financing, and value of corporations; alternative methods for utilization of surplus funds; and controls over transactions in shares. Prerequisite: Second year of J.D. candidacy. 2 hours or $\frac{1}{2}$ unit.
390. **Insurance.** Concentration on such fundamentals as the formation of the insurance relation and the principle of indemnity; includes persons and interests protected, the risks transferred, rights at variance with policy provision, claims processes, and regulation of insurance. Assignments outside of class consist of a programmed set of technical legal problems; classroom lectures supplement the problems, often focusing on broader aspects of the subject matter. Prerequisite: Second year of J.D. candidacy. 2 hours or $\frac{1}{2}$ unit (summer session, 2 $\frac{1}{2}$ hours or 1 unit).
391. **Legal Problems.** Preparation of comments on recent decisions for publication in the

University of Illinois Law Forum. Open to students selected for superior achievement in two or more semesters of law study. 1 hour. May be repeated. No graduate credit.

395. **Clinical Training.** Student field work in the offices of the Champaign County Legal Services Agency, Vermilion County Legal Services Agency, Champaign Human Relations Commission, local City Attorneys, State of Illinois Department of Mental Health, Champaign County State's Attorney, Champaign County Public Defender, and other public agencies. Students engage in legal and investigative work under the supervision of agency attorneys or other administrative personnel; this work may include conducting client interviews, doing legal research, preparing legal documents, pleadings, and briefs, and in some cases, engaging in the trial of actual cases. 1 hour. May be repeated up to four times. No graduate credit.
399. **Research in Special Topics.** Individual research on a special problem selected in consultation with the instructor. 1 to 4 hours, or $\frac{1}{2}$ to 1 unit.
402. **Introduction to U.S. Law.** An intensive introduction to the American legal system for graduate law students with prior professional training in non-common law legal systems; stresses the functioning of basic U.S. legal institutions and the techniques of American legal research. 1 unit.
499. **Thesis Research.** 0 to 3 units.

LAW AND SOCIETY

Director of Program: Professor R. Simon

Office: 318a Lincoln Hall, Urbana

460. **Proseminar in Law and Society, I.** Interdisciplinary course for faculty and graduate students working in the law and society area. Each meeting includes a presentation of current work by faculty and/or students. Students are required to do original research under supervision. Prerequisite: Consent of instructor for students from nonparticipating units. $\frac{1}{2}$ unit.
461. **Proseminar in Law and Society, II.** Continuation of Law and Society 460. Prerequisite: Consent of instructor for students from nonparticipating units. $\frac{1}{2}$ unit.

LEISURE STUDIES

Head of Department: Professor J. J. Bannon

Department Office: 104 Huff Gymnasium, Champaign

100. **Leisure: Its Uses and Resources.** Philosophical foundations of leisure and recreation; history of the development of parks and man's organized efforts to meet his leisure needs; introduction to present patterns of organized recreation; professional preparation for the field; and evaluation of student skills and experience. 2 hours.
110. **Foundations for Delivery of Leisure Services.** Introduces the leisure studies major to enabling legislation, fiscal concerns, standards for planning, problems of cities, and the relationship of professional organizations to recreation and park services. 2 hours.
130. **Introduction to Therapeutic Recreation.** Introduction to concepts and principles of therapeutic recreation; types of illnesses and disabilities; settings; programming and services; and role of the therapeutic recreator. 2 hours.
140. **Principles of Camping.** Objectives, organization, techniques, counseling, activities, and evaluation. 3 hours.

141. **Introduction to Outdoor Education and Recreation.** Philosophy and principles; programs and methods used by various types of institutions; and field experience. Prerequisite: Leisure Studies 100 or consent of instructor. 2 hours.
180. **Recreation Program Laboratory, I.** Survey of a number of recreation program activities; through a series of workshops, students are instructed in leadership skills in such program areas as recreational dance, drama, music, arts and crafts, and social recreation. 1 hour.
181. **Recreation Program Laboratory, II.** Survey of a number of recreation program activities; through a series of workshops, students are instructed in leadership skills in such program areas as recreational dance, drama, music, arts and crafts, and social recreation. 1 hour.
182. **Basic Recreation Field Experience.** Directed field experience in public and private recreation agencies; gives students majoring in recreation an introduction to working in actual field situations; students work in University-approved agencies of their own choice four to thirty-two hours each week. Prerequisite: Leisure Studies 100 and 110. 1 or 2 hours. Must be repeated in a different responsibility classification.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Leadership in Leisure Delivery Systems.** Introduces the student to the various theories of leadership applicable to situations that exist in the field of leisure studies; provides practice in various leadership settings and techniques for the evaluation of leadership performance. Prerequisite: Leisure Studies 100 or 110. 3 hours.
210. **Theories and Methods of Supervision.** Concepts, principles, and objectives of supervision; the nature of the supervisory relationship; supervisory functions and processes; identification and application of methods and techniques; and organizational and operational patterns of supervision in recreation and park settings. Prerequisite: Leisure Studies 180 and 181, or consent of instructor. 3 hours.
215. **Recreation Program Development.** Theory and practice in recreation program development in the various recreation settings, including public, private, and commercial operations; core programming and programming dictated by the needs of the field, setting, or clientele; and program evaluation. Prerequisite: Leisure Studies 100 and 200, or consent of instructor. 3 hours.
250. **Special Problems.** Special projects in research and independent investigation in any phase of health, physical education, recreation, or related areas selected by the student. Prerequisite: Junior or senior standing; grade-point average of 3.5; consent of faculty adviser, instructor, and head of department. 2 to 3 hours. May be repeated for a maximum of 4 or 6 hours.
260. **Honors Seminar.** Same as Health Education 260 and Physical Education 290. Lectures and discussions dealing with issues in physical education, dance, health education, recreation education, and related fields. Prerequisite: James Scholar or grade-point average of 4.0 the preceding semester; consent of faculty adviser, instructor, and head of department. 2 hours. May be repeated for a maximum of 6 hours.
272. **Organization of Aquatic Programs.** Same as Physical Education 272. History of athletics; leadership training methods; swimming pool sanitation; pool and beach control; and operational records. 2 hours.
274. **Urban Leisure Systems.** Orientation to the urban and inner-city setting and to the role of leisure within this community; methods and techniques effective in out-reach programs; guest lecturers in related fields such as urban planning, social work, etc.; guest speakers from local community; field trips and field experience; and readings from several disciplines as relevant. Prerequisite: Advanced undergraduate standing or consent of instructor. 3 hours.
280. **Professional Seminar.** Seminar discussions to prepare students for supervisory internship; placement; agency-university relationships; evaluation; resume writing; and professional code of ethics. Prerequisite: Leisure Studies 182; junior standing; consent of the coordinator of field work programs. 1 hour.

- 282. Field Practicum, I.** Students are assigned to approved field instruction agencies in a supervisory capacity for a minimum of forty hours per week for an eight-week session; both the agency and the University provide supervision. Prerequisite: Leisure Studies 280. 4 to 8 hours. May be repeated to a maximum of 8 hours.
- 283. Field Practicum, II.** Students are assigned to approved field instruction agencies in a supervisory capacity for a minimum of forty hours per week for an eight-week session; both the agency and the University provide supervision. Prerequisite: Leisure Studies 282. 4 hours.
- 290. Research in Leisure Studies.** The place of research in recreation and parks; research design; data collection, processing, and analysis; use of completed research; and development of an appreciation of and an ability to evaluate and utilize research rather than an ability to conduct research. Prerequisite: Senior standing; consent of instructor. 3 hours.
- 299. Off-Campus Study.** Provides campus credit for foreign or domestic study completed off-campus. A student's proposal for study must have prior approval of the major department and the college office. Final determination of appropriate credit is made on the student's completion of the work. Prerequisite: Advanced standing and approval of major department and college. 0 to 16 hours (summer session, 0 to 8 hours). May be repeated to a maximum of 32 hours.
- 310. Introduction to Administration.** Organization of public and private agency programs, leadership, facilities, and services; introduction to recreation administration. Prerequisite: Leisure Studies 100; advanced undergraduate standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 315. Play Theories and Their Implications.** Classical and modern theories of play; critical analysis of definitions, concepts, and assumptions and of extant research and research strategies; implications for programming and planning for play. Prerequisite: Leisure Studies 110 and 215; junior standing; or consent of instructor. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit.
- 320. Park Management.** An intensive study of the principles, practices, and problems involved in managing public park systems; designed to provide a professional background including the history of parks, organization, planning, examination of facility design and layout, maintenance, finance, and operation of park systems. Prerequisite: Senior standing in leisure studies, or consent of the instructor; credit in the following courses or equivalent: Landscape Architecture 226; Urban Planning 171; Political Science 305; Leisure Studies 280. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 321. Recreational Use of Public Lands.** Study of lands in the public domain and their historical, current, and potential use for outdoor recreation; an analysis of land, woods, and water in the public domain; the demand for outdoor recreation; multiple-use concept of natural resources; functions and policies of federal and state governments and their agencies; the economics of outdoor recreation; and the future of outdoor recreation in America. Prerequisite: Leisure Studies 100; Economics 108; Geography 214; or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 330. Principles of Therapeutic Recreation.** Concepts, principles, objectives, methods, and settings of recreation for the ill and handicapped. Prerequisite: Advanced undergraduate or graduate standing; Leisure Studies 100, and 180 or 181, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 331. Recreation Leadership for Special Groups.** Leadership theory and methods applied, in recreational settings, primarily to groups of the mentally ill, the mentally retarded, the physically disabled, and those with conduct disorders. Prerequisite: Leisure Studies 110 and 130. 3 hours, or $\frac{1}{2}$ to 1 unit.
- 343. Social Psychology and Motor Behavior.** Same as Physical Education 343. The use of social psychological theory and methods in the study of motor behavior; emphasis given to the influence of social psychological processes on motor skill acquisition, including such variables as social facilitation, competition, aggression, attitudes, and personality. Prerequisite: Educational Psychology 390 or Psychology 201, or consent of instructor. 4 hours or 1 unit.

348. **Social Problems Related to Physical Activity and Sport.** Same as Physical Education 348. A seminar with field study on physical activity and sport for marginal, deviant, or sociopsychologically deprived groups. Prerequisite: Six hours in the social sciences or consent of instructor. 2 hours, or $\frac{1}{2}$ or 1 unit.
349. **Analysis of Small Groups in Play and Sport.** Same as Physical Education 349. The methodology of small group research and analysis of the small group in play and sport; discussion of culture, social structure, and personality structure in the group; and class and student observation and analysis of the small group in play and sport in natural field settings. Prerequisite: Psychology 100 or 201, or Sociology 100 or 201, or consent of instructor. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
381. **Management Internship.** Work-study experience in the management aspects of leisure service delivery systems. Students are assigned to agencies in their special fields of study and are closely supervised by University faculty. Prerequisite: Leisure Studies 282 and 283, or graduate standing. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit.
401. **Foundations of Leisure Studies.** Basic philosophical, historical, and scientific foundations and developments in leisure and recreation; analysis of recreation values as related to other contemporary individual and community needs; and functions and settings of organized recreation, special problem areas, and current issues. Prerequisite: Leisure Studies 100 or equivalent. 1 unit.
402. **Leisure Systems Administration.** Strengthens the graduate student's knowledge of the public administration of recreation programs and services provided by municipal, county, state, and national departments and agencies as related to the general well-being of individuals, families, and communities. Prerequisite: Basic course in the organization of recreation or equivalent. 1 unit.
403. **Evaluation of Leisure Resources and Programs.** Methods and techniques of determining recreational needs, interests, and opportunities of individuals and communities through surveys, studies, and appraisals; evaluation and appraisal of community recreation programs and services; and research in the field of recreation. Prerequisite: Leisure Studies 100 or 310, or equivalent; a course in tests or measurement statistics. 1 unit.
404. **Outdoor Education and Recreation.** Philosophy, essential principles, methods, techniques, resources, administrative and program practices for outdoor education and recreation. Prerequisite: Leisure Studies 140 or equivalent; one undergraduate course in any one of the following: biology, botany, geology, or zoology. 1 unit.
443. **Group Dynamics in Sport.** Same as Physical Education 443. Presentation of theories and methods in the study of the psychology of small group behavior in sport; an analysis of the literature pertaining to group processes, with particular emphasis on group performance in sport. Prerequisite: Leisure Studies 343 or consent of instructor. 1 unit.
490. **Seminar.** Student presentation of thesis studies, informal discussions, and critical analysis of problems; informal lectures by invited speakers. 0 credit.
493. **Special Projects.** Independent research on special projects. Open only to students majoring in leisure studies. Prerequisite: Leisure Studies 403 or equivalent. $\frac{1}{2}$ to 2 units.
494. **Special Topics in Leisure Studies.** Lecture courses in topics of current interest; specific subject matter will be announced in the *Timetable*. Prerequisite: Will be determined for each course offered and will be indicated in the *Timetable*. $\frac{1}{2}$ or 1 unit.
499. **Thesis Research.** Preparation of thesis in recreation. 0 to 4 units.

LIBERAL ARTS AND SCIENCES

Program Administrator: Professor R. K. Applebee

Program Office: 294 Lincoln Hall, Urbana

110. **Workshop-Tutorial.** A workshop-tutorial in special topics for students in the experimental living learning unit, Unit One only; topics and hours to be arranged. Prerequisite: Permission of the director of Unit One. 1 to 6 hours.
140. **Thought and Structure in Physical Science.** An approach to the structure of scientific theories using some of the subject matter of descriptive astronomy and physics; emphasis on the nature of scientific thinking and the criteria for the validity of scientific ideas. Lecture, laboratory, and discussion. 4 hours.
141. **The Physical Universe.** Study of the various forms of universal energy, using some of the subject matter of cosmology and modern physics; emphasis on such items as man's ability to measure very far distances and to interpret the evidence for the origin of the solar system and of the universe. Prerequisite: Liberal Arts and Sciences 140. 4 hours.
142. **Physical Science in Modern Society.** Same as Geology 142. Physical science for nonscience majors; emphasizes the basic chemical and physical aspects of the earth's environmental systems and the impact of modern technology on these systems. 3 hours.
143. **Environmental Physical Science.** Same as Geology 143. Physical science for nonscience majors; emphasizes earth processes and resources relevant to modern society including the availability and by-products of utilization of energy and water resources and the limitations imposed by earth processes on society. Students may not receive credit for Geology/Liberal Arts and Sciences 143, and Geology 101 or 104. 3 hours.
197. **Freshman Seminar in Physical Science.** A history of scientific discovery emphasizing the way in which crucial experiments of physical scientists from Galileo to Faraday have supported new scientific concepts and theories; discussion, individual research, and reports; and laboratory work replicating significant experiments. Prerequisite: James Scholar or designation as a superior student; consent of instructor. 4 hours.
198. **Freshman Seminar in Physical Science.** A history of scientific discovery emphasizing the way in which crucial experiments of physical scientists from Maxwell to modern times have supported new scientific concepts and theories; discussion, individual research, and reports; and laboratory work replicating significant experiments. Prerequisite: Liberal Arts and Sciences 197 or consent of instructor. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
210. **Experimental Seminar.** Seminar or workshop in special topics for Unit One students only; topics to be arranged in areas not treated by regular course offerings, or in areas within the expertise of the Unit One staff. Credit toward college or departmental requirements is contingent on approval of the appropriate unit. Prerequisite: Consent of instructor and sophomore standing. 3 hours.
299. **LAS Study Abroad.** Provides campus credit for foreign study. A student's proposal for study abroad must have prior approval of the major department and the College of Liberal Arts and Sciences office. Final determination of appropriate credit is made on the student's completion of the work. Prerequisite: Permission of the student's major department and the College of Liberal Arts and Sciences office. 0 to 15 hours (summer session, 0 to 8 hours). May be repeated to a maximum of 30 semester hours per academic year or to a total of 36 semester hours, all of which must be earned within one calendar year.

LIBRARY SCIENCE

Director of Graduate School: Professor H. Goldhor

School Office: 329 Library, Urbana

195. **Introduction to Library Use.** Use of the card catalog, periodical indexes, encyclopedias, dictionaries, and other reference books. Intended for freshman and sophomores; not to be counted toward the undergraduate minor in library science. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
300. **Foundations of Librarianship.** The development of the library as an institution in relation to the society it serves, the operation and organization of libraries, building the library collection, types of reference tools, and the cataloging and classification of books and other materials; serves as an orientation to librarianship as a profession. Prerequisite: Consent of department. 6 hours or 2 units.
301. **Bibliography.** Covers enumerative bibliography, the practices of compiling lists; analytical bibliography, the design, production, and handling of books as physical objects; and historical bibliography, the history of books and other library materials, from the invention of printing to the present. Prerequisite: Library Science 300 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
302. **Science Materials for Nonspecialists.** Aims (a) to acquaint students with library materials in science and technology that serve the interests and needs of nonspecialist users of school, college, and public libraries, and (b) to develop proficiency in their selection, evaluation, and use for general reading and for reference work; centered around current interests and information needs of library users with limited technical backgrounds. Prerequisite: Library Science 300 or consent of instructor. 3 hours or 1 unit.
303. **Library Materials for Children.** Selection and use of library materials for children in public libraries and elementary school media centers, according to their needs in their physical, mental, social, and emotional development; deals with the standard selection aids for all types of print and nonprint materials and develops the ability to select and describe children's materials according to their developmental uses. Students may not receive credit for both Library Science 303 and Elementary and Early Childhood Education 304. Prerequisite: Library Science 300 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
304. **Library Materials for Young Adults.** Evaluation, selection, and use of library materials for young adults in school and public libraries and community organizations, according to personal and curricular needs; studies selection sources for all formats of materials and explores techniques for utilization of materials. Prerequisite: Library Science 300 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
308. **Audiovisual Services in Libraries.** Designed to acquaint students with the nonprint media responsibilities of libraries; includes the evaluation, selection, and acquisition of software and hardware, the utilization of media in various types of libraries (by individuals and groups, in formal and informal programs), and the administration of integrated media collections (films, recorded sound, video, and exhibits). Prerequisite: Library Science 300 or consent of instructor. 3 hours or 1 unit.
309. **Storytelling.** Fundamental principles of the art of storytelling including techniques of adaptation and presentation; content and sources of materials; story cycles; methods of learning; practice in storytelling; and planning the story hour for the school and public libraries, for recreational centers, for the radio, and for television. Prerequisite: Consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
310. **Typographic Disciplines of the Book.** The study of the book as a manufactured object; emphasis on practices and methods in continuous use from the Renaissance to the present, including type faces, paper, binding, and illustration; and extensive practicum in the typographic laboratory. Prerequisite: Consent of instructor. 3 hours or $\frac{1}{2}$ unit.
354. **Audio-Visual Communication.** Same as Elementary and Early Childhood Education 354 and Secondary Education 354. An analysis and application of those introductory

aspects of communication theory and practices concerned with the design and use of audio-visual messages which influence the learning process; the selection, utilization, production, and evaluation of audio-visual materials and selected technological aids. Prerequisite: Senior or graduate standing. 3 hours, or ½ or 1 unit.

405. **Library Administration.** Designed to supply knowledge of the internal organization of libraries and of the principles of library administration; emphasis on comparison of the conditions found in the several kinds of libraries and on applications of the general theory of administration. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
406. **Media Programs and Service for Children and Young Adults.** The role, problems, and needs of children's and young adults' library services in the school and public library. A two-day field trip required; estimated expense, \$35.00. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
407. **Cataloging and Classification, I.** Theory and application of basic principles and concepts of descriptive and subject cataloging; emphasis on interpreting catalog entries and making a catalog responsive to the needs of users; provides beginning-level experience with choice of entries, construction of headings, description of monographs (and, to a lesser extent, of serial publications and nonprint media), filing codes, Dewey and Library of Congress classification systems, and Library of Congress subject headings. Prerequisite: Library Science 300. 1 unit.
408. **Cataloging and Classification, II.** More complex problems in making and evaluating the changing, modern library catalog; practical and administrative problems in cataloging serial publications, analytics, ephemeral materials, and microforms; deals with various nonprint media, rare books and manuscripts, foreign language materials, and materials in special subject areas. Prerequisite: Library Science 407. 1 unit.
409. **Communication Roles and Responsibilities of Libraries.** Consideration of mass media of communication in terms of their relations with modern library services; review of media organization, content, and research; consideration of problems of intellectual freedom as an aspect of communications behavior; and discussion of the potential role of electronic devices in library activities now and for the future. 1 unit.
410. **Adult Public Services.** The literature, history, and problems of providing library service to the general adult user; investigation of user characteristics and needs, and the effectiveness of various types of adult services. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
411. **Reference Service in the Humanities and Social Sciences.** Detailed consideration of the bibliographical and reference materials in various subject fields; training and practice in their use for solving questions arising in reference service. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
412. **Science Reference Materials for Specialists.** Aims (a) to acquaint students with typical reference materials in science and technology that serve the information and research needs of specialist users of academic, technical, and research libraries, and (b) to develop proficiency in their selection, evaluation, and use; centered around characteristics and information needs of library users with considerable technical backgrounds. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
415. **Library Automation.** Introduction to various types of equipment for handling information and providing services in libraries; study of applications to library operations; and introduction to systems planning, to automation concepts, and to computer use. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
416. **Advanced Library Automation.** The development of computer programs for library technical processes such as circulation, acquisitions, serials control, cataloging, and the analysis of library computer networks and data bases; includes seminar presentations based on individual research in automation topics. Prerequisite: Library Science 415. 1 unit.
424. **Government Publications.** Aims to acquaint students with government publications, their variety, interest, value, acquisition, and bibliographic control, and to develop proficiency in their reference and research use; considers publications of all types and all

governments (local, national, international) with special emphasis on U.S. state and federal governments and on the United Nations and its related specialized agencies. Prerequisite: Library Science 411, 412, or consent of instructor. 1 unit.

427. **Resources of American Research Libraries.** Acquaints students with the distribution and extent of American library resources for advanced study and research; spatial and financial aspects of library resources; methods of surveying library facilities; growth and use of union catalogs and bibliographical centers; interinstitutional agreements for specialization of collections and other forms of library cooperation; and the use of the research collection by the scientist and scholar. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
428. **Library Buildings.** Study of the library's physical plant in the light of changing concepts and patterns of library service; analysis of present-day library buildings, (both new and remodeled) and their comparison with each other as well as with buildings of the past; examination of the interrelationship of staff collections, users, and physical plant; and discussion supplemented by visits to new libraries and conference with their staffs. A two-day field trip is required; see *Timetable* for estimated cost. Prerequisite: Library Science 405 or consent of instructor. 1 unit.
429. **Information Storage and Retrieval.** Types of systems for storage and retrieval of documents and references; history of retrieval systems, their characteristics, evaluation, and factors affecting their performance, with special reference to modern computer-based systems; procedures in the dissemination of scientific and other information; major information centers and services in the U.S. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
430. **Advanced Reference.** Enables the student to utilize the varied resources of a large research library; deals with the methods of analyzing and solving bibliographic problems such as arise in scholarly libraries and in connection with research projects. Prerequisite: Library Science 411 or 412, and consent of instructor. 1 unit.
431. **Books and Libraries in the Ancient and Medieval World.** The development of writing and of the book in ancient and medieval times; book collecting and the growth of libraries from earliest times to the discovery of printing. 1 unit.
432. **Books and Libraries Since the Renaissance.** Same as Communications 432. Study of the developing format of the book, the history of printing, and the growth of libraries in Europe and America since the Renaissance. 1 unit.
433. **Advanced Subject Bibliography.** Study of the literature, information sources, and reference aids in various specialized fields of knowledge, identified as different sections of this course, from the point of view of their use by librarians. Prerequisite: Consent of instructor. ½ unit. May be repeated for a total of 1 unit.
434. **Library Systems.** Development of library systems, with special reference to public libraries as a norm for the development of library services; detailed treatment of library standards; the growth and development of county and regional libraries, and the role of the state library and of federal legislation. Prerequisite: Library Science 405 or consent of instructor. 1 unit.
435. **Library Services to Specialist Users.** In-depth study of goals and objectives, policy, and services of research-oriented libraries; of characteristics and information needs of specialist users of these libraries; and of effective library services that satisfy specialist user needs. Study is based on actual library operations according to subject interest of student. Prerequisite: Library Science 411 or 412. 1 unit.
438. **Administration and Use of Archival Materials.** Administration of archives and historical manuscripts; emphasis on the processing and research use of archival materials. Prerequisite: Consent of instructor. 1 unit.
439. **Medical Literature and Reference Work.** Consideration of representative reference and bibliographical aids in medical sciences; problems provide experience with typical medical reference sources (only at the University of Illinois Medical Center in Chicago). Prerequisite: Consent of instructor. 1 unit. Offered in the summer session only.

440. **Advanced Bibliography.** Discusses the major reference bibliographies, including general works, subject lists in various fields, regional historical and current national bibliographies, and published library catalogs; surveys the nature of bibliographical access to the output of the world's press, descriptive bibliography, and rare-book librarianship. Prerequisite: Library Science 301 or consent of instructor. $\frac{1}{2}$ or 1 unit.
441. **History of Children's Literature.** Interpretation of children's literature from the earliest times, including the impact of changing social and cultural patterns on books for children; attention to early printers and publishers of children's books and to magazines for children. 1 unit.
442. **Seminar in Library Materials for Children and Young Adults.** Advanced study of criteria for the evaluation of books and other media, including an individual project on a given theme or subject involving extensive critical reading, viewing, and listening. Prerequisite: Library Science 303, 304, or consent of instructor. 1 unit.
443. **Contemporary Book Publishing.** Survey of twentieth-century book publishing, placing it in an economic, social, and literary context; emphasis on economic structure, the relationship of author and publisher, promotion, distribution, and the influence of the industry on librarianship. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
444. **Measurement and Evaluation of Library Services.** Methods and criteria for evaluating various facets of library service, including the collection, the catalog, document delivery capabilities, reference service, technical processes, and information retrieval operations; deals with cost-effectiveness considerations. Prerequisite: Library Science 300 or consent of instructor. 1 unit.
445. **Vocabulary Control of Information Retrieval.** The construction, characteristics, and application of controlled vocabularies for use in information retrieval systems; covers a full range of vocabulary control possibilities from highly structured thesauri and classification schemes to natural-language (free text) searching; special emphasis on the thesaurus and vocabulary control in computer-based systems. Prerequisite: Library Science 429. 1 unit.
450. **Advanced Problems in Librarianship.** Directed and supervised investigation of selected problems in library resources, reference service, research libraries, reading, public libraries, or school libraries. Prerequisite: Fifth-year degree in library science or consent of director. $\frac{1}{2}$ to 2 units.
460. **Special Topics in Librarianship.** An advanced seminar on topics of individual choice; presentation and criticism of written research reports based on individual study on an advanced level; and sections or practicum in research methods offered in the following areas: (a) historical, I; (b) survey; (c) observation; (d) experimental; and (e) historical, II. Students may enroll in a maximum of two sections, concurrently or consecutively. Open to doctoral students only. Prerequisite: Library Science 469 or consent of instructor. $\frac{1}{2}$ to 2 units.
465. **Librarianship and Society.** Analysis of the role and functions of libraries in the twentieth century; the changing characteristics of information and knowledge viewed as major determinants of libraries' relations to society. Prerequisite: M.S. in library science or consent of instructor. 1 unit.
468. **Education for Librarianship.** For those interested in preparing for teaching library science at the graduate level; analyzes current problems in library education in terms of the historical background, the current situation, and possible solutions. Prerequisite: M.S. in library science. 1 unit.
469. **Principles of Research Methods.** Designed for persons planning to engage in research; reviews significant investigations in the library field and considers the use of hypotheses, the conduct of experiments, the nature of proof, and the employment of statistical methods, with a view to helping students develop their dissertations. Required for Ph. D. candidates. Prerequisite: Knowledge of the principles of statistics; M.S. in library science or consent of instructor. 1 unit.

499. **Thesis Research.** Individual study and research. Section A: M.S. candidates, 0 to 2 units. Section B: doctoral candidates, 0 to 4 units.

LIFE SCIENCES, SCHOOL OF

(Including Biology, Botany, Entomology, Microbiology, Physiology and Biophysics, and Zoology)

School Office: 387 Morrill Hall, Urbana

Biology

100. **Biological Science, I.** Introduction to the biological sciences, their aims, content, and methods, with special reference to their application to human life and civilization. 4 hours.
101. **Biological Science, II.** Continuation of Biology 100. Prerequisite: Biology 100 or consent of instructor. 4 hours.
110. **Principles of Biology, I.** Heredity, evolution, diversity, reproduction, development, structure and function of cells, organisms, and populations. Prerequisite: One year of college chemistry, or concurrent enrollment in Chemistry 102 with laboratory. 5 hours.
111. **Principles of Biology, II.** Continuation of Biology 110. Prerequisite: Biology 110. 5 hours.
151. **The Cell.** Study of the biology of cells from the molecular to the microscopic level of organization. Prerequisite: Credit or registration in organic chemistry; consent of honors biology committee. 5 hours.
198. **Freshman Seminar.** Current topics in biology in the context of total culture. Participants are required to do independent library research and to present a report on a topic of their choice which is related to the subject of the seminar. Prerequisite: Consent of instructor. 1 hour.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
208. **Investigations in Biology, I.** Provides broad exposure to research methodology in the biological sciences; includes a general introduction to experimental design and analysis, followed by individual design and completion of an experiment in genetics and evolution. Prerequisite: Biology 110 and 111, or equivalent. 4 hours.
209. **Investigations in Biology, II.** Continuation of Biology 208. Individual design and completion of experiments in development, functional anatomy, behavior, and ecology. Prerequisite: Biology 208 or consent of instructor. Students who have not had Biology 208 will enroll in special sections. 4 hours.
210. **Genetics.** Principles of heredity and the nature of genetic material. Credit is not given for both Biology 210 and Zoology 106. Prerequisite: Biology 111 or equivalent, or consent of instructor. 4 hours.
211. **Developmental Biology.** Introduction to basic mechanisms of organismic development as elucidated by descriptive and experimental methods. Prerequisite: Biology 111 or equivalent; a course in organic chemistry. 3 hours.
212. **Environmental Biology.** Lecture, discussion, laboratory, and field course dealing with the relationships between organisms and their environment; introduction to physiological bases for adaptations, population dynamics, community organization, and the structure and function of ecosystems. Prerequisite: One year of biology or consent of instructor. 5 hours.
251. **The Organism.** Study of the way different classes of organisms respond to challenges of their environment; emphasis on the general features of organismic behavior. Prerequisite:

- site: Biology 151; good standing in the honors biology program; and consent of the honors biology committee. 5 hours.
296. **Honors Seminar.** Lectures, student presentations, and discussions on selected topics of biology. Prerequisite: Junior or senior standing; 4.0 cumulative average; two courses in biology or consent of instructor. 1 hour. May be repeated once for credit.
 307. **Immunology.** Introduction to fundamentals of immunology with emphasis on biological application; basic background for understanding immunological responses and techniques applicable to biological research. Prerequisite: Four semesters of college biology; a course in organic chemistry, or consent of instructor. 4 hours or $\frac{3}{4}$ unit.
 308. **Experimental Immunobiology.** Introduction to immunological laboratory techniques for solving biological problems and to experimental techniques in cellular immunology. Prerequisite: Credit or concurrent registration in Biology 307; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
 310. **Principles of Population Biology, I.** Biology 310 and 311 provide an integrated treatment of population concepts in biology. Major topics: ecology, ethology, population genetics, and evolution. Prerequisite: Biology 210 or consent of instructor; college algebra. 3 hours or $\frac{3}{4}$ unit.
 311. **Principles of Population Biology, II.** Continuation of Biology 310. Prerequisite: Biology 310 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
 313. **Experimental Genetics.** Laboratory course to expose students to several types of organisms, experimental approaches, and methods of analysis utilized in genetical research. Prerequisite: Biology 151 or 210; consent of instructor. 4 hours or 1 unit.
 314. **Experimental Development.** Laboratory course to expose students to a variety of organisms, experimental approaches, and methods of analysis utilized in developmental research. Prerequisite: Biology 211 or 251, or Zoology 333; consent of instructor. 4 hours or 1 unit.
 316. **Population Genetics.** Same as Dairy Science 316. The mathematical theory of the genetics of populations: estimation of gene frequency, Hardy-Weinberg principle, systems of mating, relationship between relatives, and forces that change gene frequency; applications to man, animals, and plants. Students desiring 4 hours or 1 unit credit will do additional work in some area of population genetics. Prerequisite: Dairy Science 110 or Biology 210 and college algebra; or consent of instructor. 3 or 4 hours, or $\frac{3}{4}$ or 1 unit.
 338. **History of Biology.** Same as History 338. Development of biological thought from antiquity to the present, emphasizing evolutionary theory and physiology in the nineteenth century and genetics in the twentieth century. Prerequisite: One year of college biology or history, or consent of instructor. 3 hours or 1 unit.
 351. **Population Biology.** Study of problems associated with behavior of plant and animal populations based on genetic, evolutionary, and ecological principles. Prerequisite: Biology 251; statistics; good standing in the honors biology program; consent of Honors Biology Committee. 4 hours or 1 unit.
 371. **Quantitative Biology, I.** Theory and practical application in biology of probability and statistics; lectures and assigned problems. Prerequisite: College algebra; consent of instructor. 4 hours or 1 unit.
 372. **Quantitative Biology, II.** Additional statistical topics in biology, including sequential nonrandomness, nonparametric correlation, and binomial sequential sampling; limited enrollment; individual problems. Prerequisite: Biology 371 or equivalent introductory statistics course, and consent of instructor. 2 hours or $\frac{1}{2}$ unit.
 373. **Advanced Biometry.** Bivariate and multivariate statistical treatment of biological experiments and surveys; emphasizes analysis of large, unbalanced data matrices; and follows the general linear model approach. Techniques appropriate to electronic digital computation are considered in detail. Prerequisite: A course in calculus, a course in statistics, and a course or experience in electronic digital computation; or consent of instructor. 5 hours or 1 unit.
 374. **Quantitative Ethology.** Same as Zoology 374. Ethological and sociobiological applications of mathematical and statistical concepts and methods to vertebrate and inverte-

- brate behavior: analysis of ethograms; stochastic, informational, and sequential analysis of behavior; use of multidimensional contingency tables in the study of social interactions; mathematical models: evolution of cooperative behavior via individual, kin, and group selection; animal conflict; and animal play. Prerequisite: Zoology 346 or Psychology 345; elementary statistics or probability. 3 hours or $\frac{3}{4}$ unit.
380. **Social Issues in Biology.** Ethical and sociopolitical implications of the biological sciences; an issue-oriented lecture-discussion format centering on problems such as bioethics, genetics and development, health care and allocation of scarce resources, death and dying, behavior manipulation, biological experimentation, population control, and environmental ethics. Prerequisite: Upper-division standing and 6 hours of life science. 3 hours or $\frac{3}{4}$ unit.
411. **Discussions in Genetics and Cytogenetics.** $\frac{1}{4}$ unit.
416. **Quantitative Genetics.** Same as Dairy Science 416. The mathematical theory of the genetics of quantitative traits: properties of random-mating populations; estimation of repeatability, heritability, and genetic correlation; genetic results of selection; aids to selection; correlated response; selection for more than one trait; and applications to animals and plants. Prerequisite: Dairy Science 316 and 340, or consent of instructor. 1 unit.
418. **Concepts and Topics in Immunology.** Same as Veterinary Medical Science 418. Newer concepts and theories in the field of immunology, including theories of antibody formation and immunologic tolerance, regulation of the immune response, biosynthesis and structure of antibodies, and evolutionary aspects of the immune response. Lectures and discussion. Prerequisite: Consent of instructor; Microbiology 327 and Biology 307 recommended. $\frac{1}{2}$ unit.
423. **Electron Microscopy.** Same as Chemistry 423. Lectures, discussions, and demonstrations on the physical principles and electron optics of the transmission electron microscope and its modern variants; lectures and demonstrations of modern high vacuum techniques. Open to qualified graduate students in all departments. Prerequisite: A course in modern physics or physical chemistry (having calculus as a prerequisite) affording an introduction to wave mechanics; consent of instructor. $\frac{1}{2}$ unit.
429. **Electron Microscopy with Laboratory.** Same as Chemistry 429. General lectures on theory and design of electron microscopes without mathematical derivations; discussion and practice on specimen preparation; operation of electron microscopes with separate sections to meet special needs of biologists, geologists, and those interested in electron diffraction. Most theory lectures may be omitted by those concurrently enrolled or having credit in Biology 423 or Chemistry 423. Open to qualified graduate students in all departments. Prerequisite: Two semesters of general physics; two semesters of college mathematics; three semesters of chemistry; consent of instructor. 1 unit.
430. **Biological Ultrastructure.** Lectures and reports on the fine structure of plant and animal cells and cell products; discussions of possible relationships of ultrastructure to function and of diverse interpretations of chemical-physical information as ultrastructure. Prerequisite: Consent of instructor. 1 unit. Offered in 1975-76 and in alternate years.
431. **Plant Cell Metabolism.** Same as Agronomy, Forestry, Horticulture, and Plant Pathology 431. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the biochemistry of mature seeds and metabolic processes occurring during seed germination and heterotrophic growth. Meets during the first half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
432. **Plant Cell Energetics.** Same as Agronomy, Forestry, Horticulture, and Plant Pathology 432. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the energy coupling processes in plant cells (respiration, photosynthesis, photorespiration); and discusses current literature relating to mechanisms of electron transport, phosphorylation, and carbon fixation. Meets during the

second half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.

- 433. Environmental Regulation of Plant Growth.** Same as Agronomy, Forestry, Horticulture, and Plant Pathology 433. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns mechanisms of plant response to the environment, including ion uptake and transport, water relationships, gas exchange, and photosynthesis of whole plants. Meets during the first half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
- 434. Regulation of Plant Development and Reproduction.** Same as Agronomy, Forestry, Horticulture, and Plant Pathology 434. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the hormonal regulation of growth, development, and reproduction and the metabolism of seed and fruit formation. Meets during the second half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
- 450. Ecological Methods, I.** Field and laboratory methods employed in ecological research. First semester of a two-semester sequence; covers methods involved in studying physical and chemical properties of soil, soil organisms, and measuring physical environmental factors. Prerequisite: A course in statistics; consent of instructor. 1 unit.
- 451. Ecological Methods, II.** Field and laboratory methods employed in ecological research. Second semester of a two-semester sequence; covers sampling of populations and communities, and analysis of ecosystem functions. Prerequisite: Biology 450; consent of instructor. 1 unit.
- 452. Ecology Seminar.** Discussion, review, and critical analysis of specific topics in ecology; required of all students in the ecology program. Prerequisite: Two courses in ecology; consent of instructor. $\frac{1}{4}$ unit. May be repeated to a total of 2 units.
- 453. Analysis of Ecosystems.** Practical application of statistical techniques and computer technology to ecological problems; emphasis on model building for analysis of population dynamics, and structure and function of ecosystems; and individual problems. Prerequisite: Botany 381, Zoology 345 or Entomology 315, Biology 310 and 371, Mathematics 120, and Computer Science 121, or consent of instructor. 1 unit. Offered in 1974-75 and in alternate years.
- 457. Ultrastructural Pathology.** Same as Veterinary Medical Sciences 457. Ultrastructural basis of pathologic processes occurring in animal tissues and cells; lectures, discussions and reports. Prerequisite: Consent of instructor. $\frac{3}{4}$ or 1 unit.
- 475. College Biology Teaching Seminar.** Seminar in the teaching of biology for prospective college teachers. A second $\frac{1}{4}$ unit can be earned by completion of a project in an approved topic area. Prerequisite: Graduate standing in a program within the School of Life Sciences. $\frac{1}{4}$ to $\frac{1}{2}$ unit.
- 490. Special Topics in Biology.** Individual topics in research and/or reading conducted under the supervision of faculty members in the School of Life Sciences. Designed for students enrolled in the biology program who would like to become more familiar with specialized fields of study prior to committing themselves to a specific area for their doctorate degree. $\frac{1}{2}$ to 2 units.
- 493. Advanced Electron Microscopy.** Same as Chemistry 493. Conferences and practice dealing with specialized laboratory techniques, preparation of specimens, and the analysis and study of varied materials by use of transmission and/or scanning electron microscopes, and by the techniques of electron diffraction. Open to qualified students in all departments. Prerequisite: Biology 429; consent of instructor. $\frac{1}{4}$ or $\frac{1}{2}$ unit.
- 499. Thesis Research.** 0 to 4 units.

Botany

Head of Department: Professor J. B. Hanson

Department Office: 289 Morrill Hall, Urbana

100. **General Botany.** Basic principles of growth and form, physiology, genetics, evolution, and ecology in plant biology. Students may not receive credit for both Botany 100 and 101. 4 hours.
101. **General Botany for Selected Students.** Provides instruction in the structure, physiology, reproduction, ecology, and economic importance of plants; instruction adjusted to the level of the selected student and consists of demonstration, discussion, and lecture. Admission to each section is limited to fifteen students. Students may not receive credit for both Botany 101 and 100. Prerequisite: James Scholar standing or consent of instructor. 5 hours.
204. **Natural History of Plants.** Diversification and distribution of plants in time, space, and culture; evolution and dispersion of plants in nature and under the influence of selection and utilization by man; natural and artificial selection of important plant types and structures; and plant geography as determined by climate, geology, and cultivation. Prerequisite: Botany 100 or 101, or equivalent. 3 hours.
220. **Evolutionary Survey of the Plant Kingdom.** The morphology and evolution of plants representative of algae, fungi, liverworts, mosses, lower vascular plants, and seed plants. Prerequisite: Botany 100 or 101, or Biology 110 and 111. 3 hours.
234. **Form and Function in Flowering Plants.** Lecture course on the physiological and morphological attributes that underlie the biosynthesis, growth, and reproduction of flowering plants in relation to the environment. Prerequisite: Botany 100 or 101, or a year of biology; Chemistry 102. 3 hours.
260. **Introductory Plant Taxonomy.** Classification and identification of flowering plants, with special reference to the local flora and to the needs of high school teachers. Occasional field trips required. Prerequisite: Botany 100 or 101, or Biology 100 and 101, or Biology 111. 3 hours.
290. **Individual Topics.** For seniors who wish to study individual problems and topics not assigned in other courses. Prerequisite: Ten hours of advanced work in botany or another biological science: senior standing. 2 to 5 hours. May be repeated for a maximum of 5 hours.
292. **Senior Thesis.** Independent research for seniors in botany; prerequisite for graduation with distinction in botany and recommended for students intending graduate study. A thesis must be submitted for credit to be received, but graduation with distinction is not an automatic result of enrollment in Botany 292. Will substitute for Botany 290 in fulfilling independent study requirement. Prerequisite: Candidacy for degree with distinction in botany. 2 to 5 hours. May be repeated for a maximum of 10 hours.
304. **General Plant Morphology.** Lecture and laboratory course dealing with the structure, reproduction, and evolution of representative algae, fungi, bryophytes, pteridophytes, gymnosperms, and angiosperms. Prerequisite: Botany 100, Biology 101, 111, 251, or consent of instructor. 4 hours or 1 unit.
325. **Paleobotany.** Same as Geology 325. Structure, phylogeny, and geological distribution of representative fossil plants. Two or three field trips. Prerequisite: Botany 100, or Biology 100 and 101; Geology 101 or 107; or consent of instructor. 5 hours or 1 unit.
330. **Plant Physiology.** General course concerned with plant functions, including water relations, mineral nutrition, metabolism, growth, and reproduction. Prerequisite: Chemistry 131; Botany 100, or Biology 101, 111, or 251. 3 hours or ½ unit.
331. **Experimental Cytology.** Same as Zoology 331. Lectures on structure and function of the cell; coverage on current concepts of cell and molecular biology relating to cellular function, cell division, and organelle interaction. Prerequisite: Biology 210 or 251; consent of instructor. 3 hours or ¾ unit.

- 333. Plant Physiology Laboratory.** Same as Agronomy 333 and Horticulture 333. A laboratory course in plant physiology; a supplement to Botany 330 which serves the needs of those interested in acquiring familiarity with techniques of experimental plant physiology. Prerequisite: Credit or concurrent registration in Botany 330 or equivalent. 4 hours or 1 unit.
- 334. Experimental Cytology Laboratory.** Same as Zoology 334. Introduction to cytological techniques, microscopic analysis of macromolecules, isotopic techniques, and autoradiography; phase and fluorescent microscopy and photomicrography. Prerequisite: Consent of instructor. 2 hours or $\frac{1}{2}$ unit.
- 341. Field Ecology.** Study of plant communities in various sections of North America during spring vacation. Trips rotate on a three- to five-year basis. Outdoor cooking and camping; transportation in University cars. Prerequisite: One of the following: Botany 260, 366, 381, or 385; consent of instructor. 1 hour or $\frac{1}{4}$ unit. May be repeated for a maximum of 3 hours or $\frac{3}{4}$ unit.
- 345. Plant Anatomy.** Study of the internal structure of vascular plants with special emphasis on development, function, and evolutionary history. Prerequisite: One year of botany. 4 hours or 1 unit.
- 350. Phycology.** Introductory lecture and laboratory to the ecology, morphology, physiology, and systematics of the algae. Prerequisite: One year of botany or another biological science, or consent of instructor. 4 hours or 1 unit.
- 351. Viruses, I.** Same as Microbiology and Zoology 351. An introduction to the molecular basis of virus growth and development. Prerequisite: Biology 210 or Microbiology 200, or the equivalent background in molecular biology; concurrent registration in Microbiology 330 or Biochemistry 355 recommended. 3 hours or $\frac{3}{4}$ unit.
- 360. Angiosperm Phylogeny and Biogeography.** The phylogeny of the angiosperms and their past and present geographic distribution as reflected in the major floras of the world. Prerequisite: Botany 260 or consent of instructor. 4 hours or 1 unit.
- 363. Plant Products.** Lectures on the natural products of plants, with emphasis on relevant compounds of ecological, pharmacological, toxicological, and economic interest. Prerequisite: Biochemistry 350 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
- 366. Field Botany.** Identification and classification of native and naturalized flowering plants of eastern North America. Prerequisite: One course in botany; consent of instructor. 3 or 5 hours, or $\frac{1}{2}$ or 1 unit. Offered in the summer session only.
- 372. General Mycology.** Structure, classification, and identification of fungi, including those of economic importance. Prerequisite: One year of botany, entomology, microbiology, or zoology; senior standing or consent of instructor. 4 hours or 1 unit.
- 381. Plant Ecology.** Principles of ecology exemplified by vegetation and environments of Illinois. Prerequisite: Botany 260 or equivalent. 5 hours or 1 unit.
- 382. Aquatic Plant Ecology.** Ecology of plant communities in freshwater, estuarine, and marine ecosystems; lecture, laboratory, and field work. Prerequisite: Botany 100 or 101, Biology 110 and 111 or equivalent, or consent of instructor. 5 hours or 1 unit.
- 402. Molecular Genetics: Chromosome Mechanics.** Same as Microbiology and Zoology 402. Structure and behavior of chromosomes (including replication, repair, complementation, recombination, and mutation); emphasis on microbial systems and molecular mechanisms. Prerequisite: Microbiology 316 and 330, or consent of instructor. $\frac{3}{4}$ unit.
- 403. Physiology of Fungi.** Same as Plant Pathology 403. Germination, growth, metabolism, and sporulation of fungi; physiology of fungi as related to parasitism, antibiotic production, vitamin assay, and industrially important products; and discussion of the nature of fungicidal activity. Prerequisite: Organic chemistry or biochemistry; mycology; Plant Pathology 204 or equivalent; microbiology. 1 unit. Offered in alternate years.
- 405. Molecular Genetics: Gene Action.** Same as Microbiology and Zoology 405. Structure, synthesis, and function of molecules and organelles concerned with intracellular transmission of genetic information; gene regulation, transcription, and translation. Prere-

quisite: Microbiology 330, Microbiology 316 plus biochemistry, or consent of instructor. $\frac{3}{4}$ unit.

410. **Botany Discussions.** All graduate students in botany, except those with conflicting teaching assignments, are required to register in and attend the general seminar. No credit given except to those students presenting the results of their Ph.D. thesis research. 0 or $\frac{1}{4}$ unit.
413. **Discussions in Plant Physiology.** $\frac{1}{4}$ unit.
414. **Discussions in Plant Morphology and Taxonomy.** $\frac{1}{4}$ unit.
418. **Discussions in Plant Ecology and Plant Geography.** Developments in ecology and plant geography, with emphasis on one special division. Prerequisite: Graduate standing in botany, entomology, geography, or zoology. $\frac{1}{4}$ unit. May be repeated to a maximum of 1 $\frac{1}{2}$ units.
419. **Discussions in Photosynthesis and Related Topics.** Prerequisite: Consent of instructor. Students may accumulate 1 $\frac{1}{2}$ units. 0 or $\frac{1}{4}$ unit.
421. **Cytogenetics.** Same as Zoology 421. Chromosome theory: structure, behavior, and physiology of chromosomes in heredity and development. Prerequisite: Biology 210 or Microbiology 330, or consent of instructor. 1 unit.
424. **Mineral Nutrition of Plants.** Same as Agronomy 424 and Horticulture 424. Study of uptake, transport, and metabolic utilization of mineral nutrients by plants. The scope of the course is to present the essentiality of various anions and cations in light of metabolic activity and constituency in functional plant compounds; major emphasis on metabolic activity and function of the elements. Prerequisite: Botany 330 or consent of instructor. 1 unit.
427. **Discussions in Mycology.** Seminar course designed for discussion of current research in the morphology, taxonomy, and physiology of fungi, especially the nonparasitic forms. Prerequisite: Consent of instructor. $\frac{1}{4}$ unit.
438. **Bioenergetics of Photosynthesis.** Same as Biophysics 438. Biophysical and biochemical mechanisms of green plant and bacterial photosynthesis; includes the role of membranes; and emphasizes energetic aspects of photosynthesis. Meets during the first half of the spring semester. Prerequisite: One year each of college physics, chemistry, and biology; Biochemistry 350 or Biophysics 301; or consent of instructor. $\frac{1}{2}$ unit.
442. **Environmental Plant Physiology.** Same as Agronomy 442. Lecture course dealing with the interaction of plants and environment at the level of the whole organism, extending to the cell and the community; emphasis on heat and mass transfer, plant and soil potentials, and effects of light on growth. Prerequisite: Chemistry 131; general physics; general or plant physiology; consent of instructor. 1 unit.
461. **Angiosperm Systematics.** An integrated approach to the uses of systematic data from genetics and cytogenetics, chemistry, anatomy-morphology, and ecology, and their application to problems in angiosperm classification and phylogeny. Prerequisite: Botany 260 or consent of instructor. 1 unit. Offered in alternate years.
462. **Origin of Variation in Plants.** Same as Agronomy 462. Study of the principles of plant evolution; discussion of theoretical and descriptive aspects of origin of variation, mode of speciation, role of hybridization, natural and artificial selection, and adaptation. Prerequisite: Consent of instructor. 1 unit.
471. **Advanced Mycology: Special Groups.** The several classes of fungi and their activities are considered in successive semesters. Special groups within these classes may be selected for concentrated study, depending upon the student's interest in mycology. Prerequisite: Botany 372 or consent of instructor. $\frac{1}{2}$ unit.
485. **Plant Geography of North America.** Study of principles of plant geography, plant distribution in relation to environment, and vegetational units of North America. Prerequisite: Botany 381 or equivalent. 1 unit. Offered in alternate years.
488. **Plant Pigments.** Same as Horticulture 488. A comprehensive presentation of the nature, function, distribution, biosynthesis, degradation, separation, and spectroscopic properties of pyrrole, carotenoid, quinone, and anthocyanin pigments. Prerequisite: Botany 330 or consent of instructor. 1 unit. Offered in alternate years.

490. **Advanced Studies in Botany.** Not more than 1 unit may be applied toward the Graduate College master's degree requirement of 3 units of course work at the 400 level. Work may be taken in the following areas: (a) anatomy; (b) biochemical cytology; (c) biological rhythms; (d) cytogenetics and speciation; (e) ecology; (f) genetics; (g) morphogenesis and development; (h) morphology; (i) mycology; (j) paleobotany; (k) photosynthesis; (l) phycology; (m) physiology; (n) taxonomy; (o) ultrastructure; and (p) virology. $\frac{1}{2}$ to 2 units.
499. **Thesis Research.** Individual work under supervision of members of the staff in their respective fields. 0 to 4 units.

Entomology

Head of Department: Professor S. Friedman

Department Office: 320 Morrill Hall, Urbana

101. **Agricultural Entomology.** Lectures and discussion with laboratory practice in the recognition of agricultural pests for students of agriculture; covers methods of injury by insects; their structure, physiology, metamorphosis, classification, and control; recognition, nature of injury, life history, and habits; and control of the more common destructive or annoying pests of field crops, vegetables, fruits, stored products, and domestic animals. Counts for credit in technical agriculture. 3 hours.
103. **Life of Insects.** Nontechnical course designed to give a balanced comprehensive picture of insect life; treats insect structures, growth, and relationships with other animal groups; life histories of the principal groups; modes of reproduction, movement, protection, communication, and behavior; interrelations with the physical and biotic environment, parasitism, transmission of diseases, predatism, and pollination; and includes how insects benefit and injure man, their control, and their roles in the history of man and in the arts. Credit is not given for both Entomology 103 and 118. 4 hours.
118. **Insects, Man, and Environment.** Nontechnical course which considers basic aspects of entomology and ecology, especially as they relate to problems in the use of pesticides and environmental pollution. Credit is not given for both Entomology 118 and 103. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
290. **Special Problems.** For students ready to undertake special investigation to be completed as an undergraduate study or as the beginning of a thesis problem for an advanced degree. It also may be used to prepare a thesis for scholastic honors. Prerequisite: Consent of instructor. May be taken by students who can only attend classes on Saturday morning. 2 to 5 hours.
301. **Introduction to Entomology.** Integrated studies of the principal morphological, physiological, and ecological relationships of insects. Prerequisite: Biology 111; Chemistry 131; consent of instructor. 5 hours or 1 unit.
302. **Classification of Insects.** Comprehensive survey of the systematics and phylogeny of the orders and principal families of insects, with practical experience in identification of these taxa. Prerequisite: Consent of instructor. 4 hours or 1 unit.
312. **Entomology for Teachers.** Recognition of the chief orders of insects in their immature and adult stages, including their development, life cycles, and interrelationships with the environment; students will prepare collections; field trips, laboratory, and discussion. Prerequisite: One year of biology, botany, zoology, or equivalent. 3 or 5 hours, or $\frac{1}{2}$ or 1 unit. Offered in the summer session only.
315. **Insect Ecology.** Discussion of the practical and theoretical aspects of ecology in relation to insects as individuals, populations, and communities; emphasis on the role of insects in the environment. Prerequisite: Biology 212 or consent of instructor. 4 hours or 1 unit.

319. **Fundamentals of Insect Control.** Emphasis on the principles underlying control of important insect pests of agriculture and human and animal health; study of integrated pest control involving biological, cultural, and chemical factors and of the ecology of the use of pesticides in the total environment. Prerequisite: Biology 111 and Chemistry 101, or equivalent; consent of instructor. 4 hours or 1 unit.
322. **Insect Bionomics.** Biology of insects dealing with life history and conditions of environment that favor abundance of insects representative of various habitats. Prerequisite: Entomology 103 or 302, or Zoology 320; consent of instructor. 4 hours or 1 unit.
361. **Individual and Group Behavior of Honey Bees.** Same as Horticulture 361 and Zoology 361. Study of individual and group behavior of honey bees, their biological value, physical basis, and evolution. Lectures and discussions, one or more local field trips, term paper, and assigned readings. Prerequisite: One semester of entomology or zoology. 2 hours or ½ unit.
410. **Insect Morphology.** Comprehensive study of internal and external structures of insects from the comparative viewpoint. Prerequisite: Biology 111 or equivalent; consent of instructor. 1 unit.
413. **Medical and Veterinary Entomology.** Training in recognition, classification, methods of injury, habits, and control or destruction of insects, mites, and ticks which are predators, parasites, or disseminators of disease among men and domestic animals. Prerequisite: Entomology 103 or 302, or Zoology 320; consent of instructor. 1 unit.
420. **Chemistry and Toxicology of Insecticides.** Designed to provide fundamental information concerning the mode of action, the relationship of chemical structure to toxicity, and the physiological explanation of the chemical poisoning of insects. Prerequisite: One year of biology or equivalent in animal science; organic chemistry; consent of instructor. 1 unit.
422. **Insect Physiology.** Study of principal physiological and biochemical functions of insects, exclusive of sensory functions. Prerequisite: Entomology 302 and 410; organic chemistry; consent of instructor. 1 unit.
423. **Insect Behavior and Its Physiological Basis.** Insect locomotion, feeding, reproduction, defensive reactions, learning, and other behavior, and the physiological basis of these activities. Prerequisite: Entomology 422 or Physiology 301, or consent of instructor. ¾ unit.
424. **Advanced Insect Physiology.** Comprehensive study of physiological and biochemical interactions between the insect and its environment including sensory mechanisms, attractants and repellants, nutritional specialization, intermediary metabolism, energy production and utilization, metabolic activity accompanying functional changes, and process controls. Prerequisite: Entomology 422; Biochemistry 350; consent of instructor. ¼ to 1 unit.
426. **Seminar in Entomology.** Discussions, reviews, and appraisals of special topics in the field of entomology. Prerequisite: Consent of instructor. 0 or ¼ unit. May be repeated for a maximum of 1 unit.
490. **Individual Topics.** Individual topics in research and/or reading conducted under the supervision of faculty members in the Department of Entomology; particularly designed for students enrolled in the entomology programs who would like to become more familiar with specialized fields of study prior to committing themselves to a specific area for their doctorate degree. Prerequisite: Consent of instructor. ½ to 2 units. May be repeated.
499. **Thesis Research.** Work may be taken in the following subjects: morphology and embryology of insects; applied entomology; systematic entomology; biology and ecology of insects; insect toxicology; and insect physiology. 0 to 4 units.

Microbiology

Head of Department: Professor R. D. DeMoss

Department Office: 131 Burrill Hall, Urbana

100. **Introductory Microbiology.** Introduction to the principal activities and properties of microorganisms, including bacteria, yeasts, molds, and viruses; consideration of the role of natural processes, such as photosynthesis; and man's use and control of microorganisms in the production of antibiotics and vaccines in industrial fermentations, in sanitation and public health, and in agriculture. Credit is not given for more than one of the following: Microbiology 100, 113, or 200. 3 hours.
101. **Introductory Experimental Microbiology.** Laboratory introduction to the techniques employed in the investigation of microbial activities and properties; experiments designed to familiarize the student with the handling, identification, and characterization of microorganisms and their activities, particularly those of interest to man. Credit is not given for both Microbiology 101 and 201. The course terminates at mid-semester. Prerequisite: Credit or concurrent registration in Microbiology 100. 2 hours.
113. **Man and Microbes.** General education biological science course for nonscience majors; examines the effects of microbes on the activities of man; emphasizes environmental, economic, and disease effects of microbial activity on society; and presents microbiology as an example of a modern biological science. Credit is not given for more than one of the following: Microbiology 113, 200, or 100. 3 hours.
200. **Microbiology.** Emphasis on fundamental concepts of microbiology, including nutrition, ecology, and physiology of microorganisms, and their role in nature and in infection and immunity. Credit is not given for more than one of the following: Microbiology 200, 100, or 113. Prerequisite: Credit or concurrent registration in organic chemistry. 3 hours.
201. **Experimental Microbiology.** Laboratory emphasizing the fundamentals of microbiology, including the biochemical basis of microbial physiology, ecology, and nutrition; microbial genetics and gene-enzyme relationships. Emphasis and encouragement are given to the experimental approach to microbiology. Credit is not given for both Microbiology 201 and 101. Prerequisite: Credit or concurrent registration in Microbiology 200 and in organic chemistry. 3 to 5 hours.
290. **Research and Special Problems.** Prerequisite: Fifteen hours of microbiology; consent of instructor. 3 to 5 hours. May be repeated for a maximum of 10 hours.
292. **Senior Thesis.** Research under the direction of a senior staff member in microbiology. Normally, the student takes two semesters of Microbiology 292 in the senior year. Recommended for all those planning future research and graduate study; prerequisite for graduation with distinction in microbiology. In the semester preceding initial enrollment, interested students should consult with their advisors concerning the procedures for enrollment. A minimum of 2 hours per senior semester is required, and a thesis must be presented for credit to be received, but graduation with distinction is not an automatic result of enrollment in Microbiology 292. Prerequisite: Consent of senior thesis adviser. 2 to 6 hours. May be repeated for a maximum of 10 hours.
309. **Comparative Microbial Chemistry.** Emphasis on comparative biochemical activity and other chemical characteristics as a basis for discussion of the features of major groups of microorganisms; stress on comparison of the energy metabolism of microbial groups. Prerequisite: Biochemistry 350 or equivalent. 2 hours or $\frac{1}{2}$ unit.
311. **Food and Industrial Microbiology.** Relationship of microorganisms to food manufacture and preservation, to industrial fermentation and processing, and to sanitation. Prerequisite: Microbiology 101, 201, or 309, or equivalent; credit or concurrent registration in organic chemistry laboratory, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
312. **Techniques of Applied Microbiology.** Consideration, through experimentation, of properties of bacteria, yeasts, molds, and actinomycetes important to industrial process-

- es; exploration of methods of control of microbial processes in industry and sanitation. Prerequisite: Credit or concurrent registration in Microbiology 311. 2 hours or $\frac{1}{2}$ unit.
316. **Genetic Analysis of Microorganisms.** Prokaryotic and eukaryotic microbial genetic systems; emphasis on typical data analyses, together with the basic classes of genetic phenomena. Prerequisite: General genetics, Microbiology 200, or Microbiology 330. 3 hours or $\frac{3}{4}$ unit.
326. **Pathogenic Bacteriology.** Study of parasitism and pathogenic microorganisms; classification, morphology, cultural requirements, and reactions; toxins, diagnostic tests, and methods of differentiation and recognition; and diseases microorganisms cause. Lectures and laboratory. Prerequisite: Microbiology 101, 201, or 309; organic chemistry laboratory. 5 hours or 1 unit.
327. **Immunology.** Survey of the field of immunology with emphasis on its chemical aspects. Lectures and laboratory. Prerequisite: Credit or concurrent registration in biochemistry, or consent of instructor. 5 hours or 1 unit.
330. **Molecular Biology of Microorganisms.** Modern contributions to the science of microbiology; emphasis on the structure, function, and synthesis of informational macromolecules and on the role microorganisms have played in molecular biology. Prerequisite: Microbiology 200 or equivalent; credit or concurrent registration in biochemistry. 3 hours or $\frac{3}{4}$ unit.
331. **Microbial Physiology and Anatomy.** Discussions and problems concerning growth, physiology, anatomy, and death of microorganisms. Prerequisite: Microbiology 200 or equivalent; Biochemistry 350 or equivalent. 3 hours or $\frac{3}{4}$ unit.
336. **Mechanisms of Pathogenesis.** The dynamic interactions between microbial parasites and their hosts; ranges from clinical to molecular aspects of infectious disease; and emphasizes established and potential mechanisms of pathogenesis. Prerequisite: Microbiology 326 or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
351. **Viruses, I.** Same as Botany and Zoology 351. An introduction to the molecular basis of virus growth and development. Prerequisite: Biology 210 or Microbiology 200, or the equivalent background in molecular biology; concurrent registration in Microbiology 330 or Biochemistry 355 recommended. 3 hours or $\frac{3}{4}$ unit.
402. **Molecular Genetics: Chromosome Mechanics.** Same as Botany and Zoology 402. Structure and behavior of chromosomes (including replication, repair, complementation, recombination, and mutation) with emphasis on microbial systems and molecular mechanisms. Prerequisite: Microbiology 316 and 330, or consent of instructor. $\frac{3}{4}$ unit.
405. **Molecular Genetics: Gene Action.** Same as Botany and Zoology 405. Structure, synthesis, and function of molecules and organelles concerned with the intracellular transmission of genetic information, including gene regulation, transcription, and translation. Prerequisite: Microbiology 330, Microbiology 316 plus biochemistry, or consent of instructor. $\frac{3}{4}$ unit.
409. **Cultivation and Properties of Microorganisms.** Nutritional and metabolic properties of the major groups of microorganisms; a comparative study of the ecology, selective isolation, and cultivation of bacteria. Laboratory. Prerequisite: Biochemistry 355 or equivalent; credit or concurrent registration in Microbiology 309; consent of instructor. 1 unit.
412. **Advances in Microbiology.** Discussions of current research in the following areas of microbiology: (a) general microbiology; (b) microbial physiology and metabolism; (c) immunochemistry; and (d) molecular genetics. Prerequisite: Consent of instructor. $\frac{1}{4}$ unit. May be repeated for a maximum of 1 unit.
419. **Animal Virology.** Same as Veterinary Medical Science 419. Discussion-laboratory with major emphasis on host-parasite relationships, natural history, and epidemiology supplemented with appropriate laboratory techniques as they pertain to the major groups of animal viruses. Prerequisite: Microbiology 326 and 327, or Veterinary Pathology and Hygiene 331 and 332; Biochemistry 350 or 354; consent of instructor. $\frac{3}{4}$ unit.
451. **Experimental Virology.** Experiments on the biology, replication, and genetics of bacte-

riophages, with emphasis on experimental design by the student. Prerequisite: Microbiology 351; consent of instructor. 1 unit.

490. **Individual Problems.** Prerequisite: Consent of instructor. $\frac{1}{2}$ to 2 units.

495. **Seminar.** Required of all graduate students whose major is microbiology. Prerequisite: Ten hours of microbiology; consent of instructor. 0 or $\frac{1}{4}$ unit.

499. **Thesis Research.** 0 to 4 units.

Physiology and Biophysics

Head of Department: Professor W. W. Sleator

Department Office: 524 Burrill Hall, Urbana

BIOPHYSICS

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.

290. **Reading and Individual Topics.** Reading or laboratory work chosen in consultation with a departmental faculty sponsor. Prerequisite: Consent of instructor. 2 to 4 hours. May be repeated to a maximum of 10 hours.

301. **Introduction to Biophysics.** Review of the field of biophysics designed to introduce the student to types of biological problems currently under investigation. Prerequisite: Eight hours of physics. 3 hours or $\frac{3}{4}$ unit.

302. **Fundamentals of Nervous Activity.** The quantitative basis of the generation and transmission of electrical signals within and between nerve cells; develops and discusses, with examples, the physical relationships describing resting potential, core conduction, excitation, and synaptic transmission. Meets during the first half of the fall semester. Prerequisite: One year of calculus and one year of college physics. 2 hours or $\frac{1}{2}$ unit.

312. **Introduction to Radiobiology.** Nature and mechanisms of the biological consequences of low dose and chronic irradiation. Intended primarily for students in engineering and physical sciences. Prerequisite: Mathematics 141, or 140 and 145; 8 hours of physics; consent of instructor. 2 hours or $\frac{1}{2}$ unit.

404. **Physiological Measurements.** Same as Physiology 404. Laboratories concerned with introducing at a graduate level current research techniques in physiological and biophysical sciences; problem-oriented laboratories; students select up to four special topics representing different areas of physiology and biophysics, such as mammalian and human, molecular, cellular and radiation biology, comparative physiology, and biophysical measurements. Emphasis placed on ability to work independently, and students give written reports of their experiments. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 1 unit. May be repeated to a maximum of 1 $\frac{1}{2}$ units.

406. **Principles of Biophysical Measurements.** Lecture course designed to acquaint the student with physical methods useful in the solution of biological problems; topics covered include bioelectric measurements, including basic electronics; optical methods, including microscopy, spectrophotometry, and measurement of action spectra; use of high-energy radiations; tracer techniques; and acoustical techniques. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit.

410. **Special Topics in Biophysics.** Advanced course on some topic of interest in biophysics, such as electrobiology, radiation biology, photobiology, bioacoustics, or the physics of muscular contraction. $\frac{1}{2}$ to 1 unit.

411. **Seminar.** Survey of literature in one area of biophysics, with special emphasis on student reports. Prerequisite: Enrollment in the biophysics program or consent of instructor. $\frac{1}{2}$ unit.

413. **Membrane Biophysics.** Equations for the transport of water, ions, and non-electrolytes across membranes; meets during the second half of the fall semester. Prerequisite:

- Credit or concurrent registration in Physiology 403b; one year of physics beyond introductory physics, or equivalent; physical chemistry; consent of instructor. $\frac{1}{2}$ unit.
414. **Sensory Biophysics.** Advanced treatment of sensory systems which are approachable in detailed quantitative terms, with emphasis on the visual system; lectures scheduled during the first quarter of the spring semester. Normally carries $\frac{1}{4}$ unit credit; however, students may develop a particular topic introduced in the lectures into a term paper for an extra $\frac{1}{4}$ unit credit. Prerequisite: Biophysics 301, Physiology 301 or 403, or consent of instructor. $\frac{1}{4}$ or $\frac{1}{2}$ unit. Students must see the instructor before enrolling for $\frac{1}{2}$ unit.
 415. **Radiation Biophysics.** Consideration in quantitative terms of the mechanisms of the responses of molecules and cells to ionizing radiation; meets during the second quarter of the spring semester. Prerequisite: Graduate standing in biophysics, one year of physics beyond introductory physics and Biophysics 301 or 312, or consent of instructor. $\frac{1}{4}$ unit.
 424. **Ultrasonic Biophysics.** Same as Bioengineering 424. Ultrasonic propagation in, and interaction with, biological media at macromolecular, cellular, and organismic levels of structure; meets during the first quarter of the spring semester in alternate years. Prerequisite: Graduate standing in biophysics or consent of instructor. $\frac{1}{4}$ unit.
 426. **Kinetic Models in Biophysics.** Techniques of constructing kinetic models to correlate data from biological systems; includes drawing implications of physical mechanisms from model behavior; and considers intensive treatment of excitable cell membrane as an example of a modelled system. Meets during the second half of the spring semester in alternate years. Prerequisite: Cellular physiology and calculus. $\frac{1}{2}$ unit.
 427. **Analysis of the Excitation Process.** Analysis of the excitation process in nerve and muscle, including transport equations, ion selectivity, ion gating, and charged surface phenomena; meets during the first half of the spring semester in alternate years. Prerequisite: Biophysics 302. $\frac{1}{2}$ unit.
 428. **Cell Membranes.** Isolation and biochemical analysis; experimental membrane models Gouy-Chapman-Stern layers; equations of transport (diffusional, mediated, and active); phospholipid bilayers and protein subunits; and cell membrane synthesis (*in vivo* and *in vitro*). Meets during the second half of the spring semester in alternate years. Prerequisite: Biophysics 301 or Physiology 402; Biochemistry 350 or equivalent. $\frac{1}{2}$ unit.
 438. **Bioenergetics of Photosynthesis.** Same as Botany 438. Biophysical and biochemical mechanisms of green plant and bacterial photosynthesis; includes the role of membranes; and emphasizes energetic aspects of photosynthesis. Meets during the first half of the spring semester. Prerequisite: One year each of college physics, chemistry, and biology; Biochemistry 350 or Biophysics 301; or consent of instructor. $\frac{1}{2}$ unit.
 463. **Radioisotopes in Biological Research: Principles and Practice.** Same as Veterinary Medical Science 463 and Animal Science 463. Lectures, demonstrations, and laboratory on the fundamentals of radioisotope procedures and applications in biology and medicine. Prerequisite: Quantitative chemistry; one year each of mathematics, physics, and biology, and/or consent of instructor. 1 unit.
 475. **Biophysics of Muscle.** Description and analysis of the fundamental physical processes underlying motility and contraction in living systems; surveys recent advances and assesses current status of relevant problems; meets during the second quarter of the spring semester in alternate years. Prerequisite: Chemistry 340 or 342, and Biochemistry 350. $\frac{1}{4}$ unit.
 490. **Individual Topics.** For graduate students wishing to study individual problems or topics not assigned in other courses. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 2 units.
 499. **Thesis Research.** Research may be conducted in one of the areas listed below, subject to approval of the staff member concerned and the department in which the research is to be done: (a) bioacoustics; (b) biophysics of excitable membranes; (c) physical properties of lipids and membranes; (d) lipid biophysics, model membranes, and pollution effects; (e) photobiology and photosynthesis; (f) biophysics of muscular contraction; (g) radiobiology; (h) information theory and cybernetics; (i) ion transport and permeability; (j) mechanical properties of tissues; (k) biophysical chemistry; (l) sensory biophysics. 0 to 4 units.

PHYSIOLOGY

101. **Introduction to Human Physiology: Physical and Chemical Bases of Cell Function, Principles of Physiological Control Systems, Coordinated Body Functions.** Emphasizes those aspects especially illustrative of general principles of biology; designed to be one-half of a student's life sciences general education requirement; especially suitable for coupling with an anthropology or psychology course. Prerequisite: High school chemistry strongly recommended. 3 hours. Credit will not be given for Physiology 101 and any of the following: Physiology 102, 103, 104, 105, or 106.
102. **Introduction to Human Physiology: Principles of Physiological Control Systems, Coordinated Body Functions, Physiological Bases of Behavior.** Emphasizes those aspects which make physiology unique among the life sciences; designed to be one-half of a student's life sciences general education requirement; especially suited for coupling with another course in biology. Prerequisite: A college course in biology or equivalent (for example, 3 hours credit or credit waiver via CLEP examination). 3 hours. Credit will not be given for Physiology 102 and any of the following: Physiology 101, 103, 105, 106, or 107.
103. **Introduction to Human Physiology: The Physical and Chemical Bases of Cellular Function, Principles of Physiological Control Systems, Coordinated Body Functions, Physiological Bases of Behavior.** Prerequisite: High school chemistry strongly recommended. 4 hours. Credit will not be given for Physiology 103 and any of the following: Physiology 101, 102, 104, 105, 106, or 107.
104. **Physical and Chemical Bases of Cell Function: Scientific Method, Nature of Biological Systems, Cell Metabolism, Heredity.** Prerequisite: High school chemistry strongly recommended. 1 hour. Credit is not given for Physiology 104 and any of the following: Physiology 101 or 103.
105. **Principles of Physiological Control Systems: Nature of Nerve Impulse, Neural and Hormonal Control Mechanisms, Homeostatic Mechanisms.** Prerequisite: Either (a) credit or concurrent registration in Physiology 104, or (b) a college life science course, or (c) 3 hours credit or credit waiver via CLEP examination. 1 hour. Credit will not be given for Physiology 105 and any of the following: Physiology 101, 102, or 103.
106. **Coordinated Body Functions.** Study of the cardiovascular, renal, respiratory, and digestive systems. Prerequisite: Credit or concurrent registration in Physiology 105. 1 hour. Credit will not be given for Physiology 106 and any of the following: Physiology 101, 102, or 103.
107. **Physiological Bases of Behavior.** Processing of sensory information; physiological correlates of consciousness and behavior; motor control; and reproduction and sex. Prerequisite: Credit or concurrent registration in Physiology 101 or 106. 1 hour. Credit will not be given for Physiology 107 and any of the following: Physiology 102 or 103.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
234. **Human Anatomy and Physiology.** Study of the essentials of anatomy and physiology with special reference to muscular and nervous systems. Prerequisite: Physiology 103 or consent of instructor. 5 hours.
290. **Reading and Individual Topics Course.** Readings or laboratory work in fields chosen in consultation with a departmental faculty sponsor. Must be taken in partial fulfillment of departmental honors requirements. Prerequisite: A course in physiology; consent of instructor. 2 to 4 hours. May be repeated for a maximum of 10 hours.
295. **Special Topics in General Physiology.** Selected topics in general physiology. Prerequisite: Credit or concurrent registration in Physiology 301; consent of instructor. 2 hours.
296. **Special Topics in Animal Physiology.** Selected topics in animal physiology. Prerequisite: Credit or concurrent registration in Physiology 302; consent of instructor. 2 hours.
301. **General Physiology.** A consideration from the standpoint of experimental biology of functions that are common to most eukaryotic cells. Prerequisite: Biology 111 or 251, or equivalent; one year each of college-level mathematics and physics; chemistry through organic with laboratory. 3 hours or $\frac{3}{4}$ unit.

302. **Animal Physiology.** Organ physiology of animals; emphasis on homeostasis and physiological interactions of animals with their environment. Prerequisite: Biology 111 or 251, or equivalent; one year each of college-level mathematics and physics; chemistry through organic with laboratory. 3 hours or $\frac{3}{4}$ unit.
303. **General Physiology Laboratory.** An introduction to experimentation with cellular functions common to most eukaryotic cells; emphasis on biochemical, radioactive tracer, electrical, and mechanical recording techniques. Prerequisite: Credit or concurrent registration in Physiology 301. 2 hours or $\frac{1}{4}$ unit.
304. **Experimental Physiology Laboratory.** Introduction to problems and techniques for studying the physiology of organ systems. Prerequisite: Credit or concurrent registration in Physiology 302. 2 hours or $\frac{1}{4}$ unit.
305. **Principles of Ergonomics.** Same as Industrial Engineering and Physical Education 305. Concepts and design criteria to achieve optimum mutual adjustment of man and his work; consideration of such topics as static and dynamic forces on the human frame; response to environmental stress (heat, vibration, noise); vigilance and fatigue; and man-machine systems. Prerequisite: Senior standing; consent of instructor. 4 hours or 1 unit.
306. **Quantitative Methods in Ergonomics.** Same as Industrial Engineering and Physical Education 306. Laboratory problems and discussion on measurements of the physical and mental capacities and limitations of human beings in relationship to the stresses and demands of working environments; familiarization with techniques and tools such as assessment of human energy expenditures on an industrial job, use of seating research chair, and high-speed and time lapse photography. Student teams select about six problems from a list of topics, or they develop problems of special interest to the team. Prerequisite: Physiology 305. 4 hours or 1 unit.
312. **Endocrinology.** Same as Zoology 312. Physiology and biochemistry of the endocrine system with special reference to vertebrates. Prerequisite: Physiology 301 or a course in biochemistry; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
331. **General Radiobiology.** Response of multicellular organisms, cells, and macromolecules to ionizing radiations. Lectures, student reports, and discussions. Prerequisite: One year each of mathematics, physics, chemistry, and biology. 4 hours or 1 unit.
401. **Physiology of Systems and Organs.** Analysis of organization and function of vertebrate systems, which combines the viewpoints of traditional cellular, comparative, mammalian, and human physiology; nervous, circulatory, digestive, and excretory systems; and gross metabolism. Prerequisite: One year of college-level physics; chemistry through organic; an upper-division course in physiology; physical chemistry and biochemistry recommended; knowledge of calculus presumed. 1 unit.
402. **Comparative and Adaptational Physiology.** The first half of the course deals with comparative mechanisms of adaptation to the environment, including homeostatic theory, osmotic and ionic regulation, respiration and metabolism, nutrition and digestion, and temperature relations; the second half concerns comparative behavioral physiology, including sense organs, mechanisms of motility (especially muscles), and central nervous integration. Prerequisite: One year of college-level physics; chemistry through organic; an upper-division course in physiology; physical chemistry and biochemistry recommended; knowledge of calculus presumed. 1 unit.
403. **Cellular and Molecular Physiology.** Physicochemical analysis of cellular function and structure; consideration of the implications of the properties of cells for the physiology of multicellular animals. Students may enroll for the lecture series on physiology of cytoplasm and the nucleus, cell growth and division and cellular regulatory mechanisms, and/or for the lecture series on physiology of cell membranes, bioelectrics, and motility. Prerequisite: One year of college-level physics; chemistry including physical and biochemistry; an upper-division course in physiology; knowledge of calculus presumed. $\frac{1}{2}$ or 1 unit.
404. **Physiological Measurements.** Same as Biophysics 404. Laboratories concerned with introducing at a graduate level current research techniques in the physiological and bio-

- physical sciences; problem-oriented laboratories; students select up to four special topics representing different areas of physiology and biophysics, such as mammalian and human, molecular, cellular and radiation biology, comparative physiology, and biophysical measurements. Emphasis placed on ability to work independently, and students give written reports of their experiments. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 1 unit. May be repeated to a maximum of 1 $\frac{1}{2}$ units.
410. **Mammalian Physiology Seminar.** Current trends in mammalian physiology. Prerequisite: Physiology 401 and 402, or equivalent; consent of instructor. $\frac{1}{2}$ unit.
412. **Advanced Endocrinology.** Same as Animal Science, Dairy Science, and Zoology 412. Seminar, lectures, student reports, and discussions of recent advances in endocrinology. Prerequisite: Physiology 312; consent of instructor. $\frac{1}{2}$ unit. May be repeated to a maximum of 2 units.
413. **Experimental Mammalian Physiology.** Same as Veterinary Medical Science 413. Physiological applications of experimental mammalian surgery. Prerequisite: Physiology 401 and 402, or equivalent; consent of instructor. 1 unit.
414. **Experimental Mammalian Physiology.** Physiological applications of experimental pharmacodynamics. Prerequisite: Physiology 401 and 402, or equivalent; consent of instructor. 1 unit.
416. **Structure and Function of the Nervous System.** Understanding of nervous function through the experimental approach. Prerequisite: Two semesters of physiology courses beyond the elementary level; two semesters of general physics; consent of instructor. 1 unit.
421. **Gross Human Anatomy.** General survey of the structures of the human body with emphasis on the relations between form and function. Prerequisite: One semester of embryology; consent of instructor. 1 unit.
431. **Experimental Radiobiology.** Laboratory exercises in irradiation procedures and in examination of biological responses to ionizing radiations. Prerequisite: Physiology 331 or equivalent; consent of instructor. 1 unit.
441. **Advanced Comparative Physiology.** Seminar, lectures, student reports, and discussions. Topics rotate in three-year cycle: adaptational physiology, comparative neurophysiology, and comparative physiology of motile mechanisms. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit.
442. **Advanced Comparative Physiology Laboratory.** Laboratory experiments presenting comparative principles in osmotic and ionic regulation; respiration and metabolism; temperature regulation of animals; and physiology of circulatory systems, of muscle, of sense organs, and of nervous systems. Prerequisite: Physiology 402, 403, and 404; credit or concurrent registration in Physiology 441. 1 unit.
451. **Advanced Cellular Physiology.** Seminar, lectures, student reports, and discussions. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit.
470. **Human Pathologic Physiology.** Disturbances of function in tissues and organs and their relationship to the pathogenesis of human disease. Prerequisite: Two semesters of advanced physiology; one semester of biochemistry; consent of instructor. $\frac{3}{4}$ unit.
472. **Human Physiology Seminar.** Topics of current emphasis in human physiology. Prerequisite: Two semesters of advanced physiology; one semester of biochemistry; consent of instructor. $\frac{1}{2}$ unit.
473. **Ergonomics Seminar.** Same as Industrial Engineering 473 and Physical Education 473. Topics in ergonomics explored in depth, such as effects of vibration on human performance, biomechanics of the hand, and functional dimension. Prerequisite: Physiology, Physical Education, or Industrial Engineering 306, or consent of instructor. $\frac{1}{2}$ unit.
490. **Individual Topics.** For graduate students wishing to study individual problems or topics not assigned in other courses. Prerequisite: Approval of department. $\frac{1}{2}$ to 2 units.
499. **Thesis Research.** Research may be conducted in the following areas, with the consent of the instructor: (a) cellular and molecular physiology; (b) comparative physiology; (c) mammalian physiology; (d) human anatomy and human physiology; (e) endocri-

nology; (f) neurophysiology; (g) radiobiology; and (h) environmental and stress physiology. 0 to 4 units.

Zoology

Department Office: 515 Morrill Hall, Urbana

Zoology courses are controlled by the Provisional Departments of Ecology, Ethology, and Evolution and of Genetics and Development.

105. **The Ecosystem Concept.** Introduction to ecological principles; particular emphasis on man in relation to the global environment; evolution of man and the human ecosystem; and consideration of effects of human population growth, energy production, and natural resource utilization as they affect global cyclic mechanisms. 3 hours.
106. **Principles of Heredity.** Introduction to genetics and the laws of inheritance with special emphasis on man; the relationship of genetics to human affairs. No biological training required. Students may not receive credit for Zoology 106 and Biology 210. Prerequisite: Sophomore standing. 3 hours.
107. **Evolution.** Analysis of the theories of evolution, the mechanism of evolutionary changes, and the evolution of man. Prerequisite: Sophomore standing. 3 hours.
143. **Biological Bases of Human Behavior.** Same as Anthropology, Home Economics, and Psychology 143. Critical consideration of data and information bearing on current controversies and ideas concerning the antecedents of selected aspects of human behavior. Topics to be discussed include communication, social organization, and parental, sexual, and aggressive behavior. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
232. **Comparative Vertebrate Anatomy.** Classification and comparative anatomy of vertebrates including functions and evolution of their organs and organ systems. Prerequisite: Biology 111 or equivalent. 5 hours.
246. **Vertebrate Social Organization.** Same as Anthropology, Psychology, and Sociology 246. Introduction to the biosociology of vertebrates; emphasis on the behavioral, physiological, and population aspects of vertebrate social organizations, from fishes to primates. Prerequisite: One year of introductory biology. 3 hours.
290. **Individual Topics.** Laboratory conferences, and readings. Prerequisite: Two years of zoology; senior standing; approval of department. May be taken by students who can attend classes only on Saturdays. 2 to 5 hours.
304. **Field and Systematic Zoology.** Collection, preservation, and identification of lower vertebrates and land and fresh-water invertebrates: habits and life histories of selected forms. Prerequisite: Biology 111 or equivalent; senior standing or consent of instructor. 5 hours or 1 unit.
312. **Endocrinology.** Same as Physiology 312. Physiology and biochemistry of the endocrine system with special reference to vertebrates. Prerequisite: Physiology 301 or a course in biochemistry; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
315. **Human Genetics.** Study of the techniques required for genetic analysis of human traits; discussion of genetic mechanisms operative in human development, metabolism, and behavior; and genetics and human disease. Prerequisite: Biology 210; biochemistry and statistics recommended. 3 hours or $\frac{3}{4}$ unit.
318. **Protozoology.** Basic treatment of the morphology, physiology, and systematics of the protozoa; consideration of their evolution, ecology, morphogenesis, sexual phenomena, genetics, and parasitism with life histories of selected free-living and parasitic forms. Prerequisite: Biology 111 or equivalent. 5 hours or 1 unit.
320. **Invertebrate Zoology.** Invertebrates; structure and development; application of biological principles; specific and comparative morphology of the invertebrates; and coordi-

- nation of structure and function, origin, development, and life histories. Prerequisite: Biology 111 or equivalent. 5 hours or 1 unit.
321. **Parasitology.** Worm parasites: life cycles, morphology, taxonomy, and environmental relations; lecture, laboratory, technic, readings, quiz, demonstrations, and problems. Prerequisite: Biology 111 or equivalent. 5 hours or 1 unit.
330. **Practical Microtechnique.** Introduction to microscopy, microphotography, and histological technique. Prerequisite: Histology or embryology; consent of instructor. 3 hours or $\frac{1}{2}$ unit.
331. **Experimental Cytology.** Same as Botany 331. Lectures on structure and function of the cell; coverage on current concepts of cell and molecular biology relating to cellular function, cell division, and organelle interaction. Prerequisite: Biology 210 or equivalent; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
332. **The Evolution of Adaptive Systems.** Evolutionary mechanisms underlying adaptations; the relationships among theoretical population biology, developmental biology, functional morphology, and the fossil record, with some emphasis on quantitative models. Prerequisite: Biology 210 and consent of instructor; Biology 310 and a course in calculus recommended. 3 hours or $\frac{3}{4}$ unit.
333. **Vertebrate Embryology.** Development of the vertebrate body and its organs. Prerequisite: Biology 111 or equivalent. 5 hours or 1 unit.
334. **Experimental Cytology Laboratory.** Same as Botany 334. Introduction of cytological techniques, microscopic analysis of macromolecules, isotopic techniques, and autoradiography; phase and fluorescent microscopy and photomicrography. Prerequisite: Consent of instructor. 2 hours or $\frac{1}{2}$ unit.
335. **Ornithology.** Structure, functions, environmental relations, habits, life history, and identification of birds. Laboratory during first eight weeks and field trips during last eight weeks of the semester. Prerequisite: Biology 111 or equivalent. 3 hours or $\frac{1}{2}$ unit.
336. **Mammalogy.** Classification, distribution, life history, evolution, and identification of mammals. Lecture, laboratory, and field work. Prerequisite: Zoology 232. 4 hours or 1 unit.
337. **Ichthyology.** Classification, structure, evolution, distribution, and life history of fishes. Lectures, laboratory, and field work. Prerequisite: Zoology 232. 3 hours or $\frac{1}{2}$ unit.
339. **Field Vertebrate Natural History.** Laboratory and field course, in two segments, offering two levels of involvement with the material: (1) Section A, survey of North American vertebrates; introduction to their taxonomy, life histories, habitats, and feeding habits. 1 hour or $\frac{1}{4}$ unit. (2) Section B, intensive study of North American vertebrates with emphasis on vertebrates of Illinois; taxonomy, life histories, habitats, and feeding habits of all the common resident species. 4 hours or 1 unit. Prerequisite: Credit or concurrent registration in Zoology 340, or equivalent; consent of instructor for Section B.
340. **Natural History of the Vertebrates.** Lectures on vertebrate adaptations for survival and reproduction. Prerequisite: Biology 111 or equivalent, and junior standing. 3 hours or $\frac{3}{4}$ unit.
341. **Field Ecology.** Study of biotic communities, mammals, birds, reptiles, amphibia, fishes, and invertebrates in various sections of North America during spring vacation; outdoor camping and cooking; and transportation in University cars. Prerequisite: Credit or concurrent registration in one of the following: Zoology 304, 335, 336, 337, 340, or 345; consent of instructor. 1 hour or $\frac{1}{4}$ unit. May be repeated for a maximum of 3 hours.
342. **Wildlife Management and Conservation.** Size and measurement of animal population; factors affecting reproduction and mortality; life history; and management policies for fishes, mammals, and birds. Prerequisite: Biology 111 or equivalent. 3 hours or $\frac{1}{2}$ unit.
343. **Limnology.** Fresh water biology; study of the lake, pond, and river with emphasis on the physical environment as well as on the plants and animals which live in fresh water. Lectures, discussions, laboratory, and field work. Prerequisite: Biology 111 or equivalent; senior standing or consent of instructor. 5 hours or 1 unit.

344. **Introduction to Primate Morphology and Behavior.** Same as Anthropology 343. Survey of primate social behavior and the classification, morphology, and distribution of living and extinct species; emphasis on interrelationships with aspects of anthropological study. Prerequisite: Anthropology 240 or Zoology 246, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
345. **Animal Ecology.** Study of the relationships between organisms and their environment; major emphasis on population dynamics and ecosystem functions and their significance to human populations. Prerequisite: Biology 212 or consent of instructor. 4 or 5 hours, or $\frac{3}{4}$ or 1 unit. Four hours or $\frac{3}{4}$ unit credit requires field work on six Saturdays; 5 hours or 1 unit requires field work on ten Saturdays, including one weekend field trip.
346. **Ethology.** Same as Anthropology 346 and Animal Science 346. Introduction to descriptive and experimental analyses of animal behavior. Prerequisite: One year of courses in zoology, physiology, psychology, or biological anthropology. 3 hours or $\frac{3}{4}$ unit.
347. **Ethology Laboratory.** Same as Anthropology 347 and Animal Science 347. Laboratory in ethology. Prerequisite: Zoology 346 and consent of instructor. 3 hours or $\frac{3}{4}$ unit.
348. **Physiological Bases of Behavior.** Physiological mechanisms underlying behavior as determined through comparative studies; emphasis on the invertebrates; and topics including the functional organization of nervous systems, neurosecretion and synaptic chemistry, sensory physiology, and integration. Prerequisite: Zoology 346 or Psychology 345; Physiology 301 or 302. 3 hours or $\frac{3}{4}$ units.
349. **Ecology and Evolution of Social Structure.** Evaluation of the interplay between social organizations and ecologic factors with emphasis on evolutionary mechanisms and consequences. Prerequisite: Zoology 346; Biology 310. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
350. **Behavior-Genetic Analysis.** Same as Anthropology 342 and Psychology 342. Concepts, methods, and problems in analysis of relations between genetic systems and animal behavior. Prerequisite: Anthropology 240 or Biology 210, or consent of instructor; consent required for enrollment in laboratory. 3 or 5 hours, or $\frac{3}{4}$ or 1 unit.
351. **Viruses, I.** Same as Microbiology and Botany 351. Introduction to the molecular basis of virus growth and development. Prerequisite: Biology 210 or Microbiology 200, or the equivalent background in molecular biology; concurrent registration in Microbiology 330 or Biochemistry 355 recommended. 3 hours or $\frac{3}{4}$ unit.
353. **Hormones and Behavior.** Survey of the behavioral effects of hormones in vertebrates and invertebrates; emphasizes the extensive literature on hormonal effects on reproductive and social behavior. Students enrolled for graduate credit may write a term paper for an extra $1\frac{1}{4}$ -unit credit. Prerequisite: Biology 111. 3 hours, or $\frac{3}{4}$ or 1 unit.
354. **Ethology of Mammals.** Survey of mammalian behavior from an ethological point of view; stresses comparative and evolutionary viewpoints; and includes feeding, communication, biological concepts of motivation and learning, reproduction, parental care, and ontogeny of behavior. Prerequisite: Zoology 336 or 346, Psychology 345, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
356. **Animal Play.** Animal play, including human play, from ecological, ethological, and evolutionary points of view; includes quantitative and structural descriptions of play behavior, age-dependent schedules for play, play as physical training for animals, play as a learning environment and learning mechanism, and play in a sociobiological context. Prerequisite: Zoology 346, Psychology 345, Anthropology 343, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
359. **Aquatic Ecology.** Same as Civil Engineering 347. Integrated study of the environmental factors affecting the composition and distribution of biota in lakes, rivers and estuaries; emphasis on the nature of the response of aquatic ecosystems to stress and practical means of aquatic resource management. Prerequisite: Credit or concurrent registration in Civil Engineering 346 or Zoology 343, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
361. **Individual and Group Behavior of Honey Bees.** Same as Entomology 361 and Horticulture 361. Study of individual and group behavior of honey bees, their biological value, physical basis, and evolution. Lectures and discussions, one or more local field

- trips, term paper, and assigned readings. Prerequisite: One semester of entomology or zoology. 2 hours or $\frac{1}{2}$ unit.
367. **Analysis of Development.** Advanced study of basic problems in developmental biology; major emphasis on interactions at molecular, fine structural, and cellular levels; the genetic and metabolic mechanisms by which these interactions are controlled in plants and animals; and critical examination of theories of differentiation in light of recent research. Lectures, discussions, outside readings, and student reports. Prerequisite: Biology 211 or Zoology 333; Biology 210; organic chemistry. 3 hours or $\frac{3}{4}$ unit.
374. **Quantitative Ethology.** Same as Biology 374. Ethological and sociobiological applications of mathematical and statistical concepts and methods to vertebrate and invertebrate behavior: analysis of ethograms; stochastic, informational, and sequential analysis of behavior; use of multidimensional contingency tables in the study of social interactions; mathematical models: evolution of cooperative behavior via individual, kin, and group selection; animal conflict; and animal play. Prerequisite: Zoology 346 or Psychology 345; elementary statistics or probability. 3 hours or $\frac{3}{4}$ unit.
393. **Laboratory in Primate Social Behavior.** Same as Anthropology 393 and Psychology 393. Introduction to the observational analysis of comparative primate communication and social behavior; instruction, discussion, and supervised practice in describing, classifying, and interpreting the social behavior of nonhuman primates. Each student is expected to perform a small individual laboratory project. Prerequisite: Anthropology 343 or Zoology 344, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
402. **Molecular Genetics: Chromosome Mechanics.** Same as Botany and Microbiology 402. Structure and behavior of chromosomes (including replication, repair, and complementation, recombination, and mutation); emphasis on microbial systems and molecular mechanisms. Prerequisite: Microbiology 316 and 330, or consent of instructor. $\frac{3}{4}$ unit.
405. **Molecular Genetics: Gene Action.** Same as Botany and Microbiology 405. Structure, synthesis, and function of molecules and organelles concerned with the intracellular transmission of genetic information, (including gene regulation, transcription, and translation). Prerequisite: Microbiology 330, Microbiology 316 plus biochemistry, or consent of instructor. $\frac{3}{4}$ unit.
406. **Physiology of Reproduction.** Same as Animal Science 406. Comparative physiology of reproduction and endocrinology of domestic and laboratory animals; fertility and sterility. Lectures and laboratory. 1 unit.
407. **Evolutionary Theory.** Genetic, systematic, ecological, and zoogeographical concepts as related to the processes of evolution. Prerequisite: One course in genetics; consent of instructor. 1 unit.
408. **Laboratory Methods in Physiology of Reproduction.** Same as Animal Science 408. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 1 unit.
412. **Advanced Endocrinology.** Same as Animal Science, Dairy Science, and Physiology 412. Seminar, lectures, student reports, and discussions of recent advances in endocrinology. Prerequisite: Physiology 312; consent of instructor. $\frac{1}{2}$ unit. May be repeated to a maximum of 2 units.
418. **Advanced Protozoology.** Advanced consideration of selected topics, with lectures, discussions and readings; emphasis on laboratory practice in modern methods and techniques of studying both free-living and parasitic protozoa; and collecting, culturing, and staining of representative forms. Prerequisite: Zoology 318 or equivalent. 1 unit.
419. **Topics in Experimental Protozoology.** Consideration of the advantageous employment of protozoa in modern researches concerned with basic biological problems; selected experimental topics covered by lectures, demonstrations, discussions, reports, and readings. Prerequisite: Consent of instructor. $\frac{1}{2}$ or 1 unit.
420. **Experimental Invertebrate Zoology.** Study of current research problems and practice in the experimental methods used in the area of invertebrate zoology. Prerequisite: Zoology 320 or equivalent; consent of instructor. 1 unit.

421. **Cytogenetics.** Same as Botany 421. Chromosome theory: the structure, behavior, and physiology of chromosomes in heredity and development. Prerequisite: Biology 210 or Microbiology 330, or consent of instructor. 1 unit.
422. **Advanced Parasitology.** Advanced study of modern methods in helminthology. Prerequisite: Zoology 321 or equivalent. 1 unit.
425. **Experimental Parasitology.** Same as Veterinary Medical Science 425. Broadly based consideration of the relation of parasites to their hosts and to their environments; and of the factors which influence these relationships. Prerequisite: A laboratory course in parasitology or protozoology; organic chemistry; Biochemistry 350; statistics recommended. 1 unit.
433. **Topics in Developmental Biology.** Study of initial differences in developing systems and interactions leading to more complex differences. May be elected in successive years. Prerequisite: Zoology 367. $\frac{1}{4}$ unit. Maximum credit for master's candidates, 1 unit; for doctoral candidates, 3 units.
443. **Problems in Primate Behavior and Ecology.** Same as Anthropology 443. Group discussions and individual presentations of research reports and problems in fields of primate ethology, ecology, evolution, and related subjects; topics vary each semester. Prerequisite: Consent of instructor. $\frac{1}{2}$ or 1 unit. May be repeated for additional credit.
444. **Concepts in Ethology.** Group discussion of problems such as stimulus filtering, spontaneity, and stereotyped motor patterns, with a new topic each semester. Prerequisite: Zoology 346. $\frac{1}{2}$ unit.
445. **Seminar in Fish and Wildlife Ecology.** Modern ecological principles and concepts to specific problems in fisheries and wildlife. Prerequisite: Zoology 342 or 345, or equivalent. $\frac{1}{2}$ unit. Offered in alternate years.
490. **Individual Research.** For master's degree candidates who elect to write a research report rather than a thesis. Prerequisite: Consent of adviser. $\frac{1}{2}$ to 3 units. No more than 3 units may be included in the master's degree program.
491. **Topics in Population Biology.** Seminar course devoted to discussion of problems in population biology, with a different topic each semester. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit. May be repeated to a maximum of 4 units.
499. **Thesis Research.** 0 to 4 units.

LINGUISTICS

(See Humanities, School of)

MATHEMATICS

Head of Department: Professor P. T. Bateman

Department Office: 273 Altgeld Hall, Urbana

101. **Basic Mathematics.** Introduction to algebra, designed for the Educational Opportunities Program; topics in arithmetic, measurement, and elementary geometry and algebra. 4 hours.
104. **Elements of Algebra and Trigonometry.** For premedical students and students in the curriculum preparatory to the teaching of biology who have entered with only one unit of high school algebra and who need credit in trigonometry as a prerequisite to physics. Students who enter with one and one-half units of algebra must take Mathematics 114. Credit in Mathematics 104 involves duplication of credit with Mathematics 111, 114,

and 118, and does not serve as a prerequisite for Mathematics 120. Prerequisite: High school algebra, one unit; high school plane geometry, one unit. 3 hours.

111. **Algebra.** Students having one and one-half or more units of high school algebra may not take this course unless they have the approval of their college office. Credit is not given for both Mathematics 111 and 112. Prerequisite: Entrance algebra, one unit; high school plane geometry, one unit. 5 hours.
112. **College Algebra.** Credit is not given for both Mathematics 111 and 112. Prerequisite: Entrance algebra, one and one-half units; high school plane geometry, one unit. 3 hours.
114. **Plane Trigonometry.** Prerequisite: Entrance algebra, one and one-half units, or concurrent registration in Mathematics 111; high school plane geometry, one unit. 2 hours.
118. **Introduction to Mathematics, I.** An elementary course for students whose major interests are not in engineering or the physical sciences; provides an overall view of mathematics; emphasizes ideas and concepts rather than routine drill; and includes concepts from the following areas: combinatorics, number theory, the real and rational number systems, topology, representation of numbers, and map coloring. Prerequisite: High school algebra, one unit; high school plane geometry, one unit; or equivalent. 3 hours.
119. **Introduction to Mathematics, II.** Continuation of Mathematics 118; includes concepts from the following areas: combinatorics, algebraic number theory, constructions, cardinal numbers, probability and statistics, analytic geometry, and calculus. Prerequisite: Mathematics 118. 3 hours.
120. **Calculus and Analytic Geometry.** First course in calculus and analytic geometry; basic techniques of differentiation and integration with applications, including curve tracing in the plane. Students with strong backgrounds in analytic geometry should normally enroll in Mathematics 135. Credit is not granted for Mathematics 120 or 135 and Mathematics 134. Prerequisite: Mathematics 111 or 112, and Mathematics 114, or an adequate placement test score. 5 hours.
124. **Introductory Analysis for Social Scientists, I.** An introduction to finite mathematics for students in the social sciences; introduces the student to the basic ideas of logic, set theory, probability vectors and matrices, and Markov chains. Problems are selected from social science and business. Prerequisite: Mathematics 111 or 112, or a passing grade on the Mathematics Placement Test. 3 hours.
130. **Calculus and Analytic Geometry.** Second course in calculus and analytic geometry. Methods of integration; conic sections; polar coordinates; parametric equations; vectors and partial derivatives; and first-order differential equations. Prerequisite: Mathematics 120. 5 hours.
131. **Calculus and Analytic Geometry.** Second course in calculus and analytic geometry. Methods of integration; conic sections; polar coordinates; and vectors. Prerequisite: Mathematics 120. 3 hours.
134. **Introductory Analysis for Social Scientists, II.** Introduction to the concepts of functions and relations and the basic ideas of the calculus. Credit is not granted for Mathematics 134 and Mathematics 120 or 135. Prerequisite: Mathematics 124. 4 hours.
135. **Calculus.** First course in calculus. Differentiation and integration; applications to curve-tracing, maxima and minima, area, and volume. Prerequisite: Completion of a thorough college-level course in plane and solid analytic geometry, or equivalent. 5 hours.
140. **Calculus and Analytic Geometry.** Third course in calculus and analytic geometry. Multiple integrals; infinite series; linear algebra; and linear differential equations. Prerequisite: Mathematics 130. 3 hours. Students may not receive credit for both Mathematics 140 and 244.
141. **Calculus and Analytic Geometry.** Third course in calculus and analytic geometry. Parametric equations; partial derivatives; multiple integrals; infinite series; linear algebra; and first-order and linear differential equations. Prerequisite: Mathematics 131. 5 hours. Students may not receive credit for both Mathematics 141 and 244.

145. **Calculus.** Second course in calculus. Further applications of derivatives and integrals; partial derivatives and vectors; multiple integrals; infinite series; and first-order and linear differential equations. Prerequisite: Mathematics 135. 5 hours. Students may not receive credit for Mathematics 145 and 244.
149. **Honors Course in Mathematics.** Prerequisite: Concurrent registration in an honors section of Mathematics 120, 130, 131, 140, or 141; consent of the department. Enrollment is strictly limited to students with superior mathematical talents. 1 hour.
150. **Problem Solving.** The art and techniques of solving mathematical problems; Polya's rules; and heuristics of mathematical problem solving. Prerequisite: Concurrent registration in an honors section of the calculus. 1 hour. May be repeated to a maximum of 4 hours.
161. **Statistics.** Credit is not given for both Mathematics 161 and Economics 171 or Psychology 115. Prerequisite: Mathematics 111 or 112; sophomore standing. 3 hours.
190. **Calculus Computational Laboratory, I.** Introduction to "BASIC" and interactive programming; laboratory treatment of computational aspects of calculus including limits of sequences, derivatives, and approximation methods. Prerequisite: Credit or concurrent registration in Mathematics 120, 134, or 135, or equivalent. 1 hour.
191. **Calculus Computational Laboratory, II.** Continuation of Mathematics 190; topics include continued fractions; the number e ; the maximum problem; symbolic and numerical methods in differentiation and integration; and curve plotting. Prerequisite: Mathematics 190 or consent of instructor; credit or concurrent registration in Mathematics 130, 131, or 145, or equivalent. 1 hour.
192. **Calculus Computational Laboratory, III.** Continuation of Mathematics 191; topics include vectors and arrays in "BASIC"; linear algebra, and numerical and graphical methods of differential equations. Prerequisite: Mathematics 191 or consent of instructor; credit or concurrent registration in Mathematics 140, 141 or 145, or equivalent. 1 hour.
198. **Freshman Seminar.** Guides the student in the study of selected topics not considered in standard courses. Prerequisite: Enrollment in the mathematics honors program; consent of department. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
202. **Mathematics for Elementary Teachers.** A systematic presentation of elementary mathematics for juniors and seniors who are preparing to teach in elementary schools. Topics include decimal numerals, number systems, sets, and introductory algebra. A simultaneous development of teaching methods and materials may be included. Not acceptable for credit in the College of Liberal Arts and Sciences. Prerequisite: Junior standing in elementary education. 5 hours.
203. **Mathematics for Elementary Teachers.** Continuation of Mathematics 202. Topics include measurement, metric and nonmetric geometry, algebra, sets, and introduction to trigonometry, statistics, and probability. A simultaneous development of teaching methods and materials is also included. Not acceptable for credit in the College of Liberal Arts and Sciences. Prerequisite: Mathematics 202 or consent of instructor. 3 hours.
244. **Mathematical Analysis for Social Scientists.** Continuation of Mathematics 134. The calculus of the trigonometric functions, Taylor polynomials, and infinite series; analytic geometry in n dimensions, vector calculus, classical extremum problems in n variables, and Lagrange multipliers; and multiple integrals. Prerequisite: Mathematics 134 or consent of instructor. 5 hours. Students may not receive credit for Mathematics 244 and Mathematics 140, 141, or 145.
250. **Advanced Problem Solving.** Similar to but more advanced than Mathematics 150. Prerequisite: The calculus; and Mathematics 150 or consent of instructor. 1 hour. May be repeated to a maximum of 6 hours.
257. **Introduction to Numerical Analysis.** Same as Computer Science 257. Introduction to the principles and techniques of numerical mathematics for students in the physical sciences; includes topics in roundoff-error analysis, approximation of functions, derivatives and integrals, and numerical solution of nonlinear equations, ordinary differential

equations, and systems of linear equations. The computer is used extensively and a term project may be assigned. Prerequisite: A basic computer science 100-level programming course, one year of calculus, or consent of instructor. 3 hours. Students may not receive credit for both Computer Science/ Mathematics 257 and Computer Science 350.

263. **Statistics in Engineering and the Physical Sciences.** A first course in the use of statistical methods for interpreting the results of experiments; emphasis on applications to engineering and the physical sciences. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours.
290. **Individual Study.** Guided individual study of advanced topics not covered in other courses. Prerequisite: Mathematics 347 with grade of B or better, or consent of department. 2 hours. May be repeated to a maximum of 8 hours.
291. **Honors Individual Study.** Guided individual study of advanced topics not covered in other courses; for students seeking honors credit. Prerequisite: Mathematics 347 with grade of B or better, or consent of Mathematics Honors Committee. 2 hours. May be repeated to a maximum of 8 hours.
296. **Honors Seminar.** Careful study of a selected area of mathematics, carried out either deductively from axioms or inductively through problems; subject matter varies with instructor. Prerequisite: Consent of Mathematics Honors Committee. 3 hours. May be repeated to a maximum of 6 hours.
300. **The Theory of Sets and the Real Number System.** Elementary naive set theory and the development of the integers, the rational numbers, and the real numbers. Prerequisite: Mathematics 140, 141, or 145, or equivalent, or consent of instructor. 3 hours or 1 unit.
302. **Topics on Geometry.** Historical development of geometry; includes tacit assumptions made by Euclid, Euclid's Fifth Postulate and its equivalents; the discovery of non-Euclidean geometries; geometry as a mathematical structure; finite geometries; geometry as a study of invariants of set transformations; projective geometry; applications of group theory to geometry; and vector geometry. Prerequisite: Mathematics 140, 141, or 145, or equivalent, or consent of instructor. 3 hours or 1 unit.
303. **Advanced Aspects of Euclidean Geometry.** Selected topics from geometry, for example circum-circle, the nine-point circle, theorems on centroid and ortho-center, the construction of regular figures, isometries in the plane and space, rotations and translations, fixed points, ordered and affine geometries, and geometry of inversive plane. Prerequisite: Mathematics 140, 141, or 145, or equivalent, or consent of instructor. 3 hours or 1 unit.
305. **Teacher's Course.** Presents selected topics in mathematics that are related to the content of secondary school mathematics programs; provides background for enrichment topics for secondary school students; and may include, among others, the following topics: number systems, mathematical induction, number theory, probability, graph theory, Boolean algebras and their relation to computer design, ruler and compass constructions, and the geometry of complex numbers. Prerequisite: Mathematics 140, 141, or 145, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
306. **History of Calculus.** An examination of the historical origins and conceptual genesis of the concepts of the calculus. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
307. **Selected Mathematical Topics for Secondary School Teachers.** Deals with the teaching of topics in high school mathematics. Prerequisite: One year of secondary school teaching in mathematics or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
310. **Theory of Interest.** A study of compound interest and annuities; applications to problems in finance. Prerequisite: Mathematics 140, 141, or 145. 3 hours or 1 unit.
311. **Advanced Algebra.** Algebraic methods of summation of infinite series; primarily intended for students interested in actuarial science, but not restricted to such students. Prerequisite: Mathematics 140, 141, or 145, or equivalent, or consent of instructor. 3 hours or 1 unit.

313. **Combinatorial Mathematics.** Same as Computer Science 313. Permutations and combinations, generating functions, recurrence relations, inclusion and exclusion, Polya's theory of counting, and block designs. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
314. **Introduction to Set Theory and Mathematical Logic.** Supplies the set-theoretic and logical preliminaries for graduate work in mathematics; includes sets, relations, and mappings; the notions of constant and variable; the integers; cardinal and ordinal numbers; Zorn's lemma; the real numbers; informal account of the propositional calculus and first-order functional calculus; and informal account of various axiomatic theories. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
315. **Linear Transformations and Matrices.** An introductory course emphasizing techniques of linear algebra; topics include matrix operations, determinants, linear equations, vector spaces, linear transformations, eigenvalues, and eigenvectors. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
317. **Introduction to Abstract Algebra.** An introductory course in abstract algebra; includes modular arithmetic, permutations, group theory through the isomorphism theorems, ring theory through the notions of prime and maximal ideals, and additional topics such as unique factorization domains and classification of groups of small order. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
318. **Introduction to Linear Algebra.** Abstract approach emphasizing concept of linear transformation; topics include linear equations, vector spaces, linear transformation, matrices, determinants, invariant subspaces, direct sum decompositions, canonical forms, inner product spaces, and bilinear forms. Prerequisite: Mathematics 317. 3 hours or 1 unit.
319. **Applied Modern Algebra.** Sets and functions, finite-state machines, partially ordered sets, Boolean algebras, normal form of switching functions, the semigroup of a machine, and group codes. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
323. **The Elements of Geometry and Topology, I.** Introduction to geometrical techniques relevant to topology and differential geometry; curves from four viewpoints: topology, differential geometry, combinatorics, and algebraic geometry; and local differential geometry of surfaces. Prerequisite: Mathematics 343. 3 hours or 1 unit.
324. **The Elements of Geometry and Topology, II.** Continuation of Mathematics 323. Three viewpoints of surfaces are studied and interrelated: topology, differential geometry, and combinatorics (algebraic topology). Prerequisite: Mathematics 323. 3 hours or 1 unit.
327. **Introduction to Projective Geometry, I.** Prerequisite: Mathematics 315 or consent of instructor. 3 hours or 1 unit.
332. **Introduction to Set Theory and Topology.** Informal set theory, cardinal and ordinal numbers, and axiom of choice; topology of metric spaces and introduction to general topological spaces. Prerequisite: Credit or concurrent registration in Mathematics 347. 3 hours or 1 unit.
341. **Differential Equations.** A basic course in ordinary differential equations; topics include existence and uniqueness of solutions and the general theory of linear differential equations; treatment is more rigorous than that given in Mathematics 345 but not as rigorous as that given in Mathematics 349. Credit is not given for both Mathematics 341 and 345 or 349. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
342. **Differential Equations.** Deals with the theory of Fourier series and applications to solving partial differential equations. Prerequisite: Mathematics 341 or 349. 3 hours or 1 unit.
343. **Advanced Calculus.** Introductory study of vector calculus and functions of several variables; topics include directional derivatives; Jacobians; change of variables in multiple integrals; maxima and minima; line and surface integrals; theorems of Gauss, Green,

- and Stokes; infinite series; and uniform convergence. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
344. **Elementary Real Analysis.** Careful treatment of the theoretical aspects of the calculus of functions of a real variable; topics include the real number system, limits, continuity, derivatives, and the Riemann integral. Credit is not given for both Mathematics 344 and 347. Prerequisite: Mathematics 140, 141, or 145. 3 hours or 1 unit.
345. **Differential Equations and Orthogonal Functions.** Intended for engineering students and others who require a working knowledge of differential equations. Credit is not given for both Mathematics 345 and 341 or 349. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
346. **Complex Variables and Applications.** For students who desire a working knowledge of complex variables; covers the standard topics; and gives an introduction to integration by residues, the argument principle, conformal maps, Laplace transforms, and potential fields. Students desiring a systematic development of the foundations of the subject should take Mathematics 348. Credit is not given for both Mathematics 346 and 348. Prerequisite: Mathematics 343 or consent of instructor. 3 hours or 1 unit.
347. **Introduction to Higher Analysis: Real Variables.** Careful development of elementary real analysis including such topics as completeness property of the real number system; basic topological properties of n -dimensional space; convergence of numerical sequences and series of functions; properties of continuous functions; and basic theorems concerning differentiation and Riemann integration. Credit is not given for both Mathematics 344 and 347. Prerequisite: Mathematics 140, 141, or 145 (or equivalent) and junior standing; or consent of instructor. 3 hours or 1 unit.
348. **Introduction to Higher Analysis: Complex Variables.** For students who desire a rigorous introduction to the theory of functions of a complex variable; topics include Cauchy's theorem, the residue theorem, the maximum modulus theorem, Laurent series, the fundamental theorem of algebra, and the argument principle. Credit is not given for both Mathematics 346 and 348. Prerequisite: Mathematics 347. 3 hours or 1 unit.
349. **Differential Equations and Orthogonal Functions.** A more rigorous treatment of differential equations than that given in Mathematics 341 and 345. Prerequisite: Mathematics 347. 3 hours or 1 unit. Credit is not given for Mathematics 349 and 341 or 345.
351. **Topics in Applied Mathematics.** A survey course in applied mathematics for secondary school mathematics teachers; deals with topics in the application of matrices to physical and social sciences, and in the applications of Boolean algebra and game theory. Prerequisite: Consent of instructor. 3 hours or 1 unit.
352. **Multivariate Real Analysis.** Rigorous treatment of the calculus of functions of several real variables; topics covered include differentials, maxima and minima, Lagrange multipliers, transformation of multiple integrals, Jacobian's, implicit function theorems, line and surface integrals, Stokes' theorem, and vector analysis. Prerequisite: Mathematics 347. 3 hours or 1 unit.
353. **Elementary Theory of Numbers.** Topics covered include divisibility, primes, congruences, quadratic reciprocity, and Farey sequences. The course objectives are to familiarize students with mathematical proofs and to prepare them for further work in algebra and number theory. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
354. **Theory of Algebraic Numbers.** Topics include Gaussian integers and primes, polynomials, divisibility, algebraic integers, arithmetic in algebraic number fields, ideals, class numbers, and units. Prerequisite: Mathematics 317 or 353. 3 hours or 1 unit.
357. **Mathematical Models in the Social Sciences.** Use of many models drawn from the social sciences to motivate, illustrate, and give a unified development of topics in the following areas: linear algebra, graph theory, Markov chains, and linear and nonlinear systems of difference equations. Prerequisite: Mathematics 134 or equivalent. 3 hours or 1 unit.
358. **Numerical Analysis: Linear Problems.** Same as Computer Science 358. Numerical methods for linear algebra and eigenvalue problems with some applications to linear

boundary value problems for differential equations. Prerequisite: Computer Science/Mathematics 257, Mathematics 315 or 318, and Mathematics 343; or consent of instructor. 3 hours or 1 unit.

359. **Numerical Analysis: Nonlinear Problems.** Same as Computer Science 359. The development and analysis of algorithms for polynomial and spline interpolation; least squares and Chebyshev approximation; interpolatory and Gaussian quadrature; solution of systems of nonlinear equations; and the initial-value problem in ordinary differential equations. Prerequisite: Computer Science/Mathematics 257 and Mathematics 343, or consent of instructor. 3 hours or 1 unit.
361. **Introduction to Probability Theory, I.** Introduction to mathematical probability; includes the calculus of probability, combinatorial analysis, random variables, expectation, distribution functions, moment-generating functions, and central limit theorem. Prepares students for Mathematics 362 and 366. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
362. **Introduction to Mathematical Statistics.** Introduction to mathematical statistics assuming only knowledge of probability theory; includes normal sampling theory, sufficiency, best estimators, maximum likelihood estimators, confidence intervals, most powerful tests, and chi-square tests. Prerequisite: Mathematics 361. 3 hours or 1 unit.
363. **Introduction to Mathematical Statistics and Probability, I.** Introduction to mathematical statistics that develops probability as needed; includes the calculus of probability, random variables, expectation, distribution functions, central limit theorem, point estimation, confidence intervals, and hypothesis testing. Prepares students for Mathematics 364. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
364. **Introduction to Mathematical Statistics and Probability, II.** Continuation of Mathematics 363. Includes moment-generating functions, transformations of random variables, normal sampling theory, sufficiency, best estimators, maximum likelihood estimators, confidence intervals, most powerful tests, unbiased tests, and chi-square tests. Prerequisite: Mathematics 363. 3 hours or 1 unit.
365. **Analysis of Variance.** Estimation and hypotheses testing in linear models; one-, two-, and higher-way layouts; incomplete layouts; analysis of covariance; and random effects models and mixed models. Prerequisite: Credit or concurrent registration in Mathematics 315 and 362 or 364. 3 hours or 1 unit.
366. **Introduction to Probability Theory, II.** Continuation of Mathematics 361. Includes random walks, discrete and continuous time Markov chains, and special topics selected from weak stationarity, multivariate central limit theorem, probability model building, stochastic equations, martingale theory, and renewal theory. Prerequisite: Mathematics 361 or 364. 3 hours or 1 unit.
368. **Topics in Applied Statistics.** Formulation and analysis of mathematical models for random phenomena; student participation in statistical consulting; and instruction in statistical techniques as required. Prerequisite: Mathematics 363 or consent of instructor. 3 hours or 1 unit. May be taken for credit more than once with consent of instructor.
370. **Finite Differences.** Finite differences, finite integration, interpolation, difference equations, numerical integration, and iterative methods of solving equations. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
371. **Actuarial Theory, I.** Single-life mortality functions, annuities, life insurance, premiums, and reserve. Prerequisite: Mathematics 140, 141, or 145, or equivalent. 3 hours or 1 unit.
372. **Actuarial Theory, II.** Continuation of Mathematics 371. Emphasis is on multiple-life functions. Prerequisite: Mathematics 371. 3 hours or 1 unit.
373. **Combinatorial Computing.** Same as Computer Science 373. Computational aspects of algorithms for solving combinatorial problems; topics include counting and enumeration, sorting, searching, and computational problems in graph theory and algebra. Prerequisite: Mathematics 315 or equivalent, and Computer Science 121 or other

Computer Science 100-level programming course, or consent of instructor. 3 hours or 1 unit.

375. **Automata and Formal Languages, I.** Same as Computer Science 375. Alphabets, languages, and grammars; finite automata, regular expressions, and type 3 grammars; context-free languages and pushdown automata; Turing machines and unsolvability; and Post's correspondence problem and its application to context-free languages. Prerequisite: Mathematics 319 or consent of instructor. 3 hours or 1 unit.
376. **Automata and Formal Languages, II.** Continuation of Mathematics 375. Context sensitive languages and linear bounded automata; operations on languages, closure properties, and abstract families of languages; miscellaneous unsolvable problems; time-and-tape bounded Turing machines; and other topics chosen by the instructor. Prerequisite: Mathematics 375. 3 hours or 1 unit.
377. **Recursive Functions.** Computable functions; Turing computability; recursively enumerable sets; the halting problem; Rice's theorem; recursion theorem; and example of a priority argument. Prerequisite: Mathematics 375 or 314 or 317. 3 hours or 1 unit.
378. **Computer Application to Problems in Mathematics.** Same as Computer Science 378. Discussion of many problems which can be formulated mathematically and lend themselves to computer solution; problems are chosen from the following major areas: applied statistics, in particular Monte Carlo techniques and simulation; combinatorics; symbolic algebra; and game playing and decision problems. Prerequisite: Junior standing; Computer Science 121 or other Computer Science 100-level programming course, or consent of instructor. 3 hours or 1 unit.
381. **Vector and Tensor Analysis.** Prerequisite: Mathematics 343 or equivalent, or consent of instructor. 3 hours or 1 unit.
383. **Linear Programming.** Same as Computer Science 383. Systems of linear inequalities, the standard canonical and general linear problems, and simplex methods of solution. Prerequisite: One year of calculus. 3 hours or 1 unit.
384. **Nonlinear Programming.** Iterative and analytical solutions of constrained and unconstrained problems of optimization; gradient and conjugate gradient solution methods; Newton's method, LaGrange multipliers, and duality and the Kuhn-Tucker theorem; and quadratic, convex, and geometric programming. Prerequisite: Mathematics 140, 141, or 145, and a knowledge of linear algebra equivalent to Mathematics 315, or equivalent, or consent of instructor. 3 hours or 1 unit.
386. **Laplace Transforms.** Basic operation rules of Laplace transforms through the complex-inversion theorem; applications to solutions of initial and boundary value problems in differential equations; and evaluation of Cauchy integrals. Other types of transforms are considered and used for solving differential equations. Prerequisite: Mathematics 343. 3 hours or 1 unit.
388. **Mathematical Methods in Engineering and Science.** Matrices, determinants, bounds and approximations to eigenvalues, introduction to linear operator theory and inner product spaces, orthogonal expansions, and Fourier transforms. Prerequisite: Mathematics 343 or equivalent. 3 hours or 1 unit.
391. **Switching Theory.** Same as Computer Science 391 and Electrical Engineering 391. Combinational electronic and relay switching networks; two-level design methods; and pulse-mode and fundamental mode sequential networks. Prerequisite: Computer Science 264, Electrical Engineering 290, or Mathematics 319, or consent of instructor. 3 hours or 1 unit.
392. **Finite State Machines.** Same as Electrical Engineering 392 and Computer Science 392. Synchronous machines: state reduction of incompletely specified machines, series parallel decomposition, state assignment, and machine behavior; asynchronous machines: state assignment, hazards, and interacting machines. Prerequisite: Mathematics 319 and Computer Science/Electrical Engineering/Mathematics 391, or consent of instructor. 3 hours or 1 unit.
400. **General Seminar.** General seminar required of all graduate students who have passed the departmental written qualifying examination for the Ph.D. 0 credit.

401. **Second Course in Abstract Algebra, I.** Isomorphism theorems for groups; solvability of p -groups; simplicity of the alternating group on 5 letters; Sylow theorems and Jordan-Hölder theorem; principal ideal domains; Gauss' lemma; Eisenstein's criterion; fundamental theorem of Galois theory; finite fields; cyclotomic fields; and solvability of equations by radicals. Prerequisite: Mathematics 317 and 318. 1 unit.
402. **Second Course in Abstract Algebra, II.** Modules; Hilbert basis theorem; Krull-Schmidt theorem; Wedderburn theorem on semisimple rings; finitely generated modules over principal ideal domains, with applications to abelian groups and canonical forms for matrices; categories and functors; tensor products; and bilinear and quadratic forms. Prerequisite: Mathematics 401. 1 unit.
403. **Theory of Rings.** Ideal theory in commutative rings; structure of noncommutative rings. Prerequisite: Mathematics 402 or equivalent. 1 unit.
404. **Group Theory.** Structure of groups, derived groups, nilpotence and solvability, and extensions and products. Prerequisite: Mathematics 402 or equivalent. 1 unit.
405. **Algebraic Number Theory.** Further development of the theory of fields covering topics from valuation theory, ideal theory, units in algebraic number fields, ramification, function fields, and local class field theory. Prerequisite: Mathematics 402 or equivalent. 1 unit.
406. **Homological Algebra.** Definition and properties of the functors Ext and Tor ; projective, injective, and flat modules; group extensions; dimensions of rings, and Hilbert theorem on syzygies. Prerequisite: Mathematics 402 or equivalent. 1 unit.
407. **Group Representation Theory.** Representation of groups by linear transformations, group algebras, character theory, and modular representations. Prerequisite: Mathematics 401 and 402, or equivalent. 1 unit.
408. **Lie Algebras.** Examples of Lie algebras (low dimensions, Lie algebras of Lie groups, free algebras, and universal enveloping algebra); Poincaré-Birkhoff-Witt theorem; nilpotent and solvable algebras; Cartan subalgebras; structure of semisimple algebras; real forms; and representations. Prerequisite: Mathematics 401; credit or concurrent registration in Mathematics 402. 1 unit.
410. **Logical Foundations of Mathematics.** Development of the predicate calculus of first order as a framework for metamathematical investigations; consideration of the completeness and incompleteness theorems of Gödel. Prerequisite: Mathematics 314 or 317, or consent of instructor. 1 unit.
411. **Model Theory.** Elements of model theory, including Löwenheim-Skolem theorems, categoricity, ultraproducts, and applications to algebra; decidability theory using both model theoretic methods and elimination of quantifiers. Prerequisite: Mathematics 410. 1 unit.
412. **Recursive Function Theory.** Introductions to recursive functions; study of properties of recursive and recursively enumerable sets; degrees of unsolvability; and the implications of the Church-Turing thesis. Prerequisite: Mathematics 410 or consent of instructor. 1 unit.
413. **Set Theory.** Zermelo-Fraenkel axiomatic set theory; consideration of basic concepts in set theory such as ordinal, cardinal, and rank. Prerequisite: Mathematics 410. 1 unit.
414. **Advanced Topics in Logic.** Prerequisite: Mathematics 410; consent of instructor. 1 unit.
415. **Advanced Topics in the Theory of Groups.** Prerequisite: Consent of instructor. 1 unit.
416. **Advanced Topics in Abstract Algebra.** Prerequisite: Consent of instructor. 1 unit.
417. **Category Theory.** Categorical structure of mathematics; categories, functors, and natural transformations; limits, representable functors, and functor categories; adjoint functor theorems and Kan extensions; algebraic theories and tripleable categories; and numerous examples from algebra, topology, and analysis. Prerequisite: Credit or concurrent registration in Mathematics 402 and 435. 1 unit.
418. **Graph Theory.** Structure of graphs; planarity and colorability of graphs; matrices associated with a graph; and automorphism group of a graph. Prerequisite: Mathematics 313, 317, or 319, or equivalent. 1 unit.

419. **Applied Modern Algebra.** A study of polynomial rings and finite fields with applications to the construction and decoding of codes, including BCH codes, correction of burst errors, codes from geometry, codes from Hadamard matrices, and Shannon's fundamental theorem. Prerequisite: Mathematics 317 or 319, or equivalent; or consent of instructor. 3 hours or 1 unit.
422. **Algebraic Geometry.** 1 unit.
423. **Differentiable Manifolds.** Definition and properties of differentiable manifolds and maps, introducing vector fields, tangent bundles, differential forms, exterior derivatives, and foliations. Prerequisite: Mathematics 323 or 381, or consent of instructor. 1 unit.
424. **Riemannian Geometry.** Local and global properties of Riemannian manifolds. Prerequisite: Mathematics 423. 1 unit.
425. **Linear Analysis on Manifolds, I.** Study of topological invariants of differentiable and complex manifolds. Prerequisite: Mathematics 423 and 431, or consent of instructor. 1 unit.
426. **Linear Analysis on Manifolds, II.** Continuation of Mathematics 425. Prerequisite: Mathematics 425. 1 unit.
427. **Lie Groups.** Study of groups which are also differentiable manifolds. Prerequisite: Mathematics 423. 1 unit.
428. **Topics in Geometry.** Prerequisite: Consent of instructor. 1 unit.
430. **Elementary Geometry from a Modern Viewpoint.** Designed for secondary school teachers of mathematics; primary purpose is to discuss critically the logical structure and content of Euclidean geometry from the modern point of view; and consideration is given to the historical development of the modern approach. Prerequisite: One year of experience in the teaching of high school mathematics; consent of instructor. 1 unit.
431. **Algebraic Topology, I.** Homological algebra techniques, simplicial and singular homology, fundamental group and covering spaces, and applications. Prerequisite: Mathematics 318 and 332; concurrent registration in Mathematics 401 or consent of instructor. 1 unit.
432. **Algebraic Topology, II.** Continuation of Mathematics 431. Axiomatic homology theory, fibrations and cofibrations, CW-complexes, cohomology products, and other topics. Prerequisite: Mathematics 431; concurrent registration in Mathematics 402. 1 unit.
433. **Fiber Spaces and Characteristic Classes.** Continuation of Mathematics 432. Study of fiber bundles and their associated characteristic classes, applications to geometric problems. Prerequisite: Mathematics 432. 1 unit.
434. **Polyhedral Topology.** Topology in the piecewise linear category. Prerequisite: Mathematics 431 and 435. 1 unit.
435. **General Topology, I.** Study of topological spaces and maps, including Cartesian products, identifications, connectedness, compactness, uniform spaces, and function space. Prerequisite: Mathematics 332 or consent of instructor. 1 unit.
436. **General Topology, II.** Continuation of Mathematics 435. Prerequisite: Mathematics 435. 1 unit.
438. **Topics in Topology.** Prerequisite: Consent of instructor. 1 unit.
439. **Seminar in Topology.** Prerequisite: Consent of instructor. 1 unit.
440. **Theory of Functions of a Complex Variable, I.** Topics include the Cauchy theory, harmonic functions, entire and meromorphic functions, and the Riemann mapping theorem. Prerequisite: Mathematics 346 and 347, or Mathematics 348. 1 unit.
441. **Real Analysis, I.** Lebesgue measure on the real line; integration and differentiation of real valued functions of a real variable; and additional topics at discretion of instructor. Prerequisite: Mathematics 347 or equivalent. 1 unit.
442. **Real Analysis, II.** Abstract measure theory; integration on general measure spaces; and introduction to functional analysis. Prerequisite: Mathematics 441. 1 unit.
443. **Ordinary Differential Equations.** Existence, uniqueness, and continuation of solutions; topics selected from the following: the theory of linear differential operators, Sturm-Liouville theory, stability theory, and qualitative theory of differential equations. Prerequisite: Mathematics 347; a first course in ordinary differential equations. 1 unit.

444. **Partial Differential Equations.** Prerequisite: Consent of instructor. 1 unit.
445. **Theory of Functions of a Complex Variable, II.** Continuation of Mathematics 440. Topics include subharmonic functions, Nevanlinna theory, analytic continuation and Riemann surfaces, and univalent functions. Prerequisite: Mathematics 440. 1 unit.
446. **Hilbert Space.** Geometrical properties of Hilbert spaces; linear operators; and the spectral theory for self adjoint and related operators. Prerequisite: Mathematics 442. 1 unit.
447. **Banach Spaces.** Geometrical properties of Banach spaces; bounded linear operators; applications to analysis; and linear topological spaces. Prerequisite: Mathematics 442. 1 unit.
448. **Harmonic Analysis.** Locally compact groups; Haar measure; Fourier analysis; and Tauberian theorems. Prerequisite: Mathematics 442. 1 unit.
449. **Banach Algebras.** Properties of Banach algebras and their representation as algebras of continuous functions or algebras of bounded linear operators; applications to spectral theory and harmonic analysis. Prerequisite: Mathematics 446 or 447. 1 unit.
450. **Ordered Spaces.** Study of ordered topological vector spaces and vector lattices and positive operators. Prerequisite: Mathematics 447. 1 unit.
451. **Theory of Probability.** Prerequisite: Mathematics 442. 1 unit.
452. **Theory of Probability.** Prerequisite: Mathematics 451. 1 unit.
453. **Analytic Theory of Numbers, I.** Problems in number theory treated by methods of analysis; topics chosen from prime number theory, Riemann zeta function, sieve methods, diophantine approximation, metric theory, partitions, lattice points, Waring's problem, and asymptotic properties of arithmetical functions. Prerequisite: Mathematics 317 or 348. 1 unit.
454. **Analytic Theory of Numbers, II.** Continuation of Mathematics 453. Prerequisite: Mathematics 453. 1 unit.
455. **Mathematical Methods of Physics.** Introduction to inner product spaces, linear operators, and Schwartz distribution theory; Green's functions for ordinary differential equations; and integral equations: Hilbert-Schmidt theory and Sturm-Liouville theory. Prerequisite: Mathematics 343 and 346. 1 unit.
456. **Mathematical Methods of Physics.** Calculus of variations: Euler-Lagrange theory, Rayleigh-Ritz method, and Dirichlet principle; integral transform methods and separation of variables; and approximation methods: finite differences, Galerkin's method, and asymptotic expansions. Prerequisite: Mathematics 455 or consent of instructor. 1 unit.
457. **Numerical Solution of Ordinary Differential Equations.** Same as Computer Science 457. Derivation and rigorous analysis of one-step, multistep, and extrapolation methods, variable stepsize, error estimation, stiff equations, and boundary value problems. Prerequisite: Computer Science/Mathematics 359 and Mathematics 315 or 318, or consent of instructor. 1 unit.
458. **Topics in Numerical Analysis.** Same as Computer Science 458. Prerequisite: Consent of instructor. 1 unit. May be repeated.
460. **General Relativity and Cosmology.** Same as Astronomy and Physics 424. Foundations of general relativity and applications to problems of astrophysics; includes gravitation as geometry, mathematical tools, Einstein's equations, relativistic stellar structure, black holes and gravitational collapse, cosmology, gravitational radiation, and experimental tests. Prerequisite: Physics 322, 411, 412, and 442, or equivalent; or consent of instructor. 1 unit.
461. **Applied Stochastic Processes.** Introduction to topics such as spectral analysis, filtering theory, and prediction theory of stationary processes; Markov chains and Markov processes. Prerequisite: Mathematics 346 and 347. 1 unit.
463. **Information Theory.** Same as Computer Science 463 and Electrical Engineering 463. Mathematical models for information channels and sources; existence theorems for and construction of error-correcting codes. Prerequisite: Mathematics 361. 1 unit.

465. **Topics in Automata Theory.** Same as Computer Science 465 and Electrical Engineering 465. Prerequisite: Mathematics 392 or consent of instructor. 1 unit.
466. **Topics in Ordinary Differential Equations.** Introduction to current research in such areas as stability and asymptotic behavior of solutions; topological dynamics; numerical methods; and boundary value problems and spectral theory of differential operators. Prerequisite: Consent of instructor. 1 unit.
468. **Topics in Analysis.** Prerequisite: Consent of instructor. 1 unit.
469. **Seminar in Analysis.** Prerequisite: Consent of instructor. 1 unit.
470. **Statistical Decision Functions.** Statistics from the point of view of decision making; introduction to the theory of games; minimax and other decision functions; techniques for determining optimal decision functions; and applications to nonsequential and sequential decision making in practice. Prerequisite: Consent of instructor. 1 unit.
473. **The Theory of Testing Hypotheses.** Methods of constructing statistical tests which have optimum properties in small samples; the principles of invariance, unbiasedness, and similarity; and most stringent tests and minimax tests. Prerequisite: Consent of instructor. 1 unit.
474. **The Theory of Estimation.** Methods of constructing uniformly minimum variance unbiased estimates; minimax estimation; and estimation by confidence sets. Prerequisite: Consent of instructor. 1 unit.
475. **Topics in Combinatorics.** Same as Computer Science 475. Selected topics from graph theory, algebraic coding theory, enumerative analysis, combinatorial design, and discrete optimization; includes other topics of current research interest, such as Ramsey's Theorem, Sperner's Theorem, Dilworth's Theorem, and the theory of matroids. Prerequisite: Computer Science 273, Computer Science/Mathematics 313, or consent of instructor. 1 unit.
478. **Topics in Statistics.** Prerequisite: Consent of instructor. 1 unit.
487. **Theory of Approximation.** Same as Computer Science 487. General approximation theory in normed linear spaces; primary emphasis on functions defined on an interval, and periodic functions; existence and uniqueness theorems; characterization of Chebyshev approximants; degree of approximation; interpolation with emphasis on the quality of interpolants as approximants; and use of approximations in computing. Prerequisite: Mathematics 318 and 348, or consent of instructor. 1 unit.
488. **Topics in Applied Mathematics.** Prerequisite: Consent of instructor. 1 unit.
489. **Seminar in Applied Mathematics.** Prerequisite: Consent of instructor. 1 unit.
490. **Reading Course.** Prerequisite: Consent of instructor. 1 to 2 units.
499. **Thesis Research.** Prerequisite: Consent of instructor. 0 to 4 units.

MECHANICAL AND INDUSTRIAL ENGINEERING

(Including Bioengineering)

Head of Department: Professor B. T. Chao

Department Office: 144 Mechanical Engineering Building, Urbana

Bioengineering

270. **Individual Study.** Individual projects. Prerequisite: Consent of instructor. 0 to 4 hours.
306. **Mechanical Properties of Biological Materials.** Mechanical properties of biological materials important for bioengineering applications; required term papers and oral reports based on literature survey and/or laboratory projects. Prerequisite: Chemistry 131, Physics 108, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.

308. **Implant Materials for Medical Applications.** Review of the biological and engineering aspects of implant materials; characterization of major classes of promising implant materials; and problems of tissue-implant interaction and surgical problems involved in implant work. Laboratories and independent projects illustrate the use of implant materials. Prerequisite: Chemistry 102; Physics 102 or 108, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
370. **Special Topics in Bioengineering.** Lecture and discussion relating to new areas of interest. Prerequisites will be announced in the *Timetable* as topics vary. 0 to 4 hours, or 0 to 1 unit. May be repeated as topic varies.
375. **Modeling of Bio-Systems.** Same as Electrical Engineering 375. Application of linear systems theory and feedback control systems analysis to biological systems; sensory receptors, neuro-muscular system models, control of eye movement, the pupil control system, man-machine interactions, parameter identification in biological systems; and optional project laboratory. Prerequisite: General Engineering 222, Mechanical Engineering 265, Aeronautical and Astronautical Engineering 271, or Electrical Engineering 308 or 310; or consent of instructor. 3 or 4 hours, or $\frac{3}{4}$ or 1 unit.
377. **Biomedical Instrumentation.** Same as Electrical Engineering 377. Introduction to engineering aspects of the detection, acquisition, processing, and display of signals from living systems; emphasizes biomedical transducers for measurements of biopotentials, pH, pCO₂, pO₂, force, displacement, pressure, flow, temperature, and impedance; and optional laboratory with animal experiments. Prerequisite: Electrical Engineering 244 and 260, or consent of instructor. 3 or 4 hours, or $\frac{3}{4}$ or 1 unit.
424. **Ultrasonic Biophysics.** Same as Biophysics 424. Ultrasonic propagation in, and interaction with, biological media at macromolecular, cellular, and organismic levels of structure; meets during the first quarter of the spring semester in alternate years. Prerequisite: Graduate standing in biophysics or consent of instructor. $\frac{1}{4}$ unit.
498. **Individual Study.** Individual projects. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 2 units.

Industrial Engineering

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
232. **Methods-Time Analysis.** Principles of motion economy affecting the design of a product or service; the effective use of human effort as related to the tools and equipment used in manufacturing and commercial endeavors; reasons for time study and the principles of determining time standards; study of standard data and other specific types of micromotion standards; and applications of all phases of the studies to specific cases. Prerequisite: Mechanical Engineering 185 or equivalent; junior standing. 3 hours.
238. **Analysis of Data.** Nature of probabilistic models for observed data; discrete and continuous distribution function models; inferences on universe parameters based on sample values; and introduction to control charts, acceptance sampling, and measurement theory. Prerequisite: Completion of basic calculus. 3 hours.
282. **Process Planning and Economy in Manufacturing.** Principles of engineering economy and their applications to manufacturing problems; studies of typical manufacturing processes and their economic factors; and exercises in planning processes for maximum efficiency. Prerequisite: Mechanical Engineering 185 or equivalent; senior standing in engineering. 3 hours.
286. **Operations Analysis.** The development and application of schematic and mathematical models for analysis and decision making relative to the task of coordinating manufacturing activities at optimum levels of economy and efficiency; stress on linear programming. Prerequisite: Industrial Engineering 232 and 238, or consent of instructor. 3 hours.
287. **Job Evaluation and Wage Incentives.** Study of job evaluation techniques and wage incentive systems; problems of installing and maintaining job and position evaluation

systems in industrial organizations. Prerequisite: Industrial Engineering 232 or equivalent; senior standing. 3 hours.

288. **Industrial Systems Analysis and Design.** Application of systems approach to the analysis of interacting industrial procedures; development of decision rules based on analytical treatment of system variables rather than by judgmental methods; and application of computers to the total synthesis and evaluation of operational procedures. Prerequisite: Credit or concurrent registration in Industrial Engineering 282 and 286. 3 hours.
291. **Seminar.** A series of lectures by faculty and invited authorities from the profession concerning the ethics and practices of industrial engineering in their relationship to other fields of engineering, economics, and the problems of society. Prerequisite: Senior standing in industrial engineering; must be taken first semester of senior year. 0 credit.
293. **Special Projects.** Experimental and analytical investigation in industrial engineering research. Prerequisite: Senior standing in industrial engineering; consent of head of department. 3 hours.
296. **Honors Project.** Special project or reading course for James Scholars in engineering. Prerequisite: James Scholar in engineering; consent of instructor. 1 to 4 hours.
297. **Honors Seminar.** Special lecture sequence and/or discussion groups arranged each semester to bring James Scholars in engineering into direct contact with the various aspects of engineering practice and philosophy. Prerequisite: James Scholar in engineering; consent of instructor. 1 to 4 hours.
299. **Thesis.** Investigation of special subjects and preparation of thesis embodying report on investigation, review of literature, and discussion of results. Prerequisite: Industrial Engineering 293 or 296. 3 hours.
305. **Principles of Ergonomics.** Same as Physiology and Physical Education 305. Concepts and design criteria to achieve optimum mutual adjustment of man and his work; consideration of such topics as static and dynamic forces on the human frame; response to environmental stress (heat, vibration, noise); vigilance and fatigue; and man-machine systems. Prerequisite: Senior standing; consent of instructor. 4 hours or 1 unit.
306. **Quantitative Methods in Ergonomics.** Same as Physiology and Physical Education 306. Laboratory problems and discussion on measurements of the physical and mental capacities and limitations of human beings in relationship to the stresses and demands of working environments; familiarization with techniques and tools such as assessment of human energy expenditures on an industrial job, use of seating research chair, and high-speed and time lapse photography. Student teams select about six problems from a list of topics, or they develop problems of special interest to the team. Prerequisite: Industrial Engineering 305. 4 hours or 1 unit.
332. **Standard Time Systems.** The study of development, uses, and limitations of standard time data and predetermined time systems. Prerequisite: Industrial Engineering 232. 3 hours, or $\frac{3}{4}$ or 1 unit.
334. **Introduction to Reliability Engineering.** Same as General Engineering 334. An introduction to concepts in engineering design, testing, and management for highly reliable components and systems. Prerequisite: Industrial Engineering 238 or Mathematics 361, or equivalent with consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
335. **Industrial Quality Control.** Control charts for attributes and variables; modified control chart techniques; acceptance sampling for attributes and variables; relationship to design, production, and procurement; quality cost analysis; military standards practice; survey and reports of current quality literature; and management of quality programs. Prerequisite: Industrial Engineering 238 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
336. **Design and Analysis of Industrial Experimentation.** Randomized blocks, t-tests, and factorial and fractional factorial designs; concepts of randomization, blocking, screening, and confounding; second-order designs, response surface methodology, and evolutionary operation; and introduction to mechanistic model building and nonlinear estimation. All topics are treated through engineering applications and case studies.

Prerequisite: Industrial Engineering 238 or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.

350. **Manufacturing Process and Tool Design.** Study of and exercises in the design of manufacturing processes and tools for maximum efficiency; utilization of computer techniques in the design of manufacturing processes and tools. Prerequisite: Industrial Engineering 282 or undergraduate course in engineering economy. 3 hours, or $\frac{3}{4}$ or 1 unit.
355. **Numerical Control of Manufacturing Processes.** Study of numerical control systems, manufacturing processes, principles and practices basic to numerical control, and programming methodology for numerical control. Prerequisite: Mechanical Engineering 185 or consent of instructor; background in computer technology. 3 hours, or $\frac{3}{4}$ or 1 unit.
357. **Safety Engineering.** Study of engineering principles applied to industrial accident prevention; safe plant layout; safety in maintenance; boilers and pressure vessels; design and application of machine guards; material handling and storage; hand and power tools; welding hazards; electrical hazards; flammable liquids and fire protection; industrial health engineering; and toxic materials. Prerequisite: Senior standing in engineering or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
358. **Problems in Safety Engineering.** Extended and intensified study of specific safety problems; study of industrial safety procedures and methods of application; provides sound knowledge of accident prevention principles and applications for the student interested in entering the field of safety engineering in industry. Prerequisite: Industrial Engineering 357 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
386. **Industrial Engineering Analysis.** Analysis and development of analytical techniques for the solution of problems in industrial engineering; application of statistical methods to uncertainty problems; analysis of linear programming techniques appropriate to the solution of allocation problems dealing with materials, money, men, and machines; and queueing theories applied to maintenance and inventories. Prerequisite: Industrial Engineering 286 and Mathematics 263, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
393. **Special Problems.** Study of advanced problems related to industrial engineering. Prerequisite: Senior standing or consent of instructor. 1 to 4 hours, or $\frac{1}{2}$ to 1 unit.
401. **Scientific Management, I.** A study of modern management principles on the basis of quantitative methods, concentrating on such operation research techniques as nonlinear and dynamic programming and queueing theory. Prerequisite: Industrial Engineering 386 and Mathematics 361, or consent of instructor. 1 unit.
402. **Scientific Management, II.** A systems approach to industrial problems involving inventory control, scheduling and line balancing, and maintenance and investment theory; application of formally accumulated knowledge of operation research techniques. Problems from industry are assigned to small teams of students. Prerequisite: Business Administration 401 or Industrial Engineering 401; background in computer technology or consent of instructor. 1 to 1 $\frac{1}{2}$ units.
416. **Design of Construction and Industrial Operations, I.** Same as Civil Engineering 416. Conceptual development of a systems design procedure for optimal design of construction and industrial operations; general forms required for critical path networks, linear programs, theory of queues, and inventory models required for systems design; and design evaluation and control models. Prerequisite: Bachelor of Science in civil or industrial engineering; credit or concurrent registration in Mathematics 363; or consent of instructor. 1 unit.
417. **Design of Construction and Industrial Operations, II.** Same as Civil Engineering 417. Continuation of Industrial Engineering 416. Prerequisite: Industrial Engineering 416 or Civil Engineering 416; credit or concurrent registration in Mathematics 315; or consent of instructor. 1 unit.
454. **Production Engineering.** Advanced consideration of production engineering principles as related to cost analysis and reduction, control of flow of work in manufacture, evaluation of performance against standard, and compensation; special investigations. 1 unit.

458. **Laboratory Investigations in Industrial Engineering.** Special investigations of such problems as optimization of operations, programming systems, work standards, plant layout, and flow of materials. $\frac{1}{2}$ to 1 $\frac{1}{2}$ units.
473. **Ergonomics Seminar.** Same as Physiology 473 and Physical Education 473. In-depth exploration of topics in ergonomics such as effects of vibration on human performance, biomechanics of the hand, and functional dimension. Prerequisite: Industrial Engineering 306 or consent of instructor. $\frac{1}{2}$ unit.

Mechanical Engineering

185. **Materials Processing and Production Technology.** Technical aspects of manufacturing processes; principles of metal casting, welding, and other processes involving application of heat; mechanics of chip formation; cold forming processes; and conventional and nonconventional metal removal processes. Laboratory experiments and reports. Prerequisite: Chemistry 102; Physics 106; credit or concurrent registration in Mathematics 140, 141, or 145. 4 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
205. **Thermodynamics.** Introduction to classical thermodynamics through the second law; system and control volume analyses of thermodynamic processes; irreversibility and availability; relations among thermodynamics properties; and discussion of microscopic aspects. Prerequisite: Mathematics 140, 141, or 145; Physics 107. 3 hours.
206. **Thermodynamics.** Analysis of processes and systems for power generation and refrigeration; design cases including compressors, pumps, and turbines; mixing, combustion, and heat exchange; and modelling, power cycles, air conditioning, refrigeration, and cryogenics systems. Prerequisite: Mechanical Engineering 205 or 207. 3 hours.
207. **Thermodynamics.** Energy and its transformations; properties of thermodynamic media, including kinetic theory analysis; thermodynamic processes of open and closed systems; reversibility and limitations; entropy and the second law; thermodynamics temperature scales; and second law analysis of chemically reactive systems. Prerequisite: Mathematics 140, 141, or 145; Physics 107. 3 hours.
209. **Thermodynamics and Heat Transfer.** Thermodynamic analysis of energy transfer and transformation; properties of simple working substances; analysis of open and closed systems, direct and reversed cycles, and processes involving transfers of mass and energy; and basic laws of heat transfer. Prerequisite: Mathematics 140, 141, or 145; Physics 107. 3 hours.
210. **Introduction to Engineering Experimentation.** Design and planning of engineering experiments on the basis of scientific analysis; execution of basic engineering experiments using fundamental measurement instruments and techniques; analysis, correlation, and evaluation of experimental data using mathematical and statistical concepts; and introduction and utilization of analog and digital computer methods. Prerequisite: Concurrent registration in Mathematics 345 and Mechanical Engineering 220. 3 hours.
211. **Introductory Gas Dynamics.** Introduction to dynamics; special emphasis on the theory and engineering applications of compressible high velocity flows. Prerequisite: Mathematics 345, Physics 107, and credit or registration in Mechanical Engineering 205. 3 hours.
213. **Heat Transfer.** Principles and application of heat transfer by conduction, convection, and thermal radiation. Prerequisite: Mechanical Engineering 211. 3 hours.
220. **Mechanics of Machinery.** Linkages, cams and gears, velocities, accelerations, inertia forces, vibrations, critical speeds, balancing of engines, and gyroscopes. Prerequisite: Theoretical and Applied Mechanics 154 or 156, or concurrent registration in Theoretical and Applied Mechanics 211; credit or concurrent registration in Computer Science 101. 4 hours.

224. **Machine Analysis and Design.** Application of mathematics, material sciences, and engineering mechanics to problems in analysis and design of machine components; considers function, production, and economic factors of design; and includes fasteners, springs, shafting, and power transmission. Prerequisite: Mechanical Engineering 220 and Theoretical and Applied Mechanics 221. 3 hours.
234. **Heat Treatment of Metals.** Principles of crystal structure in metals; plastic deformation and strengthening mechanisms; application of principles to heat-treating processes and the interrelation among process, microstructure, and physical properties of metals; hardenability and special hardening processes; and selection and heat treatment of metals based on performance requirements. Prerequisite: Theoretical and Applied Mechanics 221. 3 hours.
250. **Thermal Science Laboratory.** Basic experiments in thermodynamics, gas dynamics, and heat transfer and their applications; experiments selected to introduce pertinent instrumentation and experimental techniques, and to further the understanding of fundamentals via physical observations. Prerequisite: Mechanical Engineering 205 and 213. 3 hours.
254. **Heat Transfer and Gas Dynamics.** Principles and applications of heat transfer; basic concepts of compressible fluid flow. Prerequisite: Mechanical Engineering 205; credit or concurrent registration in Theoretical and Applied Mechanics 235. 3 hours.
257. **Gas Turbines.** Theory, analysis, and performance of gas turbines; thermodynamic cycle analysis; performance parameters; centrifugal and axial compressors; axial flow turbines; and basic laboratory work involving fundamental variables and their effects on performance. Prerequisite: Mechanical Engineering 206 and 211. 3 hours.
260. **Air Flow and Conditioning.** Synthesis of principles of fluid mechanics, heat transfer, and thermodynamics in the flow and conditioning of air; combined heat- and mass-transfer relations for the air-water vapor system; and applications to the engineering design of heating, ventilating, air conditioning, and other process-industry systems. Prerequisite: Mechanical Engineering 206, 211, and 213. 3 hours.
265. **Principles of Control Systems.** Introduction to servomechanisms and control systems; modeling of dynamic elements, linearization, and block diagram algebra; steady state, transient response and frequency response of control systems; and stability criteria, design, compensation, and performance characteristics. Prerequisite: Junior standing in engineering or consent of instructor. 3 hours.
271. **Machine Analysis and System Design.** Application of mathematics, material sciences, and engineering mechanics to problems in analysis and design of machine components; considers function, production, and economic factors of design; and includes gearing, brakes, shafting, critical speeds, lubrication, and design project. Prerequisite: Mechanical Engineering 224. 3 hours.
275. **Creativity in Engineering Design.** Study of engineering systems to show the creative use of scientific principles and design procedures; survey of natural laws and examples of their creative application; and introduction to methods for promoting creativity in engineering. Prerequisite: Mechanical Engineering 271. 3 hours.
284. **Welding Engineering.** Fundamentals of welding and metallurgical effects of temperature cycles involved; physical effects of energy input rates and welding processes on mechanical properties; residual stresses and distortion control; design and economics of welded structures; and laboratory involving welding, physical tests, and metallurgical study of welded joints. Prerequisite: Mechanical Engineering 234 or equivalent; senior standing. 3 hours.
291. **Seminar.** A series of lectures by faculty and invited authorities from the profession concerning the ethics and practices of mechanical engineering in their relationship to other fields of engineering, economics, and the problems of society. Prerequisite: Senior standing in mechanical engineering; must be taken first semester of senior year. 0 credit.
293. **Special Projects.** Experimental and analytical investigation in mechanical engineering

- research. Prerequisite: Senior standing in mechanical engineering; consent of head of department. 3 hours.
296. **Honors Project.** Special project or reading course for James Scholars in engineering. Prerequisite: James Scholar in engineering; consent of instructor. 1 to 4 hours.
297. **Honors Seminar.** Special lecture sequence and/or discussion groups arranged each semester to bring James Scholars in engineering into direct contact with the various aspects of engineering practice and philosophy. Prerequisite: James Scholar in engineering; consent of instructor. 1 to 4 hours.
299. **Thesis.** Investigation of special subjects and preparation of thesis embodying report on investigation, review of literature, and discussion of results. Prerequisite: Mechanical Engineering 293 or 296. 3 hours.
301. **Thermodynamics.** Basic considerations of the three laws of thermodynamics; elementary statistical principles for the prediction of properties of pure substances and mixtures; transport properties; and electric and magnetic systems. Prerequisite: Mechanical Engineering 206 or equivalent; consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
302. **Nuclear Power Engineering.** Same as Nuclear Engineering 302. Principles of release and utilization of fission energy in nuclear power engineering; includes such topics as fission processes and controlled chain reactions; nuclear reactor types, design principles, and operational characteristics; power reactor design criteria; radiation hazards and radioactive waste treatment; economics; and other applications such as propulsion and research reactors. Prerequisite: Consent of instructor. 3 hours or 1 unit.
303. **Dynamics of Aerosols and Hydrosols.** Same as Civil Engineering 359. Theory and application of the basic relations of fluid dynamics, thermodynamics, and heat transfer to the motion of aerosols and hydrosols, with application to problems in air and water pollution. Prerequisite: Senior or graduate standing. 3 hours or 1 unit.
305. **Thermodynamics of High-Velocity Flow.** The thermodynamics of gases during high-velocity flow within enclosed channels using Mach number as the fundamental variable; analyses of the basic flow equations, effects of friction, and plane shock theory; and application to thermodynamic cycles involving nozzles, diffusers, compressors, combustion, and turbines. Prerequisite: Mechanical Engineering 205 and 211, or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
306. **Industrial Heat Transfer.** Theory and application of numerical, analogical, and experimental methods to selected heat transfer problems; application of principles of convection, condensation, and boiling heat transfer to design of heat exchange equipment. Prerequisite: Undergraduate courses in fluid mechanics and heat transfer, or consent of instructor. 4 hours or 1 unit.
311. **Instrumentation and Measurements.** Same as Agricultural Engineering 311. Accuracy, precision, and statistical consideration of measurement data; dynamics of measurement; displacement, velocity, acceleration, force, torque, pressure, and temperature measurements; mechanical impedance; measurements on fluids; and instrumentation systems. Prerequisite: Senior standing in engineering or science. 3 or 4 hours, or $\frac{3}{4}$ or 1 unit.
312. **Modern Control Theory.** The concept of state; state-space representation of systems; transfer function decomposition and state-variable diagrams; state response of continuous and discrete-data systems; determination of the transition matrix; diagonalization; state response of time-varying systems; controllability and observability; stability and Lyapunov's method; and introduction to optimization and design. Prerequisite: Mechanical Engineering 265 or equivalent, or consent of instructor. 4 hours or 1 unit.
314. **Lubrication.** The theoretical basis of lubrication, hydrodynamic bearing theory, and properties of lubricants; lubrication methods and appliances; and study of the lubrication requirements of machines of many kinds. Prerequisite: Undergraduate courses in machine design and fluid mechanics. 3 hours, or $\frac{3}{4}$ or 1 unit.
321. **Refrigeration and Cryogenics.** The theory of operation and the design of equipment for the production of low temperatures from below ambient down to near absolute zero; applications to industrial, consumer, aerospace, medical, and various research

uses. Prerequisite: Mechanical Engineering 205, 211, and 213, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.

323. **Design of Thermal Systems.** Selection of components in fluid- and energy-processing systems to meet system performance requirements; computer-aided design; system simulation; optimization techniques; and investment economics and statistical combinations of operating conditions. Prerequisite: Mechanical Engineering 206, 211, and 213. 3 hours, or $\frac{3}{4}$ or 1 unit.
331. **Internal Combustion Engines.** Study of the fundamental principles underlying the theory and analysis of reciprocating internal combustion engines, fuels, carburetion, combustion, exhaust emissions, detonation, fuel injection, and factors affecting performance; basic laboratory work involving measurements of effects of variables on performance. Prerequisite: Credit or registration in Mechanical Engineering 206, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
332. **Theory of Internal Combustion Engines.** Analysis of internal combustion engines, including thermodynamics, combustion and effects of mixtures, chemical equilibrium and dissociation, exhaust emissions and air pollution, flow through valves, breathing, supercharging and turbocharging, lubrication, friction, and combustion chamber design. Prerequisite: Mechanical Engineering 331 or equivalent, or consent of instructor. 3 hours or 1 unit.
333. **Air Pollution and Combustion.** Same as Aeronautical and Astronautical Engineering 335 and Civil Engineering 358. Natural and man-made pollutants in the atmosphere; fundamentals of stoichiometry, reaction kinetics, and chemical equilibrium as applied to pollutants and their reactions in the air; and all combustion devices which make major contributions to air pollution, and current and possible control techniques for these devices. Prerequisite: Chemistry 102 and Mechanical Engineering 205 or 207, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
335. **Power Systems Engineering and Economy.** Application of thermodynamics principles and fluid flow and heat transfer processes to power systems; determination of system characteristics and methods to satisfy these requirements with awareness of economic factors and ecological considerations. Prerequisite: Mechanical Engineering 206, 211, and 213, or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
336. **Automotive Vehicle Dynamics.** Introduction to the dynamics and control of automotive multidegree of freedom systems; the development and solution of governing equations for both steady state and transient conditions by computer simulation techniques; investigation of the performance, handling, and safety aspects of vehicles and their interaction with external and internal interfaces; examination of the influence of tires, suspension, steering, and aerodynamic forces; and laboratory experiments and demonstrations. Prerequisite: Mechanical Engineering 265 or equivalent, or consent of instructor. 4 hours or 1 unit.
341. **Engineering Analysis and Design.** Correlation of previously acquired design experience with the creative problem of synthesis and analysis that depend upon design judgment. Prerequisite: Mechanical Engineering 271 or senior standing, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
342. **Kinematic Analysis and Synthesis.** Geometry of constrained motion; application of mathematical and other techniques to the kinematic analysis and synthesis of mechanisms. Prerequisite: Undergraduate course in kinematics and senior standing, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
343. **Dynamics of Machinery.** A course complementary to the undergraduate course; emphasis on the analytical approach to the study of dynamic forces in machines, balancing, critical speeds, shaft vibration, governors, and gyroscopes. Prerequisite: Mechanical Engineering 220 and senior standing, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
344. **Introduction to Optimal Mechanical Design.** Optimal design of mechanical elements and systems; stresses problem formulation, emphasizing derivation and solution of governing equations; and includes choice of appropriate optimization techniques and sen-

sitivity analysis. Topics range from unconstrained single-parameter optimization of mechanical elements to constrained multi-parameter optimization of systems of mechanical elements. Prerequisite: Mechanical Engineering 224 or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.

- 348. The Air Pollution System.** Same as Agricultural Engineering, Civil Engineering, Environmental Studies, General Engineering, Geography, Urban and Regional Planning, and Veterinary Medical Science 348. Synthesis of current concepts on air pollution sources, meteorological dispersion, health effects, economic damage, and the political, legal, planning, and engineering implications for control and enforcement. In Part I, current concepts and applications utilizing recent information are presented. In Part II, implications are examined in small group discussions of several contemporary societal problems. Prerequisite: Senior or graduate standing. 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit. Consent of instructor is required for those students who wish to take this course for 1 hour or $\frac{1}{4}$ unit.
- 375. Introduction to Bionics.** Biological concepts and data aiding in the solution of engineering problems; analysis of mechanisms found in living systems and their application to the design of mechanical devices. Prerequisite: Mechanical Engineering 224 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
- 388. Industrial Control Systems.** The study of industrial control techniques by case studies of actual industrial systems; provides competence in the design, selection, and maintenance of industrial control systems; and introduces applications to electromechanical, pneumatic, thermal, and hydraulic systems. Prerequisite: Mechanical Engineering 265 or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
- 393. Special Problems.** Study of advanced problems related to mechanical engineering. Prerequisite: Senior standing or consent of instructor. 1 to 4 hours, or $\frac{1}{2}$ to 1 unit.
- 401. Thermodynamics and Transport Properties.** Thermodynamic and microscopic considerations for the prediction of properties; caratheodory principle; relations among properties; microscopic considerations and statistical methods; thermodynamic and transport properties; and fluctuation and nonequilibrium thermodynamics. Prerequisite: Mechanical Engineering 301 or consent of instructor. 1 unit.
- 402. Nonequilibrium Processes.** Dynamics and thermodynamics of multiphase and multi-component systems with special relevance to air pollution control and energy conversion; relaxation phenomena; general motion of systems of disparate elemental masses; diffusion in gravitational and electric fields, and boundary layer motion with mass transport; dispersion and collection of particulate matter; and transport with surface reactions. Prerequisite: Mechanical Engineering 301 and 303, or consent of instructor. 1 unit.
- 403. Fundamentals of Combustion.** Same as Aeronautical and Astronautical Engineering 438. Fundamentals of kinetic theory, transport phenomena, chemical equilibria, and reaction kinetics; flames, their gross properties, structure, and gas dynamics including oscillatory and turbulent burning; solid and liquid propellant combustion; one-dimensional detonation theory including structure and initiation; three-dimensional and other complex detonation waves; and supersonic burning. Prerequisite: Mechanical Engineering 305 or Aeronautical and Astronautical Engineering 213. 1 unit.
- 404. Gas Dynamics, I.** Introduction to theoretical gas dynamics; fundamental laws and basic equations for subsonic, transonic, and supersonic steady and unsteady flow processes. Prerequisite: Mechanical Engineering 305 or equivalent, or consent of instructor. 1 unit.
- 405. Convective Heat Transfer.** Fundamentals of convective heat transfer; calculation of heat transfer within conductor and over submerged objects for laminar and turbulent flow; natural convection; film condensation and boiling; and liquid metals. Prerequisite: Mechanical Engineering 306 or consent of instructor. 1 unit.
- 406. Heat Conduction in Solids.** Fundamentals of heat conduction in isotropic and anisotropic solids; methods of solution to steady and transient heat conduction problems in one, two, and three dimensions; internal heat sources; periodic flow of heat; problems

- involving phase change; and approximate analytical techniques. Prerequisite: Mechanical Engineering 306 or Mathematics 346, or consent of instructor. 1 unit.
408. **Laboratory Investigation in Thermodynamics.** Special investigations involving thermodynamic analysis, thermodynamic properties, and performance of physical and chemical systems. Prerequisite: One-year course in thermodynamics; one half-year course in power laboratory. $\frac{1}{2}$ to $1\frac{1}{2}$ units.
409. **Laboratory Investigations in Fluid Flow, Heat Transfer, and Combustion.** Special investigation in flow, metering, heat transfer, and heat exchanger performance and design. Prerequisite: Courses in thermodynamics and fluid mechanics. $\frac{1}{2}$ to $1\frac{1}{2}$ units.
410. **Thermal Radiation.** Fundamentals of radiant energy transport in absorbing and non-absorbing media; pyrometry; and applications to selected problems involving combined energy transport mechanisms. Prerequisite: Mechanical Engineering 306 or consent of instructor. 1 unit.
411. **Control of Air Pollution from Stationary Sources.** Same as Civil Engineering 448. The study of the basic theory of pollution control devices and their application to air pollution control problems. Prerequisite: Credit or concurrent registration in Civil Engineering 340 and 343, or consent of instructor. 1 unit.
412. **Analysis of Air Pollutants.** Same as Civil Engineering 449. Laboratory analysis of common air pollutants; theory of operation of laboratory and automatic field instrumentation. Prerequisite: Civil Engineering 343 or consent of instructor. $\frac{3}{4}$ unit.
421. **Environmental Control.** Same as Architecture 421. Design of environmental systems for buildings; integration of mechanical, structural, and architectural demand, in lectures and through a semester design project. Prerequisite: Undergraduate degree in architecture or mechanical engineering, or consent of instructor. 1 unit.
423. **Thermal Systems.** Steady-state simulation and optimization of thermal systems, dynamic performance, and probabilities in system design. Prerequisite: Mechanical Engineering 323. 1 unit.
428. **Investigations in Thermal Systems.** Investigations in the modeling, simulation, and optimization of thermal systems such as power generating, heating and cooling, and thermal processing systems. Prerequisite: Consent of instructor. $\frac{1}{2}$ to $1\frac{1}{2}$ units.
429. **Investigations in Environmental Control.** Investigations in heating, ventilating, air conditioning, and human comfort. Prerequisite: Consent of instructor. $\frac{1}{2}$ to $1\frac{1}{2}$ units.
432. **Theory of Rotary Compressors.** Thermodynamical and mechanical fundamentals; compression with and without cooling; classification of compressors; similarity considerations and characteristics; principles of and computations for radial compressors; improvement in performance of integrating parts; axial flow compressors; lattice and airfoil theory; change in operating conditions of turbo-compressors; regulation; and rotary positive blowers. Prerequisite: Mechanical Engineering 205, 206, and 211; or Aeronautical and Astronautical Engineering 211. 1 unit.
438. **Laboratory Investigations in Power Machinery.** Special investigations in power machinery, such as turbines, engines, fans, and compressors. Prerequisite: One-year course in power laboratory. $\frac{1}{2}$ to $1\frac{1}{2}$ units.
441. **Machine Design.** A technical application course that focuses the previously acquired design experience on the creative problem of developing machines to perform specified functions; proper considerations of manufacturing processes involved; and checking of all parts for stress, wear, vibration, fatigue, etc. Prerequisite: Undergraduate course in dynamics of machines; one year of machine design. 1 unit.
442. **Linkage Synthesis.** Geometry of constrained motion in two and three dimensions; application of mathematical and other techniques to the synthesis of mechanisms. Prerequisite: Mechanical Engineering 342 or consent of instructor. 1 unit.
443. **Dynamics of Machinery.** Complementary to the undergraduate course and devoted to a more detailed study of velocities, accelerations, and forces in machine parts having reciprocating, rotating, and combined motions; balancing; flywheels; and special topics. Prerequisite: Undergraduate course in dynamics of machines; one year of machine design. 1 unit.

445. **Design of Internal Combustion Engines.** Comprehensive study of the design of internal combustion engines, including gas forces, inertia loads, bearing analysis, torsional vibration, balance, lubrication, valve and cam design, and stress analysis of major parts of the engine. Prerequisite: Mechanical Engineering 271, 331, or equivalent. 1 unit.
448. **Laboratory Investigations in Machine Design.** Special investigations in machine design. $\frac{1}{2}$ to 1 $\frac{1}{2}$ units.
458. **Laboratory Investigations in Production.** Special investigations in field of production, particularly in materials processing, metal cutting, and production engineering. $\frac{1}{2}$ to 1 $\frac{1}{2}$ units.
493. **Seminar.** Required of all graduate students each semester with the exception of doctoral candidates who have passed their preliminary examination. Presentation and discussion of significant developments in mechanical engineering. 0 credit.
497. **Special Problems in Mechanical Engineering.** Lectures, seminars, and individual investigations or studies in selected areas of mechanical engineering. Prerequisite: Consent of instructor. 0 to 1 unit. May be repeated.
499. **Thesis Research.** 0 to 4 units.

MEDICAL SCIENCES

Dean of School: Dean D. K. Bloomfield

School Office: 190 Medical Sciences Building, Urbana

300. **Medical Sciences.** First-year program in preparation for the M.D. degree involving guided study of anatomy, behavioral science, biochemistry, genetics, immunology, microbiology, neuroscience, pathology, pharmacology, physiology, and reproductive biology. Elements of clinical experience are included. Learning experiences are monitored and presented by faculty in the clinical and basic medical sciences. Prerequisite: Enrollment is limited to students accepted by the College of Medicine. 19 hours (summer session, 9 hours).
374. **General Epidemiology.** Same as Environmental Studies, Health Education, Veterinary Medical Science, and Veterinary Pathology and Hygiene 374. The epidemiology and natural history of infectious and noninfectious diseases, including integrated vector control and host resistance, and mental health and public health. Prerequisite: Microbiology 326, Veterinary Medical Science 332, or equivalent, or consent of instructor. 4 hours or 1 unit.

METALLURGY AND MINING ENGINEERING

Head of Department: Professor C. A. Wert

Department Office: 201 Metallurgy and Mining Building, Urbana

Metallurgical Engineering

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
207. **Extractive Metallurgy.** Basic processes for the recovery of metals from their ores; mineral beneficiation; smelting, refining, and related processes; and hydrometallurgical methods. Prerequisite: Junior standing in metallurgical engineering or equivalent. 3 hours.

296. **Metallurgical Seminar.** Review of current metallurgical literature; classroom reports and discussions; and preparation of technical abstracts and reports. Prerequisite: Senior standing in metallurgical engineering. 2 hours.
299. **Thesis.** Investigation of special problems and preparation of a thesis. May be substituted for certain technical subjects in the senior year. Prerequisite: Senior standing; approval of head of department. 1 to 3 hours.
301. **Welding and Joining Processes.** Same as Civil Engineering 375. The physical principles of fusion welding; heat flow; thermal cycles; physical metallurgy and mechanical properties of welded joints; applications of welding to large structures; testing of welds; nondestructive testing; design, economics, and weld specifications; and laboratory experiments in welding. Prerequisite: Theoretical and Applied Mechanics 224 or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
306. **Design of Engineering Alloys.** A study of the fundamental principles which determine the constitution, structure, treatment, and application of alloy steels and other special-purpose high-performance alloys. Prerequisite: Metallurgical Engineering 372. 3 hours, or $\frac{3}{4}$ or 1 unit.
307. **Corrosion of Metals.** Electrochemistry, thermodynamics, and kinetics of corrosion; behavior of ferrous and nonferrous metals; corrosion rates; corrosion control; cathodic and anodic protection; high-temperature corrosion; corrosion testing; and electrolytic machining methods. Prerequisite: Mechanical Engineering 234 or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
310. **Crystallography and Diffraction.** Study of structure and composition of solids using X-rays and electron beams; radiography, spectroscopy, and X-ray and electron metallography. Prerequisite: Physics 108. 4 hours or 1 unit.
314. **Metallurgical Thermodynamics.** Thermodynamic principles applied to the study of phase and chemical equilibrium and to the calculation of free energy of phases. 3 hours or $\frac{3}{4}$ unit.
315. **Metallurgical Kinetics.** Diffusion and heat flow calculations and their applications to kinetics of metallurgical processes. Prerequisite: Metallurgical Engineering 314 and 372. 3 hours or $\frac{3}{4}$ unit.
316. **Mechanical Metallurgy.** Fundamentals of plastic deformation of crystalline solids; elementary theory of statics and dynamics of dislocations; applications to deformation of single crystals and polycrystals; fracture; and effect of metallurgical variables on mechanical properties. Prerequisite: Junior standing in engineering or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
318. **Physics of Metals.** The nature of the perfect and imperfect crystal, the electronic structure of solids, electrical conduction in metals and semiconductors, and dielectric and magnetic properties of solids. Prerequisite: Senior standing in engineering or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
334. **Physical Metallurgy for Engineers.** Fundamentals of crystallography, imperfections, alloying, and deformation; consideration of composition, temperature, and prior thermal and mechanical treatment in the use of metals, with emphasis on their mechanical properties. Prerequisite: Credit or concurrent registration in Theoretical and Applied Mechanics 221 or Aeronautical and Astronautical Engineering 224, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
370. **Physical Metallurgy, I.** First of a two-semester sequence treating metallurgical phenomena and their utilization in engineering materials and processes; defects, diffusion, phase diagrams, solidification and casting, and plastic deformation and annealing. Prerequisite: Junior standing in engineering; Mathematics 345; Theoretical and Applied Mechanics 221. 3 hours or $\frac{3}{4}$ unit.
371. **Physical Metallurgy Laboratory, I.** Laboratory course to be taken simultaneously with Metallurgical Engineering 370. Experiments using various metallographic, physical, and mechanical property observations to relate structure to properties and illustrate behavior of materials. Prerequisite: Concurrent registration in Metallurgical Engineering 370. 3 hours or 1 unit.

372. **Physical Metallurgy, II.** Continuation of Metallurgical Engineering 370. Precipitation; eutectoid reactions; martensite; ordering; surface reactions; cast iron; and joining. Prerequisite: Metallurgical Engineering 370 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
373. **Physical Metallurgy Laboratory, II.** Laboratory course to be taken simultaneously with Metallurgical Engineering 372. Experiments using various metallographic, physical, and mechanical property observations to relate structure to properties and illustrate behavior of materials. Prerequisite: Concurrent registration in Metallurgical Engineering 372. 3 hours or 1 unit.
384. **Properties of Solids.** Perfect and imperfect crystal lattices; electronic structure of solids including basic theory and applications to transport properties of metals and semiconductors; semiconductor diodes; and dielectric and magnetic properties of solids. Prerequisite: Physics 383. 3 hours or $\frac{3}{4}$ unit.
386. **Electron Microscopy and Diffraction Theory.** Theory and application of transmission electron microscopy and diffraction with emphasis on thin crystals; electron optics, interference phenomena, interpretation of images and diffraction patterns, specimen preparation, etc. Students interested in laboratory experience may enroll in Chemistry 429. Prerequisite: Metallurgical Engineering 310 or equivalent. 3 hours or 1 unit.
387. **Advanced Physical Metallurgy.** Advanced physical metallurgy designed for graduate students whose undergraduate degrees are in engineering or physical science fields other than metallurgy or materials sciences; discusses the standard topics of physical metallurgy with an emphasis on underlying physical principles; and includes selected laboratory experiments. Not to be taken by undergraduates registered in the Department of Metallurgy and Mining Engineering. Students may not receive credit for Metallurgical Engineering 387, and Metallurgical Engineering 370 or 372. Prerequisite: Advanced undergraduate standing in a field other than metallurgy, or graduate standing. 4 hours or 1 unit.
407. **Plastic Deformation and Annealing of Metals.** The mechanism and crystallography of plastic deformation of single crystals and of polycrystalline metals; annealing effects; recovery, subgrain growth, and recrystallization; and deformation textures and annealing textures. Prerequisite: Consent of instructor. 1 unit.
408. **Dislocations and Mechanical Properties of Metals.** General static and dynamic properties of single dislocations in crystals; dislocation interactions; properties of dislocation arrays; and role of dislocations in metallurgical phenomena with particular emphasis on mechanical properties. Prerequisite: Consent of instructor. 1 unit.
409. **Crystal Physics.** The anisotropic properties of crystals treated by tensor and matrix methods with application to paramagnetism, conduction and diffusion, thermoelectricity, deformation, elasticity, and martensitic transformations; discussion of the effects of crystal symmetry and the properties of aggregates. Prerequisite: Vector algebra, determinants, and thermodynamics; consent of instructor. 1 unit.
410. **Advanced X-Ray Metallography.** X-ray diffraction as applied to the study of metals and alloys; effects of cold work, annealing, substructures, preferred orientation, and ordering; and principles of electron and neutron diffraction. Prerequisite: Chemistry 427 or consent of instructor. 1 unit.
420. **Metallurgical Thermodynamics.** Fundamental thermodynamic considerations and applications of thermodynamics to metallurgical problems; particular emphasis on heterogeneous equilibrium and thermodynamic properties of solutions. Topics approached from the viewpoints of both macroscopic thermodynamics and statistical mechanics. Prerequisite: Metallurgical Engineering 314 or equivalent. 1 unit.
421. **Kinetics of Phase Changes in Metals.** The viewpoint of statistical thermodynamics, rate theory, diffusion in solids, interface energy, nucleation theories, and phenomenological analysis of nucleation and growth; application to crystal growth, diffusionless phase changes, oxidation, pearlite reaction, precipitation, and sintering. Prerequisite: Metallurgical Engineering 420 or consent of instructor. 1 unit.
430. **Surface Physics.** Same as Physics 430. Introduction to theory and experiment on atomic behavior of crystal surfaces; thermodynamics of surfaces; surface energy; diffraction

- tion and structure; gas-solid collisions; Brownian motion, diffusion, and evaporation; electron and ion emission, tunnelling; Van der Waals forces; theory of chemical interactions; and kinetics and statistics of adsorption. Prerequisite: Metallurgical Engineering 421 or Physics 489, or consent of instructor. 1 unit.
485. **Metallurgical Engineering Problems.** Individual study in areas of metallurgical engineering not covered by regular course offerings; carried out under the supervision of a member of the staff. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 2 units.
486. **Laboratory Investigations in Metallurgy.** Special investigations in metallurgy to provide an opportunity to employ some advanced experimental methods of research. Available only to nonthesis students enrolled in a Master of Science program. Prerequisite: Consent of instructor. $\frac{1}{4}$ or $\frac{1}{2}$ unit.
492. **Seminar on Surfaces.** Discussions and lectures on current research on surfaces and related areas. Prerequisite: Consent of instructor. 0 or $\frac{1}{4}$ unit.
493. **Seminar on Anelasticity.** Lectures and discussions of the nature of anelasticity and its application to metallurgy. Prerequisite: Consent of instructor. 0 or $\frac{1}{4}$ unit.
494. **Seminar on Phase Transformations in Metals.** Discussion of current research in this field including presentation by graduate students of their own work. Prerequisite: Consent of instructor. 0 or $\frac{1}{4}$ unit.
495. **Seminar on Diffusion and Imperfections.** Lectures and discussions on diffusion and imperfections in crystalline solids. Prerequisite: Consent of instructor. 0 or $\frac{1}{4}$ unit.
497. **Seminar on Alloy Phases.** Discussion and lectures on current research, including work by the graduate students, relating to the electronic structure and crystal structure of alloy phases. Prerequisite: Consent of instructor. 0 or $\frac{1}{4}$ unit.
498. **Colloquium in Physical Metallurgy.** Review of current metallurgical research in other laboratories by visiting lecturers. Some of the research currently done in the department is also reviewed. Required of all graduate students in metallurgical engineering. No credit.
499. **Thesis Research.** Individual research in specialized problems under the supervision of members of the staff. Results of research may be used for graduate thesis. 0 to 4 units.

Mining Engineering

302. **Political, Economic, and Environmental Aspects of Minerals and Their Utilization.** The availability and utilization of national and world mineral resources and the related environmental, economic, and political implications are examined through lectures, readings, student reports, panel discussions, guest speakers, field trips, and films. Prerequisite: Economics 101 or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
351. **Geophysical Prospecting.** Same as Geology 351. Principles of geophysics and their application to mining processes. Prerequisite: Senior standing in engineering or geology, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
356. **Rock Mechanics.** Mechanical properties of rocks; design of mine openings in bedded, massive, and fractured rock; methods of support; drilling; and blasting. Prerequisite: Mining Engineering 351. 3 hours, or $\frac{3}{4}$ or 1 unit.
393. **Special Problems.** Individual studies of any phase of mining or petroleum engineering selected by the student and approved by his adviser and the staff member who supervises the study. Prerequisite: Consent of instructor. 0 to 4 hours, or 0 to 1 unit.
414. **Physical Chemistry of Clays and Soils.** Same as Agronomy 414 and Ceramic Engineering 414. The application of physical chemical principles and concepts to surfaces and adsorption on surfaces; emphasis on silicate surfaces and water adsorption. Prerequisite: Chemistry 340 or equivalent, or consent of instructor. 1 unit. Offered in alternate years.
497. **Special Problems.** Individual studies in areas of mining or petroleum engineering not covered by regular course offerings; carried out under the supervision of a member of the staff. Prerequisite: Consent of instructor. 0 to 2 units.

499. **Thesis Research.** Individual research in some phase of the general field of mining or petroleum engineering under the supervision of a member of the staff. 0 to 4 units.

MICROBIOLOGY

(See Life Sciences)

MILITARY SCIENCE

Head of Department: Lieutenant Colonel D. L. Pinson

Department Office: 110w Armory, Champaign

100. **Leadership Laboratory.** For first semester freshmen. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
101. **Introduction to Military Science (United States Defense Establishment, I).** An introduction to military life, customs, and organization; achievement of a practical working knowledge of individual weapons and their utilization. 1 hour.
102. **Military Map and Aerial Photograph Analysis.** Fundamentals of military map and aerial photograph reading; includes the application of basic principles emphasizing terrain appreciation and evaluation; marginal information; military and topographic map symbols; methods of orientation and resection; military grid reference systems; and classes of aerial photography and methods of obtaining the same. 1 hour.
103. **Introduction to Tactics.** Fundamentals of tactics and their application to the employment of squad- and platoon-sized units in offensive and defensive military operations. Prerequisite: Credit or concurrent registration in Military Science 101; concurrent registration in Military Science 125. 1 hour.
111. **United States Army and National Security (United States Defense Establishment, II).** A survey course in the problems of the United States national defense policy, and the role of the United States Army in implementation of that policy. 1 hour.
112. **American Military History.** Develops certain basic concepts useful for the study of military history and for the study of current problems of national defense; gives the student a sense of perspective and continuity of the main developments in the history of warfare, and the relation of war to society; discussions of land, sea, and air war through an examination of the relation of strategy and tactics to geography, economics, sociology, and technology through the ages; analyzes the relationship between civilians and soldiers in various forms of government; surveys main developments in the history of warfare as they have affected American military history; and examines the effects of nuclear weapons on traditional concepts. 2 hours.
125. **Leadership Laboratory.** For second semester freshmen. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
150. **Leadership Laboratory.** For first semester sophomores. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
175. **Leadership Laboratory.** For second semester sophomores. A noncredit course designed to provide development by practical application of the student's leadership characteristics

tics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.

200. **Leadership Laboratory.** For first semester juniors. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
201. **Principles of Military Instruction.** An introduction to the principles, methods, and techniques fundamental to military instruction to include lesson planning and presentation, use of training aids, and methods of evaluation. 1 hour.
202. **Introductory Military Operations (Fundamentals and Dynamics of the Military Team, I).** The application of the principles of offensive and defensive combat as applied to small tactical units; an analysis of the problem of insurgency and the methods used in its containment; and the means and methods of military communications and their use. Prerequisite: Approval of professor of military science; concurrent registration in Military Science 200 or 225. 3 hours.
203. **Principles of Military Leadership.** Introduces the student to the principles of leadership, the responsibilities and techniques of military leaders, and the problems of leadership in the military environment. 1 hour.
210. **Military Law and Administrative Management.** An introduction to the fundamental concepts of military justice; the basic principles and methods of courts-martial procedure; and principles of nonjudicial punishment. 1 hour.
211. **Proseminar.** A lecture-discussion course utilizing guest lectures in politico-military and military affairs. Individual research projects and readings are required, and a general review of Military Science 102 is included. 2 hours.
212. **Advanced Military Operations (Fundamentals and Dynamics of the Military Team, II).** An advanced study of military operations, logistics, and administration to include the study of the techniques and functions of commanders and staffs, and the fundamentals of supply and administration of platoons and companies. Prerequisite: Approval of professor of military science; concurrent registration in Military Science 250 or 275. 3 hours.
225. **Leadership Laboratory.** For second semester juniors. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
250. **Leadership Laboratory.** For first semester seniors. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
275. **Leadership Laboratory.** For second semester seniors. A noncredit course designed to provide development by practical application of the student's leadership characteristics through progressive training in leadership, drill, and command. Field trips may be required. 0 credit.
288. **The Military and Society.** Development of the military as a part of society; includes origins of the interaction between the military and politics, various military sociological models, the military and modernization, and the military and national security. Prerequisite: Junior standing. 3 hours.

MINING ENGINEERING

(See Metallurgy and Mining Engineering)

MUSIC

Director of School: Professor R. E. Bays

School Office: 3050 Music Building, Urbana

100. **Rudiments of Theory.** Notation of key signatures, meter signatures, scales, intervals, chords, and their usage within common practice music; no previous experience in music theory is assumed. Open to students of all colleges of the university. 3 hours. Fine and Applied Arts music majors receive no credit.
101. **Fundamentals of Music Theory and Practice, I.** Notation, vocabulary, and basic concepts, including scales, modes, intervals, chords, and terminology; aural and visual analysis of musical forms and procedures; and stresses the development of melodic, harmonic, and rhythmic vocabularies. Prerequisite: Music 100 or placement into Music 101 by examination. 3 hours.
102. **Fundamentals of Music Theory and Practice, II.** A continuation of Music 101 with gradually increased emphasis on visual elements (score reading and analysis); links theory and practice through analytical understanding. Prerequisite: Music 101. 3 hours.
103. **Selected Studies in Style Analysis, I.** Practical use of the material presented in Music 102. The student may select from a variety of areas of particular emphasis suited to his own interests and curriculum. See *Timetable* for specific offerings. Prerequisite: Music 102. 2 hours. May be repeated for a maximum accumulated credit in Music 103 and/or Music 104 of 8 hours.
104. **Selected Studies in Style Analysis, II.** Practical use of the material presented in Music 102. The student may select from a variety of areas of particular emphasis suited to his own interests and curriculum. See *Timetable* for specific offerings. Prerequisite: Music 102. 2 hours. May be repeated for a maximum accumulated credit in Music 103 and/or Music 104 of 8 hours.
106. **Composition.** Music composition in its beginning and secondary stages; practice in phrase, sentence and period, analysis, and writing; writing of the shorter forms of music; and instruction in range, characteristic, and idiom of instruments. Prerequisite: Limited to students in composition major curriculum or consent of composition faculty. 2 hours.
109. **Ear Training and Sight Singing.** An individual course that develops and improves the students' ability to sight sing and to coordinate aural and visual musical disciplines. 1 hour.
110. **Basic Music Literature.** An introduction to the standard concert repertory through intensive guided listening. Representative works by major composers are chosen to illustrate the principal forms, styles, and techniques of vocal and instrumental music emphasizing the period since 1700. Required of freshmen in music. 2 hours.
113. **Appreciation of Music.** Symphonic poems and symphonies. For nonmusic students. Prerequisite: Sophomore standing. 2 hours.
115. **Introduction to Opera.** Introduction to the art form, opera; a survey of its musical and dramatic development from 1600 to the present. Prerequisite: Sophomore standing. 2 hours.
130. **Introduction to the Art of Music, I.** Designed for the layman to train students in intelligent listening and to acquaint them with many great works of the literature of music. For nonmusic students only. Students register for the lecture and one quiz section. 4 hours.

131. **Introduction to the Art of Music, II.** Continuation of Music 130. For nonmusic students only. Prerequisite: Music 130. 4 hours.
133. **Non-Western Music.** A survey of the musics of Asia, Africa, and Oceania and the native traditions of the Americas. 3 hours.
134. **Afro-American Music.** An introduction to Afro-American music in the United States, past and present, including its African and European origins, its relationship to European music, its social and historical context, and its relationship to Afro-American music elsewhere in the New World. Prerequisite: Music 130 or consent of instructor. 3 hours.
140. **Introduction to Music Education.** Basic issues and principles of music education and the teaching profession. 2 hours.
142. **Elements of Conducting.** The development of basic techniques for conducting instrumental and vocal ensembles. Prerequisite: Music student standing or consent of instructor. 2 hours.
150. **Jazz Piano Improvisation, I.** The study of jazz theory, harmony, and improvisational techniques at the piano; includes experience in solo and ensemble situations, and an historical survey of jazz development from about 1910. Prerequisite: Music 162 or equivalent; Music 104 and 109, or equivalent; consent of instructor. 2 hours.
151. **Jazz Piano Improvisation, II.** Continuation of Music 150. The study of jazz theory, harmony, and improvisational techniques at the piano; includes experience in solo and ensemble situations, and an historical survey of jazz development from about 1910. Prerequisite: Music 162 or equivalent; Music 104 and 109, or equivalent; consent of instructor. 2 hours.
160. **Group Instruction in Piano, I.** Beginning group instruction in piano for music majors whose principal performing medium is voice or an orchestral or band instrument; studies simple piano literature and the development of skills in technique, sight reading, harmonization, transposition, improvisation, and analysis. 2 hours.
161. **Group Instruction in Piano, II.** Elementary group instruction in piano for music majors whose principal performing medium is voice or an orchestral or band instrument; easy solos from the main periods with appropriate technical development; continuation of skills introduced in Music 160; and introduction of piano ensemble literature. Prerequisite: Music 160 or equivalent; consent of instructor. 2 hours.
162. **Group Instruction in Piano, III.** Intermediate group instruction in piano for music majors whose main performing medium is voice or an orchestral or band instrument; study of intermediate level solos and ensemble compositions; harmonization with chromatic chords, sight reading, transposition of four-voice works, improvisation, and learning of patriotic songs. Prerequisite: Music 161 or equivalent; consent of instructor. 2 hours.
163. **Group Instruction in Piano, IV.** Moderately advanced group instruction in piano for music majors whose performing medium is voice or an orchestral or band instrument; continuation of Music 162 with emphasis on solos, ensemble works, technical development, and more advanced work in sight reading, harmonization, improvisation, transposition, and aural skills. 2 hours.
165. **Class Instruction in Voice.** Group instruction in the fundamentals of singing. For School of Music students who do not major in voice; required of such students in music education. 2 hours.
166. **English Diction.** Phonetics applied to English song literature; individual clinical analysis and practice. To be taken with Music 181. Prerequisite: Freshman standing in voice or consent of instructor. 1 hour.
167. **Italian Diction.** Phonetics applied to Italian song literature; individual clinical analysis and practice. To be taken with Music 181. Prerequisite: Freshman standing in voice or consent of instructor. 1 hour.
168. **German Diction.** German pronunciation as applied to German vocal literature; class and individual clinical analysis and practice. To be taken with Music 181. Prerequisite: Sophomore standing in voice or consent of instructor. 1 hour.

169. **French Diction.** Principles of French pronunciation applied to French vocal literature; class and individual clinical analysis and practice. To be taken with Music 181. Prerequisite: Sophomore standing in voice or consent of instructor. 1 hour.
170. **String Instruments.** Class instruction in the fundamentals of playing violin, viola, cello, and string bass. Prerequisite: Junior standing in music or consent of instructor. 2 hours.
171. **Woodwind Instruments.** Class instruction in the fundamentals of playing and teaching clarinet, flute, saxophone, oboe, and bassoon. Prerequisite: Enrollment in the School of Music; for nonmusic majors, consent of instructor. $\frac{1}{2}$ or 2 hours.
172. **Brass Instruments.** Class instruction in the fundamentals of playing and teaching trumpet, French horn, trombone, baritone, and tuba. Prerequisite: Enrollment in the School of Music; for nonmusic majors, consent of instructor. $\frac{1}{2}$ or 2 hours.
173. **Percussion Instruments.** Class instruction in the fundamentals of playing and teaching percussion instruments. Prerequisite: Enrollment in the School of Music; for non majors, consent of instructor. 2 hours.
174. **Guitar Techniques.** Techniques of playing and teaching classic and folk guitar. Prerequisite: Consent of instructor. 2 hours.
175. **Techniques of Teaching Classroom Instruments.** Fundamental techniques for playing the guitar, the recorder, and the autoharp; includes methods for implementing the use of these instruments in the teaching of elementary and junior high school vocal-music classes. 2 hours.
177. **Lute.** Instruction in lute. Prerequisite: Qualifying audition. 2 hours.
178. **Guitar.** Instruction in guitar at the undergraduate level, predominantly classical. 2 or 4 hours (summer session, 1 or 2 hours).
179. **Harpsichord.** Instruction in harpsichord at the undergraduate level. 2 or 4 hours.
180. **Piano.** Instruction in piano at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
181. **Voice.** Instruction in singing at the undergraduate level. 2 or 3 hours (summer session, 1 or 2 hours).
182. **Organ.** Instruction in organ at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
183. **Violin.** Instruction in violin at the undergraduate level. 2 or 4 hours (summer session 1 or 2 hours).
184. **Viola.** Instruction in viola at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
185. **Cello.** Instruction in violoncello at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
186. **String Bass.** Instruction in string bass at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
187. **Flute.** Instruction in flute at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
188. **Clarinet.** Instruction in clarinet at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
189. **Oboe.** Instruction in oboe at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
190. **Bassoon.** Instruction in bassoon at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
191. **Cornet and Trumpet.** Instruction in cornet and trumpet at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
192. **French Horn.** Instruction in French horn at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
193. **Trombone.** Instruction in trombone at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
194. **Baritone.** Instruction in baritone at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).

195. **Tuba.** Instruction in tuba at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
196. **Percussion.** Instruction in percussion at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
197. **Harp.** Instruction in harp at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
198. **Saxophone.** Instruction in saxophone at the undergraduate level. 2 or 4 hours (summer session, 1 or 2 hours).
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
200. **Instrumentation, I.** Orchestration and arranging for orchestral groups. Prerequisite: Senior standing in music. 2 hours.
201. **Instrumentation, II.** Problems in arranging for all wind instruments. Required of composition majors. Prerequisite: Music 200 or consent of instructor. 2 hours.
202. **Review of Music Theory.** Fundamental terminology and procedures for analysis of western music; representative works from major stylistic periods, with particular attention to the development of the students' understanding of functional elements and analytical techniques. Students may present no more than 14 hours credit in Music 101, 102, 103, 104, and/or 202 for graduation. Prerequisite: One year of music theory at another institution. 3 hours.
209. **Kodaly: Philosophy and Methods.** An introduction to the music education philosophy of Zoltan Kodaly through experiences in relative sol-fa and the expansion of aural awareness. Prerequisite: Consent of instructor. 3 hours.
210. **Computer-Assisted Instruction in Music.** Introduction to computer-assisted instruction (CAI) and its uses in public school, college, and continuing education programs in music; familiarization with visual and audio programming strategies and the research potential of CAI systems. Prerequisite: Consent of instructor. 2 hours.
213. **The History of Music, I.** Survey of music and its development in Western civilization to 1750; emphasis on an acquaintance with representative musical works and style, and on understanding musical concepts in the light of their historical background. Required of all music students. Prerequisite: Music 110 or consent of instructor. 3 hours.
214. **The History of Music, II.** Survey of the development of music as an art in Western civilization from 1750 to the present; emphasis on an acquaintance with formal and stylistic problems through the study of representative works and on understanding specific musical concepts in the light of their historical and general cultural context. Required of all music students. Prerequisite: Music 213. 3 hours.
229. **Thesis and Advanced Undergraduate Honors in Music.** Special individual research projects. Required of seniors in the history of music and composition-theory curricula; open also to advanced undergraduates, including James Scholars, who have achieved University or college honors and who desire to do research in specialized areas of music, including performance. Prerequisite: Senior standing in the history of music and composition-theory, or consent of instructor. 2 hours.
230. **Choral Literature and Conducting, I.** A laboratory course which includes choral literature for secondary choral groups. Students conduct choral singing groups (their conducting is videotaped), learn to analyze and prepare choral scores, and conduct in a choral laboratory. Prerequisite: Music 142. 2 hours.
231. **Choral Literature and Conducting, II.** A laboratory course which includes the study and conducting of public school choral music. Students conduct choral groups, prepare choral scores, learn rehearsal techniques, conduct in a choral laboratory, and conduct vocal ensembles in the public schools. Prerequisite: Music 230. 2 hours.
232. **Instrumental Literature and Conducting, I.** Survey of music literature for wind ensemble and band; principles of interpretation and techniques of conducting emphasized through detailed study and performance of selected compositions. Prerequisite: Music 142. 2 hours.
233. **Instrumental Literature and Conducting, II.** Principles of interpretation and techniques of orchestral conducting emphasized through detailed study and performance of

- selected orchestral compositions appropriate for public school groups. Prerequisite: Music 232. 2 hours.
234. **Workshop in Elementary Music Education.** Detailed consideration of music objectives, principles of learning, and their implications for teaching methods; major emphasis on techniques and materials suitable for teaching music in the elementary school by the classroom teacher. Specifically designed for the experienced classroom teacher. Prerequisite: Consent of instructor; public school teaching experience. 2 hours. Offered in the summer session only.
235. **Elementary and Junior High School Instrumental Music.** Principles, materials, and pedagogical and organizational techniques for teaching instrumental music in the elementary and junior high school. 2 hours.
236. **Choral Techniques in Elementary and Junior High School.** A detailed consideration of literature, arranging for elementary and junior high school choruses, and the changing voice. Prerequisite: Advanced music undergraduate standing or consent of instructor. 3 hours.
237. **Orff: Philosophy and Methods.** An introduction to the Carl Orff-Schulwerk approach to music for children; techniques include the use of Orff instruments and materials and the adaptation of these materials for classroom use with or without instruments. Prerequisite: Sophomore standing in music education or consent of instructor. 2 hours.
238. **Children's Musical Literature.** Critical analysis of music written for children or used in the public schools for the teaching of children. 3 hours.
239. **Teaching Music in the Secondary School.** Comprehensive examination of music teaching at the secondary school level, including what can be taught, how it might be taught, curriculum design and development, scheduling, and administration. Prerequisite: Concurrent registration in Educational Practice 242 or participation in the full semester student teaching program. 3 to 5 hours.
240. **Music for Elementary Teachers, I.** A presentation of music for students preparing to teach in the elementary schools; required for state elementary school certification, but not acceptable for credit in the School of Music. Prerequisite: Junior standing in elementary education or consent of instructor. 3 hours.
241. **Music for Elementary Teachers, II.** Continuation of Music 240. A presentation of music for students preparing to teach in the elementary schools; required for state elementary school certification, but not acceptable for credit in the School of Music. Prerequisite: Music 240. 3 hours.
242. **Teaching Music in the Elementary School.** Techniques of and material suitable for teaching music in the elementary school. 3 hours.
243. **Teaching Music in the Junior High School.** Detailed consideration of the music program in the junior high school; special emphasis on instructional material and methods of instruction. 3 hours.
244. **Teaching of Instrumental Music.** Principles, techniques, organization, and materials for teaching instrumental music in the public school. Prerequisite: Consent of instructor. 2 hours.
245. **Choral Arranging.** Arrangement of suitable materials for choral organizations on the high school level. Prerequisite: Junior standing in music. 2 hours.
246. **Teaching of Choral Music.** A methods course designed for vocal-choral majors; includes techniques of supervision and administration, tone and diction, and rehearsing and singing in styles; and considers materials suitable for organizing and teaching choral music in the public schools. Prerequisite: Music 142, 230, or 231, or consent of instructor. 2 hours.
248. **Music for Early Childhood Teachers, I.** Development of musical competencies essential for teachers in nursery schools and kindergartens; singing, rhythmic keyboard improvisation, and creative and music reading skills and extensive study of music materials suitable for use in early childhood music. 3 hours.
249. **Music for Early Childhood Teachers, II.** Further development of the objectives stated in the description for Music 248; increasing emphasis on individual performance skill

and further survey of materials appropriate for use in early childhood music. Prerequisite: Music 240 or 248, or consent of instructor. 3 hours.

250. **University Orchestra.** Prerequisite: Consent of instructor. 1 hour.
251. **Chamber Orchestra.** A chamber orchestra for the purpose of performing literature of all periods written specifically for a chamber-sized orchestra. Prerequisite: Consent of instructor. 1 hour.
252. **Wind Ensemble.** Mixed woodwind-brass-percussion ensembles for the study and performance of wind chamber compositions. Prerequisite: Junior standing or consent of instructor. 1 hour.
253. **Collegium Musicum.** Ensemble work in the performance of medieval, Renaissance, and baroque music; various small groups formed for the performance of sonatas and canatas of Bach and Handel, wind serenades of Mozart, etc. Interested students may play on viola, lute, harpsicord, and other instruments from the University's collection. Prerequisite: Consent of instructor. 1 hour.
254. **String Ensemble.** The student participates in various ensemble groups, such as trios, quartets, quintets, etc., for the study of chamber music literature. The course may be repeated or taken during the freshman and sophomore year without credit. Prerequisite: Consent of instructor. 1 hour.
255. **Woodwind Ensemble.** Prerequisite: Consent of instructor. 1 hour.
256. **Brass Ensemble.** Ensembles of mixed brasses in both small and large forms. Prerequisite: Consent of instructor. 1 hour.
257. **Percussion Ensemble.** Prerequisite: Consent of instructor. 1 hour.
258. **Piano Ensemble.** Prerequisite: Consent of instructor. 1 hour.
259. **Organ Keyboard Techniques.** Development of practical keyboard skills related to the work of the church organist; transposition, score-reading, harmonization, modulation, hymn-playing, and solo and anthem accompaniment. Prerequisite: Consent of instructor. 1 hour.
260. **Oratorio Society.** Performance of oratorios and other major choral works in cooperation with the University Symphony Orchestra; an advanced mixed-voice chorus open to students, faculty, and townspeople. Prerequisite: Consent of instructor. 1 hour.
261. **University Chorus.** Performance of cantatas and other choral works; a mixed-voice chorus for average and beginning singers. Open to students, faculty, and townspeople. Prerequisite: Consent of instructor. 1 hour.
262. **Women's Glee Club.** Practical experience in the rehearsal and public performance of choral music of various periods and styles. Open to all women students. Prerequisite: Consent of instructor. 1 hour.
263. **Men's Glee Club.** Practical experience in the rehearsal and public performance of choral music of various periods and styles. Open to all men students. Prerequisite: Consent of instructor. 1 hour.
264. **Concert Choir.** Practical experience in mixed-voice singing of accompanied and unaccompanied music of various periods and styles; a highly advanced group of competent student singers. Prerequisite: Consent of instructor. 1 hour.
265. **Opera Workshop and Ensemble.** Preparation and public performance of grand or light opera; covers the music and acting only. Students desiring experience in costuming, stage management, scenery, publicity, etc., should apply to the University Theatre which cooperates in the opera productions. Admission is by audition. Prerequisite: Consent of instructor. 1 hour.
266. **Jazz Band.** Designed to acquaint proficient instrumentalists with jazz compositions, arrangements, and improvisational procedures, and to promote a high degree of stylistic and technical competence in performance. Prerequisite: Consent of instructor, determined by auditions. 1 hour.
267. **Harp Ensemble.** Ensembles of multiple harps and harp in combination with other instruments. Prerequisite: Consent of instructor, or Music 197 and/or 397. 1 hour.
268. **Small Choral Ensembles.** Open to a limited number of undergraduate students who desire experience in performance of music specifically written for smaller choral

- groups. Membership through audition only. Prerequisite: Consent of instructor. 1 hour.
- 300. Eighteenth-Century Counterpoint.** Study of the technique of contrapuntal writing as found in the works of J. S. Bach and other eighteenth-century composers; imitation, canon, invertible counterpoint, two- and three-part inventions, etc., studied through writing and analysis of compositions by eighteenth-century composers. Prerequisite: Music 104 and/or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 301. Fugue.** Study of fugal writing during the eighteenth and early nineteenth centuries; a continuation of the study of tonal counterpoint begun in Music 300, with special emphasis on the study and analysis of the fugal works of J. S. Bach, Handel, and Beethoven, and on the writing of fugues and parts fugues. Prerequisite: Music 300 and/or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 302. Musical Acoustics, I.** History of music, science, and technology; introduction to sets and functions; definition of acoustical parameters: frequency (pitch), amplitude (loudness), and spectrum (sound quality); measurement of decibel level and frequency response; harmonic spectrum analysis; sound perception; acoustic waves; and acoustics of string, wind, and percussion instruments. Prerequisite: Mathematics 111, 112, or 118, or equivalent. 3 hours or $\frac{3}{4}$ unit.
- 303. Musical Acoustics, II.** Acoustics of the voice; speech formants; intervals, scales, tuning, and temperament; auditorium and room acoustics; microphones and loudspeakers, electronic sound reinforcement, and feedback problems; sound recording and reproduction; and sound analysis and synthesis by computer. Prerequisite: Music 302. 3 hours or $\frac{3}{4}$ unit.
- 304. Contemporary Compositional Techniques.** Studies in specialized areas of composition for advanced undergraduates and graduates majoring in composition-theory. May be elected by others with consent of instructor. Prerequisite: Music 104, 106, or 109, or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
- 306. Composition.** Work in original composition including the small and large homophonic forms. Prerequisite: Limited to students in composition major curriculum or consent of composition faculty. 2 to 4 hours, or $\frac{1}{2}$ or 1 unit.
- 307. Counterpoint of the Fifteenth and Sixteenth Centuries.** Analysis and writing in the principal contrapuntal styles of the fifteenth and sixteenth centuries; familiarization, through study and singing, with the styles of Dunstable, Dufay, Obrecht, Okeghem, Gombert, Des Pres, Lassus and Palestrina; and writing based on the results of the study of these composers' works. Prerequisite: Junior standing in music or consent of instructor. 2 hours or $\frac{1}{2}$ unit. Offered in 1975-76 and in alternate years.
- 308. Analysis of Musical Form.** Intensive study of representative compositions of the sixteenth through the twentieth centuries for structure and form. Prerequisite: Music 104 and 109, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 309. Electronic Music Techniques.** Introduction to use of electronic music studios; aesthetics of sound composition and compositional techniques; system theory; "classical" sound synthesis and tape manipulation techniques; concept of voltage control and use of voltage-controlled synthesizers; techniques for interaction of live sounds with electronics; and notational problems. Tape composition studies are assigned. Prerequisite: Junior standing in composition-theory or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
- 310. Ancient and Medieval Music.** A history of Western music to about 1400. Prerequisite: Music 131 or 214, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 311. Music in the Renaissance.** A history of music from about 1400 to 1600. Prerequisite: Music 131 or 214, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 312. Music of the Seventeenth Century.** A history of music from about 1600 to 1700. Prerequisite: Music 131 or 214, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 313. Music of the Eighteenth Century.** A history of music from about 1700 to 1800. Prerequisite: Music 131 or 214, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
- 314. Music of the Nineteenth Century.** A history of music from about 1800 to 1900. Prerequisite: Music 131 or 214, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.

315. **Music of the Twentieth Century.** A history of music from about 1900 to the present. Prerequisite: Music 131 or 214, or consent of instructor. 3 hours or ½ unit.
316. **Introduction to Music of the World's Cultures.** Same as Anthropology 316. An introduction to non-Western and folk music, to the role of music in the world's societies, and to methods of collecting and studying music in nonliterate, folk, and Asian high cultures. Primarily for students outside the School of Music. Prerequisite: Anthropology 103 or 110, or consent of instructor. 3 hours or ½ unit.
317. **Area Studies in Ethnomusicology.** Same as Anthropology 315. A seminar devoted to intensive study in the music of one specific culture, e.g., Japan, China, Indonesia, India, the Near East, African and New World Negro, European and American folk cultures, or American Indian. Prerequisite: Senior standing in music or consent of instructor. 3 hours or ½ unit. May be repeated to a maximum of 12 hours or 2 units.
318. **History of Performance Practices, I.** Study of musical performance from about 900 to 1650 A.D.; discussion of musical instruments, makeup of instrumental and vocal ensembles, etc., supplemented by demonstration performances of selected works using the University's collection of instruments. Prerequisite: Senior standing in music theory and music history, or consent of instructor. 3 hours or ½ unit.
319. **History of Performance Practices, II.** Study of musical performance from 1600 to 1750 A.D.; discussion of musical instruments, ornamentation, basso continuo, etc., supplemented by demonstration performances using the University's collection of instruments. Prerequisite: Senior standing in music theory and music history, or consent of instructor. 3 hours or ½ unit.
320. **Proseminar.** Special preparation in specialized fields of musicology, theory and composition, and music education. Prerequisite: Senior or graduate standing in music or music education; consent of instructor. 2 or 4 hours, or ½ or 1 unit. May be repeated to a maximum of 8 hours or 2 units.
323. **Opera Production, I.** Helps interested students on the graduate level study the problems of the lyric stage; investigation of and practice with casting methods, program selection, production procedures, stage direction, coaching methods, and opera dramatics. Prerequisite: Music 265 and 381; consent of instructor. 3 hours or ½ unit. May be repeated to a maximum of 6 hours or 1 unit.
324. **Opera Production, II.** Helps interested students on the graduate level study the problems of the lyric stage; investigation of and practice with casting methods, program selections, production procedures, stage direction, coaching methods, and opera dramatics. Prerequisite: Music 323. 3 hours or ½ unit. May be repeated to a maximum of 6 hours or 1 unit.
325. **Introduction to Musicology, I.** Survey of the discipline of musicology, its scope, and its history with bibliographical studies and sample problems for investigation. Prerequisite: Graduate standing in musicology or consent of instructor. 4 hours or 1 unit (summer session, 2 hours or ½ unit).
326. **Introduction to Musicology, II.** Continuation of a survey of the discipline of musicology; special attention to class projects in systematic musicology and to the philosophy of music history. Prerequisite: Music 325 or consent of instructor. 4 hours or 1 unit (summer session, 2 hours or ½ unit).
327. **Urban Popular Music.** Introduction to the world's popular music; emphasis on its role in society, based on American, European, Latin American, and non-Western repertoires. Prerequisite: Music 130 or equivalent, or consent of instructor. 2 hours or ½ unit.
330. **Applied Music Pedagogy.** Survey of techniques, practices, and materials; presentation of group and individual instruction; an approach to teaching problems, tone production, musical styles, and interpretation for various age levels; and actual teaching experience under faculty supervision. Required of applied music majors in piano, voice, and string instruments. Prerequisite: Junior standing in music or consent of instructor. 2 hours or ½ unit. May be repeated to a maximum of 4 hours or 1 unit.
334. **The Music of America, I.** Study of folk, popular, and art music in America from the time of the first European settlers through the middle of the nineteenth century; psalm-

- ody, early opera and concert life, African and European folk music, the singing school, music of European immigrants, and the roots of jazz. Prerequisite: Senior standing in music or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
335. **The Music of America, II.** Study of chamber, choral, and orchestral music written by American composers from 1850 to the present; jazz and its offshoots; folk and popular music; and experimental music in America. Prerequisite: Senior standing in music or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
336. **Music in Latin America.** Studies in the history of music in Latin America from colonial times to the present, including its cultural and social background. Each semester is devoted to a specific area, e.g., Caribbean America and Venezuela, Colombia and the Andean nations, Brazil and the River Plate nations. A reading knowledge of Spanish or Portuguese is recommended. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{1}{2}$ unit. May be repeated to a maximum of 6 hours or 1 unit.
340. **Instrumental Clinic and Band Pageantry.** Study of the peculiarities of the individual instruments, criteria for selection, and accepted teaching methods and procedures for each instrument. Band pageantry deals with formation designing, charting and show continuity, marching fundamentals, and special problems. 2 hours or $\frac{1}{2}$ unit.
342. **Percussion Methods.** Designed primarily for teachers of school music who may or may not be percussion performers, but who wish to teach percussion and initiate such a program in the schools. Prerequisite: Senior or graduate standing in music education; Music 174 and 257, or equivalent. 3 hours or $\frac{1}{2}$ unit.
343. **Tests and Measurement in Music Education.** Construction, design, appraisal, and use of measurement devices for music teaching and research. Prerequisite: Consent of instructor. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
345. **Teaching Techniques of Music Theory.** Teaching materials, methods, texts, and pedagogical sequence are discussed and analyzed, including an intensive survey of the structural materials normally covered during the first two years of collegiate study. Prerequisite: Music 300 or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
346. **Workshop in Music Education.** Development of essential facts, attitudes, and principles through a consideration of problems encountered in music education. Parallel with this study is the preparation of resource materials for music programs in elementary and secondary schools. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit. May be repeated to a maximum of 2 units. Offered in the summer session only.
347. **Teaching of Woodwind Instruments.** Designed primarily for teachers of instrumental music in the public schools. Prerequisite: Senior or graduate standing in music education or consent of instructor. 2 hours or $\frac{1}{2}$ unit. Offered in the summer session of 1974 and in alternate years.
348. **Teaching of Brass Instruments.** Designed primarily for teachers of instrumental music in the public schools. Prerequisite: Senior or graduate standing in music education or consent of instructor. 2 hours or $\frac{1}{2}$ unit. Offered in the summer session of 1974 and in alternate years.
349. **Music in Early Childhood.** Same as Home Economics 349. Detailed consideration of the music program in nursery schools, kindergarten, and the primary grades; topics include the nature of early musical responses, objectives, experience levels of the program, methods of teaching, and materials. Observation of music teaching at the Child Development Laboratory is included in the course work. Prerequisite: Senior or graduate standing in music or home economics, or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
350. **Advanced Ensemble Music.** Selected projects in the study and performance of ensemble literature, including the areas of operatic, instrumental, and vocal-choral music and accompanying. Prerequisite: Registration in applied music at the 300-level; consent of instructor. 2 hours or $\frac{1}{2}$ unit (summer session, 1 hour or $\frac{1}{4}$ unit).
355. **Musical Theatre.** Same as Theatre 355. Study of musical theatre and its scores and librettos; consideration of production problems, including those of choreography, scenery, and costume design; and the planning and production of a musical play or score. Prerequisite: Junior standing and consent of instructor. 3 hours or $\frac{1}{2}$ unit.

360. **Advanced Group Instruction in Piano, I.** A comprehensive keyboard musicianship course for advanced pianists emphasizing the development of the following skills: sight reading, harmonization, transposition, improvisation, playing by ear, and vocal and instrumental score reading. Ensemble piano music is performed. Prerequisite: Music 180 (12 hours completed) or Music 163, and Music 104 and 109, or equivalent; consent of instructor. 2 hours or $\frac{1}{2}$ unit.
361. **Advanced Group Instruction in Piano, II.** Continuation of Music 360. Comprehensive keyboard musicianship course for advanced pianists emphasizing the development of the following skills: sight reading, harmonization, transposition, improvisation, playing by ear, and vocal and instrumental score reading. Ensemble piano music is performed. Prerequisite: Music 180 (12 hours completed) or Music 163; Music 104 and 109 or equivalent; Music 360 or equivalent and consent of instructor. 2 hours or $\frac{1}{2}$ unit.
366. **Vocal Repertoire, I.** To be taken with Music 381. Study of the standard solo literature, including solo excerpts from larger works, i.e., cantata, oratorio, and opera; supplements the student's knowledge of the literature in his special field. Prerequisite: Junior standing in voice or consent of instructor. 1 hour.
367. **Vocal Repertoire, II.** To be taken with Music 381. Study of the standard solo literature, including solo excerpts from larger works, i.e., cantata, oratorio, and opera; supplements the student's knowledge of the literature in his special field. Prerequisite: Junior standing in voice; consent of instructor. 1 hour.
377. **Principles of Accompanying.** Grasp of the fundamental principles of accompanying singers and instrumentalists; practical experience in accompanying; and facility in sight reading for keyboard performers. Prerequisite: Advanced undergraduate or graduate standing in music or music education and consent of instructor. 4 hours or 1 unit (summer session, 2 hours or $\frac{1}{2}$ unit).

Note: Music 378 through 398 (applied music) have the following 16.40 prerequisite: For students in the Bachelor of Music curriculum, junior standing in the major applied music subject; for students in music education, completion of the curricular requirement in the major applied music subject; and for students in other colleges of the University, completion of four semesters in comparable applied music course at the 100-level.

378. **Guitar.** Instruction in guitar at the advanced undergraduate and graduate levels; predominantly classical. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
379. **Harpsichord.** Instruction in harpsichord at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
380. **Piano.** Instruction in piano at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
381. **Voice.** Instruction in singing at the advanced undergraduate and graduate level. 2 or 3 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
382. **Organ.** Instruction in organ at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
383. **Violin.** Instruction in violin at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
384. **Viola.** Instruction in viola at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
385. **Cello.** Instruction in violoncello at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
386. **String Bass.** Instruction in string bass at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
387. **Flute.** Instruction in flute at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
388. **Clarinet.** Instruction in clarinet at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).

389. **Oboe.** Instruction in oboe at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
390. **Bassoon.** Instruction in bassoon at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
391. **Cornet and Trumpet.** Instruction in cornet and trumpet at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
392. **French Horn.** Instruction in French horn at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
393. **Trombone.** Instruction in trombone at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
394. **Baritone.** Instruction in baritone at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
395. **Tuba.** Instruction in tuba at the advanced undergraduate and graduate level. 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
396. **Percussion.** Instruction in percussion at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
397. **Harp.** Instruction in harp at the advanced undergraduate and graduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
398. **Saxophone.** Instruction in saxophone at the advanced undergraduate level. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit (summer session, 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit).
400. **Advanced Instrumentation: Chamber and Symphonic.** Orchestration for chamber and symphony orchestras; works of classical, romantic, and modern composers. Prerequisite: Undergraduate instrumentation. $\frac{1}{2}$ or 1 unit.
401. **Advanced Instrumentation: Band.** Arrangement for the concert band of works from orchestra, organ, and chamber music by composers of the classical, romantic, and modern periods. Prerequisite: Undergraduate instrumentation. $\frac{1}{2}$ or 1 unit.
402. **Analysis in Relation to Performance and Interpretation, I.** A unifying course in the structure of music, in which analysis is related to the performance and understanding of music; course material drawn from standard literature from the Renaissance to the present day with emphasis on the smaller forms. Prerequisite: Music 104 or equivalent; consent of instructor. 1 unit.
405. **Individual Topics in Music Theory.** Studies in specialized areas of analysis, theory systems, and aesthetics for theory-composition majors. Prerequisite: Graduate standing in music; consent of instructor. $\frac{1}{2}$ or 1 unit. May be repeated to a maximum of 3 units.
406. **Composition.** Advanced study of contrapuntal forms; study of contemporary melodic and harmonic practices; and original work in advanced composition. $\frac{1}{2}$ to 1 $\frac{1}{2}$ units.
410. **History of Music Theory.** Prerequisite: Graduate standing in musicology or composition, or consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
411. **Introduction to Ethnomusicology.** Comprehensive survey of concepts, problems, and methods of research in non-Western and folk music. Prerequisite: Graduate standing in musicology or consent of instructor. 1 unit.
412. **History of Musical Aesthetics, I.** Survey of the principal philosophies of music from Pythagoreanism to the humanistic period, their historical backgrounds, and their relation to musical styles. Prerequisite: Graduate standing in music. $\frac{1}{2}$ or 1 unit.
413. **History of Musical Aesthetics, II.** Survey of the principal philosophies of music, their historical backgrounds, and their relation to musical styles from the seventeenth century to the present day. Prerequisite: Music 412. $\frac{1}{2}$ or 1 unit.
414. **Notation, I.** History of notation from its beginning to 1400. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit.
415. **Notation, II.** History of notation from 1400 to 1600, including instrumental tablatures. Prerequisite: Music 414 or consent of instructor. $\frac{1}{2}$ unit.
417. **History of Instrumental Music from 1600 to 1750.** Prerequisite: Consent of instructor. $\frac{1}{2}$ or 1 unit.

418. **The Origins and the History of Opera up to Gluck.** The antecedents of opera in the sixteenth century; social, cultural, intellectual forces leading to its development; study of scores, librettos, and scenography; and readings on performance practices, theory, and aesthetics of opera. The principal composers covered are Monteverdi, Cavilli, Cesti, Lully, Rameau, Blow, Purcell, Scarlatti, Handel, and Gluck. $\frac{1}{2}$ or 1 unit. Prerequisite: Music 312 or consent of instructor.
419. **The History of Opera from Mozart to the Present.** A detailed examination of stylistic and structural developments in opera after Gluck, with special reference to representative works from Mozart to Schoenberg viewed in relation to the general musical and cultural background of their time and place of origin. Prerequisite: Music 312 and 313, or consent of instructor. $\frac{1}{2}$ or 1 unit.
420. **Seminar in Music Literature.** Intensive study of outstanding works selected from all fields of music literature. Required of all students (except those in choral music) enrolled in the Doctor of Musical Arts program. Prerequisite: Consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
421. **Research in Music Education.** Introduction to problems and methods of research in music education. Required of all candidates for the Doctor of Education in music education. Prerequisite: Graduate standing in music or music education. $\frac{1}{2}$ or 1 unit.
422. **Seminar in Theory of Music.** Intensive study of selected topics in the fields of music theory, history of theory, and history of musical materials. Prerequisite: Graduate standing in music theory or consent of instructor. $\frac{1}{2}$ or 1 unit.
423. **Seminar in Musicology.** Problems in historical and systematic musicology or ethnomusicology; discussions of special problems and reports on individual research. Prerequisite: Graduate standing in musicology or consent of instructor. 1 unit.
424. **Seminar in the Works of a Selected Composer.** A seminar devoted to intensive historical and analytical study of the works of important composers; each semester devoted to one composer, e.g., Bach, Beethoven, Handel, Haydn, Mozart, or Wagner. Prerequisite: Music 213 and 214; two of the following: Music 310, 311, 312, 313, or 315, or equivalent. 1 unit (summer session, $\frac{1}{2}$ unit). May be repeated for a maximum of 2 units.
425. **Readings in Musicology and Music Theory.** Individual guidance in intensive readings in the literature of musicology or music theory, selected in consultation with the instructor and in accordance with the needs and interests of the student. Prerequisite: Graduate standing in musicology or music theory. $\frac{1}{2}$ or 1 unit (summer session, $\frac{1}{2}$ unit).
426. **Choral Literature, I.** Survey of choral and vocal ensemble repertoire from the Middle Ages to 1750. Prerequisite: Open to graduate music students by consent of instructor. $\frac{1}{2}$ unit.
427. **Choral Literature, II.** Survey of choral repertoire from 1750 to the present. Prerequisite: Open to graduate music students by consent of instructor. $\frac{1}{2}$ unit.
428. **Problems and Methods.** Introduction to methods in research and stylistic criticism and to bibliographic aids, editions, and editing of music, as related to the work of the musician and composer. Reports of bibliographic problems and on individual projects are presented orally and in writing. Required of all students in the Master of Music program, except those majoring in musicology. 1 unit.
429. **Historical Studies in Twentieth-Century Music.** A seminar in contemporary music, with emphasis on the historical foundations of current trends in musical composition. Prerequisite: Music 315 or 422, or equivalent. $\frac{1}{2}$ to 1 unit (summer session, $\frac{1}{2}$ unit). May be repeated to a maximum of 2 units.
430. **Advanced Orchestra Conducting and Literature.** Intensive study of conducting techniques and problems related to standard orchestral literature; survey of materials for school and community orchestras. Prerequisite: Previous conducting experience. 1 unit.
431. **Advanced Band Conducting and Literature.** Study of problems and techniques of band conducting; survey of literature for the concert band. Prerequisite: Graduate standing in music or music education. 1 unit.

432. **Advanced Choral Techniques, I.** An intensive laboratory approach to the development of advanced techniques necessary for working effectively with choral ensembles. Prerequisite: Graduate standing in music. 1 unit.
433. **Advanced Choral Techniques, II.** An intensive survey of choral literature with laboratory organization for reading, conducting, and interpreting choral music of all periods, styles, and voice arrangements. Prerequisite: Graduate standing in music, Music 432 or equivalent, or consent of instructor. 1 unit.
434. **Piano Literature.** Prerequisite: Bachelor of Music or Bachelor of Science in Music Education, or consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
435. **Vocal Literature.** Study of solo song in larger works, and solo art song. Prerequisite: Bachelor of Music or Bachelor of Science in Music Education, or consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
436. **Organ Literature.** An intensive study of organ literature from Bach to the present; includes the music itself, recordings, and collateral readings. Prerequisite: Bachelor of Music or Bachelor of Science in Music Education, or consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
437. **String Instrument Literature.** Prerequisite: Bachelor of Music or Bachelor of Science in Music Education, or consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
438. **Wind Instrument Literature.** Survey at the graduate level of the field of solo and ensemble wind literature; includes analysis and performance, when possible, of the music itself, recordings, and collateral readings. 1 unit. May be repeated for a maximum of 2 units.
439. **Percussion Instruments Literature.** Survey and analysis of the field of solo and ensemble percussion literature; includes analysis and performance, when possible, of the music itself, recordings, and collateral readings. Prerequisite: Graduate standing in music; consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
440. **Foundations and Principles of Music Education, I.** A consideration of the historical and philosophical foundations of music education and their application to the process of program development in music education. Prerequisite: Graduate standing in music education or music. $\frac{1}{2}$ or 1 unit.
441. **Foundations and Principles of Music Education, II.** A consideration of the psychological foundations of music education and their application to the processes of instruction, administration, supervision, and evaluation of music education programs. Prerequisite: Graduate standing in music education or music. $\frac{1}{2}$ or 1 unit.
442. **The General Music Program in Secondary Schools.** Detailed consideration of the general music program, its objectives, organization, and operation; special attention to materials and methods of teaching. $\frac{1}{2}$ or 1 unit.
443. **Administration and Supervision of Music Education.** Deals with the functions of supervisors and directors of music education in administering music programs in elementary and secondary schools. $\frac{1}{2}$ or 1 unit.
444. **The General Music Program in Elementary Schools.** Detailed consideration of elementary general music, its objectives, organization, and operation; special attention to materials and methods of teaching. $\frac{1}{2}$ or 1 unit.
445. **Music in Higher Education.** An orientation to the organization, teaching, and administration of music in the college and university. Prerequisite: Graduate standing in music education or music. $\frac{1}{2}$ or 1 unit.
446. **Seminar in Experimental Music, I.** Survey of contemporary electronic music, computer music, and related types of music; discussion of relevant music theory. Prerequisite: Music 303 or consent of instructor. $\frac{1}{2}$ unit.
447. **Seminar in Experimental Music, II.** Continuation of Music 446. Prerequisite: Music 446 or consent of instructor. $\frac{1}{2}$ unit.
448. **Computer Music.** Representation of sound signals in a digital computer; methods for input and output of sounds to and from a computer; sound synthesis programs; synthesis of simple musical structures; use of graphics; processing of live sounds by computer;

editing and retrieval; fidelity of computer-produced sounds; and hybrid analog/digital computers. Prerequisite: Graduate standing in composition-theory or consent of instructor. $\frac{1}{2}$ unit.

449. **Problems in Band Conducting.** An examination of techniques of rehearsal, conducting, and preparation of band organizations for concert performance; emphasizes discussion, analysis, and preparation of selected scores and the problems they present. Prerequisite: Graduate standing or experience as a band conductor. $\frac{1}{2}$ or 1 unit.
450. **History of Vocal Ensemble and Choral Music, I.** Critical and analytic study of vocal and choral ensemble music from the Middle Ages to 1750. Prerequisite: Music 426 and 427, or consent of instructor. 1 unit (summer session, $\frac{1}{2}$ unit).
451. **History of Vocal Ensemble and Choral Music, II.** Critical and analytic study of vocal and choral ensemble music from 1750 to the present. Prerequisite: Music 450 or consent of instructor. 1 unit (summer session, $\frac{1}{2}$ unit).
452. **Choral Conducting Project.** Required of candidates for the degree of Master of Music with choral music option during the final semester in residence; includes participation in a graduate choral conducting laboratory and preparation of a choral ensemble for public performance. Prerequisite: Music 432 and consent of instructor. $\frac{1}{2}$ unit.
454. **Advanced Choral Performance Techniques.** Study of performance problems and musical analysis of choral music with techniques of preparation and rehearsal from the various style periods: Renaissance, baroque, classic-romantic, and contemporary. Prerequisite: Admission into the Doctor of Musical Arts choral music program, or the equivalent background in other doctoral degree programs. $\frac{1}{2}$ unit. May be repeated to a maximum of 2 units.
455. **The Choral Program in Secondary Schools.** An in-depth study of the methods and materials appropriate for teaching choral music in the secondary schools. Prerequisite: Graduate standing in music or music education. $\frac{1}{2}$ or 1 unit.
477. **Advanced Accompanying.** Grasp of the fundamental principles of accompanying singers and instrumentalists, practical experience in accompanying, and facility in sight reading for keyboard performers. Prerequisite: Graduate standing in music or music education and/or consent of instructor. 1 unit. May be repeated to a maximum of 3 units.
480. **Piano.** Prerequisite: Bachelor of Music degree; successful completion of a qualifying examination given by the graduate committee. $\frac{1}{2}$ or 1 unit.
481. **Voice.** Prerequisite: Bachelor of Music degree; successful completion of a qualifying examination given by the graduate committee. $\frac{1}{2}$ or 1 unit.
482. **Organ.** Selected studies from the masterworks of organ literature. Prerequisite: Bachelor of Music degree; successful completion of a qualifying examination given by the graduate committee. $\frac{1}{2}$ or 1 unit.
483. **String Instruments.** Prerequisite: Bachelor of Music degree; successful completion of a qualifying examination given by the graduate committee. $\frac{1}{2}$ or 1 unit.
484. **Wind Instruments.** Prerequisite: Bachelor of Music degree; successful completion of a qualifying examination given by the graduate committee. $\frac{1}{2}$ or 1 unit.
485. **Percussion Instruments.** Prerequisite: Bachelor of Music degree; successful completion of a qualifying examination given by the graduate committee. $\frac{1}{2}$ or 1 unit.
489. **Doctoral Projects.** Special projects for candidates for the Doctor of Musical Arts; open only to students in the Doctor of Musical Arts program. Prerequisite: Consent of instructor. 0 to 4 units (summer session, 0 to 2 units).
499. **Thesis Research.** Research in special projects. Prerequisite: Consent of instructor. 0 to 4 units.

NAVAL SCIENCE

Head of Department: Captain J. W. Orrill

Department Office: 239 Armory, Champaign

100. **Naval Science Laboratory.** A noncredit course designed to give the Naval ROTC student, through practical application, a better grasp of the naval science subjects taught in the classroom and a working knowledge of close order drill. 0 credit.
111. **Introduction to Naval Science.** Naval organization and management practices examined within the context of American social and industrial organization and practice; command and control, organization for logistics, service and support, functions and services of major components of the Navy and Marine Corps, and shipboard organization; and emphasis on management and leadership functions. Prerequisite: Approval of professor of naval science; concurrent registration in Naval Science 100. 3 hours.
112. **Naval Ships Systems, I.** Study of ship compartmentation, propulsion systems, auxiliary power systems, interior communications, and ship control; types, structure, and purpose of naval ships; and examination of elements of ship design and ship stability. Prerequisite: Naval Science 111 or consent of instructor. 3 hours.
121. **Naval Ships Systems, II.** Introduction to concepts of naval weapons systems, their capabilities and limitations, and their individual and complimentary roles in a wide variety of offensive and defensive situations. Prerequisite: Credit or concurrent registration in Physics 102 or equivalent, and one course in computer science, or consent of instructor. 3 hours.
122. **American Military Affairs.** An introductory survey of military affairs in the United States from the American Revolution to the present; emphasis on the evolution of the American military establishment, and international and domestic considerations leading to American involvement in international conflicts. Prerequisite: Sophomore standing in NROTC Program or consent of instructor. 3 hours.
231. **Navigation and Naval Operations, I.** Provides the student with an understanding of the theory and techniques of the three types of marine (nautical) navigation: piloting, electronic, and celestial. Prerequisite: Junior standing in NROTC Program; registration in Naval Science 100 or consent of instructor. 3 hours.
232. **Navigation and Naval Operations, II.** Designed to give an understanding of the concepts and use of relative motion principles, international maritime law and the rules of the nautical road, and the fundamentals of U.S. fleet organization, communication, and operations. Prerequisite: Junior standing in NROTC Program; concurrent registration in Naval Science 100, or consent of instructor. 3 hours.
242. **Naval Personnel Administration.** Exploration of the sociological structure of the military, the management practices essential to the effective functioning of that organization, and the role of the junior manager. Much of the instruction will be theoretical, but it will also concentrate in the specific areas of military law and justice, administrative procedures, and applicable personnel management practices, the understanding of which is essential to a well-rounded and qualified officer. Prerequisite: Senior standing in NROTC Program; registration in Naval Science 100 or consent of instructor. 3 hours.
291. **Evolution of Warfare.** Survey of the evolution of warfare; emphasis on the philosophies and trends which have been significant in land warfare. Prerequisite: Advanced undergraduate standing; concurrent registration in Naval Science 100 or consent of instructor. 3 hours.
293. **History of Amphibious Warfare.** Study of amphibious operations and the evolution of amphibious warfare doctrine and development. Prerequisite: Advanced undergraduate standing or consent of instructor. 3 hours.

NUCLEAR ENGINEERING

Chairman of Program: Professor G. H. Miley

Program Office: 214 Nuclear Engineering Laboratory, Urbana

197. **Nuclear Energy and Its Uses.** Discussions and lectures to orient freshmen and sophomores to the role of nuclear engineering in society and technology. 1 hour. May be repeated to a maximum of 2 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
295. **Special Problems.** Individual investigation of any phase of nuclear engineering selected by the student and approved by the department. Prerequisite: Senior standing and approval of adviser. 1 to 4 hours.
302. **Nuclear Power Engineering.** Same as Mechanical Engineering 302. Principles of release and utilization of fission energy in nuclear power engineering; includes such topics as fission processes and controlled chain reactions; nuclear reactor types, design principles, and operational characteristics; power reactor design criteria; radiation hazards and radioactive waste treatment; economics; and other applications such as propulsion and research reactors. Prerequisite: Consent of instructor. 3 hours or 1 unit.
312. **Nuclear Power Economics and Fuel Management.** A quantitative analysis of the economic impact of the nuclear power industry; nuclear fuel cycle and capital costs for thermal and fast reactors; optimization of the use of nuclear fuels to provide the lowest energy costs and highest system performance; and comparison between fossil fuel systems, fission systems, and controlled thermonuclear systems. Prerequisite: Junior standing; Mechanical Engineering 302, or Nuclear Engineering 302 or 347, or consent of instructor. 3 hours or 1 unit.
321. **Introduction to Controlled Thermonuclear Fusion.** Same as Electrical Engineering 321. Review of Maxwell's equations and introduction to plasma physics as it applies to controlled thermonuclear fusion problems; energy balance; plasma confinement and stability; and recent approaches to the fusion reactor. Prerequisite: Senior or graduate standing, or consent of instructor. 4 hours or 1 unit.
346. **Modern Physics for Nuclear Engineers.** Same as Physics 346. Those fundamentals of quantum theory, atomic structure, and nuclear behavior needed by students before taking advanced courses in nuclear engineering; basic information on radiation types, properties, and interactions. Prerequisite: Junior standing in engineering or physical science. 3 hours or $\frac{3}{4}$ unit.
347. **Introduction to Nuclear Engineering.** Energy resources and nuclear power systems; nuclear particles and nuclear chain reactions; energy release from fission; fast and thermal reactors; reactor theory; radiation shielding; reactor materials and radiation damage; reactor instrumentation, safety, and control; reactor heat removal; and fusion energy sources. Prerequisite: Nuclear Engineering 346 or equivalent, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
349. **Nuclear Radiation Protection.** Same as Civil Engineering 349. Principles and practice of health physics and radiation protection engineering; includes such topics as principles of dosimetry; sources of ionizing radiation; determination of radiation tolerances; dosimetric instruments; and standards and regulations. Prerequisite: Nuclear Engineering 346 or 397, or equivalent, or consent of instructor. 4 hours or 1 unit.
351. **Nuclear Engineering Laboratory.** Radiation detection and instrumentation; radiation dosimetry and shielding; subcritical assemblies; reactor operations; basic measurements in nuclear engineering; and engineering applications. Prerequisite: Credit or concurrent registration in Nuclear Engineering 347. 3 hours or $\frac{3}{4}$ unit.
355. **Reactor Statics and Dynamics.** Intermediate-level analysis of thermal and fast reactor assemblies; reactor statics, reactor dynamics, and introductory transport theory; homogeneous and heterogeneous reactors; and multigroup diffusion theory, perturbation theory, reactivity coefficients, and control rod analysis. Prerequisite: Nuclear Engineering 347 or equivalent, or consent of instructor. 3 hours or 1 unit.

357. **Nuclear Reactor Safeguards.** Safety problems related to nuclear systems; emphasis on problems concerning nuclear reactors; past nuclear accidents and future prevention; selection of sites; containment of radioactivity; engineered safeguards; safety analysis of operation; legal responsibilities; and public relations. Prerequisite: Nuclear Engineering 302 or 347, or equivalent, or consent of instructor. 3 hours or 1 unit.
358. **Design in Nuclear Engineering.** Introduction to design in nuclear engineering systems; basic principles of definition, organization, constraints, modeling, and optimization of system design; case studies; and class design projects applying these basic principles. Prerequisite: Nuclear Engineering 347. 3 hours or $\frac{3}{4}$ unit.
388. **Nuclear Ceramics.** Same as Ceramic Engineering 388. Study of the characterization, behavior, and utilization of ceramic materials for the radiation environment of modern nuclear reactor devices with particular emphasis on the power reactor; discussion of material functions in radiation environment, the ceramic nuclear fuel cycle, radiation damage in nonfissile ceramics, and nuclear carbon, graphite, and nonfuel ceramic isotope utilization. Prerequisite: Chemistry 245 or Physics 383, or consent of instructor. 3 hours or 1 unit.
397. **Radiochemistry.** Same as Chemistry 397. Properties of radioactive nuclei; nature of radioactivity; nuclear structure; nuclear reactions; interactions of radiations with matter; chemical aspects of radioactivity work; and applications of nucleonics to chemistry. Prerequisite: One semester of physical chemistry or one semester of atomic physics, or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
398. **Radiochemistry Laboratory.** Same as Chemistry 398. Radioactivity detection and tracer applications of radioisotopes in chemistry and other fields. One laboratory and one discussion period per week. Prerequisite: One semester of physical chemistry or one semester of atomic physics, or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
401. **Fundamentals of Nuclear Engineering.** A lecture and problem course to provide background for further work in nuclear engineering; problems in materials, heat transfer, and fluid flow; and special emphasis on basic ideas and the mathematical similarity of problems in heat transfer, fluid flow, and neutron diffusion. Prerequisite: Mathematics 345 or equivalent; credit or concurrent registration in Nuclear Engineering 397 or Physics 382, or equivalent. 1 unit.
411. **Nuclear Reactor Heat Transfer.** Selected topics in nuclear reactor heat transfer: thermal analysis of fuel elements under steady and transient operation; convective energy transport from reactor cores; two-phase flow and boiling in reactor cores; and liquid metal coolant systems. Prerequisite: Nuclear Engineering 401 or consent of instructor. 1 unit.
421. **Nuclear Concepts.** Selected topics in low-energy nuclear physics of general interest to the nuclear engineering field; nuclear reactions; cross sections; slowing down and interactions with matter; decay theory; and nuclear forces. Prerequisite: Credit in a nuclear physics course such as Nuclear Engineering 397 or Physics 382. 1 unit.
422. **Controlled Fusion Systems.** Same as Electrical Engineering 422. Development of plasma models for fusion analysis; treatment of plasma heating and confinement with applications to current experiments; energy balances and energy extraction, minimum-B configuration, instability criteria, Tokamak machines, pinch systems, and mirror systems. Prerequisite: Nuclear Engineering 321 or consent of instructor. 1 unit.
425. **Nuclear-Electrical Energy Conversion.** Same as Electrical Engineering 425. Advanced concepts in nuclear radiation energy conversion of importance in both power production and radiation detection; analysis and applications of direct collection of charged particles; and theory and applications of radiation-induced ionization and excitation. 1 unit.
431. **Nuclear Metallurgy.** Metallurgical principles applied to materials problems in nuclear engineering; includes topics in production of uranium, corrosion, radiation damage, fuel element fabrication, and fuel reprocessing. Prerequisite: Consent of instructor. 1 unit.

441. **Nuclear Radiation Shielding.** Basic concepts, radiation sources, elementary gamma ray and neutron shielding, geometry factors in shielding, advanced techniques (such as Monte Carlo and discrete ordinates), special topics (such as shield heating, duct streaming, and albedo theory), and practical aspects. Prerequisite: Nuclear Engineering 349 or consent of instructor. 1 unit.
451. **Reactor Laboratory.** Reactor operation: start-up, changes in power level, and shut-down; reactor instrumentation: subcritical assemblies; flux measurements in core and thermal column; control rod worth measurements; effects of changes in fuel configurations; and activation and neutron-beam experiments. Prerequisite: Nuclear Engineering 347 or consent of instructor. $\frac{1}{2}$ or 1 unit.
454. **Nuclear Engineering Laboratory Investigations.** Individual laboratory investigations in nuclear engineering. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 2 units.
455. **Reactor Physics, I.** Same as Physics 455. Introduction to the physical concepts of reactor analysis; nuclear cross sections; diffusion, slowing down, and thermalization of neutrons; homogeneous reactor theory; introduction to heterogeneous reactor theory and reactor kinetics; and computer applications in reactor analysis. Prerequisite: Nuclear Engineering 355 or equivalent, or consent of instructor. 1 unit.
456. **Reactor Physics, II.** Same as Physics 456. Continuation of Nuclear Engineering 455. Neutron transport theory; current methods of solution of the transport equation; fast and thermal neutron spectra; applications in heterogeneous reactor analysis and other areas of reactor physics; and digital computer methods. Prerequisite: Nuclear Engineering 455 or consent of instructor. 1 unit.
457. **Methods of Fast Reactor Analysis.** Static and dynamic performance characteristics of fast reactors; multigroup diffusion and transport models for fast power-reactors; construction of multigroup cross-section sets; algorithms for one-dimensional and multidimensional numerical analysis; reactivity coefficients; and fast reactor safety and reliability. Prerequisite: Nuclear Engineering 455. 1 unit.
458. **Nuclear Reactor Engineering.** Development of engineering design phases of the fission chain reactor: reactor materials and radiations; thermal aspects; heat removal; radiation hazards; shielding; reactor performance; controls and instrumentation; types and applications; fuel conversion; and reactor power economics. Prerequisite: Nuclear Engineering 347 or consent of instructor. 1 unit.
460. **Reactor Kinetics.** Discussion of special topics such as response of reactor systems to changes of power demand and reactivity; transfer function analysis, nonlinear problems of reactor dynamics, and reactor stability; fuel cycles; and digital and analog computer methods for solving reactor kinetic problems. Prerequisite: Nuclear Engineering 401; credit or concurrent registration in Nuclear Engineering 455; consent of instructor. 1 unit.
467. **Thermomechanics of Nuclear Reactor Systems.** Same as Theoretical and Applied Mechanics 467. Origin of thermomechanics problems in nuclear reactor systems; heat generation and transfer in nuclear power systems; thermal stress in nuclear reactor systems; dynamical theory including effects of thermal shock and thermal stress-wave propagation; and current thermomechanics problems in nuclear reactor design. Term paper required. Prerequisite: Nuclear Engineering 401 or consent of instructor. 1 unit.
490. **Special Topics.** Selected areas are considered which are of current interest in research, such as nuclear materials, advanced reactor systems, thermonuclear problems, digital computer methods in nuclear engineering, and advanced topics in reactor theory. Prerequisite: Consent of instructor. $\frac{1}{2}$ or 1 unit.
495. **Nuclear Engineering Problems.** Individual study in areas of nuclear engineering and closely related fields not covered by regular course offerings. The work is carried out under the supervision of a member of the staff. Prerequisite: At least 3 units of graduate work; consent of instructor. $\frac{1}{4}$ to 2 units.
497. **Seminar in Nuclear Science and Engineering.** Lectures and discussions on current work in research and development in nuclear engineering and related fields by staff, advanced students, and visiting lecturers. 0 credit.
499. **Thesis Research.** 0 to 4 units.

NURSING

(Including General Nursing, Medical-Surgical Nursing, and Public Health Nursing)

Nursing Administrator: H. M. Rossi

Office: First Floor, 505 East Green Street, Champaign

The following courses are among the first to be offered in the College of Nursing R.N. Baccalaureate Completion Program on the Urbana-Champaign campus. Although these courses are part of the undergraduate program of the College of Nursing at the Medical Center campus, which has ultimate responsibility for them, under a cooperative arrangement they are being offered on the Urbana-Champaign campus as well.

Note: In the following courses, enrollment is limited to students who have senior standing in the College of Nursing R.N. Baccalaureate Completion Program.

General Nursing

- 290. **Seminar in Nursing.** Exploration, reporting, and discussion of issues in nursing and related fields; effect of contemporary concepts and values on nursing today; and speculations about future developments. 2 hours.
- 296. **Research Project in Nursing.** Development of individual project related to the research process. Prerequisite: Nursing 295, Sociology 184, or equivalent. 1 hour.

Medical-Surgical Nursing

- 220. **Medical-Surgical Nursing, II.** Focuses on the nursing process as it relates to the care of individuals with chronic and/or long-term illnesses which require prolonged treatment and physiological and psychosocial adaptations. Prerequisite: Concurrent registration in Nursing 221. 2 hours.
- 221. **Medical-Surgical Nursing II Practicum.** Application of theoretical concepts of rehabilitation to the nursing process in the care of selected patients with long-term and chronic illnesses. Prerequisite: Concurrent registration in Nursing 220. 2 hours.
- 280. **Senior Nursing.** Theoretical concepts of leadership and the management process as related to delivery of health care. Prerequisite: Concurrent registration in Nursing 281. 1 hour.
- 281. **Senior Nursing Practicum.** Application of the theoretical concepts of leadership and the management process as related to delivery of health care. Prerequisite: Concurrent registration in Nursing 280. 1 hour.

Public Health Nursing

- 260. **Public Health Nursing.** Concepts in the provision of comprehensive health care to individuals and families in homes and other community settings. Prerequisite: Nursing 201, Health Education 374, or equivalent; concurrent registration in Nursing 261. 3 hours.
- 261. **Public Health Nursing Practicum.** Focuses on the family and the community as the entities to which public health nursing services are directed. Prerequisite: Nursing 201 or equivalent; concurrent registration in Nursing 260. 3 hours.

NUTRITIONAL SCIENCES

Chairman of Committee: Professor P. V. Johnston

Program Office: 205 Burnside Research Laboratory, Urbana

400. **Nutritional Sciences Seminar.** Discussions of current problems in nutritional sciences. Required of all graduate students in the nutritional sciences program. Prerequisite: Nutritional Sciences 410. $\frac{1}{4}$ unit.
410. **Current Topics in Nutritional Research.** Same as Dairy Science and Food Science 410. Discussion of current research problems in experimental nutrition. Prerequisite: Biochemistry 350 or 352; an upper-level course in nutrition. $\frac{3}{4}$ unit.
411. **Chemistry of Nutritional Processes.** Same as Dairy Science and Food Science 411. Biochemical aspects of nutrition with emphasis on the function, regulation, and metabolism of nutrients in man. Prerequisite: Biochemistry 350 or 352; an upper-level course in nutrition. 1 unit.
493. **Individual Topics in Nutrition.** For students majoring in nutritional sciences who wish to undertake individual studies of a nonthesis nature in problems or topics not covered in other courses; may be taken under the direction of any member of the nutritional sciences faculty, with the exception of the student's own thesis adviser. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 2 units.
499. **Thesis Research.** 0 to 4 units (summer session, 0 to 2 units).

OCCUPATIONAL THERAPY

Program Adviser: B. Loomis

Program Office: 505 East Green Street, Champaign

100. **Occupational Therapy Orientation.** Historical development of the profession and its evolving philosophies; the attitudes, concepts, and skills of the occupational therapist; and the relationship of occupational therapy to associated disciplines; includes required laboratory-field experiences. Prerequisite: Registration in occupational therapy curriculum. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.

PERSIAN

(See Linguistics under Humanities, School of)

PHILOSOPHY

(See Humanities, School of)

PHYSICAL EDUCATION

Head of Department: Professor R. G. Wright

Department Office: 117 Freer Gymnasium, Urbana

100. **Foundations of Physical Activity.** Activities and understanding of the human body relative to physical fitness and sport skill patterns. 1 hour.
101. **Prescribed Exercise.** Prescribed exercise adapted to individual needs, capacities, and interests. Open only to paraplegic and handicapped students. 1 hour. May be repeated to a maximum of 4 hours.
102. **Symbolism and Movement.** Analysis of movement as a science and art, and as a symbolic form of communication; creative exploration of movement as a concomitant element of theater and the concert stage. 1 hour.
103. **Physical Fitness.** Activities and understanding which contribute to the development and maintenance of physical fitness according to social and hygienic standards. 1 hour. May be repeated once for credit if taken in successive semesters.
104. **Weight Training.** Skills and knowledge essential for use of weights for conditioning the body. 1 hour. May be repeated once for credit if taken in successive semesters.
105. **Conditioning and Weight Control.** Activities and understanding which contribute to the development and/or maintenance of physical fitness and a well-proportioned body. 1 to 2 hours. May be repeated once for credit if taken in successive semesters; credit not to exceed a total of 2 hours.
107. **Personal Defense.** Skills and understanding essential for defense against an aggressor, with emphasis on avoiding attack. 1 hour.
110. **Wrestling.** Introductory skills, knowledge, and conditioning essential for collegiate wrestling. 1 hour.
114. **Tumbling.** Instruction in forward and backward rolls, inverted stunts, springs, aerial somersaults, aerial twisting somersaults, and transitional movements for free exercise routines. 1 hour. May be repeated once for credit.
115. **Trampoline.** Introductory skills, knowledge, and conditioning relative to trampolining and tumbling. 1 hour.
117. **Apparatus, I.** Introductory skills, knowledge, and conditioning relative to participation on heavy apparatus. 1 hour.
123. **Target Archery.** Introductory skills, knowledge, and conditioning essential for target shooting. 1 hour.
127. **Angling.** Introductory skills and understanding essential for bait, fly, and spin casting. 1 hour.
128. **Equitation and Horsemanship, I.** Fundamentals of riding, including walk, trot, and canter; flatsaddle and bareback riding; use of reins and tack; saddling and unsaddling; and basic grooming. For current fees, see *Timetable*. 1 hour.
134. **Ballroom Dance, I.** Introductory skills and understanding essential for basic ballroom dance steps; emphasis on waltz, swing, fox trot, rhumba, cha-cha, and polka. 1 hour.
135. **American Square Dance.** Introductory skills and understanding essential for square dancing; opportunities for conducting and calling dances. 1 hour.
136. **International Folk Dance.** Introductory skills, knowledge, and conditioning essential for exploring cultural characteristics via the folk dance idiom. 1 hour.
138. **Modern Dance, I.** Introductory skills, knowledge, and conditioning essential for free and creative dance. 1 hour.
139. **Ice Dance.** Introduction to set patterns of ice dance; emphasizes ice dance skills designed to build control in footwork and balance when skating with a partner. Prerequisite: Physical Education 215 or consent of instructor. 1 hour. May be repeated to a maximum of 2 hours.
140. **International Ballroom Dance.** Skills and understanding essential for international ballroom dance steps; emphasis on tango, cha-cha, Viennese waltz, samba, rhumba,

quickstep, paso doble, mambo, and merengue. Prerequisite: Physical Education 207 or consent of instructor. 1 hour.

143. **Bowling, I.** Introductory skills and understanding essential for bowling. 1 hour.
144. **Golf, I.** Introductory skills and understanding essential for course play, with emphasis on irons. 1 hour.
145. **Figure Skating, I.** Introductory skills, knowledge, and conditioning essential for figure skating. 1 hour.
147. **Snow Skiing, I.** Introductory skills, knowledge, and conditioning relative to snow skiing; practical experience will be accommodated at off-campus locations. For current fees, see *Timetable*. 1 or 2 hours. May be repeated to a maximum of 2 hours.
148. **Track and Field.** Introductory skills, knowledge, and conditioning essential for various track and field events. 1 hour. May be repeated once for credit.
153. **Badminton.** Introductory skills, knowledge, and conditioning essential for badminton. 1 hour.
154. **Foil Fencing.** Introductory skills, knowledge, and conditioning essential for foil fencing. 1 hour.
155. **Handball.** Introductory skills, knowledge, and conditioning essential for four-wall handball. 1 hour.
156. **Racquetball, I.** Introductory skills, knowledge, and strategies essential for racquetball. 1 hour.
157. **Squash Racquets.** Introductory skills, knowledge, and conditioning essential for squash racquets. 1 hour.
158. **Tennis, I.** Introductory skills, knowledge, and conditioning essential for court play. 1 hour.
159. **Rhythmic Gymnastics.** Dynamic rhythmic movement interpretation by individual and group structure; utilization of hand apparatus (balls, hoops, ropes, etc.). 1 hour. May be repeated once for credit.
163. **Basketball.** Introductory skills, knowledge, and conditioning essential for basketball. 1 hour.
164. **Volleyball, I.** Introductory skills, knowledge, and conditioning essential for power volleyball. 1 hour.
169. **Rugby Football.** Introductory skills, knowledge, and conditioning essential for offensive and defensive strategies of the game. 1 hour.
171. **Tackle Football, I.** Introductory skills, knowledge, and conditioning for tackle football. Prerequisite: Consent of instructor. 1 hour.
172. **Lacrosse.** Introductory skills, knowledge, and conditioning essential for lacrosse. 1 hour.
173. **Soccer.** Introductory skills, knowledge, and conditioning essential for soccer. 1 hour.
174. **Speedball and Speedaway.** Introductory skills, knowledge, and conditioning necessary for speedball and speedaway. 1 hour.
175. **Field Hockey.** Introductory skills, knowledge, and conditioning essential for field hockey. 1 hour.
176. **Ice Hockey.** Introductory skills, knowledge, and conditioning essential for ice hockey. 1 hour.
177. **Baseball, I.** Introductory skills, knowledge, and conditioning for baseball. 1 hour.
182. **Swimming, I.** Introductory skills, knowledge, and conditioning essential for swimming. Open only to nonswimmers and those with no deep water experience. 1 hour. May be repeated once for credit.
183. **Competitive Swimming.** Skills, knowledge, and conditioning essential for strokes, starts, and turns; emphasis on training for competitive participation as well as meet organization. Prerequisite: Physical Education 231 or consent of instructor. 1 hour.
184. **Springboard Diving.** Introductory skills, knowledge, and conditioning essential for springboard diving. Prerequisite: Physical Education 231 or consent of instructor. 1 unit. May be repeated once for credit.

185. **Synchronized Swimming, I.** Introductory skills, knowledge, and conditioning essential for creating aquatic compositions. Prerequisite: Physical Education 231 or consent of instructor. 1 hour.
186. **Water Polo, I.** Designed to develop skills, strategies, and knowledge essential for participation in the game of water polo. Prerequisite: Physical Education 183 or consent of instructor. 1 hour.
188. **Life Saving.** American Red Cross training for the prevention of aquatic mishaps and for life saving. Prerequisite: Ability to swim one-half mile including 20 yards underwater and 100 yards of each of the following: sidestroke, breaststroke, and front crawl. 2 hours.
190. **Water Safety Instructor Training.** American Red Cross Instructor training for the teaching of swimming and life saving. Prerequisite: Physical Education 231 or consent of instructor; a Red Cross Senior Life Saving authorization card. 2 hours.
193. **Canoeing.** Introductory skills and knowledge essential for handling a canoe with safety. Prerequisite: Physical Education 231 or consent of instructor; the ability to jump or dive into deep water while clothed and maintain a survival position for 10 minutes. 1 hour.
194. **SCUBA Diving, I.** Introductory skills, knowledge, and conditioning essential for SCUBA diving. A certification card will be issued upon successful completion of the course. Prerequisite: Physical Education 231 or consent of instructor; medical certification. For current fees, see *Timetable*. 2 hours.
197. **Equitation and Horsemanship, II.** Intermediate riding skills, including individual control of walk, trot, and canter; smooth transfer of gaits; bareback riding in all three gaits; diagonals, figure eights, and serpentine; and tack maintenance. For current fees, see *Timetable*. Prerequisite: Physical Education 128 or consent of instructor. 1 hour.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Apparatus, II.** Intermediate skills, knowledge, and conditioning relative to participation on heavy apparatus. Prerequisite: Physical Education 117 or consent of instructor. 1 hour.
207. **Ballroom Dance, II.** Skills for intermediate ballroom dance steps; emphasis on waltz, swing, fox trot, rumba, cha-cha, tango, samba, and Viennese waltz. Prerequisite: Physical Education 134 or consent of instructor. 1 hour.
211. **Modern Dance, II.** Intermediate level technique, improvisation, and composition for both men and women; multimedia approaches to dance and dance criticism. Prerequisite: Physical Education 138 or consent of instructor. 1 hour.
213. **Bowling, II.** Intermediate skills and understanding essential for bowling. Prerequisite: Physical Education 143 or consent of instructor. 1 hour.
214. **Golf, II.** Intermediate skills and understanding essential for use of irons and woods; analysis of course play. Prerequisite: Physical Education 144 or consent of instructor. 1 hour.
215. **Figure Skating, II.** Intermediate skills, knowledge, and conditioning essential for figure skating, with emphasis on skills to pass the United States Figure Skating Association's preliminary tests. Prerequisite: Physical Education 145 or consent of instructor. 1 hour.
216. **Figure Skating, III.** Advanced skills, knowledge, and conditioning essential for figure skating, with emphasis on skills to pass the first eight tests of the United States Figure Skating Association. Prerequisite: Physical Education 215 or consent of instructor. 1 hour.
221. **Racquetball, II.** Intermediate skills, knowledge, and strategies essential for racquetball. Prerequisite: Physical Education 156 or consent of instructor. 1 hour.
223. **Tennis, II.** Intermediate skills, knowledge, and attitudes for effective court play. Prerequisite: Physical Education 158 or consent of instructor. 1 hour.
225. **Baseball, II.** Intermediate and advanced skills, knowledge, and conditioning for baseball. Prerequisite: Physical Education 177 or consent of instructor. 1 hour. May be repeated to a maximum of 2 hours.

227. **Tackle Football, II.** Intermediate and advanced skills and knowledge for tackle football; emphasizes team formations and strategies. Prerequisite: Physical Education 171 or consent of instructor. 1 hour. May be repeated to a maximum of 2 hours.
228. **Volleyball, II.** Intermediate skills, knowledge, and conditioning essential for power volleyball. Prerequisite: Physical Education 164 or consent of instructor. 1 hour.
231. **Swimming, II.** Intermediate skills, knowledge, and conditioning essential for swimming. Open only to swimmers who can execute a minimum of one of the five basic strokes in deep water, perform a standing dive, and tread in deep water. Prerequisite: Physical Education 182 or consent of instructor. 1 hour.
233. **Synchronized Swimming, II.** Skills and knowledge at the intermediate level for creating aquatic compositions with an emphasis on choreography. Prerequisite: Physical Education 185 or consent of instructor. 1 hour.
235. **SCUBA Diving, II.** Intermediate and advanced skills gained through dives at various off-campus locations; successful completion of the course leads to an advanced diver's certification. For current fees, see *Timetable*. Students will be expected to provide their own basic equipment. Prerequisite: Physical Education 194 or consent of instructor; current certification card and medical certification. 2 hours.
239. **Performance and Analysis of Physical Activities.** Introduction to the development of motor skills in selected physical activities; emphasis on the analysis of performance and developmental sequence as determined by different age groups, body build, and sex factors. Understanding is gained through activity, field trips, and seminars. 3 hours.
240. **Social Scientific Bases of Sport.** Introduction to the social science aspects of physical education and sport; particular emphasis on concepts derived from the social sciences (including psychology) that are appropriate to physical education and sport. 3 hours.
241. **History of Sport.** Deals principally with the social, cultural, and economic aspects of the sport movement in the Western world; secondary emphasis on methods of historical research. 3 hours.
244. **Anthropology of Play.** Same as Anthropology 244. The study of human play with emphasis on origin, diffusion, spontaneity, emergence, and diversity; includes functions of play in selected culture groups. Prerequisite: A course in anthropology. 3 hours.
249. **Sport and Modern Society.** The sociological analysis of sport in modern societies with regard to social class, politics, community, education, and collective behavior. 3 hours.
250. **Bioscientific Foundations of Man Moving.** Introduction to the anatomical, physiological, and biomechanical principles of human movement; particular emphasis on developing concepts of how the body moves, movement awareness, environmental determinants, exercise stress, physical conditioning, kinesiotherapy, and physical fitness. 3 hours.
251. **Theory of Prescribing Exercise.** Prescription and conduct of recreational and exercise programs for selected physical handicaps. Prerequisite: Physiology 103 and 234. 3 hours.
252. **Prevention and Care of Athletic Injuries.** Diagnostic procedures, massage, taping, bandaging, hydrotherapy, electrotherapy, handling emergency conditions, training quarters, facilities, and hygiene. Prerequisite: Physiology 103 and 234. 3 hours.
260. **Physical Education as a Profession.** The nature and scope of physical education as a profession; emphasis on orientation to the profession as well as understanding necessary for selecting an area of specialization within physical education. 2 hours.
261. **Rhythmics and Gymnastique Moderne.** Rhythmics, including the analysis and synthesis of various locomotor rhythmic patterns; basic principles and techniques of modern gymnastics, including dynamic rhythmic movements, such as movements with hand apparatus (balls, clubs, hoops, ribbons, and ropes) performed individually and as a group. 2 hours.
262. **Motor Development in Childhood.** Same as Home Economics 204. Study of the selection of specific movement experiences for the elicitation and maintenance of developmental sequences in children and youths based on physical growth and motor develop-

ment; observational experiences provided with children in a variety of settings. Prerequisite: Physical Education 250 or Home Economics 105. 3 hours.

263. **Curriculum Development in Elementary School Physical Education.** Identification, selection, and organization of movement experiences appropriate for elementary school-age children (K-6); emphasis on concept development and integration with total elementary school curriculum. Prerequisite: Physical Education 262 or consent of instructor. 2 hours.
264. **Organization and Administration of Physical Education.** The scope of this course is concerned with the organization and administration of a total physical education program, including administrative philosophy; the physical education program; physical education staff, facilities, and equipment; the budgetary process; legal liability; discipline; and public relations. 3 hours.
265. **Fitness Programs.** This course includes subject matter related to the "why" and "how" of physical activity; lectures provide an introduction to the physiology of exercise; and practical work includes physical fitness tests, calisthenics, and leadership techniques in a physical education class. 2 hours.
266. **Basic Movement and Body Mechanics.** Experiences, skills, and knowledge relative to structure and function of the human body in selected physical education and dance activities. 1 hour.
269. **Physical Education for the Classroom Teacher.** Curriculum, methods, and organization of physical education in the elementary school. For non-physical education majors. It is recommended that students in Physical Education 269 enroll concurrently in Elementary and Early Childhood Education 237 for the purpose of facilitating observation and/or teaching children in the elementary schools. Prerequisite: Junior standing. 3 hours.
270. **Principles of Evaluation and Assessment.** An introduction to the methods and techniques of evaluation and assessment of human performance in physical education and sport. Prerequisite: Physical Education 260; Mathematics 111 or 112, or equivalent score on the Mathematics Placement Test. 3 hours.
271. **Administration of High School Sport Programs.** Organization of sports programs, team sports, intramural programs, and recreational sports programs. 3 hours.
272. **Organization of Aquatic Programs.** Same as Leisure Studies 272. History of aquatics; leadership training methods; swimming pool sanitation; pool and beach control; and operational records. 2 hours.
273. **Instructional Strategies in Physical Education.** Knowledge of the teaching-learning process and performance outcomes transmitted into instructional strategies; emphasis on the identification of strategies specific to skill development in physical education activities. Prerequisite: Physical Education 282; concurrent registration in an instructional strategies course in a specific activity area. 1 hour.
275. **Instructional Strategies in Social Dance Forms.** Instructional strategies for teaching ballroom, folk, and American square dance. Prerequisite: Credit or concurrent registration in Physical Education 273; intermediate skill level in ballroom or folk dance. 2 hours.
276. **Instructional Strategies in Gymnastics.** Instructional strategies for the teaching of gymnastics. Prerequisite: Credit or concurrent registration in Physical Education 273; intermediate skill level in apparatus or tumbling. 2 hours.
277. **Instructional Strategies in Small Group Activities.** Instructional strategies for the teaching of small group activities; special emphasis given to skill acquisition, development and recognition of offensive and defensive systems, and discussion of motivational and instructional agents which facilitate performance. Prerequisite: Credit or concurrent registration in Physical Education 273; credit in a small group activity at intermediate level of skill. 2 hours.
278. **Instructional Strategies in Large Group Activities.** Instructional strategies for the teaching of large group activities; special emphasis given to techniques of skill acquisition, development and recognition of offensive and defensive systems, and discussion of

motivational and instructional agents which facilitate performance. Prerequisite: Physical Education 273; credit in a large group activity at intermediate level of skill. 2 hours.

279. **Instructional Strategies in Swimming.** Instructional strategies for the teaching of swimming. Prerequisite: Credit or concurrent registration in Physical Education 273; intermediate skill level in swimming. 2 hours.
282. **Psychology of Learning and Teaching Physical Education.** Physical education knowledge applied to teaching methodology in the learning process; special emphasis on the identification and assimilation of the interdependency of physical education goals, transmission process, and performance outcomes specific to elementary and secondary physical education. Prerequisite: Physical Education 239, 250, and 260; or consent of instructor. 3 hours.
285. **Supervised Experiences in Physical Education Research.** Supervised laboratory experiences in physical education research; individual work under the supervision of members of the faculty in their respective fields. The student assists with data collection, processing, and analysis for research in progress. Prerequisite: Physical Education 260 or consent of instructor. 3 hours. May be repeated to a maximum of 6 hours.
286. **Supervised Experience in the Common School.** Supervised practice in observing, assisting, and teaching children in preelementary school, elementary school, junior high school, and senior high school; emphasis on understanding motor behavior, teacher-learner behavior, and interrelatedness with other aspects of the learning environment. Prerequisite: Physical Education 282 or equivalent. 3 hours. May be repeated for a maximum of 6 hours.
287. **Supervised Experiences in the Agency Setting.** Supervised practical experience in physical education leadership roles in nonschool agency settings; emphasis on observing, planning, and conducting physical activity programs for children and/or adults in preschool, recreation, or other social agencies. Prerequisite: Physical Education 282 or equivalent. 3 hours. May be repeated for a maximum of 6 hours.
290. **Honors Seminar.** Same as Health Education 260 and Leisure Studies 260. Lectures and discussion dealing with issues in physical education, dance, health education, recreation education, and related fields. Prerequisite: James Scholar or grade-point average of 4.0 the preceding semester; consent of faculty advisor, instructor, and head of department. 2 hours. May be repeated for a maximum of 6 hours.
291. **Special Problems.** Special projects in research and independent investigation in any phase of health, physical education, recreation, and related areas selected by the students. Prerequisite: Junior or senior standing; grade-point average of 3.5; consent of faculty advisor, instructor, and head of department. 2 or 3 hours. May be repeated for a maximum of 4 to 6 hours.
292. **Advanced Football.** Offensive and defensive strategy; training drills. 1 hour.
293. **Advanced Basketball.** Offensive and defensive strategy; training drills. 1 hour.
294. **Advanced Gymnastics.** Involves the review of basic skills and study of advanced skills, and leads to qualification as an instructor of gymnastics at the elementary, secondary, and college levels; includes methods of teaching, safety devices and practices, and practical learning of progressions for the several gymnastics events. Prerequisite: Consent of instructor. 2 hours.
295. **Advanced Wrestling.** Designed to review the basic skills and to introduce more advanced wrestling techniques and strategies, thereby preparing better qualified wrestling instructors and coaches for the various educational levels. Prerequisite: Consent of instructor. 2 hours.
296. **Theory of Coaching.** Basketball, football, and baseball schedule making; team management; scouting; and officiating. Prerequisite: Consent of instructor. 2 hours.
305. **Principles of Ergonomics.** Same as Industrial Engineering and Physiology 305. Concepts and design criteria to achieve optimum mutual adjustment of man and his work; consideration of such topics as static and dynamic forces on the human frame, responses to environmental stress (heat, vibration, noise), vigilance and fatigue, and man-

- machine systems. Prerequisite: Senior standing; consent of instructor. 4 hours or 1 unit.
- 306. Quantitative Methods in Ergonomics.** Same as Industrial Engineering and Physiology 306. Laboratory problems and discussion on measurements of the physical and mental capacities and limitations of human beings in relationship to the stresses and demands of working environments; familiarization with techniques and tools such as assessment of human energy expenditures on an industrial job, use of seating research chair, and high-speed and time lapse photography. Student teams select about six problems from a list of topics, or they develop problems of special interest to the team. Prerequisite: Physiology 305. 4 hours or 1 unit.
- 341. International Physical Education and Sport.** A study of objectives, methods, personnel, facilities, and evaluation of selected national programs of physical education; additional consideration given to sports clubs, indigenous games, and research. Prerequisite: Physical Education 241 or consent of instructor. 2 hours, or $\frac{1}{2}$ or 1 unit.
- 343. Social Psychology and Motor Behavior.** Same as Leisure Studies 343. The use of social psychological theory and methods in the study of motor behavior; emphasis given to the influence of social psychological processes on motor skill acquisition, including such variables as social facilitation, competition, aggression, attitudes, and personality. Prerequisite: Educational Psychology 390; Psychology 201; or consent of instructor. 4 hours or 1 unit.
- 348. Social Problems Related to Physical Activity and Sport.** Same as Leisure Studies 348. A seminar with field study on physical activity and sport for marginal, deviant, or sociopsychologically deprived groups. Prerequisite: Six hours in the social sciences or consent of the instructor. 2 hours, or $\frac{1}{2}$ or 1 unit.
- 349. Analysis of Small Groups in Play or Sport.** Same as Leisure Studies 349. The methodology of small group research and analysis of the small group in play and sport; culture, social structure, and personality structure in the group; and class and student observation and analysis of the small group in play and sport in natural field settings. Prerequisite: Psychology 100 or 201, or Sociology 100 or 201, or consent of instructor. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
- 350. Theory and Practice of Exercise Therapy.** Theory and practice of therapeutic exercise as it applies to physical rehabilitation of the physically handicapped; physiological and kinesiological principles of physical restoration; physical educator's role as related to ancillary medical forces; and problems and principles related to kinesiotherapy, preventive, adapted, and remedial physical education, and athletic training. Prerequisite: Physiology 103 and 234; Physical Education 250 and 355; or consent of instructor. 4 hours, or $\frac{1}{2}$ or 1 unit.
- 352. Physiology of Physical Activity.** Study of the immediate and long-term physiological effects of exercise upon the body; mechanisms of neuromuscular, cardiorespiratory, and metabolic control and adaptation relative to physical activity. Laboratory and lecture. Prerequisite: Physical Education 250; Physiology 103 and 234; or equivalent. 3 hours or 1 unit.
- 354. Growth and Physical Development of Children.** Same as Home Economics 354. A study of the growth and physical development of children through adolescence with emphasis on those systems and body composition changes related to motor performance and exercise stress. Prerequisite: Physiology 103 and 234; Physical Education 270; or equivalent. 3 hours or 1 unit.
- 355. Kinesiology.** The scientific study of the anatomical and biomechanical principles of human performance; utilization of cinematography and electromyography in the analysis of selected physical education activities. Prerequisite: Physical Education 250 or equivalent; Physiology 234 or equivalent; Mathematics 104 or equivalent; or consent of instructor. 3 hours or 1 unit.
- 357. Motor Learning.** Discussion and analysis of scientific principles related to the learning and performance of motor skills; review of related literature and research in motor learning. Prerequisite: Psychology 100 or consent of instructor. 4 hours or 1 unit.

362. **Advanced Athletic Training Techniques.** Provides in-depth knowledge and skill in athletic training, including experience in prescribed athletic training duties; techniques and research in the prevention, care, treatment, and rehabilitation of athletic injuries. Prerequisite: Physical Education 252 or consent of instructor. 3 hours or 1 unit.
363. **Curriculum Development and Trends.** Curriculum planning and development in physical education with emphasis on ecological, biological, psychological, and sociological factors influencing programs in schools and colleges. Prerequisite: Physical Education 264 or consent of instructor. 4 hours or 1 unit.
364. **Problems of Facilities Planning, Construction, and Utilization.** Physical education facilities as related to objectives of physical education; consultant services with planning committees and architects; cost factors in different types of construction; the use of standards as a check on and guide for planning; safety factors; changes in playing surfaces due to research; and building and fields maintenance programs. Prerequisite: Physical Education 264 or equivalent, or consent of instructor. 2 hours, or $\frac{1}{2}$ or 1 unit.
365. **Movement Notation.** Scientific symbolic system for notation of movements of the human body. Prerequisite: Physical Education 250 or 355, or Dance 160. 3 hours or 1 unit.
394. **Special Topics in Physical Education.** Lecture course on topics of current interest; specific topics announced in the *Timetable*. Prerequisite: To be determined for each subject and indicated in the *Timetable*. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit. May be repeated.
440. **History of Physical Education and Sport.** An analysis of the research literature related to the historical foundations of physical education and sport; discussion of such persistent historical problems as the influence of economics, politics, and nationalism; curriculum and methods of instruction; professional preparation; the healthy body; dance; the use of leisure; and amateur and professional sport. Prerequisite: Physical Education 241 or equivalent. 1 unit.
441. **Philosophy of Physical Education and Sport.** Philosophical analysis of physical education and sport (with some reference to school health and recreation) in the light of the leading philosophical tendencies and possible implications for public and private education; analysis of completed research; and delineation of one's personal philosophy and the use of philosophical analysis as a research technique. Prerequisite: Philosophy 101; History and Philosophy of Education 305. 1 unit.
443. **Group Dynamics in Sport.** Same as Leisure Studies 443. Theories and methods in the study of the psychology of small group behavior in sport; analysis of the literature pertaining to group structure and group processes, with particular emphasis on group performance in sport. Prerequisite: Physical Education 343 or consent of instructor. 1 unit.
447. **Sport Psychology.** Analysis of psychological factors and principles with special reference to motor performance, learning motor skills, perception, and emotion in sports situations; review of literature; and independent projects. Prerequisite: Psychology 100; Educational Psychology 211; consent of instructor. 1 unit.
449. **The Sociology of Sport.** Same as Sociology 449. Sociological analysis of sport with emphasis on sociological theory; sport and games in cross-cultural analysis; sport's structure and function in modern industrialized society; the system of sport in regard to its role structure, formal organization, and professionalization; its differentiation along social class, age, and sex; and sport contest and conflict. Prerequisite: Nine hours of sociology or anthropology including a course in research methods, or consent of instructor. 1 unit.
451. **Scientific Basis of Physical Performance.** Contemporary trends in the study of human performance and exercise stress; analysis of the research literature, experimental strategies, and research instrumentation. Lecture-discussion and laboratory. Prerequisite: Physical Education 352 or 354; Physical Education 355; or equivalent. 1 unit.
452. **Neuromuscular Aspects of Human Performance.** In-depth study of the neuromuscular aspects of human activity; focus on selected topics related to growth, physical development, exercise prescriptions, athletic conditioning, and fitness. Lecture-discussion and laboratory. Prerequisite: Physical Education 451. 1 unit.

453. **Circulorespiratory Aspects of Physical Activity.** Aerobic performance responses to short-term, intermittent, and prolonged physical activity; special consideration given to endurance training methods and assessment techniques, ergogenic aids, and problems associated with growth, environmental influences, and competitive sport. Lecture-discussion and laboratory. Prerequisite: Physical Education 451 or consent of instructor. 1 unit.
455. **Experimental Kinesiology.** Mechanical and neuromuscular approach to human movement; analysis, experimental research findings, and lecture and laboratory discussions. Prerequisite: Physiology 234 or equivalent; Physical Education 355 or equivalent; or consent of instructor. 1 unit.
457. **Sensorimotor Development.** Same as Home Economics 457. Study of the development of spatially adapted movement behavior in man; emphasis on the nature of sensorimotor systems and development of perception; the role of proprioceptive feedback mechanisms and associated reflexes; and the neurogeometric principles basic to the study of man interpreting and acting on the environment. Prerequisite: Physical Education 357 or equivalent. 1 unit.
459. **Principles of Kinesiotherapy.** Analysis of medically approved techniques employed in the treatment of disease and injury by exercise and movement; kinesiological evaluation of principles involved; therapy preparation in teaching techniques; medically prescribed clinical training; and literature and research. Prerequisite: Physiology 234; Physical Education 250 and 355; or consent of instructor. 1 unit.
461. **Administration of Physical Education and Sport.** Analysis of completed research relating to theory and practice of administration in physical education and sport; the development of policy statements and procedures manuals for the various educational levels; and experience in the use of the case plan of instruction as a teaching technique for the development of competence and knowledge relating to human relations and administration in this specialized field. Prerequisite: Physical Education 264 or equivalent. 1 unit.
473. **Ergonomics Seminar.** Same as Industrial Engineering 473 and Physiology 473. In-depth exploration of topics in ergonomics, such as effects of vibration on human performance, biomechanics of the hand, and functional dimension. Prerequisite: Physical Education 306. ½ unit.
490. **Seminar.** Lectures, discussions, and critiques on physical education and related subjects by faculty members and visiting professional leaders; presentation and criticism of student theses. 0 credit.
493. **Independent Study.** Independent research on special projects; offered summers as a special group practicum. ½ or 1 unit.
494. **Special Topics in Physical Education.** Lecture course in topics of current interest; specific subject matter announced in the *Timetable*. ½ or 1 unit. May be repeated.
495. **Techniques of Research in Health, Physical Education, and Recreation.** Review and appraisal of common research procedures; application of statistical procedures, library methods, evaluation procedures, and experimental methods. 1 unit.
499. **Thesis Research.** Preparation of theses in physical education. 0 to 4 units.

PHYSICS

Head of Department: Professor R. O. Simmons

Department Office: 211 Physics Building, Urbana

101. **General Physics (Mechanics, Heat, and Sound).** Lectures with demonstrations, recitations, and laboratory. For students in arts and sciences, architecture, agriculture, and veterinary medicine. Prerequisite: Trigonometry. 5 hours.

102. **General Physics (Light, Electricity, and Magnetism).** Lectures with demonstrations, recitations, and laboratory. For students in arts and sciences, architecture, agriculture, and veterinary medicine. Prerequisite: Physics 101. 5 hours.
106. **General Physics (Mechanics).** Lectures with demonstrations, recitations, and laboratory. For students in engineering, mathematics, physics, and chemistry. Prerequisite: Mathematics 120; credit or concurrent registration in Mathematics 130 or 131. 4 hours.
107. **General Physics (Heat, Electricity, and Magnetism).** Lectures with demonstrations, recitations, and laboratory. For students in engineering, mathematics, physics, and chemistry. Prerequisite: Physics 106; credit or concurrent registration in Mathematics 140 or 141. 4 hours.
108. **General Physics (Wave Motion, Sound, Light, and Modern Physics).** Lectures with demonstrations, recitations, and laboratory. For students in engineering, mathematics, physics, and chemistry. Prerequisite: Physics 107; credit or concurrent registration in Mathematics 140 or 141. 4 hours.
140. **Practical Physics: How Things Work--A Course for Nonscientists.** A nonmathematical lecture-demonstration course for nonscience students, underscoring the generality and ubiquity of basic physical laws in understanding commonplace phenomena: musical instruments, photography, electric and electronic circuits, television, motors, engines, etc. 3 hours. No credit for students in the College of Engineering.
141. **Special Problems.** Special problems in physics: discussions and independent study. Supplement to Physics 140. Prerequisite: Credit or concurrent registration in Physics 140. 1 hour.
150. **Physics and the Modern World: A Course for Nonscientists.** A nonmathematical lecture course attempting to bridge the two-culture gap; takes examples from modern physics: relativity, elementary particles, quantum theory, statistics, etc., and covers basic philosophical concepts in physics which pervade all human disciplines: model-making, dynamics, ensemble behavior, and symmetry. 3 hours.
151. **Special Problems.** Special problems in physics: discussions and independent study. Supplement to Physics 150. Prerequisite: Credit or concurrent registration in Physics 150. 1 hour.
170. **Physics of Photography.** Designed to enable nonscience students to understand photography. The nature of light, including reflection and refraction; how lenses work and why they are imperfect; the formation of the latent image in the film and the development of the image; light sources; color photography; and special topics. Includes laboratory experiments. Prerequisite: High school algebra and geometry. 4 hours. No credit for students in the College of Engineering.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
302. **Principles of Atmospheric Dynamics.** Same as Atmospheric Sciences 302. An introduction to those elements of fluid dynamics and thermodynamics which are essential to understanding the large- and small-scale motions of the neutral atmosphere. Prerequisite: Mathematics 343; consent of instructor. 4 hours or 1 unit.
303. **Modern Experimental Physics, I.** Techniques and experiments in the physics of atoms, atomic nuclei, molecules, the solid state, and other areas of modern physical research. Prerequisite: Physics 342; credit or concurrent registration in Physics 386. 3 to 5 hours, or $\frac{1}{2}$ to 1 unit. Students taking the course for the first time must register for 5 hours or 1 unit. Those repeating the course may do so for variable credit of 3 to 5 hours, or $\frac{1}{2}$ to 1 unit.
321. **Theoretical Mechanics.** Motion of a particle in one, two, and three dimensions, with applications; Kepler's laws and planetary motion; scattering of particles; conservation laws; motion of a rigid body in two dimensions; statics of extended systems; and lectures and problems. Prerequisite: General physics; credit or concurrent registration in Mathematics 341, 345, or 349. 4 hours or 1 unit. No graduate credit for graduate physics majors.

- 322. Theoretical Mechanics.** Continuation of Physics 321. Moving coordinate frames and fictitious forces; special theory of relativity, conservation laws, and particle motion and creation; rigid body motion in three dimensions; gravitation and earth motion; generalized coordinates and Lagrange's equations; and constraints and small vibrations. Prerequisite: Physics 321. 4 hours or 1 unit.
- 341. Intermediate Electricity and Magnetism, I.** Basic laws of electricity and magnetism; emphasis on vector methods; electric fields, potential, capacitance, and dielectrics; conductors, magnetic fields, and magnetic induction; inductance, transients in RL, RC, and RLC circuits; and linear response theory. Lectures, problems, and laboratory. Prerequisite: Two semesters of general physics; concurrent registration in Mathematics 341, 343, or 345; or consent of instructor. 5 hours, or $\frac{3}{4}$ or 1 unit ($\frac{3}{4}$ unit without laboratory). No graduate credit to graduate physics majors.
- 342. Intermediate Electricity and Magnetism, II.** Continuation of Physics 341; applications of the basic laws; magnetostatics, boundary conditions, Ampere's law for magnetic media, magnetostatic energy and force, magnetic materials, AC circuits, filters, transmission lines; and wave propagation in dielectrics and conductors, waveguides, cavities, and radiation from antennas. Lectures, problems, and laboratory. Prerequisite: Physics 341. 5 hours, or $\frac{3}{4}$ or 1 unit ($\frac{3}{4}$ unit without laboratory). No graduate credit to graduate physics majors.
- 343. Electronic Circuits, I.** The physics of semiconductor devices; theory and application of discrete and integrated devices in linear circuits; use of operational amplifiers and feedback; regulation, oscillators, and modulation; and emphasis on practical experience. Lectures, problems, and laboratory. Prerequisite: Physics 341 or consent of instructor. 5 hours or 1 unit.
- 344. Electronic Circuits, II.** Continuation of Physics 343 with particular emphasis on nonlinear devices, switching circuits, digital logic, analog to digital and digital to analog conversion, and individual projects. Lectures, problems, and laboratory. Prerequisite: Physics 343 or consent of instructor. 5 hours or 1 unit.
- 346. Modern Physics for Nuclear Engineers.** Same as Nuclear Engineering 346. Those fundamentals of quantum theory, atomic structure, and nuclear behavior needed by students before taking advanced courses in nuclear engineering; basic information on radiation types, properties, and interactions. Prerequisite: Junior standing in engineering or physical science. 3 hours or $\frac{3}{4}$ unit.
- 360. Thermodynamics.** Zeroth, first, second, and third laws of thermodynamics; applications to simple physical and chemical systems; thermodynamic inequalities and equilibrium; and phase transitions. Lectures and problems. Prerequisite: General physics and calculus; senior standing in physics advised. 4 hours or 1 unit.
- 362. Statistical Physics.** A lecture and problem course introducing the fundamentals of classical and quantum statistical mechanics and their applications; topics covered include probability, classical statistical mechanics, kinetic theory, Fermi-Dirac and Bose-Einstein statistics with elementary examples, statistical thermodynamics, fluctuations and irreversible processes, and thermoelectric effects. Prerequisite: Physics 360 or consent of instructor. 4 hours or 1 unit. Students may not receive credit for both Physics 362 and Mechanical Engineering 301.
- 365. Introduction to Plasma Physics.** Physical concepts underlying the description of ionized gases; individual particle and continuum models; collision processes in plasmas; charged particle motion in electromagnetic fields; waves in cold plasmas; elementary treatment of collective plasma behavior; simple plasma instabilities; and selected topics of current interest. Prerequisite: Electrical Engineering 350 or Physics 342, or consent of instructor. 4 hours or 1 unit.
- 371. Light.** Wave kinematics; geometrical optics: basic concepts, ray-tracing and matrix formalism, Gaussian imaging by thick lenses, stops, and apertures, and intensity relations; interference; interference spectroscopy and coherence; diffraction: Fresnel-Kirchhoff formulation, Fraunhofer case, Fresnel case, and holography; and polarized

- light. Lectures, laboratory, and problems. Prerequisite: Physics 101 and 102, or Physics 106, 107, and 108; Mathematics 345; or consent of instructor. 4 hours, or $\frac{1}{2}$ or 1 unit.
382. **Subatomic Physics.** A lecture and problem course surveying subatomic physics; includes the nature and properties of nuclei and elementary particles, symmetries, interactions, nuclear models, tools and techniques of experimental subatomic physics, and applications to power generation, astrophysics, chemistry, medicine, and biology. Prerequisite: Physics 383, 385, or 386, or consent of instructor. 4 hours or 1 unit.
383. **Atomic Physics and Quantum Theory.** Introduction to the basic concepts of quantum theory which underlie modern theories of the properties of materials; topics covered include elements of atomic and nuclear theory; kinetic theory and statistical mechanics; quantum theory and simple applications; atomic spectra and atomic structure; molecular structure and chemical binding. Lectures and problems. Prerequisite: General physics; general chemistry; Mathematics 345 or equivalent. 3 hours, or $\frac{3}{4}$ or 1 unit.
386. **Atomic Physics and Quantum Mechanics, I.** Study of atomic phenomena integrated with an introduction to quantum theory; discussion of topics including evidence for the atomic nature of matter and the properties of the Schrodinger equation, single particle solutions in one dimension, the hydrogen atom, perturbation theory, external fields, and atomic spectroscopy of outer electrons. Prerequisite: General physics; Mathematics 343 or 345, or consent of instructor. 4 hours or 1 unit.
387. **Atomic Physics and Quantum Mechanics, II.** Continuation of Physics 386. Topics treated include identical particles; spectral hyperfine structure; magnetic properties of matter; atomic spectroscopy of inner electrons; high-energy photon effects; molecular binding and spectra; emission and absorption of light; and symmetry principles. Prerequisite: Physics 386. 4 hours or 1 unit.
389. **Introduction to Solid State Physics.** Bonding and structure of crystals; energy bands in insulators, semiconductors, and metals; electrical conductivity; optical properties; lattice vibrations; elasticity; point defects; and dislocations. Prerequisite: Junior standing in science or engineering, or equivalent. 4 hours or 1 unit.
397. **Individual Study.** Individual study at an advanced level in a subject not covered by course offerings. Prerequisite: Upperclassman; consent of adviser and staff member who supervises the work. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit. May be repeated once.
398. **Seminar on Special Topics in Modern Physics.** Lecture course on topics of current interest in physics. For advanced undergraduates or graduates. Subjects and prerequisites to be announced in the *Timetable*. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit.
402. **Theoretical Astrophysics.** Same as Astronomy 402. Application of physical principles to selected topics in astrophysics, including stellar structure and evolution, neutron stars and pulsars, cosmic electrodynamics, and cosmological problems; emphasis on the physics involved rather than on detailed factual description. Prerequisite: Physics 342 or 386, or consent of instructor. 1 unit.
404. **Stellar Structure and Evolution.** Same as Astronomy 404. Relationship between observable features of stars and the physical processes that occur in their interiors; topics include matter and radiation in stars: equations of state, modes of energy flow, nuclear energy production, and element synthesis; structure of stars during all phases prior to the supernova or planetary nebula stage; stellar pulsations with reference to Cepheids and RR Lyrae variables; and properties of white dwarfs, neutron stars, and contact binaries. Prerequisite: Physics 360 and 382; or Physics 402; or consent of instructor. 1 unit.
405. **Theory of the Interstellar Medium.** Same as Astronomy 405. Interstellar gas: balance of microscopic processes, large scale structure, interaction with stars, dynamics, heating, ionization, and cooling; continuous and discrete radiation processes, excitation mechanisms, propagation of radiation, molecule formation, dust grains, star formation, magnetic fields, and cosmic rays. Prerequisite: Consent of instructor. 1 unit.
411. **Special Functions and Boundary Value Problems in Physics.** Use of special functions in solving homogeneous partial differential equations of physics; emphasis on applications to topics such as electrostatics, wave guides and resonant cavities, vibrations of

- membranes, heat flow, and potential flow in fluids. Prerequisite: Mathematics 343 and 345, or equivalent. This course may be taken concurrently with Physics 413 or 414. $\frac{1}{2}$ unit.
- 412. Additional Techniques of Mathematical Physics.** Solution of inhomogeneous differential equations with particular emphasis on problems in electromagnetism; additional topics such as perturbation theory, variational methods, and integral equations; and emphasis on application of the techniques to nonquantum physics problems. Prerequisite: Physics 411 or equivalent. This course may be taken concurrently with Physics 413 or Physics 414. $\frac{1}{2}$ unit.
- 413. Uses of Complex Variables in Physics.** A review of complex variable theory, with emphasis on calculations useful to physicists; integration, conformal mapping, Laplace and Fourier transforms, and additional topics of use in theoretical physics. Prerequisite: Undergraduate mathematics at the level of Mathematics 343 and 345; some previous exposure to complex variables helpful, but not required. $\frac{1}{2}$ unit.
- 414. Basics of Advanced Mechanics.** Fundamentals of classical Lagrangian and Hamiltonian mechanics, with emphasis on the relation between dynamical symmetries and constants of the motion; use of conservation laws to derive basic equations of fluid dynamics; and discussion of some applications. Prerequisite: Mechanics at the level of Physics 322 or consent of instructor. $\frac{1}{2}$ unit.
- 424. General Relativity and Cosmology.** Same as Astronomy 424 and Mathematics 460. Foundations of general relativity and applications to problems of astrophysics; includes gravitation as geometry, mathematical tools, Einstein's equations, relativistic stellar structure, black holes and gravitational collapse, cosmology, gravitational radiation, and experimental tests. Prerequisite: Physics 322, 411, 412, and 442, or equivalent; or consent of instructor. 1 unit.
- 430. Surface Physics.** Same as Metallurgical Engineering 430. Introduction to theory and experiment on atomic behavior of crystal surfaces; thermodynamics of surfaces; surface energy; diffraction and structure; gas-solid collisions; Brownian motion, and diffusion and evaporation; electron and ion emission, and tunnelling; Van der Waals forces; theory of chemical interactions; and kinetics and statistics of absorption. Prerequisite: Metallurgical Engineering 421 or Physics 489, or consent of instructor. 1 unit.
- 435. Theory of Semiconductors and Semiconductor Devices.** Same as Electrical Engineering 435. Introductory quantum mechanics of semiconductors; energy bands; dynamics of Bloch electrons in static and high frequency electric and magnetic fields; equilibrium statistics; transport theory, diffusion, drift and thermoelectric effects; and characteristics of p-n junctions, heterojunctions, and transistor devices. Prerequisite: Senior-level course in quantum mechanics or atomic physics. 1 unit.
- 442. Classical Electromagnetic Radiation.** A review of Maxwell's equations followed by a relativistic formulation of the electromagnetic field and the motion of charged particles; plane and guided waves; retarded potentials; radiation from simple antennas; radiation from accelerated charged particles; and synchrotron radiation, bremsstrahlung, scattering, and further topics. Prerequisite: Physics 411 and 412, or equivalent; electromagnetism at the level of Physics 341 and 342; special relativity at the level of Physics 322. 1 unit.
- 455. Reactor Physics, I.** Same as Nuclear Engineering 455. Introduction to the physical concepts of reactor analysis; nuclear cross sections, diffusion, slowing down, and thermalization of neutrons; homogeneous reactor theory; introduction to heterogeneous reactor theory and reactor kinetics; and computer applications in reactor analysis. Prerequisite: Nuclear Engineering 355 or equivalent, or consent of instructor. 1 unit.
- 456. Reactor Physics, II.** Same as Nuclear Engineering 456. Continuation of Physics 455. Neutron transport theory; current methods of solution of the transport equation; fast and thermal neutron spectra; applications in heterogeneous reactor analysis and other areas of reactor physics; and digital computer methods. Prerequisite: Physics 455 or consent of instructor. 1 unit.

- 462. Statistical Mechanics and Kinetic Theory.** Single-particle distribution functions: classical and quantum mechanical systems, Boltzmann equation, virial theorem, and equations of state for gases; formal theory: ensembles, identical particles, thermodynamics of simple systems, and distribution functions; nonequilibrium problems; conservation laws and hydrodynamics equations, sound waves, and transport coefficients; and plasmas, normal Fermi fluid, superfluids, and systems with internal degrees of freedom. Prerequisite: Physics 360 and elementary quantum mechanics, or consent of instructor. 1 unit.
- 463. Low Temperature Theory and Quantum Liquids.** Normal Fermi liquids: equilibrium properties, transport equation, quasi-particle collisions, degenerate He, and Landau theory; formal description of experimental measurements in neutral and charged Fermi liquids; superfluid Bose liquid: He II, rotating buckets, macroscopic description of superfluid flow, two-fluid model, first, second, and quasi-particle sound, vortex lines, and microscopic theory; and superconductivity: BCS theory, electrodynamics and coherence effects, superconductivity in metals, tunnel effect, flux quantization, microscopic theory of superfluid flow, and vortices. Prerequisite: Physics 362 or 462 and 481, or consent of instructor. 1 unit.
- 465. Plasma Physics.** Survey of plasma phenomena in nature and in the laboratory; physical description of plasma phenomena by the independent particle model, one- and two-fluid models, magnetohydrodynamic equations, and kinetic equations; and applications to quantum plasmas, nonlinear effects and turbulence in plasmas, and astrophysical and thermonuclear plasmas. Prerequisite: Physics 342 or equivalent, or consent of instructor. 1 unit.
- 470. Introduction to Nuclear and Particle Physics.** Basic facts of photons, leptons, hadrons, conservation laws, types of interaction, particle production and stability symmetries, and nuclear forces and ground state properties; two-particle systems: electromagnetic interactions, bound states, and resonances; nucleon-nucleon and meson-nucleon interactions; nuclei: properties of low-lying states, models, resonant reactions, and direct processes; and particles and weak interactions: multipion resonances, symmetry schemes, beta decay and other leptonic processes, and strange particle decays. Prerequisite: Physics 480 or consent of instructor. 1 unit.
- 471. Nuclear Physics, I.** Systematics of stable nuclei and the nuclear potential; properties of odd-A nuclei; spherical single-particle shell model; residual interactions; collective states and deformed nuclei; summary of theory and experiment for low-lying states; momentum distribution of nucleons; and fission. Prerequisite: Physics 470. 1 unit.
- 475. Particle Physics, I.** Particles: properties and systematics; S-matrix theory; application of symmetry and invariance principles to decays, production processes, and polarization; collision processes; mesonic and baryonic resonances; symmetry schemes; particle scattering at very high energies; and theory of pion-nucleon scattering, dispersion relations, and Mandelstam representation. Prerequisite: Physics 470; credit or concurrent registration in Physics 483 recommended. 1 unit.
- 476. Particle Physics, II.** Electromagnetic interactions of particles, form factor, and predictions of unitary symmetry; beta and muon decay and capture, conserved and partially conserved currents, neutrino interactions, and weak interaction form factors; leptonic and nonleptonic decays of strange particles; neutral K-meson decays; and current topics. Prerequisite: Physics 470; credit or concurrent registration in Physics 483 recommended. 1 unit.
- 480. Quantum Mechanics, I.** A second course in quantum mechanics for students with a good background in wave mechanics and atomic and molecular structure. Operators, state vectors, and the formal structure of quantum theory, and operator treatments of simple systems; angular momentum and vector addition coefficients; stationary state perturbation theory; introduction to scattering theory for particles without spin, partial wave analysis, and Born approximation; and examples taken from atomic, nuclear, and elementary particle physics. Prerequisite: Senior-level atomic physics and quantum mechanics, or consent of instructor. 1 unit.

481. **Quantum Mechanics, II.** Spin and identical particles, simple many-particle systems and elements of second-quantization theory; time-dependent processes, radiative transitions, and quantization of the electromagnetic field; scattering of particles with spin; polarization; and introduction to the Klein-Gordon and Dirac equations, and properties of simple relativistic systems. Prerequisite: Physics 480 or consent of instructor. 1 unit.
483. **General Field Theory.** Covers standard techniques of field theory as used by experimenters and theorists; relativistic quantum mechanics of a single particle; Lagrangian field theories, perturbation theory, and calculation of lowest-order processes; introduction to Feynman diagrams and higher order processes; and examples taken from quantum electrodynamics, solid-state and elementary particle physics, and many-body theory. Prerequisite: Physics 481 or consent of instructor. 1 unit.
485. **Advanced Field Theory.** Quantization procedures, renormalization theory, dispersion relations, and S-matrix theory; recent developments. Prerequisite: Physics 483 or consent of instructor. 1 unit.
489. **Solid State Physics, I.** Crystalline perfection, free electron gas, screening, plasma oscillations, and dielectric response; Bloch electrons, Brillouin zones, and band structure; semiconductors, intrinsic and extrinsic, with applications; phonons, elasticity, and anharmonicity; ferromagnetism and second-order phase transitions; and superconductivity. Prerequisite: Physics 362 or consent of instructor; and Physics 480. 1 unit.
490. **Solid State Physics, II.** Hartree-Fock theory and electron-electron interactions; electron-phonon interactions; electron dynamics and transport; BCS theory of superconductivity; elastic properties; thermal properties due to anharmonicity; and defects in solids. Prerequisite: Physics 481 and 489. 1 unit.
496. **Seminar on Current Research.** Discussions and lectures on current research, including presentations by graduate students of their own work. 0 units.
497. **Individual Study.** Individual study in a subject not covered in course offerings may be arranged for credit by registration under this number. $\frac{1}{2}$ or 1 unit.
498. **Seminar on Special Topics in Modern Physics.** Lecture course in topics of current interest. Several subjects are announced in each *Timetable*. Among them are semiconductor physics, magnetic resonance, surface physics, lattice dynamics, band theory of solids, crystal imperfections, nuclear structure, field theory, elementary particle physics, advanced statistical mechanics, plasma theory, astrophysics, atmospheric physics, group theory, and applications. Prerequisite: Determined for each offering. $\frac{1}{2}$ or 1 unit.
499. **Thesis Research.** 0 to 4 units.

PHYSIOLOGY

(See Life Sciences)

PLANT PATHOLOGY

Head of Department: Professor R. E. Ford

Department Office: 218 Mumford Hall, Urbana

204. **Introductory Plant Pathology.** Basic concepts relating to causal agents of representative diseases, symptoms and diagnosis, modes of infection and spread, effects of environment on disease development, and methods of control; lecture and laboratory. Prerequisite: Botany 100 or equivalent. 3 hours.

300. **Special Problems.** For students desiring to study specific problems not assigned in other courses. Prerequisite: For undergraduates only, a minimum grade-point average of 3.5; not open to students on probation; senior standing; consent of instructor and head of department. Specific approval of the associate dean in advance of registration is required for a second and/or third special problem course. The honors section is open to James Scholars and other students having a minimum grade-point average of 4.0 and may be taken in conjunction with other courses in this department subject to approval of the instructor. 1 to 4 hours, or $\frac{1}{4}$ to 1 unit.
302. **Research Methods in Plant Pathology.** Techniques for the isolation, identification, culture of, and inoculation with plant pathogens; methods for the histological study of diseased plants; and recording of data. Prerequisite: Plant Pathology 204 or equivalent; senior standing. 3 hours or $\frac{3}{4}$ unit.
303. **Plant Nematology.** Experimental techniques, nematode anatomy, taxonomy, biology, and host-parasite relations; intensive study of selected groups including foliar, stem, root-knot, and cyst nematodes; interaction with bacteria, fungi, and viruses in plant disease development; and control principles. Prerequisite: Plant Pathology 204 or equivalent; an introductory course in zoology or biology. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
304. **Forest Pathology.** Same as Forestry 304. Principles of forest and shade-tree diseases; symptoms, causal agents, and control of major tree diseases and wood decays; and the role of man in creating and solving disease problems. Prerequisite: Botany 100 or equivalent. 3 hours or $\frac{3}{4}$ unit.
305. **Plant Disease Development and Control.** Fundamental concepts of plant disease development and control, including a consideration of the interactions of host, biotic, and abiotic causal agents, and environment; discussion of the application of nonchemical and chemical methods to disease control. Prerequisite: Plant Pathology 204, a course in organic chemistry, or consent of instructor. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
307. **International Food Crops.** Same as Horticulture 307. Various international food crops studied with emphasis on production and problems created by diseases and insects; tropical and subtropical crops stressed, but temperate food crops of international importance included; and ecological factors affecting fundamentals of food crop production and plant protection emphasized. Prerequisite: Junior standing or consent of instructor. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
308. **Plant Disease Diagnosis.** Field and laboratory techniques in plant disease diagnosis and appraisal; identification of diseases of small grains, turf, corn, soybeans, forage crops, vegetables, fruit, forest and shade trees, and ornamentals, both on field trips and in laboratory exercises. Prerequisite: Plant Pathology 204 or consent of instructor. 2 hours or $\frac{1}{2}$ unit. Offered during summer session only.
377. **Diseases of Field Crops.** Same as Agronomy 377. Study of the symptoms of the major field crop diseases, life history of causal organisms, and methods of control. Prerequisite: Plant Pathology 204 or equivalent. 3 hours or $\frac{3}{4}$ unit. Offered in alternate years.
401. **Diseases of Forest and Shade Trees.** A survey of the history, symptomatology, causes, and control of diseases of trees, with assigned reading and performance of illustrative experiments in the laboratory, greenhouse, and field. Prerequisite: Plant Pathology 204 or consent of instructor. $\frac{1}{2}$ or 1 unit. Offered in alternate years.
402. **Phytopathology.** Study of pathogenic bacteria and their role in plant disease; history, morphology, reproduction, taxonomy, and identification; emphasis on arrival, invasion, symptoms, and control; and assigned reading, lectures, and laboratory. Prerequisite: Plant Pathology 204 and Microbiology 309, or consent of instructor. $\frac{3}{4}$ unit. Offered in alternate years.
403. **Physiology of Fungi.** Same as Botany 403. The germination, growth, metabolism, and sporulation of fungi; physiology of the fungi as related to parasitism, antibiotic production, vitamin assay, and industrially important products; and discussion of the nature

- of fungicidal activity. Prerequisite: Plant Pathology 204 or equivalent; organic chemistry or biochemistry; mycology and microbiology. 1 unit. Offered in alternate years.
- 404. Plant Virology.** Fundamental concepts; classification, symptomatology, and infectivity; biological, chemical, and physical properties; techniques for transmission, straining, assay, filtration, and purification; control methods; sources of information; and history of virology. Prerequisite: Consent of instructor. $\frac{1}{2}$ or 1 unit. Offered in alternate years.
- 406. Genetics of Plant-Pathogen Interactions.** The genetics and expression of resistance in plants to fungi, bacteria, viruses, nematodes, and other pathogens; variation and genetic systems in pathogens with particular emphasis on pathogenicity; complementary genetic systems; and theory and practice of breeding disease-resistant plants. Lectures, discussions, assigned reading, and term paper. Prerequisite: Plant Pathology 204, Agronomy 323 or Horticulture 323, or consent of instructor. 1 unit. Offered in alternate years.
- 407. Physiology of Plant-Parasite Interactions.** Current concepts on physiological and biochemical bases of plant diseases; mechanisms of infection and disease development; theories of resistance and susceptibility; and interrelationships of physiological and biochemical activities that occur during the interaction of plants and their parasites. Prerequisite: One course each in plant pathology, biochemistry, and plant physiology, or consent of instructor. $\frac{1}{2}$ unit. Offered in alternate years.
- 417. Discussions in Plant Pathology.** Discussion of current research, literature, and other topics pertaining to plant pathology and related fields. $\frac{1}{4}$ unit.
- 431. Plant Cell Metabolism.** Same as Agronomy, Biology, Forestry, and Horticulture 431. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the biochemistry of mature seeds and metabolic processes occurring during seed germination and heterotrophic growth. Meets during the first half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
- 432. Plant Cell Energetics.** Same as Agronomy, Biology, Forestry, and Horticulture 432. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the energy coupling processes in plant cells (respiration, photosynthesis, photorespiration); and discusses current literature relating to mechanisms of electron transport, phosphorylation, and carbon fixation. Meets during the second half of the fall semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
- 433. Environmental Regulation of Plant Growth.** Same as Agronomy, Biology, Forestry, and Horticulture 433. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns mechanisms of plant response to the environment, including ion uptake and transport, water relationships, gas exchange, and photosynthesis of whole plants. Meets during the first half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
- 434. Regulation of Plant Development and Reproduction.** Same as Agronomy, Biology, Forestry, and Horticulture 434. One of four courses giving a comprehensive summary of present knowledge in plant physiology; concerns the hormonal regulation of growth, development, and reproduction and the metabolism of seed and fruit formation. Meets during the second half of the spring semester. Prerequisite: Botany 330 or equivalent, and an introductory course in biochemistry. $\frac{1}{2}$ unit.
- 499. Thesis Research.** Individual study and research required of all students working toward the Master of Science or Doctor of Philosophy in plant pathology. Prerequisite: Plant Pathology 302 or equivalent. Work can be taken in the following areas, subject to approval of the staff member concerned: (a) biochemistry of plant disease; (b) diseases of corn, genetics of resistance; (c) diseases of cereal grains; (d) diseases of forest and shade trees; (e) diseases of fruit crops, fungicides; (f) diseases of leguminous crops, root diseases; (g) diseases of turf and lawn grasses; (h) diseases of soybeans; (i) diseases of vegetable and canning crops; (j) nematode diseases; (k) physiology of fungi, antibiotics; and (l) plant virology. 0 to 4 units.

POLISH

(See Slavic Languages and Literatures under Humanities, School of)

POLITICAL SCIENCE

Head of Department: Professor E. A. Kolodziej

Department Office: 361 Lincoln Hall, Urbana

100. **Introduction to Political Science.** Survey of major concepts and approaches employed in political science. 3 hours.
150. **American Government: Organization and Powers.** Historical development and organization of national, state, and local governments; the federal system; national and state constitutions; civil and political rights; party system; and nature, structure, powers, and procedure of legislative, executive, and judicial departments in state and nation. 3 hours.
151. **American Government: Functions.** Functions of national, state, and local governments; foreign relations and national defense; taxation and finance; law enforcement; police power; regulation of commerce, communications, and business; promotion of social and economic welfare; and current problems. Prerequisite: Political Science 150 or consent of department. 3 hours.
198. **Freshman Seminar.** Current topics in political science in the context of the scope and method of political science. Participants are required to do independent library research and present a report on a topic of their choice which is related to the subject of the seminar. Prerequisite: Consent of instructor. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
222. **Introduction to Modern Africa.** Same as African Studies, Anthropology, and Sociology 222. An interdisciplinary introduction to Africa dealing with basic themes and problems in the politics, economics, sociology, anthropology, and history of Africa. 3 hours.
240. **Introduction to Comparative Politics.** Basic concepts and principles of political analysis from a comparative perspective. Prerequisite: Political Science 100 or 150, or consent of instructor. 3 hours.
241. **The Emerging Nations.** An introductory comparative consideration of the patterns of political development and of the policies and problems of the emerging nations of Asia, Africa, and Latin America; emphasis on the special characteristics of countries beginning their independent nationhood and the effects of these characteristics on the political systems of these lands and their role in the community of nations. Prerequisite: Three hours of political science or consent of instructor. 3 hours.
245. **Black Political Thought and Movements: U.S.A., Africa, and Caribbean.** Political thinkers and movements discussed include W. E. B. DuBois, Panthers, Garveyism, Black Muslims, Nyerere, Harlem Renaissance, Nkrumah Negritude, and Caribbean Nationalism; use of relevant literature to gain knowledge of black political thought and movements, and use of model construct for the purpose of analysis. Prerequisite: Political Science 150 or consent of instructor. 3 hours.
260. **Introduction to Political Theory.** The nature, structure, and purposes of political theory; uses major works on the problems of political order, obedience, justice, liberty, and representation to distinguish and clarify different theoretical approaches; designed to be an introduction to ideas, not a historical survey. Prerequisite: Political Science 100 or 150, or consent of instructor. 3 hours.
270. **Introduction to Political Research.** Principles of empirical research in political science; emphasizes definition of research problems, principles and practices of measurement, use of data as evidence, and data analysis; data-based analysis is conducted in the So-

- cial Science Quantitative Laboratory. Prerequisite: Political Science 100 or 150, or consent of instructor. 3 hours.
280. **Introduction to International Relations.** The structure and processes of international relations, trends in international politics, and the future of the international system in a setting of conflict and crisis. Prerequisite: Political Science 100 or 150, or consent of instructor. 3 hours.
290. **Individual Study.** Readings and reports in selected fields chosen in consultation with the instructor. Prerequisite: Written consent of instructor. 1 to 4 hours. May be repeated.
293. **Honors Senior Thesis.** Prerequisite: Written consent of instructor; open only to seniors whose field of concentration is political science and who have a general University average of at least 4.0. 2 to 5 hours. May be repeated.
295. **Special Topics in Contemporary Issues and Problems.** Study of a contemporary problem in public policy, domestic or international. See *Timetable* for current topics. Prerequisite: Sophomore standing, 3 hours of political science, or consent of instructor. 3 hours. May be repeated for credit.
296. **Special Topics in Political Science.** Selected reading and research in political science. Prerequisite: Junior or senior standing; 6 hours of political science; consent of instructor. 3 hours. No more than 6 hours of credit may be earned by registration in this course and in Political Science 297.
297. **Honors Seminar.** Research, reading, and discussion in selected topics and works in literature of political science. Prerequisite: Junior or senior standing; 6 hours of political science; 4.0 average or James Scholar designation; consent of instructor. 3 hours. No more than 6 hours of credit may be earned by registration in this course and in Political Science 296.
305. **Municipal Government.** Growth of cities; their legal status; and municipal politics and organization in the United States. 3 hours, or $\frac{1}{2}$ or 1 unit.
306. **Municipal Problems.** Municipal administration in the United States; administrative organization; personnel problems; financial problems; city planning and housing; police and fire administration; public health; and public utilities. Prerequisite: Senior standing, or junior standing with Political Science 305 or Economics 101, or 6 hours of political science. 3 hours, or $\frac{1}{2}$ or 1 unit.
310. **Rural Local Government.** Development of local government in rural America; state-local relationships; legal status of local units; organization and functions of counties, townships, school districts, and special-purpose districts; rural politics and elections; local finance; and problems of reorganization. 3 hours, or $\frac{1}{2}$ or 1 unit.
312. **State Government.** The states in the federal system; state constitutions and problems of revision; organization, powers, and functions of the legislative, administrative, and judicial branches of state government; state functions; reorganization problems in the states; state-local relations; and state finance, trends, and prospects. Students are not given credit for both Political Science 312 and 110. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
313. **Comparative State Politics.** Approaches state government from an empirical and behavioral orientation, using contemporary sources chosen to introduce current analytical techniques and methods for explicating state politics; analysis of interactions among branches of government along with the impact of policy, interest groups, and constituencies. Prerequisite: Political Science 312, 315, or 328, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
314. **The Presidency.** Determinants and growth of presidential influence; presidential decision making; the president's role in the formulation and implementation of public policy; the president and constituencies; and the president's roles as legislator, party leader, and chief executive. Prerequisite: Political Science 100 or 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
315. **Legislatures and Legislation.** The legislative function in government; structure and organization of American legislatures (national, state, and local); party organization in legislatures; legislative procedure; pressure groups and lobbying; relation of legislature

- to other branches of government; and problems of legislative reorganization. Prerequisite: Six hours of political science. 3 hours, or $\frac{1}{2}$ or 1 unit.
317. **The American Federal System.** The nature, justification, and problems of federalism; coordination of governmental efforts by contract, subsidies, and grants; and comparison of federal systems. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
321. **Government and the Economic Order.** Interplay of political and economic phenomena at various domestic, foreign, and international levels and applicability of certain generalized models. Prerequisite: Any two courses in political science or a combination of political science and economics. 3 hours, or $\frac{1}{2}$ or 1 unit.
324. **Approaches to Political Populations.** Studying political populations through participant observation, nonreactive measures, content analysis, field research, interviewing, questionnaire design, (and other techniques); research ethics surrounding the use of tape recorders, cameras, etc. Prerequisite: Twelve hours of social science; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
326. **American Political Parties.** Organization and operation of the American party system; relations between national, state, and local organizations; state and national committees; the convention systems; the primary; and campaign methods and finance. Prerequisite: Political Science 150 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
327. **Black Political Participation in the American Political Process.** Exposes students to the variety of literature on black people in American politics; political participation is the major theme. Since black and white scholars address themselves to the study of political behavior of blacks, it is necessary to compare not only their views but also to discuss the underlined message, or meaning, of their work to understanding American politics in general. Prerequisite: Political Science 150, or 6 hours or social science, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
328. **An Introduction to the Study of Political Behavior.** An analysis of the interrelations of political attitudes and public formation; special attention to the substantive areas of voting behavior, political leadership, and the rise of political mass movements; and also a review of the literature on democratic and authoritarian personality types. Prerequisite: Political Science 150 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
329. **Electoral Behavior.** Study of the social and psychological motivations behind the individual voting decision, with special emphasis on the relationships between the voting decision and social stability. Prerequisite: Six hours of political science. 3 hours, or $\frac{1}{2}$ or 1 unit.
331. **British Government.** Nature of the British Constitution; the Crown, Ministry, and Cabinet; Parliament and elections; the party system; law and the courts; local government; and the British Commonwealth. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
335. **Government and Politics of the Soviet Union.** Evolution, structure, and functioning of the Soviet system of government; the theories, structure, and functioning of the Communist party of the Soviet Union. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
336. **Governments and Politics in Western Continental Europe.** An analysis of the major governmental systems of continental Europe; the evolution, structure, and functioning of the political institutions of France, Germany, Italy, Spain, Switzerland, and the Scandinavian countries as illustrations of multiparty and dictatorial types of governments. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
337. **Government and Politics of China.** An introduction to the governments and politics of modern China. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
338. **Governments and Politics in the Middle East.** An analysis of the transformation of Middle Eastern society from Morocco to Iran, as case studies in political modernization; study of politics of the area with special reference to causes and character of modernization, role of leadership, ideologies and institutions, methods and theories for ana-

- lyzing political systems undergoing fundamental transformation, and implications for U.S. policy. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
339. **Governments and Politics of Sub-Saharan Africa.** Analysis of major political systems in Africa south of the Sahara; emphasis on the development of states and the modification of social and political systems; and a general survey of the area supplemented by a focus on selected countries. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
340. **The German Political System.** Structures and processes of postwar German politics, with primary emphasis on West Germany; special attention to foreign policy formulation and problems (particularly defense), the Berlin issue, reunification, and relations with Eastern Europe. Knowledge of German helpful but not necessary. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
342. **Government and Politics in Latin America.** A survey of the origin and development of Latin American political institutions; systems of government; public administrative systems; party government; and international policies of Latin American governments. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
343. **Political Systems and Structures of Latin American Countries.** The political process, generally of selected Latin American countries at different levels of political development; stress on the interaction between political infrastructure and more formal agencies of government; and may include cross-national comparison of the function of such factors as political culture, party system, bureaucracy, or the military establishment. Prerequisite: Political Science 342. 3 hours, or $\frac{1}{2}$ or 1 unit.
345. **Comparative Communist Systems: Asia.** Examination of the origins and development of modern communism in East Asia. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
346. **Comparative Communist Systems: Eastern Europe.** Analysis of the origins of modern communism and the development of its doctrines; applications of these doctrines in the practices of ruling Communist parties; emphasis on alternates between European and non-European Communist systems, depending on course instructor. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
347. **Governments and Politics of Southeast Asia.** Comparative analysis of the political development of the countries of Southeast Asia, the lands to the east of India and south of China; emphasis on the differing approaches to the governing of man and the formation of public policy to be found in these countries; and consideration of economic, social, historical, and geographical influences on political development. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
348. **Government and Politics of Japan.** Introduction to the government and politics of modern Japan. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
349. **Governments and Politics of South Asia.** A comparative analysis of the political development of India, Pakistan, Ceylon, and the lesser lands of South Asia; emphasis on the differing approaches to the governing of man and the formation of public policy to be found in these countries; and consideration of economic, social, historical, and geographical influences on political development. Prerequisite: Political Science 240 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
350. **Law and Society.** An introductory study from a social science perspective of the nature of law, law makers, and law appliers; the causes or inputs determining law; and the effects or outputs which law in general produces. Prerequisite: Junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
351. **American Constitutional System.** Judicial interpretation of constitution; separation of governmental powers; relation of state and national governments; control of interstate commerce; and jurisdiction of courts. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.

352. **Comparative Constitutional Law.** A comparative analysis of the constitutional law cases from a variety of countries with particular emphasis on how the cases have resolved issues relating to civil liberties and the allocation of power among governmental bodies. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
353. **Law and Politics of Poverty.** Study of court cases and other materials dealing with the legal rights and obligations of the poor as tenants, consumers, welfare recipients, employees, arrested persons, family members, legal clients, and political participants; emphasis on the constitutional, political, and sociological aspects of the legal rights involved including the political process through which relevant judicial and legislative policy is made and applied. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
354. **The Judicial Process.** A systematic analysis of legal, evidentiary, environmental, and personal factors that influence judicial decision making, with particular emphasis on the application of the scientific method to the study of judicial behavior. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
355. **The Constitution and Civil Liberties.** Study of free speech, loyalty in a democratic state, citizenship, freedom of religion, rights of persons accused of crime, and government's responsibility to protect persons from racial and religious discrimination; and special attention to the role of law and judges. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
356. **Public Administration and the Judicial Process.** The scope of administrative powers and their relation to private rights; a comparison of the processes of decision in administrative agencies and in the courts; the interests served by each; the impact of judicial review of administrative decisions upon administrative procedure and policy; the constitutional and statutory bases of review; and the legal accountability of public officers versus political accountability. Prerequisite: Political Science 305, 351, or 361, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
357. **Law and Politics of Environmental Protection.** Study of court cases, legislation, and social science materials dealing with air, water, noise, and waste pollution and conservation; particular emphasis on the political factors involved. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
359. **Jurisprudence.** Nature and sources of law; law and the state; law and justice; and evolution, arrangement, and subject matter of law. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
361. **Introduction to Public Administration.** Development of administrative organization; administration and the executive, legislature, and judiciary; principles of organization, including line and staff relationships; the staff services of finance and personnel; and formal and informal control. Prerequisite: Political Science 150. 3 hours, or $\frac{1}{2}$ or 1 unit.
362. **Administrative Organization and Policy Development.** Dynamics of policy formulation in public administrative agencies; current developments in organizational theory and their significance for public administration; origin of public administrative organizations; interpersonal behavior; large-scale organizations and centralization; external support and opposition; and policy formation and problems of compliance. Prerequisite: Six hours of political science or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
363. **Comparative Administration.** Study of modern bureaucratic organization by means of the comparative method; special reference to the bureaucracies of various countries in different stages of industrialization; and the cultural bases of administrative behavior. Prerequisite: Junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
366. **Tools of Public Management.** A critical survey of the tools of analysis available to overhead functions of public management in key areas of decision; emphasis on personnel administration and manpower utilization; budgetary processes and fiscal controls; and several methods of administrative analysis: organizational studies, procedures engineering, information processing, and operations research. Prerequisite: Political Science 361 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
371. **World International Organization.** General development and basic principles of world organization; principles, structure, methods, and actual operation of international gov-

- ernmental institutions; and special attention to the United Nations and related agencies and to their evolution from the League of Nations system. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
377. **International Communications.** Same as Communications 377. An interdisciplinary approach to international communications; its structure and content; the role of international communications in conflict and conflict resolution; the semantics of international communication; the technical and economic aspects of international mass communications; and government-industry relations in communications. Prerequisite: Political Science 280 or consent of instructor. 3 hours or 1 unit.
380. **Comparative Foreign Policies.** An analysis of the formulation and substance of the foreign policies of select nations of the world. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
381. **American Foreign Relations.** Participation in international affairs; presidential initiative; development and organization of the Department of State; diplomatic intercourse; consular service; treaty-making power; and development of foreign policy. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
382. **Contemporary American Foreign Policies.** Study of the major foreign policy decisions currently confronting the United States government: analysis of background, principal issues, and alternative actions; formulation of policies. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
383. **Soviet Foreign Policy.** Survey of Soviet foreign policy from 1917 to the present, with emphasis upon the forces shaping this policy; special attention to the interplay of ideology and national interest in policy formulation. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
384. **International Relations.** Examination of contemporary international systems in terms of the types of actors and their goals, various structures of power, and the mechanisms of allocating resources and containing conflict. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
385. **International Law.** Nature, source, and development of international law and certain basic rights and obligations of the subjects thereof. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
386. **International Law.** Responsibility, intercourse, and redress of differences between states. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
387. **National Security Policy.** Examination of the organization and formulation of current American defense policy; the theory and practice of deterrence, with special reference to American and Soviet military strategy; and the problems of disarmament and arms control. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
388. **The Military and Politics.** The role of the military in national and international policies, with special attention given to theories of war and peace, civil-military relations, the military and the political development of Western and non-Western states, and the nonmilitary uses of the military. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
389. **Chinese Foreign Policy.** An analysis of the formulation, substance, and conduct of Chinese foreign policy, with emphasis on the period since 1949; special attention to the forces shaping Chinese policy. Prerequisite: Political Science 280 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
390. **Methods of Political Analysis.** Presentation of the analytic processes in the development of concepts, hypothesis, and theories; discussion of the derivation, formulation, and specification of research problems to be related to basic methodologies and modes of analysis; and applications to political science. Prerequisite: Political Science 270, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
392. **Socialist Political Theory.** Origins, development, and recent modifications of socialist theory from the late eighteenth century to the present; examination of each contribu-

- tion in terms of its goals, efficacy, and subsequent influence; and discussion including Rousseau, Hegel, the Utopians, Marx and Engels, Anarcho-syndicalists, Lenin, Luxemburg, Trotsky, Mao, Guevara, and Garaudy. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
393. **Classical Political Theory.** A consideration of major works of Greek and Roman political theory, and especially of their relevance to modern political analysis and action. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
394. **Medieval Political Theory.** The development of political theory from the Church Fathers to the sixteenth century: Augustine, Thomas Aquinas, Dante Alighieri, Marsiglio of Padua, Machiavelli, Thomas More, and others; conflicts of church and state, theories of natural law, natural rights, kingship, legitimacy, popular sovereignty, and representative government. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
395. **Modern Political Theory.** A critical analysis of political theories from the sixteenth century to the present; focus on the development of such concepts as the nature of man, the role of the state, justice, legitimacy, obligation, individual rights, equality, and mechanisms of maintenance and change. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
396. **Contemporary Political Theory.** Major tendencies in Western political theory since 1850; conservatism and constitutionalism; the religious interpretation of the state and economic institutions; Marxism, socialism, and communism; and antidemocratic thought and totalitarian regimes. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
397. **American Political Theory.** Survey of American political thought from colonial times to the present. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
398. **Theory and Practice of Democratic Government.** Theories of the nature and conditions of democracy; comparison and analysis of contemporary democratic institutions. Prerequisite: Political Science 260 or consent of instructor. 3 hours, or ½ or 1 unit.
400. **Selected Topics in Political Theory.** Reading, analysis, and discussion of selected topics of political theory. Prerequisite: Consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
401. **History of Political Theories.** Reading and analysis of the leading political thinkers from the Greeks to the middle of the seventeenth century. 1 unit.
402. **History of Political Theories.** Readings and analysis of the leading political thinkers from the middle of the seventeenth century to the present. 1 unit.
406. **Municipal Administration.** Position of cities in American governmental systems; governmental interrelationships; powers; services; and current municipal problems. 1 unit.
412. **Problems in State Government.** Research in selected topics in American state government. 1 unit.
420. **Formation of Public Policy.** Same as Labor and Industrial Relations 420. An examination of the institutional and dynamic forces that shape the making of policy and its administration in the United States; separation of powers, pressure groups, administrative and legislative procedures, and judicial activity. 1 unit.
423. **Proseminar in American Politics.** An intensive analysis of major institutions and processes of American politics (national, state, and local); research on selected topics in American government. 1 unit.
425. **Personality and Political Process.** Rationality and its limits in political processes; the functions of symbols and myth in politics; political involvement and quiescence; and nonrational elements in legislation and administration. Prerequisite: Consent of instructor. 1 unit.
426. **Political Parties.** Special problems in political parties; methods and materials of research in this field. 1 unit.
427. **Psychological Bases of Political Behavior.** Introduction to the relationships of psychological mechanisms and life history factors to individual or group political behavior;

- topics include national loyalty and ideology, mass publics and political involvement, political authority, and individual compliance. 1 unit.
428. **Multivariate Analysis for Political Scientists.** Applied use of extended analysis of variance; multiple classification analysis, factor and small-space analysis, causal analysis, multiple regression, and selected topics for research. Prerequisite: Sociology 387 and Political Science 497, or consent of instructor. 1 unit.
430. **Proseminar in Comparative Politics.** Comparative political analysis in the context of the evolution of the social sciences and modern political science, with emphasis on theories of political action and their function in contemporary comparative studies. This course is designed as an introduction to area-oriented seminars and generally is a prerequisite for them. 1 unit.
435. **Problems in the Government of Soviet Russia.** Special topics relating to the government of the Soviet Union. 1 unit.
437. **Problems in Chinese Politics and Government.** Research in selected topics relating to the political system of China. Prerequisite: Credit or concurrent registration in Political Science 430, or consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
439. **Problems of African Politics and Government.** Analysis of political problems of African states. 1 unit. May be repeated to a maximum of 2 units.
440. **Comparative Politics and the Political Process.** The comparative study of selected national political systems or of specific institutional forces that influence the making and application of public policy in several countries. The countries studied and the legal and extralegal political agencies considered vary according to the person conducting the seminar. 1 unit. May be repeated to a maximum of 3 units.
441. **Politics in the Developing States.** Examination of the political processes in the developing countries; examination of the general problems arising in the transition from traditional societies to modern industrial states in order to describe the typical patterns of political change; and special attention given to contemporary literature and studies. Prerequisite: Political Science 430; consent of instructor. 1 unit.
442. **Problems of Latin American Politics and Government.** Special topics relating to Latin American politics and government; individual countries may be studied or comparative analysis of particular political and governmental functions or problems may be undertaken. Prerequisite: Political Science 430 and 441, or equivalent. 1 unit. May be repeated to a maximum of 2 units.
446. **Problems of Southeast Asian Politics and Government.** Research in the political systems of Southeast Asia. Prerequisite: Credit or concurrent registration in Political Science 430, or consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
448. **Problems in Japanese Politics and Government.** Study of scholarly literature on modern Japanese politics and examination of selected problems in modern Japanese politics. Prerequisite: Credit or concurrent registration in Political Science 430, or consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
450. **Contemporary Governmental Problems.** Special problems of current importance designed especially for students not majoring in political science. 1 unit. May be repeated to a maximum of 3 units.
451. **Constitutional Law.** Research in selected topics in the American constitutional system. Prerequisite: Political Science 351 or equivalent. 1 unit.
453. **Law, Policy, and Social Science.** The application of social science research techniques to improving legal procedure and legal substance; emphasis on constitutional law and other public law subjects, but also consideration of other fields of law. 1 unit.
460. **Organizational Sciences, I.** Same as Business Administration 410, Psychology 453, and Sociology 456. Introduction to the principal theories and important empirical research in various disciplines that study organizations; in addition to examination of the subject matter content of various disciplines, students critically examine the capacities and limitations of the various fields to make contributions to the study of organizations. Pre-

requisite: Enrollment as a major in organizational sciences in a cooperating program or approval of instructor. 1 unit.

465. **Problems in Administrative Management.** Analysis of methods of applying administrative principles and procedures to operating problems in government agencies, such as methods of administrative coordination and control, intergovernmental cooperation, legislative-administrative relations, the organization of regulatory functions, and review of administrative decisions. Prerequisite: Political Science 361 or consent of instructor. 1 unit.
466. **Current Administrative Theory.** A discussion of some recent trends in administrative opinion and practice on such questions as agency structure and functional activities; field and regional organization and relations; the role and functions of the executive; the process of decision making; the relations of line and staff activities; the communication and execution of policies and programs; and employee relations. 1 unit.
469. **Collective Bargaining in Public Employment.** Same as Labor and Industrial Relations, Social Work, and Administration, Higher, and Continuing Education 497. Development of employee organization, collective bargaining, and public policies in the public sector: federal, state, and local; analysis of contemporary bargaining relations, procedures, problems, and consequences. Prerequisite: Consent of instructor. 1 unit.
471. **Problems in International Organization.** Methods and materials of research in international organization; special topics, such as disarmament, security, procedural problems in the United Nations, economic and social problems, and amendment and revision of the Charter. 1 unit.
480. **Scope and Theory in International Relations.** Deals with the field of international relations, its relationship to political science and the other social sciences; treats the development of the field by examining major theories and approaches that have characterized it in the past, but with emphasis on contemporary theories and concepts. 1 unit.
481. **Methodology in International Relations.** Deals with major research methodologies in contemporary international relations; includes case studies, aggregate data, content analysis, survey research, gaming and simulations, and causal modelling; and presumes knowledge of basic international relations theory. Prerequisite: Political Science 480. 1 unit.
482. **Foreign Relations of the United States.** Special problems in the development and conduct of American foreign policy. 1 unit.
483. **United States Foreign Policies.** Study of selected current problems in foreign policy; use of power; problems of negotiation; relations with new states; and foreign aid. 1 unit.
484. **International Relations: Special Problems in Theory and Research.** Advanced seminar on special topics in international relations. Prerequisite: Political Science 480 or 481, or consent of instructor. 1 unit. May be repeated under different instructors for a maximum of 3 units.
490. **Proseminar in Political Behavior, I.** Interdisciplinary approaches to the analysis of political behavior; formation of opinions, interests, roles, and personality; applications of organization theory to political institutions; applications of conflict and bargaining theory to political processes; and systematic studies of the distribution of values. 1 unit.
491. **Proseminar in Political Behavior, II.** Continuation of Political Science 490. Prerequisite: Political Science 490. 1 unit.
492. **Problems of Explanation in Social Science.** Special topics in the methodology of social sciences, especially theory formation and theory testing. 1 unit.
493. **Research in Selected Topics.** Research in selected topics by arrangement with the instructor. ½ to 3 units.
495. **Scope and Methods of Political Science.** Definitions of the scope and subject matter of political science; methodological issues in political science; major conceptions of methodology as embodied in current leading studies of politics; and the present state of research in political science. 1 unit.

496. **Political Concepts: Formulation and Measurement.** Indicates the relevance of certain research techniques for answering questions of concern in political science; indicates the range of tools available to the student; and includes discussion of problems in concept formation. Current methods of concept measurement are presented to the student in the context of political research problems. Prerequisite: Consent of instructor. 1 unit.
497. **Research Design and Techniques.** Introduction to problems of research design, data collection, data analysis and interpretation, sampling, and some simple measures of statistical association and significance. Prerequisite: Political Science 496. 1 unit.
498. **The Logic of Political Inquiry: Selected Topics.** Application of analytic principles and procedures developed in Political Science 495 to such topics as patterns of explanation; current theoretical perspectives; group theory, functionalism, systems theory, decision making, simulation, etc; the logic of judicial decisions; and justifications of political ideologies. This list is not exhaustive, nor will all of these topics be included each semester. Prerequisite: Political Science 495. 1 unit. May be repeated to a maximum of 2 units.
499. **Thesis Research.** 0 to 4 units.

PORTUGUESE

(See Spanish, Italian, and Portuguese under Humanities, School of)

PSYCHOLOGY

Head of Department: Professor J. E. McGrath

Department Office: 315 Psychology Building, Champaign

100. **Introduction to Psychology.** Study of human behavior with special reference to perception, learning, memory, thinking, emotional life, and individual differences in intelligence, aptitude, and personality; emphasis on the scientific nature of psychological investigations; and discussion of research methods and the relation of their results to daily life and everyday problems. Lectures, discussions, and five hours of participation in laboratory experiments. Not open to students electing Psychology 103 or 105. 3 hours. Psychology 101 may be taken concurrently for 1 hour additional credit.
101. **Theory and Practice of Psychological Research.** Consideration of research methods and problems of research design in psychology; participation in ongoing research of the staff of the department. Prerequisite: To be taken concurrently with Psychology 100, 103, or 105, or with the consent of the academic adviser of the Department of Psychology. 1 hour. May not be repeated.
103. **Introduction to Experimental Psychology.** An in-depth survey of basic topics in experimental psychology; emphasis on conditioning, learning, perception, and animal behavior with stress placed on the biological aspects of these problems. Lecture and laboratory. Not open to students electing Psychology 100 or 105. 4 hours. Psychology 101 may be taken concurrently for 1 hour additional credit.
105. **Elements of Psychology.** Description and explanation of the psychological principles of everyday living, with emphasis on how behavior is motivated, how individuals learn intelligent behavior, personality, and applications of psychology to various social issues. Lectures, discussions, and five hours of participation in psychological experiments. This course may be substituted for Psychology 100 when the latter is listed as a prerequisite or a recommended elective. For placement purposes, enrollment is limited to students whose ACT composite score is 21 and below. Not open to students electing Psychology

- 100 or 103. 4 hours. Psychology 101 may be taken concurrently for 1 hour additional credit.
115. **Design and Interpretation of Psychological Research.** Introduction to methodology for laboratory and field research; basic descriptive and inferential statistics emphasizing interpretation of statistical results rather than computation; and discussion of illustrative research from several areas of psychology. Prerequisite: Psychology 100, 103, or 105; or consent of departmental academic advisor. 3 hours.
143. **Biological Bases of Human Behavior.** Same as Anthropology, Home Economics, and Zoology 143. A critical consideration of data and information bearing on current controversies and ideas concerning the antecedents of selected aspects of human behavior; topics include communication and social organization, and parental, sexual, and aggressive behavior. 3 hours.
198. **Freshman Seminar in Psychology.** Lecture-discussions devoted to the in-depth study of a topic of current interest in psychology. The specific topic studied is elected by the students from those topics falling within the area of competence of the instructor. The instructor rotates from one semester to another so that the general area changes as the instructor changes. Prerequisite: Open only to James Scholars. There may be additional prerequisites from time to time as the topic of the seminar changes. For example, there may be a mathematics prerequisite for a seminar in mathematical psychology or a biological science prerequisite for a seminar in physiological psychology. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Introduction to Social Psychology.** Systematic study of social factors in individual and group behavior; attention to social perception, motivation, and learning; attitudes, norms, and social influence processes; the development and dynamics of groups; and the effects of social and cultural factors on the individual. Credit is not given for both Psychology 201 and Sociology 201. Prerequisite: Psychology 100, 103, or 105. 3 hours.
211. **Physiological Psychology.** Survey of classical and modern concepts of the physiological basis of behavior; particular emphasis on the sensory systems, regulatory mechanisms, and learning. Prerequisite: Psychology 100, 103, or 105; Physiology 103 or 106. 4 hours.
216. **Child Psychology.** Study of the psychological development of the child. Prerequisite: Psychology 100, 103, or 105. 3 hours.
217. **Comparative Development.** Survey of phylogenetic and ontogenetic development of behavior. The first part of the course considers the comparative psychology of representative phyla, with special emphasis on the development of sensorimotor coordination, motivation, and learning. The second half of the course is concerned with development of behavior in the individual organism, with most attention devoted to behavioral changes during the life span of vertebrate organisms. Prerequisite: Psychology 100, 103, or 105. 3 hours.
230. **Perception and Sensory Processes.** Survey of the experimental psychology of sensory and perceptual processes and behavior; emphasis on the contribution of behavior science to understanding subjective experience of the physical and social environment. Prerequisite: An introductory course in psychology, physiology, or zoology. 3 hours.
233. **Introduction to Quantitative Methods, I.** Descriptive statistics, including measures of central tendency and dispersion, correlation, probability, transformations, and basic distribution theory; basic principles of sampling and research design. Laboratory includes discussion of problems and application of statistical methods to data from experiments and surveys. Prerequisite: Psychology 100, 103, or 105; college algebra or equivalent; or consent of departmental academic adviser. 3 hours. Students may not receive credit for Psychology 233 and Psychology 235, Economics 171 or 172, Mathematics 161, Sociology 185 or 385, or Educational Psychology 390.
234. **Introduction to Quantitative Methods, II.** Inferential statistics, including sampling distributions estimation, hypothesis testing, regression, correlation, and basic analysis of variance procedures. Laboratory includes discussion of problems and application of statistical methods to data from experiments and surveys. Prerequisite: Psychology 233. 2

- or 3 hours. Students who have earned credit in Economics 171 or 173, Mathematics 161, Sociology 185, or Educational Psychology 390 receive 2 hours credit in Psychology 234. Students may not receive credit for both Psychology 234 and 235.
- 235. Quantitative Methods.** Development of skill and understanding in the application of statistical methods to problems in psychological research; topics include descriptive statistics, probability, estimation, basic inferential methods, regression, correlation, and basic analysis of variance procedures. Laboratory includes discussion of problems and application of statistical methods to data from experiments and surveys. Prerequisite: Psychology 100, 103, or 105; college algebra or equivalent; or consent of departmental academic adviser. 2 or 5 hours. Students who have earned credit in Economics 171 or 173, Mathematics 161, Sociology 185 or 385, or Educational Psychology 390 receive 2 hours credit in Psychology 235. Students may not receive credit for Psychology 235 and Psychology 233 or 234.
- 245. Industrial Organizational Psychology.** A systematic study of the application of psychological methods and principles in business and industry; emphasis on personnel selection and factors influencing efficiency. Prerequisite: Psychology 100, 103, or 105; credit or concurrent registration in a statistics course. 3 hours.
- 246. Vertebrate Social Organization.** Same as Anthropology, Sociology, and Zoology 246. Introduction to the biosociology of the vertebrates; emphasis on the behavioral, physiological, and population aspects of vertebrate social organizations, from fishes to primates. Prerequisite: One year of introductory biology. 3 hours.
- 247. An Introduction to Behavior Genetics: Lecture.** Same as Anthropology 247. Examination of relations between genetic mechanisms, population structure, race, and individual differences in behavior; survey of research and future possible behavior-genetic analyses; and applications such as genetic counseling. Prerequisite: Psychology 100, 103, or 105, or Biology 100, or Physiology 103; and a course in statistics which may be taken concurrently. 3 hours.
- 248. Psychology of Learning and Memory.** Survey of basic phenomena in learning and memory emphasizing experimental data from animal and human research. Prerequisite: Psychology 100, 103, or 105. 3 hours.
- 250. Psychology of Personality.** The study of personality from various points of view: biological, experimental, social, and humanistic; surveys theory and empirical research in the study of personality. Prerequisite: Psychology 100, 103, or 105. 3 hours.
- 258. Human Factors in Man-Machine Systems.** Examination of equipment and training variables that influence the human operator in man-machine systems; includes the nature of man-machine systems, the capabilities of men and machines, and simulation for design decision; and research and principles for the design and use of symbolic and pictorial displays, control systems, and simulators for training. Prerequisite: Psychology 100, 103, or 105. 3 hours.
- 289. Introduction to Quantitative Theories in Psychology.** A survey of major quantitative theories and methodologies in psychology: models of human judgment, decision, and attitude formation, unidimensional and multidimensional scaling of stimulus domains, signal detection theory, probability and computer models of learning and higher mental processes, quantitative theories of mental test scores, and multidimensional models of ability, attitude, and personality structure. Prerequisite: Psychology 235 or equivalent. 4 hours.
- 290. Individual Study.** Individual investigation of special problems. Prerequisite: Ten hours of psychology; written consent of instructor. 1 to 4 hours. May be repeated to a maximum of 9 hours.
- 293. Honors Senior Thesis.** Planning, researching, and writing of an undergraduate honors thesis, under supervision of a faculty member, on a problem of appropriate scope and character. Prerequisite: Psychology 297. 2 to 4 hours.
- 294. Individual Topics.** Individual investigation of special problems. Prerequisite: Ten hours of psychology; a grade-point average of 4.0; written consent of instructor; in exceptional cases, upon recommendation of the instructor and approval by the head of

the department, students may be admitted with a grade-point average of 3.75. 2 to 4 hours.

297. **Junior Honors Seminar.** Seminar on experimental methods and contemporary psychological research. Prerequisite: Junior standing and admission to departmental honors program. 0 to 4 hours.
298. **Senior Honors Seminar.** Continuation of Psychology 297. Prerequisite: Psychology 297. 0 to 4 hours.
306. **Quantitative Methods, I.** A lecture and laboratory course in the development and application of quantitative methods in psychological research. Prerequisite: Twelve hours of psychology, including Psychology 115 or equivalent. 4 hours or 1 unit.
307. **Quantitative Methods, II.** Continuation of Psychology 306. Prerequisite: Psychology 306. 4 hours or 1 unit.
311. **Laboratory in Physiological Psychology.** Research on classical and current problems; emphasis on the nervous and endocrine systems in information processing and in the regulation of behavioral adaptation; and examples from sensation, perception, motivation, emotion, and learning. Laboratory. Prerequisite: Psychology 211. 4 hours, or $\frac{1}{2}$ or 1 unit.
324. **Psychology of Thinking.** Survey of problems, experimental methods, and research findings in human thinking; emphasis on concept formation, problem solving and decision making, and creativity. Prerequisite: Psychology 235. 3 hours or 1 unit.
325. **Psychology of Language.** Survey of theory and research in the psychology of language; topics include relation of linguistics and psychology, language development, and influence of language on perception, memory, and thought. Credit not given for both Psychology 325 and Linguistics 325. Prerequisite: Six hours of psychology or consent of instructor. 3 hours or 1 unit.
326. **Motivation and Emotion.** The nature and development of emotion, attitude, and motive, and the role of these processes in social adjustment. Prerequisite: Six hours of psychology. 3 hours, or $\frac{1}{2}$ or 1 unit.
330. **Experimental Psychology, I.** Survey of problems, experimental methods, and research findings in the fields of psychophysics, sensory processes, perception, judgment, and thinking. Prerequisite: Psychology 230; a knowledge of statistics equivalent to that from Psychology 235. 4 hours or $\frac{1}{2}$ unit.
331. **Experimental Psychology, II.** A lecture-laboratory course concentrating on research problems and methodology in both animal and human learning; concentration on laboratory techniques and reporting experimental results. Prerequisite: Psychology 248; a knowledge of statistics equivalent to that from Psychology 235. 4 hours or $\frac{1}{2}$ unit.
332. **Research Methods in Social Psychology: Laboratory Methods.** Same as Sociology 332. Lecture and laboratory in the methods and techniques of social psychological research in laboratory settings. Prerequisite: Psychology 201 or Sociology 201; Psychology 235 or Sociology 184 and 185. 4 hours, or $\frac{1}{2}$ or 1 unit.
333. **Research Methods in Social Psychology: Natural Settings.** Methods and techniques of social psychological research in natural settings. Students formulate and carry out research problems using procedures appropriate for research in natural settings. Prerequisite: Psychology 201 or Sociology 201; Psychology 235, or Sociology 184 and 185. 4 hours or 1 unit.
335. **Mathematical Formulations in Psychological Theory.** Illustration of mathematical formulations by studying quantitative treatments of various psychological processes; emphasis on learning theory, psychophysical laws, and other selected topics; and the development of simple mathematical tools as required. Prerequisite: Elementary statistics of probability, elementary calculus, and 6 hours of psychology, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
338. **Abnormal Psychology.** An introduction for preprofessional students to the psychological aspects of behavior disorders, including study of the insanities, psychoneuroses, mental deficiencies, and other conditions. Prerequisite: Six hours of psychology; junior

- standing except for those in the premedical curriculum who may take the course as second-semester sophomores with 4 hours of psychology, 3 hours, or $\frac{1}{2}$ or 1 unit.
339. **Community Psychology.** Introduction to the concepts and the application of psychological knowledge to community problems; stress on a broad definition of mental health, a social learning, and a preventive, rather than an ameliorative, approach to community problems; and emphasis on community organization and innovations in the delivery of services to those populations which normally fall outside the service network, e.g., the poor, minority groups, and other "marginal groups." Prerequisite: Sophomore standing; Psychology 100, 103, or 105. 3 hours, or $\frac{1}{2}$ or 1 unit.
 340. **Community Projects.** Principles of psychology applied to service problems in the community; students serve as nonprofessional mental health workers in supervised experiences in schools, hospitals, and other nontraditional settings. Prerequisite: Psychology 100 and 339; junior or senior standing; and consent of instructor. 4 hours or 1 unit.
 342. **Behavior-Genetic Analysis.** Same as Zoology 350 and Anthropology 342. Concepts, methods, and problems in the analysis of relations between genetic systems and animal and brain behavior. Prerequisite: Anthropology 240, Biology 210, or consent of instructor; consent required for enrollment in laboratory. 3 or 5 hours, or $\frac{3}{4}$ or 1 unit.
 345. **Comparative Psychology.** Animal behavior with particular reference to the behavior of vertebrates. Prerequisite: Six hours of psychology, or Psychology 100, 103, or 105; a course in zoology. 4 hours, or $\frac{1}{2}$ or 1 unit.
 347. **Behavior Genetics Laboratory.** Same as Anthropology 337. Examination of the relations between genetic mechanisms, population structure, and individual differences in behavior; laboratory work on techniques of behavior study and genetic analysis. Prerequisite: Concurrent registration in Psychology 247. 2 hours or $\frac{1}{2}$ unit.
 348. **Theories of Learning.** A critical analysis of selected theories of learning; consideration of problems of theory construction in the context of past controversies in learning as well as recent theories of animal and human learning. Prerequisite: Psychology 248 or Educational Psychology 211. 3 hours, or $\frac{1}{2}$ or 1 unit.
 350. **Research and Theory in Personality.** Study of personality for the advanced student in psychology; consideration of problems of measurement, development, structure, dynamics, and change of personality; and study of examples of current theory and research as illustrations of an objective approach to the field. Prerequisite: Psychology 100, 103, or 105; Psychology 235 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit. Graduate credit is not given for both Psychology 350 and 441.
 352. **Attitude Theory and Change.** Same as Communications 352 and Sociology 352. Comprehensive analysis of theories of attitude acquisition, organization, and change; emphasis on attitude change through communication and effects of persuasive communication on public opinion. Prerequisite: Psychology 201 or Sociology 201, or a comparable course of introduction to social psychology. 3 hours, or $\frac{1}{2}$ or 1 unit.
 353. **Individual Social Behavior.** Survey of major theories and research on perceptual, cognitive, learning, motivational, and environmental factors that influence the social behavior of the individual. Prerequisite: Psychology 201, 216, or 250, or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
 354. **Interpersonal Processes.** The nature of interpersonal transactions; theories and methods for their investigation; and consideration of both individual and social determinants of such transactions. Prerequisite: Psychology 201. 3 hours, or $\frac{1}{2}$ or 1 unit.
 355. **Industrial Social Psychology.** Same as Labor and Industrial Relations 355. Social psychological research and theory applied to industrial problems; emphasis on interaction and communication theory, role theory, leadership theory, motivational and perceptual theory, and group structure theory as an aid in understanding and analyzing industrial problems. Prerequisite: Psychology 201 or 357. 3 hours, or $\frac{1}{2}$ or 1 unit.
 356. **Human Factors in System Design.** Evaluation of the capabilities and limitations of human operators in the design of man-machine systems; applications of signal detection theory, information theory, servo theory, and Bayesian statistics to human sensing,

- monitoring, decision making, information processing, and communicating capabilities. Prerequisite: Psychology 258; one course in statistics or equivalent. 3 hours or 1 unit.
357. **Psychology of Industrial Conflict.** Same as Labor and Industrial Relations 357. An analysis, in terms of the behavior of individuals, of the causes and possible solutions of industrial conflict. Offered in the special interest of industrial relations, commerce, and engineering students. Prerequisite: Psychology 100 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit. Undergraduate majors in psychology may not receive credit in this course.
359. **The Social Psychology of Organization.** Same as Sociology 359. Analysis of the interrelationships between social and psychological factors and organizational structure and process; emphasis on sources, consequences, and modes of resolution of intra-individual, intraorganizational, and interorganizational conflict. Prerequisite: Psychology 355 or Sociology 322. 3 hours or 1 unit.
360. **Modern Viewpoints in Psychology.** A brief survey of early theoretical psychology followed by an examination of contemporary "behavior theory," Gestalt theory, and psychoanalytic theory as conceptions of man and as approaches to the study of learning, perception, personality, and social behavior. Prerequisite: Senior standing; 9 hours of psychology with an average grade of "B;" consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
361. **Advanced Developmental Psychology.** Theory and research on psychological development from birth through adolescence; maturation of behavior systems; the role of social learning in development; the effects of early experience on personality development; and critical stages in development. Prerequisite: Psychology 216 or 217; a course in statistics. 3 hours, or $\frac{1}{2}$ to 1 unit.
371. **Psychological Factors in Political Behavior.** An application of psychological methods and theories to the study of political behavior; attention to research methods and to content problems in voting behavior and national security policy. Prerequisite: Six hours beyond 100-level courses in psychology, political science, or sociology. 3 hours, or $\frac{1}{2}$ or 1 unit.
373. **Theory and Method in the Cross-Cultural Study of Individual Social Behavior.** Same as Anthropology 373. Centers on cross-cultural study of substantive areas such as personality, motivation, socialization, interpersonal behavior, psychological environments, cognition and cognitive development, ethnocentrism and stereotypes, and visual perception; emphasis on methodological limitations and contributions of cross-cultural study; and discussion of current problems and research. Prerequisite: Six hours of psychology or anthropology, or consent of instructor. 3 hours or 1 unit.
390. **Psychological Tests and Measurements.** The measurement of human behavior in psychological studies; the construction and use of psychological tests; introduction to tests of intelligence, achievement, personality, and interest; and practice in test construction, administration, and validation. Lectures and laboratory. Prerequisite: A knowledge of statistics equivalent to that from Psychology 235. 4 hours or 1 unit.
393. **Laboratory in Primate Social Behavior.** Same as Anthropology and Zoology 393. Introduction to the observational analysis of comparative primate communication and social behavior; instruction, discussion, and supervised practice in describing, classifying, and interpreting the social behavior of nonhuman primates. Each student is expected to perform a small individual laboratory project. Prerequisite: Anthropology 343 or Zoology 344, or consent of instructor. 3 hours, or $\frac{3}{4}$ or 1 unit.
396. **Seminar in Psychology.** Special topics in the field of psychology. Prerequisite: Junior standing and consent of instructor. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit. The prerequisites stated below apply to graduate majors in psychology. Students minorng in psychology may, by special permission of instructors, enroll in certain of these courses without having met all the prerequisites.
402. **Systematic Psychology.** A critical analysis and comparison of modern and contemporary psychological systems. Prerequisite: Twelve hours of psychology. 1 unit.
408. **Design of Experiments in Psychology.** Advanced experimental designs in psychological research; special methods of data analysis. Prerequisite: Psychology 307. 1 unit.

409. **Psychological Scaling.** Same as Sociology 409. Scaling theory and methodology; emphasis on measurement in psychophysics, differential psychology, and social psychology. Prerequisite: Psychology 307. 1 unit.
411. **Advanced Physiological Psychology.** Detailed examination of the physiological mechanisms in behavior; emphasis on research methodology and contemporary literature in the physiology of motivation, learning, perception, and emotion; and includes laboratory demonstrations and problems. Prerequisite: Twelve hours of psychology, including Psychology 311 or equivalent. $\frac{1}{2}$ or 1 unit.
414. **Experimental Personality Research.** A laboratory training course emphasizing physiological, perceptual, learning, and genetic approaches to the experimental study of personality; critical surveys of recent research literature combined with laboratory training in representative techniques. Prerequisite: Psychology 307; consent of instructor. 1 unit.
415. **Experimental Sensory Psychology.** A systematic study of sensory processes, including vision, audition, gustation, olfaction, and somesthesia; emphasis on experimental methods, research findings, and theory. Prerequisite: Twelve hours of psychology, including a laboratory course in experimental psychology. 1 unit.
416. **Perception.** Systematic study of methods and research findings in the field of human perception, together with an evaluation of theoretical interpretations. Prerequisite: Twelve hours of psychology. 1 unit.
417. **Experimental Psychology of Learning, I: Basic Processes.** Study of experimental investigation of basic learning processes; emphasis on the nature of the problems, experimental procedures, and theoretical significance. Prerequisite: Twelve hours of psychology. 1 unit.
418. **Experimental Psychology of Learning, II: Human Learning.** Data and theories of verbal learning; verbal mediators and their functions in learning and retention; transfer of training; short-term and long-term memory; and conceptualizations of the forgetting process. Prerequisite: Twelve hours of psychology or consent of instructor. 1 unit.
419. **Advanced Comparative Psychology.** A critical survey of techniques, results, and problems in the study of animal behavior and human behavior from the comparative-evolutionary point of view; laboratory demonstrations and individual research problems. Prerequisite: Twelve hours of psychology or biology. 1 unit.
424. **Developmental Psycholinguistics.** Same as Communications 424 and Linguistics 424. An advanced course on the acquisition of language. Prerequisite: Linguistics 325 or equivalent. 1 unit.
425. **Psycholinguistics.** Same as Communications 425 and Linguistics 425. A critical survey of methods and theories in the psychological study of the communication process; emphasis on linguistic, information-theory, and learning-theory approaches; psycholinguistic analysis of language decoding and encoding; and the development and measurement of symbolic processes, including meaning. Prerequisite: Consent of instructor. 1 unit.
426. **Research Seminar in Psycholinguistics.** Same as Communications 426 and Linguistics 426. Critical discussion of research problems to which psycholinguistic theories and techniques can be applied. Students taking this course plan, execute, and report an original piece of research in this area. Prerequisite: Psychology 425; consent of instructor. $\frac{1}{2}$ or 1 unit.
427. **Engineering Psychology.** Experimental psychology applied to the study of man-machine systems; study of psychological factors in the design of equipment, systems, and environments for safe, efficient, and comfortable performance by man. 1 unit.
428. **Higher Process.** Examination of method, theory, and research in the study of thinking; status of cognition as a construct; verbal control of behavior; concepts, problem solving, attention, language, and thought; and cognitive process as a source of motivation. Prerequisite: Twelve hours of psychology, including a laboratory course in experimental psychology. 1 unit.

429. **Second Language Acquisition and Bilingualism.** Same as Linguistics 429. Examination of the field from a psycholinguistic perspective; topics discussed include first versus second language acquisition; the nature of language aptitude and competence; methods of second language teaching; the nature of bilingualism; and comparative psycholinguistics. Prerequisite: Consent of instructor. 1 unit.
431. **Psychological Measurement in Industry.** Application of psychometric methods and the finding of differential psychology to the selection, classification, and performance evaluation of industrial personnel. Prerequisite: Psychology 307 or equivalent. 1 unit.
435. **Motivation and Morale in Industry.** Same as Labor and Industrial Relations 435. Concepts and methods in the study of motivation of employees; determinants of employee attitudes and job satisfaction; and modification of attitudes and morale. Prerequisite: Four units of graduate credit in psychology or consent of instructor. 1 unit.
436. **Mathematical Models in Psychology.** Recent developments in mathematical models in psychology; special emphasis on human learning, higher processes, and modern psychophysics. Prerequisite: One year of calculus and Psychology 306 and 307, or consent of instructor. $\frac{1}{2}$ or 1 unit.
438. **Introduction to Clinical Psychology, I.** Introduction to clinical psychology as a science and profession; lectures, discussion, demonstrations, and field observations provided for an overview of clinical psychology. Prerequisite: Graduate standing in clinical psychology; consent of instructor. 1 unit.
439. **Introduction to Clinical Psychology, II.** Continuation of introductory sequence in clinical psychology; discussion of logical issues in assessment, disposition, and behavior change; and initiation of preliminary training in interview and observational methods. Prerequisite: Psychology 438. 1 unit.
440. **Functional Analysis of Behavior.** A lecture and laboratory course in the principles, analysis, and control of behavior; emphasis on operant and respondent conditioning as means of behavior change. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit.
441. **Personality and Behavior Dynamics.** Description of the cross-sectional structure of personality, the basic principles of behavior dynamics, and the determinants which shape personality development; special topics include typologies, trait measurement, conflict and anxiety, and mechanisms of defense. Prerequisite: Twelve hours of psychology. $\frac{1}{2}$ unit. Graduate credit is not given for both Psychology 350 and 441.
442. **Behavior Disorders.** A review of the experimental-clinical literature concerning behavior disorders, with special reference to classification and etiology. Prerequisite: Psychology 338 and 440; consent of instructor. $\frac{1}{2}$ unit.
443. **Psychodiagnostics, I.** Instruction and practice in the administration and interpretation of individual tests of general intelligence, special abilities, and achievement. Prerequisite: Twelve hours of psychology, including Psychology 390 or equivalent; Psychology 439. 1 unit.
444. **Psychodiagnostics, II.** Instruction and practice in the administration and interpretation of tests and other instruments used in the assessment of personality; special emphasis on projective techniques. Prerequisite: Psychology 443; consent of instructor. 1 unit.
445. **Behavior Modification.** A critical survey of issues, principles, practice, and research related to modifying human behavior; covers psychotherapeutic and somatic approaches; symptomatic relief and personality-restructuring; goal-orientations; and individual family, group, milieu, and preventive community intervention. Prerequisite: Psychology 444; concurrent registration in Psychology 447 strongly recommended. $\frac{1}{2}$ unit.
446. **Laboratories in Clinical Psychology.** Intensive practice in techniques of clinical assessment and behavior modification with emphasis on recent innovations; small sections of the course formed according to the specialized interests of students and staff. Prerequisite: Psychology 445. $\frac{1}{2}$ to 1 unit.
447. **Internship.** Supervised field experience in clinical psychology. Prerequisite: Consent of instructor. 0 to 4 units.
449. **Medicine in Clinical Psychology.** Introduction to areas of medicine and the organization of medical services as appropriate to the practice of clinical psychology; presenta-

tion of medical facts, procedures, and viewpoints to enhance the mutual contributions and collaborative efforts of medicine and clinical psychology. Prerequisite: Second-year graduate standing in clinical psychology or consent of instructor. ½ unit.

451. **Theory and Method in Social Psychology, I.** First of two-course sequence for first-year graduate students in social psychology. Advanced theoretical and research approaches to a broad range of issues in social psychology; participation and seminar presentations by social psychology program faculty. Student participates in seminar presentations and develops and conducts a research study in conjunction with one or more faculty members. Students should register concurrently in Psychology 490. Prerequisite: Admission as a graduate student to the social psychology program, or consent of instructor. 1 unit.
452. **Theory and Method in Social Psychology, II.** Second of a two-course sequence for first-year graduate students in social psychology. Advanced theoretical and research approaches to a broad range of issues in social psychology; participation and seminar presentations by social psychology program faculty. Each student participates in seminar presentations and develops and conducts a research study in conjunction with one or more faculty members. Students should register concurrently in Psychology 490. Prerequisite: Psychology 451. ½ unit.
453. **Organizational Sciences, I.** Same as Business Administration 410, Political Science 460, and Sociology 456. Introduction to the principal theories and important empirical research in various disciplines that study organizations; critical examination of the capacities and limitations of the various fields to make contributions to the study of organizations, in addition to examination of the subject matter content of various disciplines. Prerequisite: Enrollment as a major in organizational sciences in a cooperating program or approval of instructor. 1 unit.
455. **Research Methods in Organizational Psychology.** Discussion and analysis of strategies, methods, and techniques of organizational psychological research; emphasis on methods for researching behavioral determinants within interdependent organizational roles. Prerequisite: Psychology 355 or 359, or consent of instructor. 1 unit.
456. **Attitude Measurement and Behavioral Prediction.** Same as Communications 456. Comprehensive examination of the theory and method of attitude measurement and its implications for behavioral prediction; emphasis on the attitude concept and the validity of behavioral criteria. Prerequisite: Two units in social psychology and a course in statistics, or consent of instructor. 1 unit.
457. **Theory and Research in Organizational Psychology.** Theory and research on the psychological processes involving the demands of organizations on the behavior of individuals; emphasis on the processes of power, authority, influence, leadership, communications, decision making, and organizational change. Prerequisite: Psychology 455 or consent of instructor. 1 unit.
458. **Advanced Problems in Attitude Research.** Intensive analyses of recent developments in attitude theory and research; emphasis on the attitude-behavior relationship; and examination of theories of attitude and attitude change with respect to their utility in predicting and changing social behavior. Prerequisite: Psychology 352 or 456. 1 unit.
459. **Advanced Problems in Research on Groups.** Intensive examination of current research and theory on structure, process, and performance of groups; critical examination of recent research and theoretical literature; and development of research designs for related issues in the field. Prerequisite: Psychology 451 or consent of instructor. 1 unit.
460. **Motivation and Personality Development in Children.** Theory, method, and research on the interaction of motivational, personality, and learning processes and development in children; emphasis on experimental studies and a social learning theory approach. Class projects involve some laboratory work with children. Prerequisite: Twelve hours of psychology; consent of instructor. 1 unit.
462. **Human Abilities.** Analysis of individual differences in human abilities, including historical background, measurement methodology, and functional correlates of abilities;

consideration of the use of ability measures in both experimental and applied research. Prerequisite: Psychology 307 or equivalent. 1 unit.

463. **Research Methods in Clinical Psychology and Personality.** The logical analysis of clinical inferences and their role in research; problems and methods in the investigation of the development, dynamics, and structure of personality; and research in psychotherapy. Prerequisite: Psychology 306. ½ unit.
464. **Advanced Problems in the Study of Individual Social Behavior.** An intensive examination of current research into one or more of the following areas: social perception and cognition, social motivation, social learning, and environmental factors in social behavior; critical examination of recent research and theoretical literature, and development of research designs for selected current issues. Prerequisite: Psychology 451; 6 units of psychology. 1 unit.
465. **Learning in Children.** Examination of laboratory investigations of children's learning; emphasis on developmental changes as related to current theories of learning and development; and class projects involving some laboratory work with children. Prerequisite: Twelve hours of psychology; consent of instructor. 1 unit.
466. **Advanced Personality Theory.** An integration of concepts arising from quantitative, multivariate, and experimental research on personality and requiring facility with precise models; deals with measurement, personality and motivation structure, genetics, physiological determiners, models for family and cultural relations, and structured learning theory; and considers implications of personality theory in clinical, industrial, and educational psychology. Prerequisite: Psychology 306 and 307. 1 unit.
467. **Personality Assessment.** Methods and theory in the quantitative assessment of personality; review of research findings and trends. Prerequisite: Psychology 307 or equivalent. 1 unit.
468. **Contemporary Behavior Theory.** Introduction to modern attempts to formulate scientific theories of behavior; special emphasis on theories concerning the learning process, including the work of Hull, Tolman, and Guthrie. Prerequisite: Six units of graduate credit in psychology; consent of instructor. 1 unit.
469. **Cognitive Development.** Examination of laboratory investigations of cognitive development in children; emphasis on current theories of cognition and language; and class projects involving some laboratory work with children. Prerequisite: Twelve hours of psychology; consent of instructor. 1 unit.
470. **Principles and Methods of Teaching Psychology.** Designed for graduate students in psychology; areas considered include developing course objectives and content; developing and presenting teaching-learning situations; evaluating the attainment of course objectives; advising and counseling students; ethics in teaching; and research problems on the teaching of psychology. Prerequisite: Second-year graduate standing in psychology or consent of instructor. ½ or 1 unit.
483. **Psychology of Speech and Hearing Disorders, I.** Same as Speech and Hearing Science 483. Survey of psychological techniques utilized in the clinical and experimental study of speech and hearing disorders, with special reference to speech disorders; review of research finding and development of experimental designs. Prerequisite: Consent of instructor. 1 unit.
484. **Psychology of Speech and Hearing Disorders, II.** Same as Speech and Hearing Science 484. Survey of psychological techniques utilized in the clinical and experimental study of speech and hearing disorders, with special reference to hearing disorders; review of research findings and development of experimental designs. Prerequisite: Consent of instructor. 1 unit.
485. **The Sampling of Human Populations and Social Organizations.** Same as Business Administration 435 and Sociology 485. Covers procedures for selecting samples from and estimating population parameters for human populations and social organizations; treatment of types of sample designs including simple random samples, and stratified and cluster samples, together with random number and systematic selection techniques; and emphasis on the study of various kinds of advanced sample designs for both

area and institutional settings together with the problems involved in the application of analytical statistics to complicated sampling procedures. Each student is required to participate in a field project which involves the actual selection of a cluster sample from the local area. Prerequisite: Sociology 387 or consent of instructor. 1 unit.

490. **Individual Research.** For graduate students who wish to conduct research on special problems not included in graduate theses. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 2 units.
492. **Psychology of Learning and Instruction.** Same as Educational Psychology 492. An advanced course in the nature and conditions of long-term cognitive learning and retention in classroom and similar situations; intended for doctoral students with a special interest in research leading to the improvement of classroom teaching and learning, in psychological aspects of curriculum research, and in the cognitive aspects of military and industrial training. Prerequisite: Consent of instructor. 1 unit.
493. **Seminar.** Discussion of current topics in their historical setting, with special emphasis on research problems. Prerequisite: Six units of graduate credit in psychology; consent of instructor. $\frac{1}{2}$ or 1 unit.
494. **Multivariate Analysis in Psychology and Education.** Same as Educational Psychology 494 and Sociology 494. The principal methods of descriptive statistics used in the analysis of multiple measurements; emphasis on conventional procedures of factor analysis; profile similarity models; discriminatory analysis; and multidimensional scaling. Prerequisite: Psychology 307 or Educational Psychology 496; consent of instructor. 1 unit.
495. **Theories of Measurement.** Same as Educational Psychology 495. Classical test theory (true score, error of measurement, reliability and validity of test scores, composite measures); proposed alternatives to the classical model (generalizability theory, matrix sampling, latent trait theory, criterion-referenced measurement). Prerequisite: Educational Psychology 496 or Psychology 307, or equivalent; Educational Psychology 392 or Psychology 390, or equivalent. 1 unit.
499. **Thesis Research.** 0 to 4 units.

RADIO AND TELEVISION

Head of Department: Professor P. E. Welch

Department Office: 119 Gregory Hall, Urbana

199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
252. **Television Laboratory.** Designed to acquaint the student with basic television equipment and principles of studio operation; emphasis on the production of laboratory programs with students participating in the various jobs involved in studio production. Prerequisite: Consent of department. 3 hours.
261. **Principles of Radio and Television Broadcasting.** An introductory course in the history of American radio and television broadcasting; comparative broadcasting systems; organization and operation of stations and networks; social and legal responsibilities of radio and television; codes and practices of broadcasting; and an introduction to radio and television audience measurement and survey methods. Prerequisite: Junior standing. 2 hours.
263. **Radio and Television Announcing.** Intensive training in studio procedures and interpretation of radio and television copy, including news, feature scripts, continuity, and commercials. Prerequisite: Consent of department. 2 hours.
267. **Radio Production and Direction.** Study of the principles of planning, casting, rehearsing, and airing varied program types; emphasis on advanced techniques of dramatic production. Prerequisite: Consent of department. 3 hours.

280. **Fundamentals of Dramatic Writing and Structure.** Same as Rhetoric 263, Speech Communication 263, and Theatre 280. Study of basic structure of drama; writing of scenes and analysis of short and long dramatic works; and a term project consisting of a play analysis paper or original short play. Individual students may be given permission to work in areas of film or television. Prerequisite: Consent of instructor. 3 hours.
291. **Special Problems.** Special projects, research, and independent reading in radio and television for students capable of individual work under the guidance of a faculty adviser. Prerequisite: Consent of department. 2 or 3 hours.
354. **Television Directing.** The theory and techniques of directing the television program; experience in directing laboratory productions. Prerequisite: Radio and Television 252; consent of department. 3 hours or ½ unit.
355. **Television News.** News coverage, script preparation, use of visual materials, and presentation of news programs; attention given to interviews, special events, and news fields of special interest. Prerequisite: Journalism 211; consent of department. 3 hours or ½ unit.
356. **Cinematography for Television.** The equipment and techniques used in the production of films for television, including camera operation, lighting, editing, sound recording, matching, etc. For current fees, see *Timetable*. Prerequisite: Consent of department. 3 hours or ½ unit.
357. **Broadcast Continuity Writing.** Study of the fundamentals of radio and television continuity writing, including commercial copy, talks, interviews, and music and feature programs. Prerequisite: Consent of department. 3 hours or ½ unit.
360. **Educational Uses of Television and Radio.** Same as Educational Psychology 360. Study of television and radio as educational instruments and standards necessary for such use; production, utilization, planning, and evaluation; primary and secondary uses; identification of the unique contributions and resources of the electronic media as well as their limitations; and experimentation in new production and utilization techniques designed for educational uses. 3 hours or ½ unit.
361. **Television Programs.** Television program history; types, structure, formats, and basic audience appeals; major emphasis on the creative aspects of originating and planning television programs. Prerequisite: Course or experience in television directing and production; consent of department. 3 hours or ½ unit.
362. **Radio and Television Station Management.** Study of the organization and administration of the radio and television staff and station; public relations, personnel management, and station operation; analysis of station and agency relationships, and radio and television sales procedures; methods and media for program and station promotion; and laws and regulations affecting management, financing, and labor relationships. Prerequisite: Radio and Television 261; senior standing; consent of department. 2 hours or ½ unit.
363. **Advanced Dramatic Writing.** Same as Speech Communication 363 and Theatre 380. Application of principles of dramatic form and structure to the more complex problems of playwriting; practice in writing in sustained dramatic forms. Prerequisite: Radio and Television 280; consent of instructor. 3 hours, or ½ or 1 unit. May be repeated to a maximum of 6 hours or 2 units.
365. **Radio News.** News writing and editing for broadcasting; radio news style; preparation and practice for special event reporting; commentaries and interpretations; radio news services; and processing radio news-service copy. Prerequisite: Journalism 211; consent of department. 3 hours or ½ unit.
366. **Advanced Radio and Television Practices, I.** Project work for advanced students in selected areas of radio and television, including news, advertising, announcing, production and direction, and writing. Prerequisite: All courses in area of specialization; consent of department. 2 hours or ½ unit.
367. **Advanced Radio and Television Practices, II.** Project work for advanced students in selected areas of radio and television, including news, advertising, announcing, produc-

tion and direction, and writing. Prerequisite: All courses in area of specialization; consent of department. 2 hours or $\frac{1}{2}$ unit.

- 368. Radio and Television Regulations.** Federal legislation, with emphasis on Communications Act of 1934 and the regulations of the Federal Communications Commission, legal problems in program operations, censorship and editorial selections, copyright, and author-producer relations. Prerequisite: Consent of department. 2 hours or $\frac{1}{2}$ unit.
- 450. Special Problems in Television.** Project work for advanced students in specific areas of television, including news, advertising, directing, writing, etc. Prerequisite: A television course in the area of specialization; consent of department. $\frac{1}{2}$ to 3 units. A maximum of 3 units permitted toward degree.
- 462. Seminar in Radio and Television.** Same as Communications 462. Study of the performance of radio and television in terms of content, government and industry controls, social responsibility, economic bases, and psychological and social effects. Prerequisite: Consent of department. 1 unit.
- 463. World Broadcasting.** Same as Communications 463. Study of the broadcast systems used by the nations of the world; alternative and "mixed" systems; international organizations, agreements, exchanges, and problems; broadcasts to and from other countries; implications of such new developments as satellites; and mass and nonmass uses. Prerequisite: Consent of department. 1 unit.
- 490. Special Topics in Radio and Television.** Prerequisite: Consent of department. $\frac{1}{2}$ or 1 unit.
- 499. Thesis Research.** Prerequisite: Graduate standing in radio and television. 1 or 2 units.

SECONDARY EDUCATION

Chairperson of Department: Professor I. D. Westbury
Department Office: 395 Education Building, Urbana

101. **Introduction to the Teaching of Secondary School Subjects.** A survey of recent developments in the teaching of secondary school subjects; assesses standard and new programs; and explores research and empirical evidence as they relate to effective teaching of secondary school subjects. Special sections are provided in the usual secondary school fields. 2 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
240. **Principles of Secondary Education.** Provides each specialized educational worker with a common orientation to the major responsibilities of the public school as a unit and to the educational worker's own specialized responsibilities and problems within the framework of the total educational enterprise. Prerequisite: Secondary Education 101; Psychology 100. 2 hours.
241. **Techniques of Teaching in the Secondary Schools.** Same as Health Education 241. Methods of teaching specific subject matter fields in the secondary school; special sections provided in the usual high school subjects. Prerequisite: Educational Policy Studies 201; Secondary Education 240; concurrent registration in Educational Practice 242; consent of instructor. This course meets only during the first eight weeks of the semester. 3 to 5 hours.
247. **Teaching of Speech.** Same as Speech Communication 247. A study of methods and materials used in teaching speech in the high school. Prerequisite: Senior standing; 3.5 grade-point average. 5 hours.
249. **Independent Study.** Permits study of problems not considered in other courses; for students who excel in self-direction and intellectual curiosity. Prerequisite: Upperclassman; upper 5 percent of class in grade-point average; demonstrated writing competence, research potential, scholarly attitude, and interest as attested to by instructors; consent of adviser and staff member who supervises the work. 2 or 3 hours.

291. **Thesis.** Prerequisite: Senior standing. 2 hours.
292. **Thesis.** Prerequisite: Senior standing. 2 hours.
317. **Computer-Assisted Instruction.** Same as Computer Science 317. Computer-assisted instruction (CAI) and its relation to classroom teaching; the teacher's role in development, management, and criticism of CAI lessons; treatment of topics including instructional capabilities of CAI systems, instructional programming, and the design of CAI lessons. Prerequisite: Any Computer Science 100-level programming course, or consent of instructor. 4 hours or 1 unit.
336. **Fundamentals of Reading Techniques.** Same as Elementary and Early Childhood Education 336. Basic principles, techniques, and materials for the developmental reading program; emphasis on methods and materials that provide for differentiated instruction. Prerequisite: Junior standing; concurrent registration in a teacher education curriculum. 3 hours, or $\frac{1}{2}$ or 1 unit.
338. **Teaching of Reading in Grades Four Through Twelve.** Same as Elementary and Early Childhood Education 338. Developmental reading programs beyond the primary grades; factors related to reading speed and comprehension; vocabulary development, specific comprehension skills, study skills, and reading interests and tastes. Prerequisite: Elementary and Early Childhood Education 336 or Educational Psychology 211; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
354. **Audio-Visual Communication.** Same as Elementary and Early Childhood Education 354 and Library Science 354. An analysis and application of those introductory aspects of communication theory and practices concerned with the design and use of audio-visual messages which influence the learning process; the selection, utilization, production, and evaluation of audio-visual materials and selected technological aids. Prerequisite: Senior or graduate standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
356. **The Computer and Mathematics Education.** Surveys the role of the computer as an educational tool with an emphasis on applications for teaching precollege mathematics; analysis of computational problems and development of algorithms for their solution; iteration, nonlinear interpolation, and Monte Carlo methods; computer-assisted instruction; individually prescribed instruction; modular scheduling; information retrieval; library programs; and natural language analysis. Prerequisite: Computer Science 101 or 400, or consent of instructor. 4 hours or 1 unit.
399. **Issues and Developments in Secondary Education.** A seminar on topics not treated by regularly scheduled courses; requests for initiation may be made by students or faculty members. Prerequisite: Junior standing. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit. May be repeated to a maximum of 8 hours or 2 units.
439. **Fundamentals of Curriculum Development.** Same as Elementary and Early Childhood Education 439. Explores the several theoretical bases of curriculum planning and the implications of these approaches for practice. 1 unit.
441. **Linguistic and Logical Analysis of Teaching.** An analysis of teaching from the standpoint of semantic and logical factors; discussion of topics such as theories of meaning, definition, explanation, and justification as employed by a teacher. 1 unit.
448. **Continuing Education Program Development.** Same as Administration, Higher, and Continuing Education 448 and Vocational and Technical Education 448. Analysis of the process of planning and conducting continuing education programs for adults; includes theory, research, and practice regarding sponsors, need appraisal, objectives, selection and organization of learning activities, and evaluation. Recommended for majors in continuing education. Prerequisite: Consent of instructor. Administration, Higher, and Continuing Education 362 is recommended, especially for majors in continuing education. 1 unit.
449. **Independent Study.** Offers opportunity and challenge of self-directive, independent study, that is, develops the individual's ability as an independent student and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given semester. Prerequisite: Approval of study outline by adviser and the department chairman prior to enrollment. $\frac{1}{2}$ or 1 unit. No more than 2 units may

be offered toward an advanced degree except by consent of the dean of the College of Education.

456. **Problems and Trends in Specialized Fields of Secondary Education.** An intensive examination of problems and trends in the subject fields of the secondary school. Sections are usually offered in the following areas: English language and literature, mathematics, physical and biological sciences, social science, bilingual-bicultural education, physical education, and music. 1 unit.
459. **Workshop in Curriculum Development.** An intensive exploration of curriculum development projects in specialized areas of secondary education. ½ to 2 units.
490. **Seminar for Advanced Students of Education.** Intensive examination of theoretical and policy issues in secondary education. Sections are usually offered in the following areas: curriculum policy and research, teacher education, English language and literature, mathematics, physical and biological sciences, social science, music, bilingual-bicultural education, and instructional applications of computers. Prerequisite: Admission to doctoral study in secondary education. 0 to 1 unit. May be repeated to a maximum of 2 units.
491. **Field Study and Thesis Seminar.** Explores the identification and evaluation of research topics and problems in secondary education. Prerequisite: Admission to doctoral study. 1 to 2 units. May be repeated to a maximum of 2 units.
499. **Thesis Research.** Individual direction of research and thesis writing. 0 to 4 units.

SOCIAL WORK

Director of School: Professor D. Brieland

School Office: 1207 West Oregon Street, Urbana

100. **Contemporary Social Work.** A broad survey of the field of social welfare; introduction to social services, social welfare organizations, major social problems and target population groups, and the methods employed in service to individuals, groups, and communities; and includes the range of personnel and skills in social work agencies, and the means of education and training for social work. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
290. **Honors Seminar.** A series of lectures, student presentations, and discussions on selected topics in social welfare. Prerequisite: Completion of 12 hours in social welfare courses; senior standing; 4.0 grade-point average in courses included in social welfare; and consent of instructor. 2 to 4 hours. May be repeated to a maximum of 4 hours.
298. **Practice Seminar.** Critical examination of the application of knowledge to social work practice; emphasis on reciprocal relationships between personal problems and needs, social environment, agency services, and helping methods; and consideration of new trends in practice and empirical knowledge. Prerequisite: Social work major; consent

- of undergraduate field instruction coordinator; concurrent registration in Social Work 299. 3 hours.
299. **Field Instruction.** The student is assigned to field instructors for learning experiences in social agencies and communities; experiences include the use of knowledge and understanding in analyses of case and problem situations and in direct service to agency clientele and communities. Prerequisite: Social work major; consent of undergraduate field instruction coordinator. 6 to 12 hours.
300. **Methods of Social Work Intervention, I.** Examination of the methods of social work intervention (casework, group work, and community organization) utilized in various social work agencies and social welfare settings; emphasis on understanding of the values, knowledge, principles, and processes of social work practice. Prerequisite: Admission to B.S.W. or M.S.W. program, or consent of instructor. 3 hours or 1 unit.
301. **Methods of Social Work Intervention, II.** Skill development and practice in social work with individuals, families, and small groups, within a community and organizational context; emphasis on target groups and agency settings. Prerequisite: Social Work 300. 3 hours or 1 unit.
303. **Delivery of Health Care: Problems and Perspectives.** Same as Health Education 303. The wide range of factors--ecological, social, cultural, medical, organizational, economic, and political--which influence health care in a complex nation like the United States; attention to perspectives from various fields of study. Prerequisite: Junior standing and consent of instructor. 3 hours or 1 unit.
310. **Social Welfare Policy and Services, I.** Critical study of the income maintenance system in the United States as a response to the problems of inequality of opportunity and income, poverty, and income security; consideration of alternative approaches with discussion of the social worker's role in the system. Prerequisite: Admission to social welfare major or minor, or graduate standing. 3 hours or 1 unit.
311. **Social Services Policy and Services, II.** Critical evaluation of social policy and services in selected problem areas; includes the process of social policy analysis, current issues in funding and monitoring of personal social services, and strategies for dealing effectively with social problems. Prerequisite: Credit or concurrent registration in Social Work 310. 3 hours or 1 unit.
312. **Racial Minorities and Social Welfare.** Social welfare problems, history of self-help institutions, and development of formal social provisions in relation to racial minority groups and the minority status of individual clients; emphasizes indigenous change movements. Prerequisite: Admission to B.S.W. or M.S.W. program. 3 hours or 1 unit.
313. **Social Services for Health and Rehabilitation.** The psychological and sociological impact of illness and disability on the individual, the family, and the community, emphasizing the social worker's role in medical and rehabilitation settings. Prerequisite: Admission to B.S.W. or M.S.W. program, or consent of instructor. 3 hours or 1 unit.
314. **Social Services in Mental Health and Retardation.** Examination of comprehensive community mental health services as they evolve from definitions of the problems and changes in federal and state social policy; the concept of normalization and its criteria for program evaluation; and changing roles of mental health professionals, paraprofessionals, and consumers in policy making and service delivery. Prerequisite: Admission to B.S.W. or M.S.W. program, or consent of instructor. 3 hours or 1 unit.
315. **Social Work Services for the Aged.** The social needs of older people in the context of developing services and income transfer benefits; identifies major issues in social service delivery; and reviews methods of intervention on behalf of older people in terms of both skill required and policy implications. Prerequisite: Admission to B.S.W. or M.S.W. program, or consent of instructor. 3 hours or 1 unit.
316. **Social Services for Children and Families.** Child and family welfare policies and practice in relation to social services which support, supplement, or substitute for parental care of children; practice and policy issues in relation to the state's responsibility for guardianship, juvenile court, employment of children and young persons, and regulation of child-care facilities; and consideration of trends and issues in family and child

- welfare planning. Prerequisite: Admission to B.S.W. or M.S.W. program, or consent of instructor. 3 hours or 1 unit.
317. **Social Work and Corrections.** The problems of crime, characteristics of offenders, and components of the criminal justice system as a foundation for social work practice in correctional settings. Prerequisite: Admission to B.S.W. or M.S.W. program, sociology major, or consent of instructor. 3 hours or 1 unit.
318. **Special Problems.** A small group seminar for independent study of a topic or topics of special interest in the field of social welfare; emphasis on examination and discussion of significant and current social welfare issues and problems. Prerequisite: Credit or concurrent registration in Social Work 300; consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
319. **Social Work and the Public School.** Social work services in schools as a process in school-community-pupil relations; focuses on the school as a social system; and includes education as a continuum from preschool to adulthood, financing and other major problem areas, sociolegal issues which affect equality of education and pupil welfare, and some current educational innovations. Prerequisite: Graduate standing in social work or consent of instructor. 3 hours or 1 unit.
320. **Social Perspectives in Day Care.** Day care for children within a social context; day care institutions from the perspective of history, current issues, methods of operation, social work involvement, problems, and politics. Prerequisite: Admission to interdisciplinary day-care program or consent of instructor. 3 hours or 1 unit.
327. **Research Methods in Social Work Practice.** Objectives of research pertaining to social work practice; design of experiments; measurement and methods of collecting data; design of questionnaires and schedules; methods of data analysis including statistical hypothesis testing and applications of inferential techniques; interpretation of results; and preparation of reports. Prerequisite: An introductory course in statistics and admission to social welfare major, or graduate standing. 3 hours or 1 unit.
345. **Family Planning and Population Policy.** Same as Health Education and Sociology 345. Background information for professionals involved in the field of family planning; includes historical and current trends in developing and developed nations, with emphasis on the United States; and examines family planning and population policies, and programs and contraceptive methods as related to service delivery and to professional roles. Prerequisite: Consent of instructor. 3 hours or 1 unit.
351. **Human Growth and Behavior, I.** The major forces influencing the growth and behavior of the individual from birth through adulthood; sociocultural, familial, physical, emotional, and intellectual factors as they enhance or retard social functioning; the nature and dynamics of social process as related to growth and behavior; and the relevance of this content to social work practice. Prerequisite: Admission to B.S.W. program. 3 hours or 1 unit.
400. **Comparative Analysis of Approaches to Casework.** Systematic and critical examination of selected approaches, conceptualizations, procedures, and techniques in casework theory and practice; includes the employment of a framework for the analysis and assessment of the various approaches, study of research related to process and outcome, and identification of practice issues. Prerequisite: Social Work 300. 1 unit.
401. **Comparative Approaches to Social Group Work Practice.** Social work practice theory in social group work through comparative study of various practice approaches; includes the utilization of the group work method in contemporary social work practice, practice principles, and the use of group process. Prerequisite: Social Work 300. 1 unit.
402. **Comparative Approaches in Community Organization Practice.** Principles and methods which characterize identifiable approaches used in community organization practice at neighborhood, community, state, and other levels. Prerequisite: Graduate standing in social work; Social Work 300 or consent of instructor. 1 unit.
403. **Advanced Practice in Psychosocial Treatment.** Provides opportunities for students to learn and use advanced knowledge of psychodynamics and psychopathology in formulating a psychosocial assessment and treatment strategy in social work settings; empha-

- sis on transferring such knowledge to advanced social work practice skills. Prerequisite: Credit or concurrent registration in Social Work 400. 1 unit.
- 404. Seminar and Practicum in Clinical Group Work.** Exploration of concepts and issues related to integrity and encounter groups, self-help groups, and group psychotherapy; provides experience in an intensive encounter based on a structured, contractual integrity group; and emphasizes development of self-awareness, interpersonal skill, and leadership in facilitating clinical groups. Prerequisite: Social Work 401 or equivalent. 1 unit.
- 405. Behavior Modification in Social Work.** Examination of conceptual ideas about behavior modification for their usefulness in working with clinical problems of concern to the social worker; focuses on intervention with individuals and families and the application of behavioral principles in working with groups, institutions, and communities; and emphasizes the development of a systematic approach for applying behavior modification principles in actual practice situations. Prerequisite: Social Work 300. 1 unit.
- 407. Intervention Strategies for Institutional Change.** Generic social work strategies used for institutional change, emphasizing problems and issues in the public schools. Prerequisite: Social Work 319 or consent of instructor. 1 unit.
- 420. Social Welfare Planning.** Examination of the interactional, interpersonal, and political aspects of social welfare planning in a variety of settings and under a number of auspices; formulation of models for social welfare planning. Prerequisite: Admission to M.S.W. program or consent of instructor. 1 unit.
- 421. Community Program Planning.** Definition of a problem of significant concern to a public social welfare agency; collection of data, gathering of opinions, and testing the feasibility of service options; and formulation of a program of service to ameliorate the problem. Prerequisite: Admission to M.S.W. program or consent of instructor. 1 unit.
- 426. Social Welfare Administration.** Principles and process of administration and management of social welfare organizations, including review of organization theory, policy formulation, agency structure and staff organization, and budgeting. Prerequisite: Admission to M.S.W. program or consent of instructor. 1 unit.
- 427. Service Accounting in Social Welfare.** Examines different types of services, to whom they are provided at what costs and with what results; within a systems perspective, considers methods of describing, reporting, and measuring client and target population characteristics, services, and resources; and includes allocation of scarce resources among competing demands and practice in specific methods. Prerequisite: Social Work 327 or equivalent. 1 unit.
- 428. Family Therapy Seminar and Practicum.** The principles, issues, and practices of family therapy; examines and compares major theoretical concepts; and enables students to learn how to do family therapy by studying theory and applying it in an actual practice experience. Prerequisite: Social Work 400 or consent of instructor. 1 unit.
- 431. Practice Seminar, I.** Critical examination of the application of knowledge to social work practice; emphasis on reciprocal relationships between personal problems and needs, social environment, agency services, and helping methods; and consideration of new trends in practice and empirical knowledge. Prerequisite: Concurrent registration in Social Work 468 or consent of instructor. 1 unit.
- 432. Practice Seminar, II.** Critical examination of the application of knowledge to social work practice; emphasis on relationships between personal problems, social problems, planning processes, and agency purposes and functions; and consideration of trends in social policy and empirical knowledge. Prerequisite: Concurrent registration in Social Work 469 or consent of instructor. 1 unit.
- 435. Supervision/Consultation/Staff Development.** The philosophy, objectives, principles, and methods of social work supervision, consultation, and training for staff development; analysis of similarities and differences in roles, knowledge, and skills required with emphasis on the teaching-learning-evaluating components; and issues arising from agency setting, changing legislation and program provisions, and relationships to social

welfare administration. Prerequisite: Graduate standing in social work or consent of instructor. 1 unit.

452. **Human Growth and Behavior and the Social Environment, II: Psychosocial Disorders.** Interrelationship of physical, emotional, learning, and social aspects of behavior disorders, and implications for the patient, family, and community; psychopathology, including neuroses, psychoses, character disorders, organic conditions, psychophysiologic disorders, and mental retardation; and diagnosis and treatment methods, including psychotherapy, somatic and drug therapies, and social work. Prerequisite: Social Work 351. 1 unit.
461. **Special Studies in Social Work, I.** Independent or group study in areas of special interest; application of social work principles to special problems or settings. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 2 units.
462. **Special Studies in Social Work, II.** Independent or group study in areas of special interest; application of social work principles to special problems or settings. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 2 units.
468. **Field Instruction, II.** The student is assigned to field instructors for learning experiences in social agencies and communities. Such experiences include the use of knowledge and understanding in analyses of case and problem situations and in direct service to agency clientele. Prerequisite: Consent of instructor. 1 to 2 units.
469. **Field Instruction, III.** The student is assigned to field instructors for learning experiences in social agencies and communities. Such experiences include the use of knowledge and understanding in analyses of case and problem situations and in direct service to agency clientele. Prerequisite: Social Work 468. 1 to 2 units.
484. **National Social Welfare Policy, I.** A macroanalysis of income maintenance policies; includes policy alternatives and contrasting conceptualizations of the problems of poverty, income inequality, and economic insecurity. Prerequisite: Social Work 310 or consent of instructor. 1 unit.
485. **National Social Welfare Policy, II.** Emphasis on the case approach within the context of basic political and governmental processes which influence the development, enactment, and application of national policy; analytical study of the background, legislative history, amendments, judicial interpretations, and operation of major national acts comprising our national social welfare policy, or bearing directly on social welfare such as the Social Security Act, the Employment Act, the Civil Rights Acts, and the Economic Opportunity Act. Prerequisite: Social Work 484 or consent of instructor. $\frac{1}{2}$ to 2 units.
488. **International Social Welfare.** Methodologies of comparative study; social welfare policies and programs in selected foreign countries; and special attention to foreign programs which provide data on American issues. Countries chosen vary. Prerequisite: Consent of instructor. 1 unit.
489. **Social Work and the Law.** Legal procedures and issues of special relevance to social work practice; includes legal provisions related to poverty, family development and crises, racial and ethnic minorities, institutionalized persons, crime and delinquency, legal authority of social agencies, and regulation of the profession. Prerequisite: Graduate standing in social work or consent of instructor. 1 unit.
491. **Research Seminar.** Seminar for students preparing research projects, either in groups or individually; experience in the application of research methods to current social work problems. Prerequisite: Social Work 327 or equivalent. 0 to 2 units.
492. **Seminar on Models for Directed Change.** Same as Sociology 492. Construction and analysis of models for planned intervention at the personal, small group, and community levels; construction of models as interpretations of behavioral science theory; extrapolation of hypotheses and of guides to intervention from the models; and readings from several disciplines as relevant. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 1 unit.
493. **Seminar: Design of Social Work Research.** Issues and problems in social work research; includes proof and verification, generalizability, and use of scaling and of judg-

- ments; and design of original research study. Prerequisite: Admission to D.S.W. program and Social Work 327, or consent of instructor. 1 unit.
497. **Collective Bargaining in Public Employment.** Same as Labor and Industrial Relations 497, Administration, Higher, and Continuing Education 497, and Political Science 469. Development of employee organization, collective bargaining, and public policies in the public sector: federal, state and local; analysis of contemporary bargaining relations, procedures, problems, and consequences. Prerequisite: Consent of instructor. 1 unit.
499. **Thesis Research.** Research and writing of doctoral thesis. 0 to 5 units.

SOCIOLOGY

Head of Department: Professor B. Karsh

Department Office: 326 Lincoln Hall, Urbana

100. **Introduction to Sociology.** Introductory analysis and description of the structure and dynamics of human society; special emphasis on the application of scientific methods to the observation and analysis of social norms, groups, intergroup relations, social change, social stratification, and institutions. 3 hours.
131. **Social Problems.** Introductory survey of sociological aspects of chief modern social problems; stress on the social interrelationships and cultural conflicts involved in their genesis, significance, and amelioration or prevention. Prerequisite: Three hours of sociology or 8 hours of social science. 3 hours.
184. **Nonstatistical Introduction to Social Science Research Methods.** Emphasis on the formulation of social science issues as research questions, the various types of research methods and their advantages and disadvantages, the design of research programs, the analysis and appraisal of research findings, and research reporting; critical examination of major studies in sociology, political science, and anthropology. Prerequisite: Sociology 100 or consent of instructor, or 6 hours in sociology, political science, anthropology, or geography. 3 hours.
185. **Introduction to Social Statistics.** Same as Geography 185. A first course in social statistics for students without mathematics beyond the high school level; topics include the role of statistics in social science inquiry, measures of central tendency and dispersion, simple correlation techniques, contingency analysis, and introduction to statistical inference. Prerequisite: Sociology 100 or consent of instructor, or 6 hours in sociology, political science, anthropology, or geography. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
201. **Introduction to Social Psychology.** An introduction to the study of relationships between the functioning of social systems and the behavior and attitudes of individuals; special reference to social and cultural factors in personality development and perceptual processes, and to role behavior and small group interaction. Credit is not given for both Sociology 201 and Psychology 201. Prerequisite: Sociology 100. 3 hours.
202. **Sociology of Poverty.** Analysis of institutional structures which tend to maintain poverty in industrialized societies, particularly the United States, in the context of social stratification. Prerequisite: Three hours of sociology or 8 hours of social science. 3 hours.
206. **Political Sociology.** An examination of the social contexts of political behavior, including behavior within formal organizations such as trade unions, the formation and maintenance of elite groups, and the development of movements for political change; focus chiefly on the informal processes that impinge upon and occur within different institutions, illuminating such processes by reference to materials on political behavior in the United States as well as in other nations. 3 hours.

208. **Collective Political Violence.** The study of the causes, processes, and effects of collective violence, particularly of riots, coups, and revolution. Prerequisite: Sociology 100. 3 hours.
212. **Culture Patterns and the Individual.** Relationships between institutional structure and culture patterns and the common drives, attitudes, and other adjustive mechanisms of the group members. Prerequisite: Sociology 100; junior standing. 3 hours.
219. **Comparative Study of Societies.** Introduction to crossnational comparative sociology; theories of society in comparative perspective and problems of collecting data in other societies; and detailed discussion of a selected research topic in a comparative context. Prerequisite: Sociology 100 or consent of instructor. 3 hours.
221. **Contemporary Society.** Basic character of modern life forms; underlying principles and efforts at reorientation. Prerequisite: Sociology 100; junior standing. 3 hours.
222. **Introduction to Modern Africa.** Same as African Studies, Anthropology, and Political Science 222. An interdisciplinary introduction to Africa dealing with basic themes and problems in African politics, economics, sociology, anthropology, and history. 3 hours.
223. **Stratification and Social Classes.** Systems of social ranking in human societies, with emphasis on the class structure of the United States; power, prestige, and privilege as related to class differences in the United States and other societies; the culture and styles of life of different classes; class and status as determinants of group interests, ideologies, and interaction; and effects of social change and mobility on class structure. Prerequisite: Three hours of sociology or 8 hours of social science. 3 hours.
224. **Sex Stratification in Industrial Societies.** Analysis of social institutions which perpetuate systematic discrimination by sex in industrial societies, with emphasis on occupations. Prerequisite: Sociology 100 or equivalent. 3 hours.
225. **Racial and Cultural Minorities.** A sociological and social-psychological analysis of minority groups; illustrative material drawn from representative racial, ethnic, and status groups. Prerequisite: Sociology 100; junior standing. 3 hours.
229. **Sociology of Religion.** Same as Religious Studies 229. The functions of religious institutions in societies; religious leaders and leadership; religious groups in American society; and adaptations of religious institutions to modern needs and conditions. Prerequisite: A course in introductory sociology. 3 hours.
231. **Analysis of Juvenile Delinquency.** Conceptions of delinquency and its causations; the juvenile court movement; juvenile detention; treatment of juvenile offenders; and delinquency prevention programs. Prerequisite: Sociology 100. 3 hours.
240. **Collective Behavior.** The study of spontaneous, emergent, or transitory actions by large numbers of people not linked through formal organization and not necessarily by common group identity: the phenomena of crowds, mobs, panics, disasters, rumors, booms, fads and fashions, audiences, masses, publics, propaganda targets, and social movements; implications of this behavior from the standpoints of personal problems and social change. Prerequisite: Sociology 100. 3 hours.
246. **Vertebrate Social Organization.** Same as Anthropology, Psychology, and Zoology 246. Introduction to the biosociology of the vertebrates; emphasis on the behavioral, physiological, and population aspects of vertebrate social organizations, from fishes to primates. Prerequisite: One year of introductory biology. 3 hours.
251. **Social Aspects of Mass Communications.** Same as Communications 251 and Journalism 251. Media structures related to cultural content and functions; problems of life and society as treated in mass-produced communications. Prerequisite: Registration in the College of Communications or consent of the college. 3 hours.
259. **Organizations and Society.** Survey of major types of complex organizations from the perspective of theories of organization and bureaucratization; emphasizes reciprocal relations between social structure and organizations, particularly business enterprises, unions, schools, public bureaucracies, hospitals, and prisons. Prerequisite: Three hours of sociology or six hours of social science. 3 hours.
260. **Work and Occupations.** Survey of trends in occupations, including specialization, bureaucratization, unions, and professionalization; emphasizes the relation of the Ameri-

- can work system to social stratification and mobility, and to educational and family systems; and includes occupational choice, socialization, and reward systems. Prerequisite: Three hours of sociology or six hours of social science. 3 hours.
270. **Population and Human Ecology.** Same as Rural Sociology 270. Population in relation to resources; concentration and dispersion of peoples; the internal organization of urban areas; theories of human ecology; and current problems. Prerequisite: Sociology 100; junior standing. 3 hours.
 275. **Sociology and the Community.** Nature, structure, and functions of the community; types of communities and examples of some better community studies; and the relation of the community to the larger social organizations. Prerequisite: Sociology 100. 3 hours.
 276. **Sociology of the City.** Study of urban structure and ecology, particularly in light of the planning movement; urban populations; and growth and development of urban communities. Prerequisite: Sociology 100; junior standing. 3 hours.
 277. **Rural Social Change.** Same as Rural Sociology 277. Social forces retarding or accelerating change (traditions, beliefs, attitudes, innovations, social movements, and social planning) as related to rural social organizations and institutions. Field trip to be arranged; for costs see *Timetable*. Prerequisite: Sociology 100. 3 hours.
 290. **Individual Study.** Individual study or research project. Prerequisite: Six hours of sociology; written consent of instructor on form available in 350 Lincoln Hall. 1 to 6 hours. May be repeated.
 291. **Honors Individual Study.** Prerequisite: Open only to seniors in the sociology field of concentration who are eligible for departmental distinction; written consent of instructor on form available in 350 Lincoln Hall. 3 hours.
 296. **Special Topics.** Prerequisite: Sociology 100 and consent of instructor. 3 hours. May be repeated as topics vary.
 300. **Twentieth-Century Sociological Theory.** Attempts to give some idea of four theoretical approaches: symbolic interactionism, structural-functional theory, conflict theory, and the reductionism of George Homans; treatment at varying length of important theorists including Marx (the only one from the nineteenth century), Weber, Durkheim, Simmel, Mead, and Cooley; and includes Parsons, Merton, and Dahrendorf. Prerequisite: Sociology 100. 3 hours or 1 unit.
 301. **Sociological Theory Construction.** Critical tools used to evaluate and construct sociological theories; philosophical issues in theory construction; includes the origins of concepts, the logic of confirmation, and a critical survey of contemporary schools of sociological theorizing. Prerequisite: Sociology 100. 3 hours or 1 unit.
 302. **Classical Social Theory, I.** Analysis of major classical social theorists of the nineteenth and early twentieth centuries, stressing the social and historical foundations of social theory; emphasizes the positivist tradition, including such theorists as Saint-Simon, Tocqueville, Comte, Spencer, Pareto, Durkheim, Sumner, Ward, and Freud. Prerequisite: Sociology 100. 3 hours, or $\frac{1}{2}$ or 1 unit.
 303. **Classical Social Theory, II.** Analysis of major social theorists of the nineteenth and twentieth centuries, stressing the social and historical foundations of social theory; emphasizes the idealist and pragmatist tradition, including such theorists as Marx, Weber, Mannheim, Simmel, Lukacs, the Scottish Moralists, Cooley, Mead, and Veblen. Prerequisite: Sociology 100. 3 hours, or $\frac{1}{2}$ or 1 unit.
 309. **South Asian Social Organization.** An analysis of traditional and emergent features of social organization in South Asia; analyses of family, caste, and village organization; political, economic, and religious change; urbanization; industrialization; and demography. Prerequisite: Sociology 100 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
 310. **Sociology of Knowledge.** Analysis of major empirical and conceptual developments in the study of the social determination of knowledge; includes the contributions of selected writers and of modern sociological schools, such as symbolic interactionism, structural functionalism, ethnomethodology, phenomenology, and neo-Marxism. Pre-

requisite: Sociology 100 and one 300-level course in sociological theory (300-303), or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.

311. **Sociology of Science.** Examination of science as a social and cultural institution; includes similarities and differences between scientific modes of thinking and those governing other human activities. Prerequisite: Sociology 100. 3 hours or 1 unit.
315. **Sociology of Education.** Same as Educational Policy Studies 315. Objective comparative study of education as a social process in various cultures and historical periods, with main emphasis on the present education in countries which share Western civilization. Prerequisite: Sociology 100. 3 hours, or $\frac{1}{2}$ or 1 unit.
316. **Sociology of Adolescence.** Adolescence in modern societies; social class, ethnic and minority group membership, and other variables as reflected in adolescent behavior; the problems of adolescence (discontinuities in social development, search for identity, intergenerational conflict, academic and social failure, and juvenile delinquency); the socializing institutions of family, education, peer culture, politics, religion, welfare, social control, the work world, and recreation and leisure; and emphasis on research. Prerequisite: Sociology 100; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
317. **Sociology of Law.** A general treatment of the social origins and consequences of law and legal process; special emphasis on problems of legal change and on the structure and functioning of legal sanctions; and some attention to law and law-like phenomena in other societies including primitive societies, but major focus on American society. Prerequisite: Sociology 100. 3 hours, or $\frac{1}{2}$ or 1 unit.
318. **Industry and Society.** Same as Labor and Industrial Relations 318. Introduction to the social analysis of economic institutions; selected problems of industrialization and technological change; the labor force; occupations and professions; the meanings of work; the factory as a social system; corporate organization and the corporate society; and the changing bases of managerial authority. Prerequisite: Sociology 100, or 6 hours of social science, or consent of instructor; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
320. **Social Roles.** Contemporary role theory and related concepts such as social status and social interaction; age, sex, vocational, social class, and other role types; applications of this theory to the study of the socialization process and personal adjustment; and the analysis of critical group situations and social change. Prerequisite: Sociology 100; junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
321. **Family and Kinship.** An analysis of family and kinship, with major concentration on the American family; investigation of implications of the American kinship system for trends in courtship and mate selection, interaction among kin, and other areas of family life. Prerequisite: Sociology 100, or 8 hours of social science, or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
322. **Formal Organizations.** Comparative, structural analysis of formal organizations, emphasizing relations among structural properties of organizations and their consequences for innovation, change, and organizational performance; stresses interaction among theory, methods, and data. Prerequisite: Sociology 259 or six hours of social science. 3 hours or 1 unit.
323. **The Small Social Group.** Theory, observation, and analysis of face-to-face social groups, such as friendships, cliques, clubs, committees, and laboratory and experimental groups; characteristics, functions, and forms of interaction of small groups; and recent theoretical and empirical developments in this field of sociology. Prerequisite: Sociology 201 or Psychology 201. 3 hours, or $\frac{1}{2}$ or 1 unit.
324. **Penology.** Probation, parole, and methods of institutional treatment. Prerequisite: Sociology 331. 3 hours, or $\frac{1}{2}$ or 1 unit.
325. **The Philosophy of Social Science.** Same as Anthropology 329 and Philosophy 329. A survey of philosophical problems encountered in the disciplines concerned with man and society, with particular emphasis on the extent to which questions and subject matter in these fields are amenable to scientific treatment. 3 hours or 1 unit.
326. **Social Mobility and Class Structure.** An advanced course in social stratification, concerned with patterns, causes, and consequences of social mobility and immobility; the

- analysis of rising and falling classes in industrial and developing countries and the circulation of political, social, and economic elites as well as institutional sources of individual mobility. Prerequisite: Sociology 223 or consent of instructor. 3 hours, or ½ or 1 unit.
327. **Japanese Society.** Same as Asian Studies 303. The institutions of contemporary Japan and their historical roots; the Japanese approach to modernization and development and social change; and implications of the Japanese experience for applied social change in developing areas and for social science theory and methodology. Prerequisite: Sociology 100 or consent of instructor. 3 hours or 1 unit.
328. **Sociology of Asian Religions.** Same as Religious Studies 328. A comparative study of the influences of religion on the societies of Asia, and vice-versa; focus on the problems of social change and development; and concentration on the religions and social systems of Iran, India, Thailand, China, and Japan. Prerequisite: Sociology 229 or consent of instructor. 3 hours, or ½ or 1 unit.
329. **Comparative Family Institutions.** Cross-cultural analysis of family institutions, with special reference to vital and demographic backgrounds; stress on property, authority, and the handling of deviance, and relationship to religion, economy, and polity. 3 hours, or ½ or 1 unit.
330. **Comparative Political Sociology.** Discussion of basic sociological theories of politics; emphasis on the analysis of forces that keep societies functioning and those that disrupt them and produce political and social change; discussion of social institutions and social movements; and consideration of the relationship between economic development and changes in other aspects of society. Prerequisite: Nine hours of social science or consent of instructor. 3 hours or 1 unit.
331. **Criminology.** Nature and extent of crime; past and present theories of crime causation; criminal behavior in American society and its relation to personal and cultural conditions. Prerequisite: Sociology 100; junior standing; prelegal juniors may be admitted with consent of instructor. 3 hours, or ½ or 1 unit.
332. **Research Methods in Social Psychology: Laboratory Methods.** Same as Psychology 332. Lectures and laboratory in the methods and techniques of social psychological research in laboratory settings. Prerequisite: Psychology 201 or Sociology 201; Psychology 235 or Sociology 184 and 185. 4 hours, or ½ or 1 unit.
335. **Comparative Social Stratification.** Role of social stratification, nature of social class, class determinants of culture, and class dynamics in comparative perspective; case studies of the United States, slave society, European and Japanese feudalism, Russia, India, China, and a nonliterate society. Prerequisite: Sociology 100 or consent of instructor. 3 hours, or ½ or 1 unit.
336. **Sociology of Marxism.** Critical examination of the Marxist tradition of social analysis, focusing on adaptations of Marx's theories to changing circumstances; Marxist perspectives on social stratification, ideology, alienation, social change, and revolution; and uses of Marxist sociology for protest and legitimization in capitalist and socialist societies. Prerequisite: Nine hours of social science or consent of instructor. 3 hours, or ½ or 1 unit.
340. **Social Movements.** Analysis of the factors in the formation and dynamics of social movements as collective behavior; patterns of growth, types of leaders, and control mechanisms. Prerequisite: Sociology 100. 3 hours, or ½ or 1 unit.
343. **Social Change in Developing Areas.** Same as Rural Sociology 343. Description and analysis of recent social and cultural changes occurring in new nations and developing economies; special attention given to problems of traditional social structure undergoing modernization; and social factors in economic growth, caste and class, nation-building, urbanization and population composition, education, family, and religion. Prerequisite: Sociology 100 or equivalent. 3 hours, or ½ or 1 unit.
345. **Family Planning and Population Policy.** Same as Health Education and Social Work 345. Background information for professionals involved in the field of family planning; includes historical and current trends in developing and developed nations, with em-

- phasis on the United States; and examines family planning and population policies, and programs and contraceptive methods as related to service delivery and to professional roles. Prerequisite: Consent of instructor. 3 hours or 1 unit.
350. **Soviet Social Institutions.** Analysis of the major social institutions of Soviet society; special attention to the structural consequences of Communist ideology, totalitarianism, and industrialism, and to comparison with and implications for American society; the major areas covered include population data and their sociological implications; history, values, and ideology; political institutions; economic institutions; social stratification and mobility; the nationalities; the family and education; communications and public opinion; and socialized medicine. Prerequisite: Sociology 100 or consent of instructor. Students enrolled in Russian language and area studies as majors or minors are admitted without prerequisite or special permission. 3 hours, or $\frac{1}{2}$ or 1 unit.
352. **Attitude Theory and Change.** Same as Communications 352 and Psychology 352. Comprehensive analysis of theories of attitude acquisition, organization, and change; emphasis on attitude change through communication and effects of persuasive communication on public opinion. Prerequisite: Sociology 201 or Psychology 201, or a comparable course of introduction to social psychology. 3 hours, or $\frac{1}{2}$ or 1 unit.
355. **Chinese Society.** Systematic treatment of China's social, cultural, and demographic heritage and of the impact of the West on an ancient civilization; the processes of planned and unplanned change in Chinese society; and topics including peasant-land economy, the family, patterns of social stratification and social mobility, the persistence of traditional forms, and the adoption and adaptation of new patterns. Prerequisite: Sociology 100 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
359. **The Social Psychology of Organization.** Same as Psychology 359. Analysis of the interrelationships between social and psychological factors, and organizational structure and process; emphasis on sources, consequences, and modes of resolution of intra-individual, intraorganizational, and interorganizational conflict. Prerequisite: Sociology 322 or Psychology 355. 3 hours or 1 unit.
360. **Sociology of the Professions.** Examination of the nature, position, functions, and growing importance of the major professions in the contemporary industrial (or industrializing) society; attention to the relationship between the social system and the various professional "communities," recruitment, professional socialization, and bureaucratic versus independent practice. Prerequisite: Sociology 100 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
364. **Population Trends and Patterns.** Introduction to contemporary demographic patterns and their historical development; transition theory and other models of demographic change; components of population growth and distribution; and trends and differentials in mortality and fertility. Prerequisite: Consent of instructor. 3 hours or 1 unit.
371. **Comparative Social Institutions.** Examination, in a comparative perspective, of some of the major institutional complexes of social systems, such as family and kinship structures, occupations, political institutions, and social stratification and mobility; illustrative materials drawn from a variety of societies, including primitive, nonliterate societies and advanced industrial societies such as the United States, Germany, and the Soviet Union. Prerequisite: Sociology 100 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
373. **Latin American Social Organization and Institutions.** Analysis of contemporary institutional and social class structures in Latin American communities and societies, and their relationship to certain religious and family patterns; the influence of past and present trends in urbanization, ecological organization, and population growth upon Latin American social systems and institutional organization. Prerequisite: Sociology 100 or consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
383. **Mathematical Social Science, I: Algebraic Foundations.** Application of algebraic systems to sociological and social science theory; includes topics in logic, set theory, and theory of algebraic systems necessary for the construction of graph-theoretic and algebraic models of social networks and social systems. Prerequisite: Six hours of sociology,

- political science, or anthropology; Mathematics 124 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 384. Mathematical Social Science, II: Analytical Foundations.** Application of mathematical analysis and calculus to sociological and social science theory, with emphasis on cross-sectional applications; includes topics in derivatives, integrals, and partial derivatives necessary for the explication of foundations of measurement, general systems theory, functional, exchange, and optimizing systems, models of social stratification, structure of organizations, and social interaction and influence. Prerequisite: Sociology 383 or consent of instructor; Mathematics 134 or equivalent. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 385. Social Statistics, I.** Deals intensively with descriptive statistics, probability, statistical inference, and significance testing by means of both parametric and nonparametric tests, and the various measures of association. Prerequisite: Sociology 185, or Mathematics 120, or consent of instructor. 3 hours or 1 unit.
- 386. Methods of Field Research.** Instruction, training, and supervised practice in methods of field research as a basic tool of sociology; emphasis on the role of the field researcher as participant, observer, and interviewer in various kinds of research settings, and on approaches to and applications of field data. Each student develops and executes a field research project dealing with some aspect of institutional, occupational, or general community activity and structure. Prerequisite: Sociology 184 and 185. 3 hours, or $\frac{1}{2}$ or 1 unit.
- 387. Social Statistics, II.** Treats analysis of variance, analysis of covariance, multiple and partial correlations, and complicated sampling procedures. A semester problem is developed which emphasizes integration and application of various statistical techniques to sociological problems. Prerequisite: Sociology 385. 3 hours, or $\frac{3}{4}$ or 1 unit.
- 388. Basic Methods of Demographic Analysis.** Introduction to statistical and mathematical procedures in population analysis; the gathering, processing, and evaluating of registration and census data; the life table model; and procedures of mortality and fertility analysis and population projections. Prerequisite: Mathematics 111 or 112, or equivalent. 3 hours or 1 unit.
- 396. Special Topics.** Prerequisite: Sociology 100 and consent of instructor. 3 hours or 1 unit. May be repeated as topics vary.
- 400. General Sociology.** Systematic sociology, with emphasis on the development and problems of modern structural-functional theory; analysis of the works of major contributors to functionalism, e.g., Durkheim, Weber, Merton, and Parsons; and an examination of the ways in which their work converges to form a cumulative body of sociological theory. 1 unit.
- 402. Social Stratification.** Theory and data concerning structured social inequality in industrialized societies, with special focus on the United States. 1 unit.
- 405. European Sociology: Recent Developments.** Analyses of recent developments and original contributions of European sociology; a review of the major sociological centers in France, Germany, Great Britain, Poland, Russia, and Scandinavia; and an emphasis on special problems selected on the basis of their theoretical importance. Prerequisite: Sociology 300. 1 unit.
- 407. Techniques in Demographic Analysis.** Same as Rural Sociology 407. The analysis of family formation and dissolution; measures of population movement and distribution; and introduction to the stable population model and to applications in the estimation of demographic measures. Prerequisite: Sociology 388. 1 unit.
- 408. The Sociology of Human Fertility.** Comparative studies of levels of fertility in different societies and in the same societies at different times; analysis of sociological, psychological, and demographic factors affecting human reproduction and family planning, and consequences of differentials in fertility. Prerequisite: Graduate standing or consent of instructor. 1 unit.
- 409. Psychological Scaling.** Same as Psychology 409. Scaling theory and methodology, with emphasis upon measurement in psychophysics, differential psychology, and social psychology. Prerequisite: Psychology 307. 1 unit. Offered in 1974-75 and alternate years.

410. **Crowd Behavior.** An examination of classic and contemporary theory and research bearing on crowd formation, form, relocation, and dispersal; the production, maintenance, and alteration of various behaviors within crowds; and emphasis on direct observation of, and the design of field and laboratory research bearing on these phenomena. Prerequisite: Sociology 386. 1 unit.
411. **Sociology of Science.** Social factors in the origin of broad theoretical orientations in science, such as the mechanistic doctrine, vitalism, historicism, atomism, holism, relativism, and indeterminism; social effects of these orientations; the social origin of scientists; ethos of science; the relationship of science to culture change; and the variety and nature of scientific institutions. Prerequisite: Sociology 311 or consent of instructor. 1 unit.
412. **Demography of Human Mortality.** Historical trends and patterns in human mortality and their social implications; international differentials in mortality levels and cause-of-death patterns; the measurement of mortality; age, sex, ethnic, marital, and socioeconomic mortality patterns; and some consequences of mortality declines. Prerequisite: Sociology 270 or 364, and Sociology 388. 1 unit.
414. **Seminar on Social Interaction.** Same as Communications 414. An analysis of social interaction based on the social psychology of C. H. Cooley, G. H. Mead, and W. I. Thomas; presentation of problems of theory, concepts, and method. Prerequisite: One unit of graduate credit in sociology. 1 unit.
415. **Survey Research Methods, I.** A laboratory course in survey research methods to provide students with intensive training in design, implementation, and data analysis. Students and staff design and carry out a sample survey, with specific topic varying from year to year. This portion of the course is devoted mainly to planning of the project. Sociology 416, which is devoted to execution of the research project, must be taken in the following semester. For credit, both semesters must be taken in sequence. Three to ten hours of laboratory time per week. 1 unit.
416. **Survey Research Methods, II.** A laboratory course in survey research methods to provide students with intensive training in design, implementation, and data analysis. Students and staff design and carry out a sample survey, with specific topic varying from year to year. This portion of the course sequence will be devoted mainly to execution of the research project. For credit this course must be taken in the semester following Sociology 415. Three to ten hours of laboratory time per week. 1 unit.
417. **Seminar in the Sociology of Law.** Review and analysis of selected areas of theory and research in the sociology of law; focus varies from year to year; topics covered in different years include such areas as civil litigation and the civil courts, police operations and the sociology of law and order, sociological theories of justice, and the operations of legal agencies. Students should consult the instructor about the area to be covered in a particular semester. Prerequisite: Sociology 317. 1 unit.
418. **Seminar in Industrial and Economic Sociology.** Same as Labor and Industrial Relations 418. Discussion and individual research on such topics as industrialization; labor-management relations as group relations; the interrelations of industry and community; technology and the structure of controls in industry; and the problem of a social economics. Prerequisite: Sociology 318 or Labor and Industrial Relations 318, or consent of instructor. 1 unit.
421. **Seminar on Research in Marriage and Family Life.** Analysis of relationships between research methodology and conceptual schemes employed to study family life; critical examination of typical studies which illustrate alternatives in the conceptualization of family interaction and the nature of the family unit. Prerequisite: Consent of instructor. 1 unit.
422. **Theory of Social Groups.** A comparative survey of selected conceptual systems currently used for the analysis of human groups; systems are examined with a view to determining the origins and referents of the concepts, their interrelations, and their utility as sources of testable generalizations relevant to the solution of empirical problems in group analysis. 1 unit.

- 424. Sociology of Human Service Delivery Systems.** Intensive analysis of service delivery systems; focuses on delivery of health-care, educational, mental health, welfare, rehabilitation, and/or correctional services; and includes structure, access, quality, innovation, and modelling of the systems. Prerequisite: Consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
- 425. Racial and Cultural Minorities.** Study of the factual and conceptual aspects of minority status as determined by racial and cultural criteria. Prerequisite: Undergraduate major or minor in sociology or anthropology. 1 unit.
- 429. Seminar in the Sociology of Religion.** Detailed examination of research in the sociology of religion; the substantive character of religious groups and institutions as revealed by this research; significance of the research in the light of sociological theory and of other fields of sociological concern; and the value of the current research methodology. Prerequisite: Sociology 400. 1 unit.
- 432. Special Problems in Theory and Research on Deviant Behavior.** A seminar concerned with the critique of recent theory and research on selected problems in the study of delinquency, crime, mental disorder, and the collaborative development of new theory and research designs. Prerequisite: Sociology 331 or consent of instructor. 1 unit.
- 433. Sociometrics, I.** Advanced application of statistical methods to sociology and sociological models, with emphasis on cross-sectional applications; includes theory of probability and statistical inference, the construction of stochastic sociological models, the general linear single-equation model (regression analysis, analysis of variance, covariance analysis, discriminant analysis), the covariance-structure multinormal model, and linear and log-linear models for discrete data. Prerequisite: Sociology 383 and 384, six hours of calculus and three hours of linear or matrix algebra, or consent of instructor. 1 unit.
- 434. Sociometrics, II.** Continuation of Sociology 433. Extensions of the general linear single-equation model, the covariance-structure multinormal model, and the log-linear model for discrete data to models of several relations in sociology; specification, identification, parameter estimation, and hypothesis testing for simultaneous-equation (recursive and nonrecursive) sociological models; incorporation of measurement error in sociological data; and specification and aggregation analysis. Prerequisite: Sociology 433 or consent of instructor. 1 unit.
- 440. Political Sociology.** An analysis of the impact of social cleavages and cohesion on the operation of political institutions and movements; the place of conflict and power in sociological theory; composition and behavior of power elites; participation in political associations; national and local power structure; social functions of electoral behavior; and modern national and mass political movements. Prerequisite: A course in sociological theory or consent of instructor. 1 unit.
- 444. Seminar in Public Opinion.** Same as Communications 444. Development and theory of public opinion process in society; censorship, interest groups, and propaganda; and mass media and public opinion. 1 unit.
- 449. The Sociology of Sport.** Same as Physical Education 449. Sociological analysis of sport with emphasis on sociological theory; sport and games in cross-cultural analysis; sport's structure and function in modern industrialized society; the system of sport in regard to its role structure, formal organization, and professionalization; its differentiation along social class, age, and sex; and sport contest and conflict. Prerequisite: Nine hours of sociology or anthropology including a course in research methods, or consent of instructor. 1 unit.
- 450. Problems of Soviet Society in Transition.** This seminar examines certain major problems inherent in directed social change from an agricultural to an industrial system under a totalitarian regime of the Soviet type; attention focused on such areas as the different phases of the revolutionary process, inconsistencies between ideological premises and the demands of industrialism, the unanticipated consequences of social change, the simultaneous impact upon the social system of industrialism and totalitarianism, and

implications of the Soviet experience for other countries. Prerequisite: Consent of instructor. 1 unit.

456. **Organizational Sciences, I.** Same as Business Administration 410, Political Science 460, and Psychology 453. An introduction to the principal theories and important empirical research in various disciplines that study organizations. In addition to examination of the subject matter content of various disciplines, students critically examine the capacities and limitations of the various fields to make contributions to the study of organizations. Prerequisite: Enrollment as a major in organizational sciences in a cooperating program, or consent of instructor. 1 unit.
459. **Topics in Work and Organizational Analysis.** Intensive analysis of recent developments in the study of work, occupations, and complex organizations; emphasizes methodological problems of research in the area. Prerequisite: Sociology 322 and consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
474. **Survey Methods in Marketing Research.** Same as Business Administration 431. An analysis of survey methods in marketing with emphasis on sample design, data collection, and data processing; an advanced course in the methods required to design, implement, and evaluate a research project. Prerequisite: Sociology 185 or Economics 171, or equivalent. 1 unit.
475. **Seminar in Demography.** In-depth analysis of a selected area in population studies; topics include population theory, population policy, urbanization, migration, the labor force, ethnic demography, demography of the family, mathematical demography, historical demography, and regional studies. See *Timetable* for current topics. Prerequisite: Sociology 270 or 364, Sociology 388, and consent of instructor. 1 unit. May be repeated to a maximum of 2 units.
476. **Urban Communities and Urbanization.** Intensive study of special aspects of the urbanization process as it affects the life of communities in this and in other countries. 1 unit.
477. **Seminar on Community Organization.** Same as Rural Sociology 477. Theories relating to the community concept and the analysis of community organization; the process of community change as applied to societies in various parts of the world. Prerequisite: Sociology 275 or consent of instructor. 1 unit.
480. **Sociological Theory and Method.** Concerned with the strategy and tactics involved in the construction of specific substantive theories; considers such problems as concept formation, the use and development of models, criteria of good theory, and the role of theory in the development of sociological research. 1 unit.
482. **Recent Developments in Sociology.** Intensive study of selected topics based on contemporary works of major importance in the development of sociological theory. 1 unit. May be repeated for a total of 2 units.
484. **The Sociological Theory of Talcott Parsons.** Systematic description of the social system and comparison with the personality and cultural subsystems within the general action system; examination of the theory of structural change in social system. Prerequisite: Sociology 300 or 400. 1 unit.
485. **The Sampling of Human Populations and Social Organizations.** Same as Business Administration 435 and Psychology 485. Covers procedures for selecting samples from and estimating population parameters for human populations and social organizations; types of sample designs treated include simple random samples, and stratified and cluster samples together with random number and systematic selection techniques; and emphasis on the study of various kinds of advanced sample designs for both area and institutional settings together with the problems involved in the application of analytical statistics to complicated sampling procedures. Each student is required to participate in a field project which involves the actual selection of a cluster sample from the local area. Prerequisite: Sociology 387 or consent of instructor. 1 unit.
487. **Special Problems in Rural Sociology.** Same as Rural Sociology 487. Prerequisite: One unit of graduate credit in sociology; consent of instructor. $\frac{1}{2}$ or 1 unit.
490. **Individual Topics in Sociology.** Supervised individual investigation or study of a topic not covered by regular courses; topic selected by the student and the proposed plan of

study must be approved by the adviser and the staff member who supervises the work. $\frac{1}{2}$ to 2 units.

492. **Seminar on Models for Directed Change.** Same as Social Work 492. Construction and analysis of models for planned intervention at the personal, small group, and community levels; construction of models as interpretations of behavioral science theory; extrapolation of hypotheses and of guides to intervention from the models; and reading from several disciplines as relevant. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 1 unit.
494. **Multivariate Analysis in Psychology and Education.** Same as Educational Psychology 494 and Psychology 494. The principal methods of descriptive statistics used in the analysis of multiple measurements, with emphasis on conventional procedures of factor analysis; profile similarity models; discriminatory analysis; and multidimensional scaling. Prerequisite: Psychology 307 or Educational Psychology 496; consent of instructor. 1 unit.
499. **Thesis Research.** 0 to 4 units.

SPANISH

(See Spanish, Italian, and Portuguese under Humanities, School of)

SPECIAL EDUCATION

Chairperson of Department: Professor M. S. Lilly

Department Office: 188 Education Building, Urbana

117. **Exceptional Children.** Introduction to the study of children who deviate from the average in mental, physical, and social characteristics, including a study of the characteristics of such children and the adaptation of educational procedures to their abilities and disabilities. Prerequisite: Sophomore standing and/or Psychology 100. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
249. **Independent Study.** Permits study of problems not considered in other courses; designed for students who excel in self-direction and intellectual curiosity. Prerequisite: Upperclassman; upper 5 percent of class in grade-point average; demonstrated writing competence, research potential, scholarly attitude, and interest as attested to by instructors; consent of adviser and staff member who supervises the work. 2 hours.
291. **Thesis.** Prerequisite: Senior standing. 2 hours.
292. **Thesis.** Prerequisite: Senior standing. 2 hours.
314. **Laboratory in Measurement of Exceptional Children.** Practice in administering, scoring, interpreting, and communicating the results of educational tests which may appropriately be given to exceptional children by classroom teachers; practicum sections offered by areas of exceptionality: mental retardation, learning disabilities, gifted, deaf, emotionally disturbed, and culturally disadvantaged. Prerequisite: Credit or concurrent registration in Special Education 324; consent of instructor. 2 hours or $\frac{1}{2}$ unit. May be repeated to a maximum of 4 hours or 1 unit.
316. **The Gifted Child in School and Society.** A consideration of the gifted in society; who they are, their physical, psychological, social, and educational characteristics, and society's needs and provisions for them. The major portion of the course is devoted to the consideration and evaluation of instructional and administrative adjustments that should be made for the gifted in the educational structure. Prerequisite: Educational Psychology 211 or 236; consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.

318. **Workshop and Laboratory in Education of Exceptional Children.** For those specializing in exceptional children the following sections may be offered: (a) mental retardation; (b) learning disabilities; (c) gifted children; (d) deaf children; (e) emotionally disturbed children; (f) programmed learning for exceptional children; and (g) the culturally disadvantaged. Prerequisite: Consent of instructor. 4 to 8 hours, or 1 to 2 units.
321. **Education of Disturbed and Conduct-Problem Children.** Study of the social, emotional, and learning characteristics of children who are disturbed or who exhibit problems of conduct; methods of diagnosis and differentiation; and educational environments and teaching methods used for their remediation. Prerequisite: Special Education 117 or equivalent; Educational Psychology 236 or equivalent; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
322. **Psychology and Education of the Mentally Handicapped, I.** Study of the social, emotional, physical, and learning characteristics and problems of mentally handicapped children; identification and diagnosis; available services and provisions; and educational programs and curriculum of the school. Prerequisite: Consent of instructor. 3 hours or $\frac{1}{2}$ unit.
323. **Psychology and Education of the Mentally Handicapped, II.** Techniques, methods, and materials for teaching mentally handicapped children; principles underlying course of study, parent counseling, and use of records. Prerequisite: Senior standing in special education; consent of instructor. 3 hours or $\frac{1}{2}$ unit.
324. **Mental and Educational Measurement of Exceptional Children.** Theoretical and practical considerations in psychological and educational evaluation of exceptional children; emphasis on understanding the technical and practical aspects of current testing procedures and their application to the education of exceptional children. Prerequisite: Special Education 117; consent of instructor. 3 hours or $\frac{1}{2}$ unit.
416. **Problems in Mental Deficiency.** An advanced course in mental deficiency, covering definitions, theories, classifications, etiology, diagnosis, and social, medical, psychological, and educational rehabilitation procedures; emphasis on the contributions of biology, sociology, anthropology, and psychology to educational theory and practice with reference to the mentally deficient. Prerequisite: Special Education 322 or consent of instructor. 1 unit.
417. **Psychoeducational Problems of Exceptional Children.** A course for educators, students in the behavioral sciences, and students beginning graduate study in special education; study of relevant research dealing with the physical, mental, emotional, and social traits of all types of exceptional children, and consideration of major current problems in the development of educational programs. Prerequisite: Sixteen hours of psychology and/or education, or consent of instructor. 1 unit.
420. **The Social Psychology of the Handicapped.** Study of the social and emotional adjustment of handicapped children and adults, and of the somatopsychological significance of mental, sensory, and motor variations in the adjustive process; evaluation of effects of limitations imposed by the attitude of society, the attitude of the individual toward the handicap, and the handicap itself; and analysis of implications for current educational programs for the handicapped. Prerequisite: Special Education 117 or 417; Educational Psychology 312; or consent of instructor. 1 unit.
421. **Administration and Supervision of Special Education.** Designed for advanced graduate students preparing for administrative or supervisory positions in special education programs; examination of administrative and supervisory practices in educating exceptional children with emphasis on special education programs in the public schools; and application of administrative theory to special education programs. Field trips to observe and evaluate programs are required. Prerequisite: Special Education 417; Administration, Higher, and Continuing Education 450; consent of instructor. 1 unit.
424. **Supervised Practice in Special Education.** Supervised practice in one or more settings in which either mildly or severely impaired students are served; practicum settings may include day, residential, special, and regular schools which serve handicapped students.

- Prerequisite: Admission to the graduate program in special education; consent of supervising faculty member. 1 unit.
425. **Principles and Practices of Resource Teaching.** The principles of resource teaching and their application; includes a review of the historical development of resource teaching and the study of pertinent research; and practical applications in school settings. Prerequisite: Special Education 318 or consent of instructor. 1 unit.
 449. **Independent Study.** Offers opportunity and challenge of self-directive, independent study, that is, develops the individual's ability as an independent student and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given semester. Prerequisite: Approval of study outline by adviser and the department chairman prior to enrollment. $\frac{1}{2}$ or 1 unit. No more than 2 units may be offered toward an advanced degree except by consent of the dean of the College of Education.
 456. **Problems and Trends in Special Education.** Introduction to significant problems, points of view, and trends in the field concerned; exploration of significant research related to organization, content, and techniques in the field in question. Students are encouraged to make special studies in approved areas. Sections may be offered in the following fields: (a) mental retardation; (b) learning disabilities; (c) gifted children; (d) deaf children; (e) emotionally disturbed children; (f) programmed learning for exceptional children; and (g) culturally disadvantaged children. Prerequisite: Consent of instructor. 1 to 2 units.
 459. **Workshop in Curriculum Development.** Curriculum development projects in specialized fields of special education. Sections may be offered in the following fields: (a) mental retardation; (b) learning disabilities; (c) gifted children; (d) deaf children; (e) emotionally disturbed children; (f) programmed learning for exceptional children; (g) culturally disadvantaged children; and (h) preschool children. 1 to 2 units.
 490. **Seminar for Advanced Students of Education.** Seminar in the education of exceptional children; open only to persons who have been admitted for doctoral study. Sections may be offered in the following fields: (a) mental retardation; (b) learning disabilities; (c) gifted children; (d) deaf children; (e) emotionally disturbed children; (f) programmed learning for exceptional children; (g) culturally disadvantaged children; (h) administration; (i) behavior modification; and (j) special education. 1 to 2 units.
 491. **Field Study and Thesis Seminar.** Assists doctoral candidates in planning field studies and thesis problems; students present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze all presentations critically. Limited to students who have been admitted for doctoral study. 1 to 2 units.
 499. **Thesis Research.** Individual direction of research and thesis writing. 0 to 4 units.

SPEECH AND HEARING SCIENCE

Head of Department: Professor J. J. O'Neill

Department Office: Room 300, 505 East Green Street, Champaign

105. **Voice and Articulation.** Same as Speech Communication 105. Basic factors of voice and speech sound production; analysis of faults that result in minor speech deviations or inadequacies; and individual analysis and guided practice toward improvement of speech habits. 2 hours.
109. **Introduction to Physiological Phonetics.** Basic analysis of the physiological process of producing the sounds of American English; practice in identification and in transcrip-

tion of normal and deviant speech especially for speech clinicians, hearing therapists, teachers of speech, and teachers of the deaf. 3 hours.

175. **A Survey of Historical and Professional Aspects of Speech Pathology and Audiology.** Survey of the fields of speech pathology and audiology; emphasis on historical and philosophical developments, relations to other professions, professional practice, and function and role in study of human communication. Prerequisite: Sophomore standing. 2 hours.
198. **Freshman Seminar.** A special experimental seminar or independent study course intended to cover topics not treated by regular course offerings; open to undergraduates at any level. Requests for activation of this course may be made by students or by faculty and should be directed to the head of the academic department concerned. While credit toward graduation is normally granted, credit toward satisfying specific college or departmental requirements is contingent upon approval by the appropriate college or departmental committee. 0 to 9 hours. May be repeated.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
208. **Speech and Hearing Problems in the Classroom.** An orientation of prospective teachers to speech and hearing problems encountered in the elementary and secondary schools; emphasis on description of problems and types of classroom management. Prerequisite: Junior standing. 3 hours.
290. **Individual Study.** Individual investigation of special problems. Prerequisite: Ten hours of speech and hearing science, and written approval by the faculty members who will supervise the student's work. 2 hours. May be repeated to a maximum of 6 hours.
291. **Honors Course.** Individual study leading either to a thesis or to departmental honors. Prerequisite: Senior standing; a grade point of 4.0 or consent of the head of the department. 2 hours. May be repeated to a maximum of 4 hours.
301. **General Phonetics.** Same as Speech Communication 301. Basic principles of phonetic study; includes observation and representation of pronunciation, ear training, and practice in transcription. Prerequisite: Junior standing. 3 hours, or $\frac{1}{2}$ or 1 unit.
302. **Manual Communication, I.** Study of methods of manual communication with hearing impaired individuals; analysis of the language of signs and finger spelling in relation to origins, development, and structure; and extensive practice in manual communication. Prerequisite: Consent of instructor. 2 hours or $\frac{1}{2}$ unit.
303. **Manual Communication, II.** Continuation of Speech and Hearing Science 302; an in-depth study of manual methods of communicating with hearing impaired individuals; particular emphasis on development of fluency in communicating with language-deficient deaf children and adults; and extensive practice in idiomatic language of signs. Prerequisite: Speech and Hearing Science 302 or consent of instructor. 2 hours or $\frac{1}{2}$ unit.
317. **Psychosocial Educational Aspects of Deafness.** Historical and current societal perceptions of the deaf; an analysis of the various effects and patterns of auditory impairment on children and adults; intelligence, personal and social adjustment, and the psychological processes and how they affect the acquisition of language, speech, speech reading, reading, and writing. Prerequisite: Special Education 117 and either Psychology 100 or Educational Psychology 211, or consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
319. **Special Education of the Deaf, I.** Survey of the curriculum and techniques in preschools, kindergarten, primary, and intermediate levels as applied to the hard of hearing, deafened, and deaf child; study of sense training, lip reading, vocabulary development, reading techniques, elementary school subjects, language and speech development, auditory training, and curriculum construction. Prerequisite: Consent of instructor. 5 hours, or 1 to 1 $\frac{1}{2}$ units.
320. **Special Education of the Deaf, II.** Continuation of Speech and Hearing Science 319. Prerequisite: Speech and Hearing Science 319. 5 hours, or 1 to 2 units.
348. **Speech and Language Clinical Methods in the Schools.** Same as Elementary and Early Childhood Education 348. Study of methods and materials used in the schools by

- the speech and language clinician. Prerequisite: Speech and Hearing Science 388. 3 hours or ½ unit.
375. **Speech Science, I.** Same as Speech Communication 375 and Linguistics 375. Introduction to the anatomical and physiological characteristics of the normal speech and hearing mechanisms, and to fundamental acoustics of speech. Prerequisite: Speech and Hearing Science 109 or 301, or consent of instructor. 4 hours or 1 unit.
 376. **Speech Science, II.** Same as Speech Communication 376 and Linguistics 376. Consideration of the physiology of the speaking act, the acoustical characteristics of voice and of speech sounds, and the hearing of speech. Prerequisite: Speech and Hearing Science 375. 4 hours or 1 unit.
 378. **Hearing Science.** Acoustics, anatomy, and physiology of the auditory system; psychophysical methods; and a consideration of auditory theories and mechanics. Prerequisite: Speech and Hearing Science 375. 3 hours or ½ unit.
 380. **Communication Disorders in Children: Habilitation and Rehabilitation.** Principles of differential diagnosis, therapeutic diagnosis, clinical and classroom habilitation, and rehabilitation of children with communicative disorders etiologically associated with neurological impairment, emotional disturbance, environmental deprivation, bilingualism, and mental retardation. Prerequisite: Speech and Hearing Science 383; senior or graduate standing; or consent of instructor. 3 hours, or ½ or 1 unit.
 382. **Seminar in Development and Measurement of Spoken Language.** A review of the research and practical methodology associated with the development and measurement of spoken language. Prerequisite: Speech and Hearing Science 383 or consent of instructor. 3 hours or 1 unit.
 383. **Development of Spoken Language.** Same as Speech Communication 383. Study of the correlates of language development from the prelinguistic period to adulthood. Prerequisite: Senior standing; consent of instructor. 3 hours or ½ or 1 unit.
 385. **Speech Pathology, I.** Study of the causes, symptoms, and treatment of speech disorders, including articulatory, vocal, and rhythmical disorders; observation of clinical techniques required. Prerequisite: Ten hours of speech including Speech and Hearing Science 301 and 375, or consent of instructor. 3 hours or ½ unit.
 386. **Basic Therapeutic Principles.** Discussion and demonstration of clinical approaches used with speech and language disorders. Prerequisite: Speech and Hearing Science 385; credit or registration in Speech and Hearing Science 388. 3 hours or ½ unit.
 387. **Practicum in Speech Diagnosis and Therapy.** Observation, practice, and research in diagnosis and therapy of speech disorders. Prerequisite: Speech and Hearing Science 386 and 389; grade point average of at least 3.5; consent of instructor. Students may repeat either Speech and Hearing Science 387 or 398, but not both, for 3 hours. 3 hours or ½ unit.
 388. **Speech Pathology, II.** Study of causes, symptoms, and treatment of speech disorders; includes stuttering, cerebral palsy, aphasia, and cleft palate. Prerequisite: Speech and Hearing Science 385. 3 hours, or ½ or 1 unit.
 389. **Appraisal in Speech Pathology.** Introduction to principles of diagnostic testing; discussion of administration, scoring, and interpretation of tests obtained during speech and language evaluation. Prerequisite: Speech and Hearing Science 383 and 385, or consent of instructor. 3 hours or ½ unit.
 390. **Introduction to Hearing Disorders.** Analysis of symptoms and causes of hearing losses; effects of hearing loss upon oral communication, education, and psychological adjustment; and principles of retraining the hard-of-hearing. Prerequisite: Speech and Hearing Science 375 or consent of instructor. 3 hours or ½ unit.
 391. **Audiometry.** Principles and application of basic audiometry. Prerequisite: Speech and Hearing Science 390 or consent of instructor. 3 hours, or ½ or 1 unit.
 392. **Diagnosis of Hearing Impairments in Infants and Young Children.** Symptoms and causes of hearing impairment in young children; practice in procedures used for the measurement of residual hearing; and the selection and use of hearing aids. Prerequisite:

- site: Speech and Hearing Science 390 and 391, or consent of instructor. 3 hours, or ½ or 1 unit.
393. **Aural Rehabilitation.** Principles and methods of clinical and classroom retraining of the hard-of-hearing; includes lip reading, auditory training, speech disorders and conversation, and counseling. Required in curriculum of teacher training in speech and hearing science. Prerequisite: Speech and Hearing Science 390; grade point average of at least 3.5; consent of instructor. 3 hours, or ½ or 1 unit.
394. **Hearing Conservation.** Survey of auditory screening methods, educational and protective measures, and follow-up procedures utilized in public health, public school and college, and military and industrial settings. Prerequisite: Speech and Hearing Science 390 and 391. 3 hours, or ½ or 1 unit.
398. **Practicum in Audiology.** Observation, practice, and research in diagnosis and rehabilitation of auditory disorders. Students may repeat either Speech and Hearing Science 387 or 398, but not both, for 3 hours. Prerequisite: Speech and Hearing Science 389 and 393. 3 hours or ½ unit.
399. **Design and Analysis of Experiments in Speech and Hearing Science.** An introduction to experimental designs and methods of statistical analysis in speech and hearing research. Prerequisite: Graduate standing or consent of instructor. 3 hours, or ½ or 1 unit.
418. **Communicative Problems of the Deaf.** An advanced course in the problems and procedures involved in the acquisition of language and communication by persons with severe hearing impairment, particularly those with profound prelingual deafness; emphasis on research and measurement in the development of speech, speech reading, residual hearing, reading, written language, and manual communication, including finger spelling and the language of signs; and stress on the applications of recent approaches in linguistics and psycholinguistics to language development. Prerequisite: Consent of instructor. 1 unit.
475. **Experimental Phonetics, I.** Same as Linguistics 475. Theoretical consideration of speech as motor behavior; special reference to physiological investigations of normal respiration, phonation, and articulation; and survey of the experimental literature. Prerequisite: Consent of instructor. 1 unit.
476. **Experimental Phonetics, II.** Same as Linguistics 476. Theoretical consideration of speech as an acoustical phenomenon; special reference to acoustical investigations of voice and speech sounds; and survey of the experimental literature. Prerequisite: Consent of instructor. 1 unit.
477. **Measurement of Speech, I.** Same as Linguistics 477. Principles and methods of measuring speech action; special action recorders and transducers; techniques of analysis; problems of experimental design; and laboratory experimentation. Prerequisite: Consent of instructor; credit or concurrent registration in Speech and Hearing Science 475. 1 unit.
478. **Measurement of Speech, II.** Same as Linguistics 478. Principles and methods of measuring the acoustical phenomena of speech; oscillographic measurement of vocal variables; special instruments and media for automatic graphic recording; analysis of data; problems of experimental design; and laboratory experimentation. Prerequisite: Credit or concurrent registration in Speech and Hearing Science 476; consent of instructor. 1 unit.
481. **Seminar in Neuropathologies of Speech and Language.** Advanced study of speech, vocal, and linguistics problems associated with cerebral palsy and aphasia; topics offered in rotation, one or two each semester, include neurological aspects, aphasia, and cerebral palsy. Prerequisite: Consent of instructor. 1 unit. May be repeated for a maximum of 3 units.
482. **Seminar in Stuttering.** Principles, theories, and methods of clinical management of stuttering behavior in children and adults. Prerequisite: Speech and Hearing Science 388. 1 unit.
483. **Psychology of Speech and Hearing Disorders, I.** Same as Psychology 483. Survey of psychological techniques utilized in the clinical and experimental study of speech and

hearing disorders, with special reference to speech disorders; review of research findings and development of experimental designs. Prerequisite: Consent of instructor. 1 unit.

- 484. Psychology of Speech and Hearing Disorders, II.** Same as Psychology 484. Survey of psychological techniques utilized in the clinical and experimental study of speech and hearing disorders, with special reference to hearing disorders; review of research findings and development of experimental designs. Prerequisite: Consent of instructor. 1 unit.
- 486. Advanced Clinical Techniques in Speech and Hearing.** Semi-independent management of complex cases; participation in examination and analysis; topics offered each semester include theory of clinical practice, speech pathology, audiology, language disorders, and field study. Prerequisite: Consent of instructor. $\frac{1}{2}$ to 4 units.
- 488. Diagnostic Procedures in Pathologies of Speech and Language.** Study of diagnostic procedures used in the analysis of neuropathologies of speech and language, and orofacial and laryngeal pathologies of speech. Prerequisite: Consent of instructor. 1 unit.
- 489. Seminar in Orofacial and Laryngeal Pathologies of Speech.** Advanced study of speech and vocal problems associated with cleft palate, laryngeal dysfunctions, and facial-maxillary disturbances; topics offered in rotation, one each semester, include cleft palate and organic vocal problems. Prerequisite: Consent of instructor. 1 unit. May be repeated for a maximum of 2 units.
- 490. Medical Aspects of Speech Disorders and Audiology.** Study of acute and chronic hearing and speech disorders traceable to disease of the ear and vocal mechanisms in relation to the techniques and philosophies utilized in a medically oriented environment. Prerequisite: Speech and Hearing Science 385, 388, and 486. Offered in 1974-75 and in alternate years. 1 unit.
- 491. Seminar in Hearing Disorders.** Principles and methods of clinical management of all types of hearing disorders; survey of current literature and research. The following topics are offered in rotation, one or two each semester: automatic audiometry, aural rehabilitation, and hearing aids and amplification. Prerequisite: Speech and Hearing Science 390. 1 unit. May be repeated for a maximum of 3 units.
- 492. Advanced Audiology.** Advanced study of rationale and development of principles associated with special techniques, procedures, and methods used in audiology. 1 unit.
- 495. Special Problems.** Investigation of speech projects not included in theses. Prerequisite: Consent of head of the department. $\frac{1}{2}$ to 2 units.
- 496. Proseminar in Speech and Hearing Science.** Required seminar for all graduate students; involves reporting of ongoing research of faculty, visiting researchers, and students. 0 units.
- 499. Thesis Research.** Individual research in the various areas of speech and hearing science. 0 to 4 units (summer session, 0 to 2 units).

SPEECH COMMUNICATION

(See Humanities, School of)

SWAHILI

(See Linguistics under Humanities, School of)

THEATRE

Chairperson of Department: Professor B. Hobgood

Department Office: 4-122 Krannert Center for the Performing Arts

100. **Practicum, I.** Laboratory in acting, directing, playwriting, theatre management, and the design, construction, and handling of scenery, lighting, sound properties, costumes, and makeup for public performance. Prerequisite: Consent of instructor for nontheatre majors. 1 to 3 hours. May be repeated for three semesters.
101. **Theatre: Modern Forms.** Introduction to theatre aesthetics, to theatre as a profession, and to the theatre plant; study of dramatic form and structure with emphasis on realism, naturalism, and their modifications; and a survey of theatre history from 1850 to World War II. 4 hours.
102. **Theatre: Contemporary Forms.** Study of revolts against realism; includes symbolism and its theatre, theories of Appia and Craig, expressionist drama and its staging, Brecht and epic theatre, theatre of the absurd and later developments, and the musical play. Prerequisite: Theatre 101. 3 hours.
103. **Theatre: Classical and Medieval Forms.** Theatre architecture, drama, and play production practices of ancient Greece and Rome, of Asia, and of Britain and the continent during the Middle Ages. Prerequisite: Theatre 101. 3 hours.
104. **Theatre: Sixteenth- and Seventeenth-Century Forms.** Survey of theatre history and drama with emphasis on Baroque Spain, Elizabethan England, and Renaissance Italy. Prerequisite: Theatre 101. 3 hours.
105. **Theatre: Seventeenth- and Eighteenth-Century Forms.** Survey of theatre history and drama with emphasis on France of the neoclassical era, England of the Restoration, and Europe and America of the Georgian period. Prerequisite: Theatre 101. 3 hours.
111. **Materials and Processes: Textiles.** Study of fibers, weaving methods, and color application; laboratory projects used to demonstrate textiles' response to cutting, draping, and suitability for stage scenery, properties, and costumes. 2 hours.
112. **Materials and Processes: Woods and Metals.** Study of the properties, availability, and costs of the woods and metals most useful for the theatre; laboratory experience in cutting, jointing, shaping, and finishing. 2 hours.
113. **Materials and Processes: Papers and Plastics.** Exploration of the potential use for a broad range of papers and plastics in the construction of stage properties, decoration, and accessories. 2 hours.
120. **Elements of Stagecraft.** Same as Speech Communication 157. The design of stage scenery; the materials and methods of stage scenery construction and stage lighting; and lectures, readings, and practical problems. Not open to theatre majors. 4 hours.
121. **Scenecraft.** Introduction to theatre shop organization, tools, and materials; basic scenery construction, painting, and assembling. Open to students in the College of Fine and Applied Arts only. 2 hours.
131. **Stage Lighting and Sound Effects.** The history and development of stage lighting; the theory and function of stage lighting and sound; examination of instruments, equipment, and installations; and planning the design of stage lighting and sound. Lectures, practical problems, and laboratory. 3 hours.
140. **Costume Construction.** Theory and practical techniques of sewing, fitting, and decorating stage costumes analyzed and applied to specific production situations; laboratory practice culminating in construction of a period costume by each student. 2 hours.
141. **Makeup for the Theatre, I.** Principles, materials, equipment, and application techniques; corrective and age effects; and delineation of character through use of paint and hair goods. Lecture, discussion, and practice. 2 hours.
142. **Makeup for the Theatre, II.** Equipment and methods for creation of three-dimensional effects through use of putty, wax, adhesives, and rubber; techniques of design and execution of masks, national types, and nonrealistic styles. Lecture, demonstration, and practice. Prerequisite: Theatre 141. 2 hours.

170. **Fundamentals of Acting.** Same as Speech Communication 161. Study of the methods of acting, with emphasis given to the basic stage techniques; the role of the character in relation to the play as a whole; and the intellectual and emotional values of the play and their interpretations by means of voice and action. 3 hours.
171. **Speech for the Stage: Fundamentals.** Study of the physical and psychological bases of speech and the analysis and synthesis of speech sounds; training in the requirements of good voice in the theatre; projection through breath control, support of tone, resonance, voice placement, articulation, and the element of tone; and exercises in elimination of speech regionalisms. 2 hours.
172. **Speech for the Stage: Dialogue.** Examination of the dialogue in modern plays, primarily British and American; analysis of its construction, characteristics, thought, and emotion; making meaning clear through phrasing; and attainment of vitality and variety. Class practice and performance. Prerequisite: Theatre 171. 2 hours.
173. **Speech for the Stage: Dialects.** Analysis of British stage speech and the important departures from it and of the major dialects in the United States; their phonetic transcription; training in perception; and the use of dialects in plays. Exercises and practice. Prerequisite: Theatre 172. 2 hours.
174. **Movement for the Stage: Improvisation.** Purposes and history; exercises in developing the sense memories and in their pantomimic recall; exercises to heighten the actor's observations, imagination, and creative powers; and characterized pantomime, both improvised and based on characters in plays. 2 hours.
175. **Movement for the Stage: Techniques.** Uses of movement in acting; physiological and psychological bases of movement; analysis and synthesis of the body's movement; movement timing, spacing, force, quality, climax, and motivation; stage conventions in movement; and movement and character. Exercises and drill. Prerequisite: Theatre 174. 2 hours.
176. **Acting: Characterization.** The psychology of acting; methods of preparing a role. Prerequisite: Theatre 175. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
220. **Advanced Scenecraft.** The examination of stage equipment, including rigging systems, revolves and wagon systems, platforming, and methods of shifting stage scenery. Prerequisite: Theatre 121. 2 hours.
221. **Advanced Scenery Painting.** Studio course in the problems of painting stage scenery, with special emphasis on contemporary materials and rendering processes. Prerequisite: Theatre 220 or consent of instructor. 2 hours.
222. **Scene Design, I.** Introduction to the basic processes of designing for the stage, including physical considerations, relevant research for design, stage perspective, and specific design projects for proscenium and open stage forms. Prerequisites: Theatre 220 or consent of instructor. 3 hours.
231. **Stage Lighting Design.** A studio course analyzing current lighting practices by means of production-oriented projects. Prerequisite: Theatre 131. 3 hours.
243. **Approaches to Stage Costume.** Theoretical and practical aspects of theatrical costuming for the actor and director. Prerequisite: Home Economics 285 or consent of instructor. 3 hours.
263. **Theatre of the Black Experience.** An aesthetic approach to the study of Afro-American drama concerned with the principles, playwrights, movements, and media of black drama since 1960. Prerequisite: Consent of instructor. 3 hours.
271. **Acting: Studio, I.** Periodic performances of soliloquies and short scenes from plays written after World War I; presentation before members of the theatre faculty and invited guests. Prerequisite: Second-semester junior standing in the acting option or consent of the theatre faculty. 3 hours.
272. **Acting: Styles for Period Plays.** Acting in important theatrical periods: classical Greece, the *commedia dell'arte* of Italy, Elizabethan England, the Carolinian Restoration, seventeenth-century France, and nineteenth-century Europe and America; the effect

on acting of the theatre's physical aspects; and class performance of scenes. Prerequisite: Theatre 170 or 176. 3 hours.

280. **Fundamentals of Dramatic Writing and Structure.** Same as Rhetoric 263, Speech Communication 263, and Radio and Television 280. Study of basic structure of drama; writing of scenes and analysis of short and long dramatic works; and a term project consisting of a play analysis paper or original short play. Individual students may be given permission to work in areas of film or television. Prerequisite: Consent of instructor. 3 hours.
281. **Directing, I.** Same as Speech Communication 255. Problems of script selection and interpretation, casting, rehearsing, and performances; techniques of composition, movement, and business for the proscenium stage; and direction of appropriate scenes for class presentation. Prerequisite: Theatre 170 or 176; junior standing. 3 hours.
291. **Individual Topics.** Individual projects and problems. Prerequisite: Consent of instructor. 2 hours.
292. **Individual Topics.** Individual projects and problems. Prerequisite: Consent of instructor. 2 hours.
300. **Practicum, II.** Advanced laboratory in acting, directing, playwriting, and theatre management; the design, construction, and handling of scenery, lighting sound, properties, costumes, and makeup for public performance. Prerequisite: For nontheatre majors, consent of instructor. 1 to 3 hours, or $\frac{1}{4}$ to $\frac{1}{2}$ unit. May be repeated to a total of 12 hours or 2 units.
310. **Theatre Planning and Programming.** Theatre programming including consideration of relationships of audience to stage, the merits of the various stage technological systems, and the related business, audience, and production facilities of a theatre center. 2 hours or $\frac{1}{2}$ unit.
320. **Scene Design, II.** Studio course with design projects for period plays, the musical theatre, and contemporary forms. Prerequisite: Theatre 222 or consent of instructor. 3 hours or $\frac{1}{2}$ unit.
330. **Photo-Projection Techniques.** Integration of film techniques with the scenic environment for modern staging, including initial rendering, film processing, projection surfaces, and stage projection equipment. Prerequisite: Theatre 131. 2 hours or $\frac{1}{2}$ unit.
341. **Costume Design.** Theories, problems, and projects in theatrical costume. Prerequisite: Theatre 140 and Home Economics 285. 3 hours or 1 unit.
353. **Creative Dramatics for Children.** Study of the subject matter and techniques of creative dramatics for children with laboratory application. Prerequisite: Consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
354. **Theatre for the Child Audience.** Study of the history, objectives, and techniques of play production for the child audience; laboratory application. Prerequisite: Consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit.
355. **Musical Theatre.** Same as Music 355. Study of musical theatre and its scores and librettos; consideration of production problems, including those of choreography, scenery, and costume design; and the planning and production of a musical play or score. Prerequisite: Junior standing and consent of instructor. 3 hours or $\frac{1}{2}$ unit.
371. **Acting: Studio, II.** Public presentation of short scenes under semiproduction conditions: basic lighting, stock costumes, and minimal properties. Prerequisite: Second semester senior standing in the acting option, or consent of theatre faculty. 3 hours or $\frac{1}{2}$ unit.
380. **Advanced Dramatic Writing.** Same as Radio and Television 363 and Speech Communication 363. Application of principles of dramatic form and structure to the more complex problems of playwriting; practice in writing in sustained dramatic forms. Prerequisite: Theatre 280; consent of instructor. 3 hours, or $\frac{1}{2}$ or 1 unit. May be repeated to a total of 6 hours or 2 units.
381. **Directing, II.** Production problems and techniques of movement and business for non-proscenium staging areas; direction of appropriate scenes for class presentation; and

study of production practices for the musical play. Prerequisite: Theatre 281. 3 hours or ½ unit.

401. **Studies in Dramatic Form and Structure.** Same as Speech Communication 400. Studies in the relationship of dramatic form and structure to the contemporary production of historical and modern plays. Prerequisite: Theatre 361 and 362, or equivalent; consent of instructor. 1 unit.
402. **Studies in Theatre History: Beginnings to the Seventeenth Century.** Examination of movements and contributors to the theatre. A minimum of four of the following divisions are emphasized each time the course is offered: origins; ancient Greece; Rome; Middle Ages; Italian Renaissance; England, 1558-1642; Spain, 1500-1700; and France, 1548-1700. Prerequisite: Consent of instructor. 1 unit. May be repeated to a maximum of 2 units with consent of instructor.
403. **Studies in Theatre History: Seventeenth Century to 1900.** Examination of movements and contributors to the theatre. A minimum of three of the following divisions are emphasized each time the course is offered: England, 1642-1790; colonial America; Italy, France, and Spain in the eighteenth century; northern and eastern Europe in the eighteenth century; Europe and America in the early nineteenth century; and Europe and America in the late nineteenth century. Prerequisite: Consent of instructor. 1 unit. May be repeated to a maximum of 2 units with consent of instructor.
404. **Studies in Theatre History: Twentieth Century.** Examination of movements and contributors to the theatre. A minimum of three of the following divisions are emphasized each time the course is offered: Europe, 1875-1915; Orient; Europe and America between the wars; 1945-1960; and since 1960. Prerequisite: Consent of instructor. 1 unit. May be repeated to a maximum of 2 units with consent of instructor.
405. **Seminar in the Stage History of Classic English Plays.** Same as English and Speech Communication 469. Analysis and reconstruction of past productions of classic plays, with special reference to Shakespeare. Prerequisite: One year of work in dramatic literature or theatre history; consent of instructor. 1 unit.
406. **Seminar in Theatre History.** Same as Speech Communication 468. Studies in the history of the theatre. Prerequisite: Consent of instructor. 1 unit.
407. **Seminar in Theatre Art.** Same as Speech Communication 465. Studies in the aesthetics of the theatre. Prerequisite: Consent of instructor. 1 unit.
411. **Colloquium in Advanced Design and Theatre Technology.** Projects in design for the theatre or in theatre technology, including stage scenery, costuming, lighting, makeup, projections, and sound and stage systems. Prerequisite: Candidacy for M.F.A. in theatre with design and technology specialty, or consent of instructor. 2 units. May be repeated to a maximum of 6 units.
412. **Studio in Theatre Production, I: Concepts and Their Exploration.** Open to students from the several specialties in theatre who are combined into ensembles to investigate and develop methods for analysis, visualization, and primary rehearsals. Prerequisite: Candidacy for M.F.A. in theatre, or consent of instructor. 2 units. May be repeated to a maximum of 4 units.
413. **Studio in Theatre Production, II: Rehearsal and Performance.** Open to students from the several specialties in theatre who are combined into ensembles in order to produce one or more theatrical productions. Prerequisite: Candidacy for M.F.A. in theatre, or consent of instructor. 2 units. May be repeated to a maximum of 4 units.
455. **Studies in Theatre Organization, Management, and Operation.** A study of the organization, management, and operation of the theatre staff, with special emphasis on the business procedures involved in theatre management and promotion. 1 unit (summer session, 1 unit).
471. **Colloquium in Acting.** Performance assignments in productions prepared at Krannert Center, combined with individual evaluation by the acting staff; special acting workshops dealing with problems relevant to the semester's production schedule. Prerequisite: Candidacy for M.F.A. in theatre with acting specialty, or consent of instructor. 2 units. May be repeated to a maximum of 6 units.

481. **Colloquium in Directing.** Individual assignments in directing, stage managing, or coaching of actors carried out in conjunction with the semester's productions; prepared at Krannert Center or in conjunction with the training of actors in the undergraduate curriculum. Prerequisite: Candidacy for M.F.A. in theatre with directing specialty, or consent of instructor. 2 units. May be repeated to a maximum of 6 units.
491. **Special Problems.** Individual research in selected topics by arrangement with the instructor. $\frac{1}{2}$ to 2 units.
495. **Creative Project.** Open to M.F.A. candidates in theatre only. 2 units.
499. **Thesis Research.** 0 to 2 units.

THEORETICAL AND APPLIED MECHANICS

Head of Department: Professor R. T. Shield

Department Office: 212 Talbot Laboratory, Urbana

150. **Analytical Mechanics (Statics).** Resultants of force systems; algebraic and graphical conditions of equilibrium of force systems; analysis of forces acting on members of trusses, frames, etc.; forces due to friction; and centroids. Prerequisite: Physics 101 or 106; concurrent registration in Mathematics 140, 141, or 145. 2 hours.
152. **Engineering Mechanics, I (Statics).** Analysis of force systems by means of vector algebra; treatment of two- and three-dimensional systems, including force fields; and introduction of the principle of virtual work. Prerequisite: Physics 106; concurrent registration in Mathematics 140, 141, or 145. 3 hours.
154. **Analytical Mechanics (Statics and Dynamics).** A combination of Theoretical and Applied Mechanics 150 and 212 with less emphasis on some topics. Prerequisite: Physics 101 or 106; concurrent registration in Mathematics 140, 141, or 145. 4 hours.
156. **Analytical Mechanics (Statics and Dynamics).** A combination of Theoretical and Applied Mechanics 150 and 212. Prerequisite: Physics 101 or 106; concurrent registration in Mathematics 140, 141, or 145. 5 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
212. **Engineering Mechanics, II (Dynamics).** Introduces the elements of vector calculus as applied to mechanics; treats the kinematics of three-dimensional motion of a particle and of a rigid body; considers motion relative to translating and rotating reference frames; and treats the kinetics of particles and rigid bodies by using principles involving force, mass, and acceleration, work and energy, and impulse and momentum. Prerequisite: Theoretical and Applied Mechanics 150 or equivalent; Mathematics 140, 141, or 145. 3 hours.
221. **Elementary Mechanics of Deformable Bodies.** Elastic and inelastic relationships between external forces (loads) acting on deformable bodies and the stresses and deformations produced; tension and compression members; members subjected to torsion and to bending; buckling (columns); combined stresses; repeated loads (fatigue); energy loads and impact; and influence of properties of materials. Prerequisite: Theoretical and Applied Mechanics 150 or equivalent; Mathematics 140, 141, or 145. 3 hours.
223. **Mechanical Behavior of Solids.** Influence of loading conditions and environment on the behavior of engineering materials; effects of rate of loading, time, temperature, number of stress cycles, and state of stress on the ductile and brittle behavior of materials; and significance of mechanical properties. Prerequisite: Concurrent registration in Theoretical and Applied Mechanics 221. 1 hour.
224. **Behavior of Materials.** Introduction to atomic and molecular structure of metals, cement, concrete, plastics, ceramics, and glass; response of these materials to rapid, steady, and repeated loads at various temperatures (and environments) in terms of rheological models; and fracture behavior of specific materials, that is, stress rupture,

- brittle fracture, and fatigue of metals and concrete. Prerequisite: Theoretical and Applied Mechanics 221. 3 hours.
235. **Fluid Mechanics.** Fluid properties and statics; fluid flow; ideal and real fluids; similitudes; laminar and turbulent flow in closed conduits; boundary layers; free surface flow; and turbo-machinery. Prerequisite: Theoretical and Applied Mechanics 212. 4 hours.
293. **Senior Research Project.** Students work briefly in each of the several areas of modern research in theoretical and applied mechanics. After selecting one area for further study, each student prepares a proposal for a research project which will be carried out in Theoretical and Applied Mechanics 294. Prerequisite: Senior standing in engineering mechanics. 2 hours.
294. **Senior Research Project.** Individual projects conducted in the field of mechanics previously selected in Theoretical and Applied Mechanics 293. Each student prepares a technical report or paper and presents the results orally. The best papers are presented at a symposium held at the end of the semester and are bound together and published as a theoretical and applied mechanics report. Prerequisite: Theoretical and Applied Mechanics 293. 4 hours.
299. **Thesis.** Thesis investigation of special subjects including theoretical and/or experimental research. Prerequisite: Senior standing; approval of head of department. 3 hours.
311. **Mechanical Vibrations.** Kinematics of vibratory motion; comprehensive study of motion having single degree of freedom; critical speeds of shafts; vibration of systems with several degrees of freedom; and applications to engineering problems. Credit is not given for both Theoretical and Applied Mechanics 311 and Civil Engineering 374. Prerequisite: Theoretical and Applied Mechanics 154, 156, or 212, and 221. 3 hours, or $\frac{1}{2}$ to 1 unit.
314. **Advanced Dynamics for Engineers.** Three-dimensional kinematics of a rigid body; general dynamics of a rigid body; moments and products of inertia; kinetic energy; rotation of a rigid body about a fixed axis and about a fixed point; Euler equations of motion; gyroscopic theory; introduction to Lagrange equations; and engineering applications. Prerequisite: Theoretical and Applied Mechanics 212 or equivalent; Mathematics 341 or 345. 3 hours or 1 unit.
321. **Advanced Mechanics of Deformable Bodies.** Basic concepts of mechanics of deformable bodies and brief review of elementary topics; theory of stress and strain at a point; theories of failure, including failure by fracture; unsymmetrical bending; curved beams; torsion of noncircular sections; energy principles; and Castigliano's theorem. Prerequisite: Theoretical and Applied Mechanics 221, and 223 or 224. 3 hours, or $\frac{1}{2}$ to 1 unit.
324. **Flow and Fracture of Structural Metals.** Fundamental concept of strength of crystalline engineering materials at atomic, single crystal, and polycrystalline levels of association in relation to engineering mechanisms of failure; functional relationship between material variables, state of stress, strain, time, temperature, and failure of engineering components by creep, stress rupture fatigue, and brittle fracture. Prerequisite: Theoretical and Applied Mechanics 221 or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
326. **Experimental Stress Analysis.** Measurement of stresses or deformations that are of significance in the engineering design of load resisting members; use of optical, electrical, and mechanical instrumentation, models, analogies, brittle coatings, electrical resistance gauges, photoelasticity, etc. Prerequisite: Theoretical and Applied Mechanics 221 or equivalent. 3 hours, or $\frac{1}{2}$ to 1 unit.
334. **Fluid Mechanics and Advanced Hydraulics.** Study of the basic properties of fluids in general, particularly those that influence the flow of fluids in pipes and open channels; viscosimetry; dimensional analysis; effects of boundary conditions; cavitation; water tunnel; hydraulic jump; water hammer pumps; and turbines. Some laboratory work. Prerequisite: Theoretical and Applied Mechanic 235. 3 hours, or $\frac{3}{4}$ or 1 unit.
335. **Dynamics of Fluids.** An intermediate course in the mechanics of fluids introducing analytical methods of solution for ideal and real fluids; potential flow theory, theoretical

- approaches to viscous flows including boundary layer theory, and the analysis of compressible flows are indicated. Prerequisite: Theoretical and Applied Mechanics 235. 3 hours, or $\frac{3}{4}$ or 1 unit.
346. **Dimensional Analysis and Theory of Models.** The nature and use of dimensions; systematic calculations and dimensionless products; algebraic theory of dimensional analysis; similarity and model laws; and derivation of model laws from differential equations. Applications include von Karman's theory of similarity in turbulent flow, boundary layer theory, topics in open channel flow, model laws for pumps and turbines, topics in structural analysis and vibration theory, and topics in the theory of heat. 3 hours, or $\frac{1}{2}$ or 1 unit.
351. **Fundamental Concepts of Deformable Body Mechanics.** Introduction to the general theories of kinematics of deformable bodies; general balance laws applicable to continuum mechanics; constitutive relations (stress-strain relations); and introductions to linear elasticity, linear viscoelasticity, and special concepts in other areas of solid mechanics and fluids. Prerequisite: Theoretical and Applied Mechanics 221; Mathematics 343 and 345. 3 hours or 1 unit.
360. **Continuum Mechanics, I.** A unified treatment of modern continuum mechanics; linear algebra and analysis, review of kinematics and general balance laws, and general theory of mechanical constitutive equations (simple materials). Prerequisite: Theoretical and Applied Mechanics 351 or equivalent. 3 hours or 1 unit.
373. **Engineering Acoustics.** Same as Electrical Engineering 373. Development of the basic concepts needed for the understanding of mechanical and electrical acoustic systems; vibrating string; vibrating membrane; plane waves; spherical waves; vibrating piston; acoustical filters; loudspeakers and microphones; principle of reciprocity; the ear; and architectural acoustics. Students may not receive credit for both Theoretical and Applied Mechanics 373 and Electrical Engineering 374. Prerequisite: Senior standing with credit in Mathematics 345 or equivalent, or consent of instructor. 3 hours, or $\frac{3}{4}$ to 1 unit.
381. **Mechanical Behavior and Fracture of Noncrystalline Solid Engineering Materials.** Characterization of noncrystalline materials including inorganic glasses, polymers, clay, cement, asphalt, particulate composites, and fibrous composites according to their molecular or microscopic structure and macroscopic mechanical behavior; examination of models of structure that relate to mechanical behavior; treatment of time-dependent behavior using rheological models; discussion of ductile and brittle modes of fracture; and introduction of concepts of fracture mechanics and the statistical theory of fracture strength used to describe fracture strength. Prerequisite: Theoretical and Applied Mechanics 224 or equivalent; consent of instructor. 3 hours or $\frac{3}{4}$ unit.
392. **Analysis and Synthesis of Problems.** Emphasis on the rational analysis of comprehensive problems and engineering systems. Prerequisite: Consent of instructor. 3 hours, or $\frac{1}{2}$ to 1 unit.
393. **Independent Study.** Individual studies in any area of theoretical and applied mechanics. 1 to 8 hours, or $\frac{1}{4}$ to 2 units.
400. **Seminar in Engineering Mechanics.** Treatment of special topics in the field of mechanics including mechanics of solids problems such as fracture of metals and creep of materials; fluid flow problems such as the nature of turbulence, boundary layer theory, nature and effects of roughness of boundary, and effects of free surface; dynamics problems such as vibration of beams with moving loads and the gyroscope; and certain other topics, such as biomechanics, that cut across all areas of mechanics. Each semester one or more of these topics is selected and announced as the area to be covered. 0 to $\frac{1}{4}$ unit.
412. **Vibration Analysis.** Continuation of Theoretical and Applied Mechanics 311. Specific topics include systems of several degrees of freedom; applications of generalized coordinates and Lagrange's equations; boundary value problems in vibration of elastic bodies, including strings, rods, and beams; Stodola's method; iteration process and matrix procedure; vibrations in reciprocating machines; airplane structures and propellers;

- impact and transient vibrations; self-excited vibration; stability; and nonlinear systems. Prerequisite: Theoretical and Applied Mechanics 311 or equivalent. 1 unit.
416. **Energy Principles in Engineering Mechanics.** Introduction to the variational principles of mechanics and their applications to engineering problems; the derivation, interpretation, and applications of the principle of virtual displacements, the principle of minimum potential energy, and the principle of complementary energy; major emphasis on Castigliano's theorem, Hamilton's principle, and Lagrange's equations of motion; brief treatment of variational methods of approximation; and numerous illustrative applications to stress analysis of statically determinate and statically indeterminate frames, problems of elastic stability, the theories of rings and curved beams, the theory of elastic plates, vibrations of structures, and wave motions. Prerequisite: Theoretical and Applied Mechanics 451. 1 unit.
417. **Stochastic Structural Dynamics.** Same as Aeronautical and Astronautical Engineering 452. Structural dynamics problems treated from a probabilistic point of view; introduction of theory of probability and random processes as mathematical tools; study of response of structures under random excitation in the order of increasing complexity; and discussion of probability of failure for such structures. Prerequisite: Aeronautical and Astronautical Engineering 255 or Theoretical and Applied Mechanics 314, or equivalent. 1 unit.
418. **Aerodynamic Noise.** Same as Aeronautical and Astronautical Engineering 453. Mathematical techniques for the analysis of intensity, spectrum, and directivity of noise field in various environments; practical examples including jet and rocket engines, propeller and fan, sonic boom, and cabin noise of high-speed vehicles. Prerequisite: Graduate standing in engineering, physics, or mathematics. 1 unit.
424. **Properties of Engineering Materials.** Structure of metals and behavior of materials under various conditions of loading and use, including static, creep, fatigue, and impact; effects of high and low temperature, strain rate, state of stress, and internal structure; criteria of failure; relation of mechanical properties to behavior; significance of mechanical properties; tests and interpretation of test data; and material specifications. $\frac{1}{2}$ or 1 unit.
425. **Mechanics of Inelastic Bodies.** Presents methods of obtaining relations between loads, deformations, stresses, and strains in various members that are stressed beyond the elastic range; most applications consider both time-independent and time-dependent (creep) inelastic deformations; and specific topics include straight and curved beams, columns, and beam-columns, fully plastic analysis of statically indeterminate members and structures, torsion of circular and noncircular bars, and torsion-tension of bars of circular cross section. Prerequisite: Theoretical and Applied Mechanics 321. $\frac{1}{2}$ to 1 unit.
428. **Analysis of Nonlinear Systems.** Same as Electrical Engineering 428. Treatment of singular points and stability considerations; consideration of graphical and analytical methods including the perturbation method, variation of parameters, Galerkin's method, and the Ritz method for solving nonlinear differential equations. Prerequisite: Mathematics 341; consent of instructor. 1 unit.
429. **Theory of Linear and Nonlinear Viscoelasticity.** Same as Aeronautical and Astronautical Engineering 429. Fundamental concepts of viscoelasticity with applications: elastic-viscoelastic analogies, creep and relaxation functions, thermomechanical reciprocity relations, variational principles, model fitting, shear center motion, thick-walled cylinders under pressure and inertia loads with material annihilation, sandwich plates, propagation of viscoelastic waves, vibration of bars, plates and shells, nonlinear elastic-viscoelastic analogy, properties of nonlinear viscoelastic stress-strain laws, creep rupture, and torsion of nonlinear bars and shells. Prerequisite: Aeronautical and Astronautical Engineering 326, or consent of instructor. 1 unit.
431. **Theory of Ideal Fluid Flow.** Together with Theoretical and Applied Mechanics 432, covers topics in advanced fluid mechanics that are the basis of many modern developments. Ideal fluid theory is concerned with an incompressible fluid of negligible viscos-

ity. The differential equations of motions are derived and the several methods of obtaining flow solutions are presented: the obtaining of velocity potentials and stream functions by superposition of the effects of source, doublets, and vortices, and by the methods of conformal mapping. Relations for finding the resultant forces and moments on bodies are derived and applied to bodies such as lifting surfaces. Other topics include the theory and application of free streamline flows, vortex motions, and surface wave theory. Prerequisite: An elementary course in fluid flow; a course in advanced calculus. 1 unit.

432. **Theory of Flow of Viscous Fluids.** Although a logical continuation of Theoretical and Applied Mechanics 431, this course need not be taken sequentially. The theoretical development, analysis, and solution of incompressible viscous fluid flow problems; derivation of the differential equations of motion, starting with the stress relations occurring in viscous fluids; development of direct and approximate solutions for laminar flows; presentation of boundary-layer theory; introduction to the occurrence of turbulence and its characterization; the basic equations for analyzing turbulent flows; presentation of approximate solution for flows in boundary-layers with and without pressure gradients (and separation) pipes and jets; and consideration of experimental observation and application to technological problems. Prerequisite: An elementary course in fluid flow; a course in differential equations. 1 unit.
438. **Turbulence.** Starting with the statistical modes of characterizing turbulence, discussion covers statistical theory, energy considerations, and nature of turbulence in typical flows. Laboratory experiments are used to illustrate hot wire technique of turbulence measurements and the structure of turbulence. Prerequisite: Theoretical and Applied Mechanics 432 or equivalent. 1 unit.
441. **Applied Analysis in Engineering.** Provides training in applications of mathematics to engineering problems; most of the illustrations taken from engineering mechanics. Prerequisite: Mathematics 141; Mathematics 343 and 345 recommended. 1 unit.
442. **Applied Analysis in Engineering.** Continuation of Theoretical and Applied Mechanics 441. Prerequisite: Mathematics 141; Mathematics 343 and 345 recommended. 1 unit.
451. **Theory of Elasticity with Application to Engineering Problems.** Study of the mechanics of elastic deformable bodies, based on the fundamental concepts of equilibrium, geometry of strain, and properties of materials; detailed study of relations between stresses, strains, and displacements; and special consideration given to their significance in engineering problems. Prerequisite: Theoretical and Applied Mechanics 221; Mathematics 343; Mathematics 341 or equivalent. 1 unit.
452. **Theory of Elasticity with Application to Engineering Problems.** Continuation of Theoretical and Applied Mechanics 451. Prerequisite: Theoretical and Applied Mechanics 451. 1 unit.
454. **Theory of Shells.** Provides the theoretical basis of stress analysis of shell-type structure, such as ships, submarines, monocoque aircraft structures, concrete roofs and domes, pressure vessels, and containers for liquids; includes the differential geometry of shell theory, equilibrium equations, momentless theory of shells, strains in shells, statically indeterminate problems of shells, energy formulations, and stability of shells. Prerequisite: Theoretical and Applied Mechanics 451. 1 unit.
457. **Classical Elastostatics.** A modern unified treatment of the concepts and techniques developed by investigating the Cauchy-Navier equations; emphasis on the interpretation and motivation of ideas and their interrelation for the solution of three-dimensional problems; and topics including the classical boundary-value problems, existence and uniqueness theorems, stress functions and displacement potentials, singular states of stress, extension of Green's method to the equations of elasticity, method of series, and approximation techniques. The course represents a preparation for (1) students interested in the current state of knowledge in classical elasticity, and (2) students intending to do doctoral dissertations in classical elasticity. Prerequisite: Theoretical and Applied Mechanics 451 or equivalent; consent of instructor. 1 unit.

- 458. Wave Motion in Continuous Media.** Analysis of the dynamics of deformable bodies with a major emphasis on elastic media; introduction to the terminology associated with and the methods of treating such problems; general discussion of the motion of strings, bars, shafts, plates, and other bodies when subjected to load; detailed examination of approximations involved; and discussion of their engineering significance. Prerequisite: Theoretical and Applied Mechanics 311, 314, and 451; Mathematics 341, 342, or 343, or equivalent. 1 unit.
- 460. Continuum Mechanics, II.** Continuation of Theoretical and Applied Mechanics 360. Viscous fluids (without memory) and elastic bodies as examples of simple materials; general principles of continuum thermodynamics; thermodynamics of elastic bodies; and selected topics in modern continuum mechanics. Prerequisite: Theoretical and Applied Mechanics 360. 1 unit.
- 462. Theory of Plasticity.** The physical and mathematical formulation of the mechanics of inelastically deformed bodies, plastic stress-strain laws, and their association with yield and loading function; deals primarily with members subjected to biaxial and triaxial stress conditions. Specific topics include applications to flexure and torsion of prismatic members; expansion of thick-walled cylinders and spherical shells; and introduction to problems in plane plastic flow and variational plasticity. Prerequisite: Theoretical and Applied Mechanics 451 or equivalent. $\frac{1}{2}$ or 1 unit.
- 464. Theory of Buckling.** The pertinent information and theoretical background required for the prediction of failure by buckling of structures such as airplanes, ships, bridge trusses, fabricated towers, and shells; practical illustrations. Specific topics include elastic columns with various end restraints; buckling of framework, arches, rings, and plates; inelastic buckling of columns and plates; lateral buckling of beams; energy theory; Ritz procedure; and Euler's equation of the calculus of variations. Prerequisite: Theoretical and Applied Mechanics 416 and 451. $\frac{1}{2}$ or 1 unit.
- 467. Thermomechanics of Nuclear Reactor Systems.** Same as Nuclear Engineering 467. Origin of thermomechanics problems in nuclear reactor systems; heat generation and transfer in nuclear power systems; thermal stress in nuclear reactor systems; dynamical theory including effects of thermal-shock and thermal stress-wave propagation; and current thermomechanics problems in nuclear reactor design. Term paper required. Prerequisite: Nuclear Engineering 401 or consent of instructor. 1 unit.
- 485. Fracture Mechanics.** Acquaints students with the analytical and experimental techniques used to solve current fracture problems; topics include a discussion of the macroscopic theories used to determine the static strength of bodies containing cracks; linear elastic fracture mechanics (the tool and the model) and its relation to the Griffith criteria of fracture; elastic-plastic fracture mechanics models; small-scale yielding results and their implications; and an introduction to fracture mechanics in the realm of general yielding. Examples of how the analytical methods can be applied are derived from discussion of the general fracture control plan. Prerequisite: Theoretical and Applied Mechanics 324 and 451, or consent of instructor. 1 unit.
- 493. Advanced Independent Study (Special Problems).** Analytical or experimental studies in one or more phases of theoretical and applied mechanics, including mechanics of materials, theory of elasticity, theory of plasticity, properties of materials, mechanical vibrations, hydraulics and fluid mechanics, fatigue of metals, etc. $\frac{1}{2}$ to 2 units.
- 499. Thesis Research.** 0 to 4 units.

UKRAINIAN

(See Slavic Languages and Literatures under Humanities, School of)

URBAN AND REGIONAL PLANNING

Head of Department: Professor M. P. Brooks

Department Office: 909 West Nevada Street, Urbana

171. **Planning of Cities and Regions.** Survey of city and regional planning as related to problems and programs of urbanization and resource development. 3 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
236. **Planning Workshop, I.** Field work dealing with selected physical and/or social planning problems. Prerequisite: Consent of instructor. 6 hours.
240. **Planning Internship.** Professionally supervised field experience in public and private planning or development agencies; designed to introduce students to professional employment and actual planning practice. Students work in a University-approved agency of their own choice either during the summer session between the junior and senior years or part-time during a regular semester. Summary reports are submitted by both employer and student. Prerequisite: Senior standing or consent of instructor. 0 to 6 hours. No more than 8 hours of Urban Planning 240 and 340 may be applied toward the Bachelor of Urban Planning degree.
260. **Special Problems.** Special projects, research, and independent reading. Prerequisite: Consent of head of department. 2 to 6 hours.
271. **Urban Planning Practice.** Principles and techniques of professional planning, types of practice, levels and forms of plans and planning processes, implementation measures, evaluation, and citizen involvement. Prerequisite: Credit or concurrent registration in Urban Planning 171; junior standing in urban and regional planning or consent of instructor. 3 hours. Students may not receive credit for both Urban Planning 271 and 377.
315. **Environmental Change and Public Policy.** Same as Landscape Architecture 315. Introduction to the applicability of social and political theory, methods, and techniques to environmental issues and problems; surveys federal, state, and local conditions related to changing patterns in environmental attitudes and natural resource obligations. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
320. **Planning for Historic Preservation.** Survey of the preservation movement in relation to urban planning; techniques for selection of sites and definition of districts; funding, regulation, and implementation measures; and case studies of preservation plans and programs. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
325. **United States Population and Land Settlement Policy.** Scientific, ethical, constitutional, political, and land use planning aspects of American population policy and issues, including migration and immigration; population distribution and redistribution; and national, regional, and local growth and land use policy. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
337. **Planning Workshop, II.** Small-group field work dealing with actual planning problems at local, regional, state, or national levels; emphasis on problem analysis and generation of alternatives. Student selects from several sections, depending on specific interests. Prerequisite: Consent of instructor. 6 hours or 1 $\frac{1}{2}$ units.
338. **Planning Workshop, III.** Small-group field work dealing with actual planning problems at local, regional, state, or national levels; emphasis on production of concrete plans and policies, including strategies for implementation. Student selects from several

- sections, depending on specific interests. Prerequisite: Consent of instructor. 6 hours or 1 ½ units.
- 340. Advocacy Planning Field Work.** The student is assigned as an observer and participant to work directly with disadvantaged persons or groups, usually through community advocacy agencies, human relations commissions, or comparable mechanisms. The student as advocate planner is responsible to the clients he or she serves, with faculty constituting resource groups. Opportunities may be limited to insure continuity of service; evaluation reports required. Prerequisite: Senior standing or consent of instructor. 0 credit.
- 348. The Air Pollution System.** Same as Agricultural Engineering, Civil Engineering, Environmental Studies, General Engineering, Geography, Mechanical Engineering, and Veterinary Medical Science 348. Synthesis of current concepts on air pollution sources, meteorological dispersion, health effects, economic damage, and the political, legal, planning, and engineering implications for control and enforcement. In Part I, current concepts and applications utilizing recent information are presented. In Part II, implications are examined in small group discussions of several contemporary societal problems. Prerequisite: Senior or graduate standing. 1 or 2 hours, or ¼ or ½ unit. Consent of instructor is required for those students who wish to take this course for 1 hour or ¼ unit.
- 351. History of Planning in the United States.** Planning from the mid-nineteenth century to the present as related to cultural, societal, and philosophical influences. Prerequisite: Consent of instructor. 3 hours or ¾ unit.
- 360. Introduction to Social Planning.** Survey of the major social policy issues confronting urban areas in the United States today; examination of problems, policies, and programs in several functional areas (education, manpower development, health, welfare, etc.), as well as their interrelationships and their respective contributions to the problems of poverty; and analysis of processes of citizen participation as well as the roles of government in general and the planner in particular. Prerequisite: Consent of instructor. 3 hours or ¾ unit.
- 374. Urban Planning Theory.** Examination of the urban planning function within a theoretical, methodological, institutional, and professional context. Prerequisite: Consent of instructor. 3 hours or ¾ unit.
- 376. Planning Analysis.** Research and analytic techniques in urban planning: economic base and employment; population; market analysis; and derivation and use of statistical data. Prerequisite: Consent of instructor. 3 hours or ¾ unit.
- 377. Land Use Planning and Policy Formulation.** Principles and techniques for the preparation of land use, transportation, and community facilities plans; delineation of the comprehensive plan and the policy report; and social and economic implications of land use planning. Prerequisite: Urban Planning 171, junior standing in urban and regional planning, or consent of instructor. 3 hours or ¾ unit. Students may not receive credit for both Urban Planning 377 and 271.
- 378. Law and Planning Implementation.** Cases, legislation, and materials illustrative of the social, economic, and environmental interrelationships of land-use planning and the dynamic role of law as a system of controlled conflict; traditional and emerging concepts of zoning, subdivision regulation, housing codes, and review procedures. Prerequisite: Political Science 150 and 151, or 305 and 306, or Urban Planning 379, or consent of instructor. 3 hours or ¾ unit.
- 379. Legal Basis of Governmental Planning.** Cases and materials illustrative of legal concepts and institutions basic to the governmental planning process including property, police power, eminent domain, taxation, separation of powers, and due process; indicates both the problems and potential of adaptability by the legal system in response to contemporary socioenvironmental issues. Prerequisite: Consent of instructor. 3 hours or ¾ unit.
- 380. Survey of Regional Planning.** Concepts and procedures for planning of regions; river

- valley, metropolitan, state, and national planning. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
382. **Managing Urban Development.** Implementation of the planning program through administrative mechanisms, finance, citizen participation, and reorganization; evolution of implementation techniques; status of the local planning agency; and professional approaches to operation and management of the planning agency. Prerequisite: Political Science 150 and 151, or 305 and 306, or senior standing in urban and regional planning. 3 hours or $\frac{3}{4}$ unit.
384. **Urban Design and Planning Methods.** Concepts and techniques of urban analysis, plan making, and implementation essential for effective interdisciplinary work in urban design; case studies of major types of large-scale projects. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
386. **Seminar on Environmental Policy and Law.** Identification and analysis of environmental issues and legal developments primarily at the state and federal levels. Prerequisite: Consent of instructor. 3 hours or $\frac{3}{4}$ unit.
387. **Special Topics in Urban and Regional Planning.** Seminar on topics of current interest, as announced in the *Timetable*. 3 hours or $\frac{3}{4}$ unit. May be repeated to a maximum of 12 hours or 3 units.
393. **Environmental Quality Management.** Same as Environmental Studies 393. Issues and concepts used in determining the desired level of environmental quality, with emphasis on pollution control; comparisons of management alternatives with emphasis on equity, cost, and ease of administration; and includes the study of an actual pollution management problem. Designed for students with an environmental or public policy analysis background. Prerequisite: Senior or graduate standing; calculus or consent of instructor. 3 hours or $\frac{3}{4}$ unit.
440. **Professional Internship.** Summer, part-time, or other professional-level employment in the field of planning, usually in an area of concentration; exposure to the social, political, and institutional setting in which planning operates; and full documentation of internship activities required. Prerequisite: Consent of instructor. 0 credit.
441. **Suburban Land Use Patterns.** Same as Landscape Architecture 441. Theoretical basis for land use plan design, including site qualities, offsite environmental impacts, relative location of activities, and sequences of development. $\frac{3}{4}$ unit.
442. **Spatial Design Methods.** Same as Landscape Architecture 442. Representations and solution procedures for problems involving the arrangement of land use activities in space; optimizing, approximate, and graphic methods, their applications, effectiveness, and efficiency; and experiments with computerized procedures. Prerequisite: Landscape Architecture 441 or consent of instructor. 1 unit.
455. **Urban Transportation Policy.** Major policy elements in urban transportation and the relationship of urban transportation to the region, including the decision-making process, configuration and growth of the metropolitan area, and allocation of resources. $\frac{3}{4}$ unit.
463. **Housing and Urban Policy Planning.** The role of housing in social policy planning; methodologies for analyzing the housing market with regard to social planning issues; and demand and supply trends in American housing related to historic and projected social, economic, and physical changes. Prerequisite: Undergraduate course in micro-macro economics or consent of instructor. $\frac{3}{4}$ unit.
464. **Housing and Urban Planning Practice.** Housing location and developmental models; market analysis techniques; appraising and financing methodologies; and analysis of current housing programs and housing research. Prerequisite: Urban Planning 463; a course in statistics; consent of instructor. $\frac{3}{4}$ unit.
471. **Planning Strategies and Models.** Critical overview of current planning and decision-making models, with particular reference to their application to social problem solving in urban areas; interaction between the planning process and urban political systems. Prerequisite: Consent of instructor. $\frac{3}{4}$ unit.

473. **Urban Structure and Functions.** The concept of urban structure; the elements of urban spatial structure and growth; the human stresses in urban spatial structure; and structural remedies past and present. Prerequisite: Consent of instructor. $\frac{3}{4}$ unit.
475. **Planning Methods.** Applied analytic methods in urban and regional planning, including survey research techniques, population analysis and projection, community economic and employment analysis, land-use and transportation studies, and evaluation techniques. Prerequisite: Urban Planning 376 or equivalent; consent of instructor. $\frac{3}{4}$ unit.
476. **Urban and Regional Analysis.** Quantitative analysis of urban and regional growth and development with emphasis on forecasting techniques; population projection by age-cohort survival, matrix methods, and linkages with economic projections; and economic projection by economic base, multiplier models, input-output, and simulation models. Prerequisite: A course in statistics or consent of instructor. $\frac{3}{4}$ unit.
477. **Economic Analysis of Public Plans and Policies.** Techniques of policy analysis and evaluation; includes microeconomic concepts, cost-benefit analysis, cost-effectiveness, and planning-programming-budgeting systems; and examines selected public policies in areas such as transportation, environmental control, health, education, housing, and local finance. Prerequisite: Consent of instructor. $\frac{3}{4}$ unit.
485. **Issues in State and Local Public Finance.** Selected topics, such as alternative mechanisms for public resource allocation, sources of funds, the impact of growth on local finances, functions by governmental level, and intergovernmental transfers and revenue sharing. Prerequisite: Urban Planning 477, Economics 300, or consent of instructor. $\frac{3}{4}$ unit.
487. **Seminar.** Selected topics in urban and regional planning; several sections each semester. Prerequisite: Consent of instructor. $\frac{3}{4}$ unit.
488. **Urban Planning Research.** Independent study in selected urban and regional planning topics. Prerequisite: Consent of instructor and head of the department. $\frac{1}{4}$ to $\frac{3}{4}$ unit. No more than 3 units may be applied toward the Master of Urban Planning degree.
498. **Master's Project.** A major independent or small-group project, conducted in lieu of a master's thesis. Prerequisite: Consent of instructor. 1 $\frac{1}{2}$ unit.
499. **Thesis Research.** Prerequisite: Graduate standing in urban and regional planning; consent of the head of the department. 0 to 1 $\frac{1}{2}$ units.

VETERINARY BIOLOGICAL STRUCTURE

Head of Department: Professor A. R. Twardock

Department Office: 335 Veterinary Medicine Building, Urbana

A proposal is currently under consideration to combine this department with the Department of Veterinary Physiology and Pharmacology to form a Department of Veterinary Anatomy, Physiology, and Pharmacology.

300. **Gross Anatomy.** Same as Veterinary Medical Science 300. Systematic and topographic study and dissection of the dog; lectures, discussions, demonstrations, quizzes, and laboratory. Prerequisite: Registration in the veterinary curriculum or consent of instructor. 5 hours.
301. **Histology.** Same as Veterinary Medical Science 301. Structure of cells, tissues, membranes, vessels, lymphoid organs, hollow organs, and skin; special reference to domestic animals. Prerequisite: Registration in the veterinary curriculum or consent of instructor. 4 hours.
302. **Gross Anatomy.** Same as Veterinary Medical Science 302. Comparative study and dissection of the domestic animals with special reference to development and adaptation

to function; lectures, discussions, demonstrations, quizzes, and laboratory. Prerequisite: Veterinary Biological Structure 300 and 301, or consent of instructor. 4 hours.

303. **Microscopic Organology.** Same as Veterinary Medical Science 303. Microscopic study of the organs and systems of different domestic animals; lectures, demonstrations, laboratories, and quizzes. Prerequisite: Veterinary Biological Structure 300 and 301, or consent of instructor. 3 hours.
304. **Applied Anatomy.** Structural consideration of domestic and pet animals relative to diagnostic and surgical procedures. Prerequisite: Third-year standing in veterinary curriculum or consent of instructor. 2 hours.
305. **Developmental Anatomy.** Same as Veterinary Medical Science 305. Development of organs and systems with emphasis on specializations in domestic and laboratory animals; lectures and quizzes. Prerequisite: Veterinary Biological Structure 300 and 301, or consent of instructor. 3 hours.
378. **Veterinary Clinical Orientation.** Same as Veterinary Clinical Medicine, Veterinary Pathology and Hygiene, and Veterinary Physiology and Pharmacology 378. Lectures and demonstrations illustrating the interrelationships between the basic sciences and their applications in medicine and surgery; includes methods of restraint and handling of several animal species. Prerequisite: First-year standing in the veterinary curriculum. 1 hour.

VETERINARY CLINICAL MEDICINE

Acting Head of Department: Professor J. W. Judy

Department Office: 244 Small Animal Clinic, Urbana

347. **Veterinary Clinical Oncology.** Same as Veterinary Pathology and Hygiene 347. Current techniques in diagnosis and treatment of neoplastic diseases of domesticated animals, including chemotherapy, immunotherapy, radiotherapy, and surgery; concepts of oncogenesis and tumor immunology; and incidence, breed and site predilections, behavior, prognosis, radiographic and other clinical features and complications of general classes and specific types of neoplasms. Prerequisite: Third-year standing in veterinary medical curriculum. 2 hours.
360. **Medicine, I: General Medicine.** Diagnosis, treatment, and prophylaxis of infectious, noninfectious, and surgical diseases of the small domestic animals; lectures, quizzes, and demonstrations. Required in the veterinary curriculum. Prerequisite: Third-year standing in veterinary curriculum. 5 hours.
361. **General Veterinary Surgery.** Surgical principles including hemostasis, shock, fluid, and electrolyte balance; discussion of the surgical procedures of the major systems of the body; the aftercare of the patients, both farm and domestic pet species; and laboratory covering practice and demonstrations of the principles of surgery involved in the major body systems. Prerequisite: Third-year standing in veterinary curriculum. 5 hours.
362. **Clinical and Laboratory Practice.** Clinical and laboratory practice in diagnosis, treatment, and prophylaxis of animal diseases; lectures, quizzes, and demonstrations. Prerequisite: Third-year standing in veterinary curriculum. 2 hours.
363. **Reproduction, Obstetrics, and Genital Diseases.** Principles of animal reproduction, fertility, and obstetrics of all species of domestic animals, with emphasis on farm animals. Prerequisite: Third-year standing in veterinary curriculum. 2 hours.
364. **Medicine, II: General Medicine.** Diagnosis, treatment, and prevention of noninfectious, nutritional, metabolic, toxic, and parasitic diseases of large animals; lecture and discussion. Prerequisite: Third-year standing in veterinary curriculum. 5 hours.

365. **Special Veterinary Surgery.** Lectures and clinical demonstrations on surgical diseases and their diagnosis, operative treatment, and aftercare, together with appropriate laboratory practice. Prerequisite: Third-year standing in veterinary curriculum or consent of instructor. 5 hours.
366. **Clinical and Laboratory Practice.** Clinical and laboratory practice in diagnosis, treatment, and prophylaxis of animal diseases. Prerequisite: Third-year standing in veterinary curriculum. 2 hours.
367. **Radiology and Radiobiology.** Same as Veterinary Physiology and Pharmacology 367. General principles of radiology and radiobiology techniques and application to the diagnosis and therapy of animal diseases; lectures and discussions. Prerequisite: Third-year standing in veterinary curriculum or consent of instructor. 3 hours.
368. **Infectious Diseases and Preventive Medicine.** Diagnosis, treatment, and prevention of infectious diseases of large animals; lectures, discussions, and quizzes. Prerequisite: Fourth-year standing in veterinary curriculum. 5 hours.
369. **Clinical and Laboratory Practice.** Clerkship in veterinary clinical medicine and surgery. Prerequisite: Fourth-year standing in veterinary medicine professional curriculum, or equivalent. 4 hours.
370. **Seminar.** Faculty presentation of in-depth material concerning clinical aspects of medicine and surgery. Prerequisite: Fourth-year standing in veterinary medical curriculum. 1 hour.
371. **Clinical and Laboratory Practice.** Clinical and laboratory practice in diagnosis, treatment, and prophylaxis of animal diseases. Fourth-year veterinary students enrolled in this course spend two days at the Dixon Springs Agricultural Center at Simpson, Illinois, where they participate in the fall roundup and gain valuable experience in the handling, examination, and treatment of diseases of range cattle; see *Timetable* for approximate cost. Transportation is furnished. Prerequisite: Fourth-year standing in veterinary medicine. 8 hours.
372. **Veterinary Jurisprudence and Ethics.** Principles of law and professional ethics of importance to members of the veterinary profession; animal diseases and related regulatory laws and their administration; and federal procedure under animal disease, food, and meat inspection laws. Prerequisite: Fourth-year standing in veterinary medical curriculum. 2 hours.
374. **Clinical and Laboratory Practice, III.** Clerkship in veterinary clinical medicine and surgery. Prerequisite: Fourth-year standing in veterinary medicine professional curriculum, or equivalent. 3 hours.
375. **Reproduction, Obstetrics, and Genital Diseases.** Lectures, discussion, and laboratory practice in obstetrics, pregnancy diagnosis, and male and female infertility. Prerequisite: Veterinary Clinical Medicine 363; third-year standing in veterinary curriculum. 2 hours.
376. **Economics and Business Management for the Veterinarian.** Summary of management in a practice of veterinary medicine; emphasis on the application of economic principles of record analysis, personnel management, business organization, and financial management. Prerequisite: Third-year standing in veterinary curriculum. 2 hours.
377. **Swine Practice Management, I.** A study of swine production methods and their interaction with disease conditions; lectures, laboratories, and field trips for problem solving. Prerequisite: Fourth-year standing in veterinary curriculum or consent of instructor. 2 hours.
378. **Veterinary Clinical Orientation.** Same as Veterinary Biological Structure, Veterinary Pathology and Hygiene, and Veterinary Physiology and Pharmacology 378. Lectures and demonstrations illustrating the interrelationships between the basic sciences and their applications in medicine and surgery; includes methods of restraint and handling of several animal species. Prerequisite: First-year standing in the veterinary curriculum. 1 hour.
379. **Advanced Veterinary Ophthalmology.** Structure and physiology of the eye of domestic animals, alterations caused by ocular diseases, and the pharmacologic effects of drugs

used in ocular therapeutics; basic instruction in the use of microbiologic and cytologic examination, biomicroscopy, gonioscopy, tonography, electroretinography, and ultrasonography. Prerequisite: Veterinary Clinical Medicine 369 or equivalent, or consent of instructor. 2 or 3 hours. Students enrolled for lecture only receive 2 credit hours; students enrolled for lecture and laboratory receive 3 credit hours.

380. **Beef Practice Management.** A study of beef cattle practice with emphasis on herd health, reproduction, and disease control; lectures, laboratories, and field trips. Prerequisite: Fourth-year standing in veterinary curriculum. 1 hour.
381. **Clinical and Laboratory Practice, IV.** Selective clerkship in veterinary clinical medicine and surgery. Prerequisite: Fourth-year standing in veterinary medicine professional curriculum, or equivalent. 2 to 4 hours.
382. **Exotic Pets.** Principles of restraint, diagnosis, and medical and surgical treatment of diseases of small exotic mammals, birds, reptiles, and fish kept as pets. Prerequisite: Third-year standing in veterinary medicine curriculum. 1 hour.
383. **Swine Practice Management, II.** Laboratory experiences with practical diagnostic and surgical procedures conducted in modern veterinary swine practice; includes field trips to packing plants and swine production units. Prerequisite: Veterinary Clinical Medicine 377. 1 hour.
384. **Client Relations.** Introduction to client relations, including techniques of effective verbal and nonverbal communication and applications of these techniques for veterinary students. 1 hour.
385. **Advanced Radiographic Interpretation--Large Animal.** An exercise in systematic interpretation of large animal radiographs. Prerequisite: Veterinary Clinical Medicine 371 and consent of instructor. 2 hours.
386. **Advanced Radiographic Interpretation--Small Animal.** An exercise in systematic interpretation of small animal radiographs. Prerequisite: Veterinary Clinical Medicine 371 and consent of instructor. 2 hours.
387. **Advanced Veterinary Anesthesiology.** Lecture material includes anesthetic effects on cardiopulmonary physiology, interrelationships between anesthesia and various types of drug therapy, and balanced anesthetic techniques; laboratory includes new and advanced monitoring techniques, intermittent positive pressure ventilation, and specific anesthetic procedures. Prerequisite: Senior standing in veterinary curriculum or consent of instructor. 1 hour.
388. **Advanced Soft Tissue Surgery.** Advanced techniques in soft tissue surgery in small animals. Prerequisite: Veterinary Clinical Medicine 361 and 365. 1 hour.
389. **Small Animal Diagnostic Instrumentation.** Training in the use of special medical and surgical diagnostic techniques, including endoscopy, ultrasound, and an introduction to electrodiagnostics. Prerequisite: Fourth-year standing in veterinary curriculum. 1 hour.
390. **Equine Reproduction.** Instruction in equine reproductive physiology, infectious and noninfectious infertility problems, obstetrical procedures, and preventive medicine practices. Prerequisite: Fourth-year standing in veterinary curriculum. 1 hour.
391. **Advanced Orthopedics.** After videotape viewing and discussion of procedures during the lecture period, students perform advanced surgical techniques during the laboratory periods. Prerequisite: Fourth-year standing in veterinary curriculum. 1 hour.

VETERINARY MEDICAL SCIENCE

Head of Department: Professor L. M. Jones

Department Office: 141 Veterinary Medicine Building, Urbana

300. **Gross Anatomy.** Same as Veterinary Biological Structure 300. Systematic and topo-

- graphic study and dissection of the dog; lectures, discussions, demonstrations, quizzes, and laboratory. Prerequisite: Five hours of zoology; consent of instructor. 1 unit.
301. **Histology.** Same as Veterinary Biological Structure 301. Structure of cells, tissues, membranes, vessels, lymphoid organs, hollow organs, and skin; special reference to domestic animals. Prerequisite: Registration in veterinary curriculum or consent of instructor. 1 unit.
302. **Gross Anatomy.** Same as Veterinary Biological Structure 302. Comparative study and dissection of the domestic animals; special reference to development and adaptation to function; and lectures, discussions, demonstrations, quizzes, and laboratory. Prerequisite: Veterinary Medical Science 300 and 301; consent of instructor. 1 unit.
303. **Microscopic Organology.** Same as Veterinary Biological Structure 303. Microscopic study of the organs and systems of different domestic animals; lectures, demonstrations, laboratories, and quizzes. Prerequisite: Veterinary Medical Science 300 and 301, or consent of instructor. $\frac{3}{4}$ unit.
305. **Developmental Anatomy.** Same as Veterinary Biological Structure 305. Development of organs and systems with emphasis on specializations in domestic and laboratory animals; lectures and quizzes. Prerequisite: Veterinary Medical Science 300 and 301, or consent of instructor. $\frac{3}{4}$ unit.
315. **Veterinary Physiology.** Same as Veterinary Physiology and Pharmacology 315. Nervous and muscular systems, respiration, acid-base balance, urine formation, and body fluids and their regulation; lectures, discussions, and laboratory. Prerequisite: Second year standing in veterinary curriculum or consent of instructor. 1 $\frac{1}{4}$ units.
316. **Veterinary Physiology and Pharmacology.** Same as Veterinary Physiology and Pharmacology 316. Blood and lymph, circulation, digestion, metabolism, and endocrine systems; lectures, discussions, and laboratory. Prerequisite: Veterinary Medical Science 315 or consent of instructor. 1 unit.
318. **Pharmacology.** Same as Veterinary Physiology and Pharmacology 318. General principles of pharmacy and an analysis of the action of chemical agents on physiological processes; lectures, discussions, demonstrations, and laboratory. Prerequisite: Credit or concurrent registration in Veterinary Medical Science 315 and 316; consent of instructor. 1 unit.
320. **Pharmacology and Toxicology.** Same as Veterinary Physiology and Pharmacology 320. Principles of drug action and an analysis of action of chemical agents on living organisms; includes intoxications of domestic animals; lectures, discussions, and demonstrations. Prerequisite: Veterinary Medical Science 318 or consent of instructor. 1 unit.
332. **Veterinary Microbiology and Immunology.** Same as Veterinary Pathology and Hygiene 332. Lectures, discussions, and laboratories dealing with mechanisms of infection and resistance and the properties, pathogenesis, and control of viral and fungal infection of domestic and wild animals. Prerequisite: Veterinary Pathology and Hygiene 331 or equivalent; consent of instructor. 1 unit.
333. **Protozoan and Arthropod Parasites.** Same as Veterinary Pathology and Hygiene 333. Protozoan and arthropod parasites affecting domestic animals and man; lectures, discussions, and laboratory. Prerequisite: A total of 20 hours in chemistry or animal biology, or both; consent of instructor. $\frac{3}{4}$ unit.
334. **General Pathology.** Same as Veterinary Pathology and Hygiene 334. The basic principles of pathological processes, including tissue injury and repair, circulatory and metabolic disturbances, and inflammation and neoplasia. Lectures, quizzes, demonstrations, and laboratory. Prerequisite: A total of 25 hours in histology, parasitology, physiology, and microbiology; consent of instructor. 1 unit.
335. **Special Pathology.** Same as Veterinary Pathology and Hygiene 335. Disease processes affecting organs and anatomic systems, and those occurring in specific diseases; lectures, quizzes, demonstrations, and laboratory. Prerequisite: Veterinary Medical Science 334 or equivalent; consent of instructor. 1 unit.
336. **Helminth Parasites.** Same as Veterinary Pathology and Hygiene 336. Helminth parasites affecting domestic animals and man; lectures, discussions, and laboratory. Pre-

quisite: A total of 20 hours in chemistry or animal biology, or both; consent of instructor. $\frac{3}{4}$ unit.

340. **Introduction to Applied Statistics.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Food Science, Forestry, and Horticulture 340. Statistical methods involving relationships between populations and samples; collection, organization, and analysis of data; and techniques in testing hypotheses with an introduction to regression, correlation, and analyses of variance limited to the completely randomized design and the randomized complete-block design. Prerequisite: Mathematics 104, 111, or 112, or equivalent. 4 hours or $\frac{3}{4}$ unit.
346. **Management and Diseases of Laboratory Animals.** Same as Veterinary Pathology and Hygiene 346. Principles of management of conventional and gnotobiotic laboratories; emphasis on proper care, sanitation, breeding procedures, and disease control as fundamental requirements for the production and maintenance of good quality animals for teaching and research. Prerequisite: At least two courses in biology or equivalent; consent of instructor. 2 hours or $\frac{1}{2}$ unit.
347. **The Use of Laboratory Animals: Principles and Techniques.** Lectures and discussions dealing with laboratory animals as complex biological instruments and variables affecting their definition; laboratories deal with techniques used in laboratory animal experimentation. Prerequisite: Consent of instructor. $\frac{1}{2}$ unit.
348. **The Air Pollution System.** Same as Agricultural Engineering, Civil Engineering, Environmental Studies, General Engineering, Geography, Mechanical Engineering, and Urban and Regional Planning 348. Synthesis of current concepts on air pollution sources, meteorological dispersion, health effects, economic damage, and the political, legal, planning, and engineering implications for control and enforcement. In Part I, current concepts and applications utilizing recent information are presented. In Part II, implications are examined in small group discussions of several contemporary societal problems. Prerequisite: Senior or graduate standing. 1 or 2 hours, or $\frac{1}{4}$ or $\frac{1}{2}$ unit. Consent of instructor is required for those students who wish to take this course for 1 hour or $\frac{1}{4}$ unit.
374. **General Epidemiology.** Same as Environmental Studies, Health Education, Medical Sciences, and Veterinary Pathology and Hygiene 374. The epidemiology and natural history of infectious and noninfectious diseases, including integrated vector control and host resistance, and mental health and public health. Prerequisite: Microbiology 326, Veterinary Medical Science 332, or equivalent, or consent of instructor. 4 hours or 1 unit.
392. **Special Problems.** Individual research on a special problem chosen in consultation with the instructor and department head. Prerequisite: Registration in veterinary curriculum with grade-point average of 4.0 or above, or consent of instructor. $\frac{1}{2}$ unit. May be repeated for a total of 1 unit.
408. **Principles of Hematology.** The cellular morphology of the blood and bone marrow of animals in health and disease; lectures, discussions, demonstrations, and laboratory. Prerequisite: Veterinary Medical Science 301 or equivalent, or consent of instructor. $\frac{1}{2}$ unit.
413. **Experimental Mammalian Physiology.** Same as Physiology
413. **The Physiological Applications of Experimental Mammalian Surgery.** Prerequisite: Physiology 401 and 402, or equivalent; consent of instructor. 1 unit.
415. **Mechanisms of Microbial Infections.** Newer concepts of host-microorganism relations; emphasis on the dynamics and pathogenic mechanisms of microorganisms, immune responses and defense factors of the host, and pathogenesis of specific infections. Lectures, discussions, laboratory, and special problems. Prerequisite: Microbiology 326 or Veterinary Medical Science 332, or equivalent; consent of instructor. $\frac{3}{4}$ or 1 unit.
416. **Epizootiology.** Principles and problems of epizootiology; special consideration of the zoonoses; ecology of the host and parasite as related to resistance, adaptation, perpetuation, and distribution; the principles and factors in interference, carrier and latent

- states, and reservoirs and control. Prerequisite: Veterinary Pathology and Hygiene 331 or Veterinary Medical Science 332, or equivalent, or consent of instructor. 1 unit.
417. **Medical Mycology.** Study of the fungi that cause infections in man and animals; taxonomy, methodology, epidemiology, pathology, and diagnosis. Prerequisite: Microbiology 326 or Veterinary Medical Science 332, or equivalent. 1 unit.
418. **Concepts and Topics in Immunology.** Same as Biology 418. Newer concepts and theories in the field of immunology, including theories of antibody formation and immunological tolerance, regulation of the immune response, biosynthesis and structure of antibodies, and evolutionary aspects of the immune response. Lectures and discussion. Prerequisite: Consent of instructor; Microbiology 327 and Biology 307 recommended. $\frac{1}{2}$ unit.
419. **Animal Virology.** Same as Microbiology 419. A discussion-laboratory with major emphasis on host-parasite relationships, natural history, and epidemiology, supplemented with appropriate laboratory techniques as they pertain to the major groups of animal viruses. Prerequisite: Microbiology 326 and 327, or Veterinary Pathology and Hygiene 331 and Veterinary Medical Science 332; Biochemistry 350 or 354; consent of instructor. $\frac{3}{4}$ unit.
425. **Experimental Parasitology.** Same as Zoology 425. A broadly based consideration of the relation of parasites to their hosts and to their environments, and of the factors which influence these relationships. Prerequisite: A laboratory course in parasitology or protozoology; organic chemistry; Biochemistry 350 and statistics recommended. 1 unit.
440. **Design and Analysis of Biological Experiments.** Same as Agricultural Engineering, Agronomy, Animal Science, Dairy Science, Food Science, Forestry, and Horticulture 440. Statistical methods as tools for research; principles of designing experiments and methods of analysis for various kinds of designs, including factorial experiments, considered from the viewpoint of when and how to use them. Prerequisite: Veterinary Medical Science 340 or equivalent. $\frac{3}{4}$ unit.
445. **Advanced Macroscopic Pathology.** Concepts and interpretations of gross pathologic changes, and the integration of host-parasite reactions. Prerequisite: Veterinary Medical Science 334 and 335, or equivalent; consent of instructor. $\frac{1}{2}$ or 1 unit.
450. **Advanced Veterinary Pathology.** Advanced study of gross and microscopic pathology of diseases of domestic animals. Prerequisite: Veterinary Medical Science 335 or equivalent. 1 unit.
455. **Comparative Oncology.** A comparative study of the nature of mammalian and avian neoplasms based on general and special methods of tumor identification, classification, and experimentation; lectures, demonstrations, and laboratory. Required course for students majoring in pathology in Department of Veterinary Medical Science. Prerequisite: Veterinary Medical Science 445 and 459, or equivalent. 1 unit.
457. **Ultrastructural Pathology.** Same as Biology 457. Ultrastructural basis of pathologic processes occurring in animal tissues and cells. Lectures, discussions, and reports. Prerequisite: Zoology 430; consent of instructor. $\frac{3}{4}$ or 1 unit.
459. **Advanced Correlative Pathology.** Discussion and interpretation of disease processes of domestic animals; emphasis on the correlation of gross, microscopic, and clinicopathologic findings with alterations of function. Prerequisite: Veterinary Medical Science 308, 335, 445 or 450, or equivalent; consent of instructor. 0 to 1 $\frac{1}{2}$ units.
460. **Advanced Veterinary Physiology.** Advanced study of physiology, nutrition, and biochemistry as related to problems in veterinary medical science; problems include white muscle disease, sweet clover disease, ketosis, hypoglycemia, and digestive disturbances; and laboratory includes planning, executing, and reporting a specific course project. Prerequisite: Veterinary Medical Science 315 or 316, or equivalent; consent of instructor. $\frac{1}{2}$ unit.
461. **Advanced Veterinary Pharmacology.** Evaluation of drugs, pharmacological aspects of biological antagonisms, chemotherapy, antibiotics, chelating agents and chemical biological correlation. Prerequisite: Consent of instructor. $\frac{3}{4}$ unit.

463. **Radioisotopes in Biological Research: Principles and Practice.** Same as Animal Science 463 and Biophysics 463. Lectures, demonstrations, and laboratory on the fundamentals of radioisotope procedures and applications in biology and medicine. Prerequisite: Quantitative chemistry; one year each of mathematics, physics, and biology, and/or consent of instructor. 1 unit.
465. **Comparative Pharmacodynamics.** The comparative study of drug effects and the handling of drugs by various organisms; emphasis on mode of action of elements and chemical compounds; and factors influencing absorption, distribution, metabolism, and excretion of drugs. Prerequisite: Three courses in biology; four courses in chemistry including biochemistry; consent of instructor. $\frac{3}{4}$ unit.
466. **Comparative Environmental Toxicology and Drug Resistance.** The chemistry, mechanisms, actions, and disposition of substances toxic to man and other animals; nature of host-toxicant interactions; and the biological consequences of such interactions, including toxicological mechanisms and their public health significance. Prerequisite: Veterinary Medical Science 465 or consent of instructor. $\frac{3}{4}$ unit.
490. **Seminar.** Required of all graduate students whose major is veterinary medical science. $\frac{1}{4}$ unit.
491. **The Experimental Method in Veterinary Research.** Planning of experiments, use of controls, interpretation of results, sources of error, and writing the research report. $\frac{1}{2}$ unit.
492. **Special Problems.** Basic and applied study including orientation and research on pertinent initial and continuing problems in the student's area of interest. Prerequisite: Consent of instructor. $\frac{1}{4}$ to 1 unit.
499. **Thesis Research.** 0 to 4 units.

VETERINARY MEDICINE

Program Administrator: Professor L. M. Jones

Program Office: 131 Veterinary Medicine Building, Urbana

392. **Special Problems.** Individual research on a special problem chosen after consultation with the instructor and department head. Prerequisite: Professional standing in veterinary curriculum. 1 to 3 hours. May be repeated to a maximum of 6 hours.

VETERINARY PATHOLOGY AND HYGIENE

Head of Department: Professor L. E. Hanson

Department Office: 57 Veterinary Medicine Building, Urbana

330. **Veterinary Medical History and Orientation.** Introduction to the history, recent developments, scope, and trends of veterinary medical education, practice, research, public health, and other areas; functions, obligations, and organization of the profession. Prerequisite: First-year standing in veterinary curriculum. 1 hour.
331. **Veterinary Bacteriology.** Study of the properties of bacteria responsible for diseases of domestic and wild animals; special emphasis on transmission, propagation, pathogenesis, and diagnosis. Prerequisite: First-year standing in veterinary curriculum or consent of instructor. 5 hours.
332. **Veterinary Microbiology and Immunology.** Same as Veterinary Medical Science 332. Lectures, discussions, and laboratories dealing with mechanisms of infection and resis-

- tance; the properties, pathogenesis, and control of viral infections of domestic and wild animals. Prerequisite: Veterinary Pathology and Hygiene 331 or consent of instructor. 4 hours.
333. **Protozoan and Arthropod Parasites.** Same as Veterinary Medical Science 333. Protozoan and arthropod parasites affecting domestic animals and man; lectures, discussions, and laboratory. Prerequisite: Second-year standing in veterinary curriculum or consent of instructor. 3 hours.
334. **General Pathology.** Same as Veterinary Medical Science 334. The basic principles of pathological processes, including tissue injury and repair, circulatory and metabolic disturbances, and inflammation and neoplasms; lectures, quizzes, demonstrations, and laboratory. Prerequisite: Second-year standing in veterinary curriculum or consent of instructor. 5 hours.
335. **Special Pathology.** Same as Veterinary Medical Science 335. Disease processes affecting organs and anatomic systems and those occurring in specific diseases; lectures, quizzes, demonstrations, and laboratory. Required in veterinary curriculum. Prerequisite: Second-year standing in veterinary curriculum or consent of instructor. 5 hours.
336. **Helminth Parasites.** Same as Veterinary Medical Science 336. Helminth parasites affecting domestic animals and man; lectures, discussions, and laboratory. Prerequisite: Second-year standing in veterinary curriculum or consent of instructor. 3 hours.
338. **Clinical Pathology.** Discussion of the function and interpretation of hematological, parasitological, chemical, and certain other procedures as aids in the diagnosis of animal diseases; emphasis on the correlation of laboratory findings with fundamental changes and clinical manifestations of disease. Prerequisite: Third-year standing in veterinary curriculum. 2 hours.
340. **Diseases of Poultry.** The causes, symptoms, lesions, prevention, and treatment of non-infectious and infectious diseases of domestic birds; lectures, quizzes, and PLATO demonstrations. Prerequisite: Third or fourth year standing in veterinary curriculum or consent of instructor. 2 hours.
341. **Food Hygiene and Public Health.** General principles of antemortem and postmortem inspection of food animals; procedures and techniques used in the inspection of food of animal origin; diseases of animals transmissible to man; introduction to public health and public health administration; and principles of epidemiology. Prerequisite: Fourth-year standing in veterinary curriculum or consent of instructor. 4 hours.
346. **Management and Diseases of Laboratory Animals.** Same as Veterinary Medical Science 346. Principles of management of conventional and gnotobiotic laboratories; emphasis on proper care, sanitation, breeding procedures, and disease control as fundamental requirements for the production and maintenance of good quality animals for teaching and research. Prerequisite: At least two courses in biology or equivalent; consent of instructor. 2 hours or $\frac{1}{2}$ unit.
347. **Veterinary Clinical Oncology.** Same as Veterinary Clinical Medicine 347. Current techniques in diagnosis and treatment of neoplastic diseases of domesticated animals, including chemotherapy, immunotherapy, radiotherapy, and surgery; concepts of oncogenesis and tumor immunology; and incidence, breed and site predilections, behavior, prognosis, radiographic and other clinical features and complications of general classes and specific types of neoplasms. Prerequisite: Third-year standing in veterinary medical curriculum. 2 hours.
374. **General Epidemiology.** Same as Environmental Studies, Health Education, Medical Sciences, and Veterinary Medical Science 374. The epidemiology and natural history of infectious and noninfectious diseases, including integrated vector control and host resistance, and mental health and public health. Prerequisite: Microbiology 326, Veterinary Medical Science 332, or equivalent, or consent of instructor. 4 hours or 1 unit.
378. **Veterinary Clinical Orientation.** Same as Veterinary Biological Structure, Veterinary Clinical Medicine, and Veterinary Physiology and Pharmacology 378. Lectures and demonstrations illustrating the interrelationships between the basic sciences and their applications in medicine and surgery; includes methods of restraint and handling of

several animal species. Prerequisite: First-year standing in the veterinary curriculum. 1 hour.

VETERINARY PHYSIOLOGY AND PHARMACOLOGY

Acting Head of Department: Professor A. R. Twardock

Department Office: 263 Veterinary Medicine Building, Urbana

A proposal is currently under consideration to combine this department with the Department of Veterinary Biological Structure to form a Department of Veterinary Anatomy, Physiology, and Pharmacology.

- 202. **Physiology of Domestic Animals.** Lectures, quizzes, and demonstrations. Prerequisite: Chemistry 101 or 102, or equivalent. 3 hours.
- 315. **Veterinary Physiology.** Same as Veterinary Medical Science 315. Nervous and muscular systems, respiration, acid-base balance, urine formation, and body fluids and their regulation; lectures, discussions, and laboratory. Prerequisite: Second-year standing in veterinary curriculum or consent of instructor. 5 hours.
- 316. **Veterinary Physiology and Pharmacology.** Same as Veterinary Medical Science 316. Blood and lymph circulation, digestion, metabolism, and endocrine systems; lectures, discussions, and laboratory. Required in veterinary curriculum. Prerequisite: Veterinary Physiology and Pharmacology 315 or consent of instructor. 4 hours.
- 317. **Veterinary Clinical Pharmacology.** Lecture and discussion dealing with drug absorption and elimination, dosage regimens in health and disease, drug reactions and interactions, and the clinical trial. Prerequisite: Veterinary Physiology and Pharmacology 320 or consent of instructor. 1 hour.
- 318. **Pharmacology.** Same as Veterinary Medical Science 318. General principles of pharmacology and an analysis of the action of chemical agents on physiological processes; lectures, discussions, demonstrations, and laboratory. Prerequisite: Second-year standing in veterinary curriculum or consent of instructor. Required in veterinary curriculum. 4 hours.
- 319. **Clinical Electrocardiography.** Lecture-discussion on clinical electrocardiography in veterinary medicine; discusses basic principles of cardiac electrophysiology, techniques of recording and interpreting electrocardiograms, and electrocardiographic recognition of cardiac enlargement, electrolyte imbalances, and arrhythmias; and emphasizes arrhythmias. Prerequisite: Fourth-year standing in veterinary curriculum and consent of instructor. 1 hour.
- 320. **Pharmacology and Toxicology.** Same as Veterinary Medical Science 320. Principles of drug action and an analysis of the action of chemical agents on living organisms, including intoxications of domestic animals. Lectures and laboratory. Prerequisite: Veterinary Physiology and Pharmacology 318 or consent of instructor. 4 hours.
- 321. **Topics in Veterinary Cardiology.** Lecture-discussion on topics in veterinary cardiology; major topics include congestive heart failure, congenital heart disease, acquired valvular disease, canine dirofilariasis, and cardiac surgery. Each topic is discussed from the standpoint of methods of diagnosis (emphasis on auscultatory diagnosis wherever appropriate) and treatment or management. Prerequisite: Fourth-year standing in veterinary curriculum and consent of instructor. 1 hour.
- 324. **Nutritional Aspects of Large Animal Medicine.** Clinical aspects of nutritional deficiencies, imbalances, and toxicities in cattle, horses, and swine; presentation of therapeutic principles; and nutritional aspects of the etiology, prevention, and treatment of specific disease conditions. Prerequisite: Third-year standing in veterinary curriculum or consent of instructor. 2 hours.

326. **Nutritional Aspects of Small Animal Medicine.** Clinical aspects of nutritional deficiencies, imbalances, and toxicities in small animals; presentation of therapeutic principles; and nutritional aspects of the etiology, prevention, and treatment of specific disease conditions. Prerequisite: Third-year standing in veterinary curriculum or consent of instructor. 1 hour.
367. **Radiology and Radiobiology.** Same as Veterinary Clinical Medicine 367. General principles of radiology and radiobiology including techniques and application to the diagnosis and therapy of animal diseases; lectures, discussions and laboratories. Prerequisite: Third-year standing in veterinary curriculum or consent of instructor. 3 hours.
378. **Veterinary Clinical Orientation.** Same as Veterinary Biological Structure, Veterinary Clinical Medicine, and Veterinary Pathology and Hygiene 378. Lectures and demonstrations illustrating the interrelationships between the basic sciences and their applications in medicine and surgery; includes methods of restraint and handling of several animal species. Prerequisite: First-year standing in the veterinary curriculum. 1 hour.

VOCATIONAL AND TECHNICAL EDUCATION

Chairperson of Department: Professor L. J. Phipps
Department Office: 345 Education Building, Urbana

101. **Nature of the Teaching Profession.** Introduction to educational problems; a general study of the nature of teaching: its opportunities and responsibilities. Through individual work, students are helped to evaluate their potentialities for teaching. 2 hours.
181. **Introductory Woodwork.** Beginning course in hand woodwork, with emphasis on both manipulative skills and related technical material. One section of this course is offered for majors in industrial education and another for students in the occupational therapy curriculum. 4 hours.
182. **Advanced Course in Woodwork.** Advanced course in design and construction of woodwork projects with related technical information. Prerequisite: Vocational and Technical Education 181. 4 hours.
183. **General Metalwork.** A basic course in general metalwork; materials, tools, problems, and processes in bench metalwork, foundry, and introductory gas and arc welding. 4 hours.
188. **General Shop for Elementary and Special Education Teachers.** Includes manipulative processes and the study of tools and materials appropriate for craft and shop activities in the elementary school and in special education classes. 3 hours.
189. **Supervised Occupational Experience.** Provides students preparing to teach in the vocational and technical fields the occupational experience necessary or appropriate to complete the requirements in these curricula. Students who are employed and concurrently enrolled in this course complete assignments covering the related technical information of their chosen fields and undergo regularly scheduled written, oral, and performance examinations. Application for a job assignment must be made three months prior to the semester in which placement is desired. Prerequisite: Sophomore standing. 2 or 3 hours. May be repeated to a maximum of 17 hours.
199. **Undergraduate Open Seminar.** 1 to 5 hours. May be repeated.
240. **Principles of Vocational and Technical Education.** Provides each specialized educational worker with a common orientation as to the major responsibilities of the public school as a unit and to the educational worker's own specialized responsibilities and problems within the framework of the total educational enterprise. Prerequisite: Vocational and Technical Education 101; Psychology 100. 2 to 4 hours.
249. **Independent Study.** Permits study of problems not considered in other courses; designed for students who excel in self-direction and intellectual curiosity. Prerequisite:

Upperclassman; upper five percent of class in grade-point average; demonstrated writing competence, research potential, scholarly attitude, and interest as attested to by instructors; consent of adviser and staff member who supervises the work. 2 hours.

270. **Technique and Curriculum Development for Teaching Secretarial and Office Practice Subjects.** Review of results of current research and experimentation in the teaching of typewriting, shorthand, and other office practice subjects; review of basic education principles relative to skill development; and introduction to the use of innovations and technology, and their implications for office education. Proficiency level in typewriting and shorthand must be validated through examination administered by business education faculty prior to enrollment in the course. 3 hours.
271. **Technique and Curriculum Development for Teaching Data Processing and Office Machines.** Introduction of techniques for teaching the operation of a variety of office machines used for processing data; introduction of current methods of teaching the use of automated data-processing equipment and requirements for employment. Proficiency level in the operation and theory of operation of office machines used for processing data must be validated through examination administered by business education faculty prior to enrollment in the course. 3 hours.
275. **Summer Experience in Agricultural Education.** Supervised experience in the work of a teacher of agricultural occupations during a two- or three-week period in the summer; planning summer work, teaching adult classes, supervising farm practice or on-the-job training of students, advising school-sponsored youth organizations, counseling students, studying a community, becoming acquainted with facilities and equipment used in an agricultural occupations program, and becoming familiar with the situations in which the student will later do student teaching during a school year. Course work is completed during the summer with official registration in the fall semester. Prerequisite: Educational Policy Studies 201. 2 or 3 hours.
276. **Student Teaching in Agricultural Occupations.** Supervised experience in the work of a teacher of agricultural occupations during an eight-week period; planning programs, teaching high school and adult students, managing facilities and equipment, supervising students on the job, advising youth organizations, counseling students, and keeping records and making reports. Prerequisite: Educational Policy Studies 201 and Vocational and Technical Education 240, or consent of instructor; registration in Vocational and Technical Education 277. 8 hours.
277. **Programs and Procedures in Agricultural Education.** Preparation for a successful experience in student teaching and for beginning work as a teacher of agricultural occupations; teaching high school and adult classes, maintaining and using facilities and equipment, supervising occupational experience programs, advising youth organizations, counseling students, and keeping records and making reports. Prerequisite: Educational Policy Studies 201 and Vocational and Technical Education 240, or consent of instructor; registration in Vocational and Technical Education 276. 5 hours.
278. **Vocational Home Economics Education for Youth and Adults.** Preparation for work as a teacher in vocational home economics programs for youth and adults; study of procedures for planning, organizing, executing, and evaluating home economics occupational programs. Prerequisite: Senior standing and consent of instructor. 3 hours.
280. **General Drafting for Teachers.** An integrating course to prepare industrial education students to teach drafting; deals primarily with the problems of organizing and teaching drafting courses. 3 hours.
284. **Advanced Metalwork.** Intermediate and advanced operations with hand and machine tools; the designing, planning, and constructing of machine shop projects; and a study of ferrous and nonferrous materials appropriate for machine shop work. Prerequisite: Vocational and Technical Education 183. 4 hours.
291. **Thesis.** Prerequisite: Senior standing. 2 hours.
292. **Thesis.** Prerequisite: Senior standing. 2 hours.
349. **Special Study and Investigation in Vocational and Technical Education.** Offers opportunity for an individual to study, on or off campus, selected problems, trends, and

new developments or to conduct specialized technological investigations for the improvement of instructional programs in areas related to vocational and technical education. Prerequisite: Consent of instructor; demonstrated ability to pursue special study or investigation proposed. 2 to 4 hours, or $\frac{1}{2}$ to 1 unit.

370. **Agricultural Education for First-Year Teachers.** Specific help with the problems of beginning teachers; campus meeting in August; other meetings in centers in the state convenient to first-year teachers; and visits by instructors to schools in which first-year teachers are employed. Prerequisite: Vocational and Technical Education 276 and 277. 3 hours, or $\frac{3}{4}$ to 1 unit.
381. **Foundations of Career, Occupational, and Practical Arts Education.** A study of basic concepts and practices of career, occupational, and practical arts education; explores the development of the curricular areas concerned, including types of programs, their place and role in various types of educational settings, students served, and issues and trends in program change. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
382. **Cooperative Vocational and Technical Education Programs.** Provides the specific professional background required of teachers, coordinators, and administrators who organize and conduct public school programs utilizing community resources and experiences; includes the background, philosophy, organization, and administration of cooperative education. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
383. **Planning and Organizing Content for Career, Occupational, and Practical Arts Education.** Emphasizes selection, organization, and preparation of content for instructional programs in career, occupational, and practical arts education; students perform task analyses, prepare instructional objectives, arrange content in appropriate sequence, and determine allocation of resources. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
384. **The General Shop Program.** A laboratory and theory course in the organization and administration of the industrial arts general shop program. Prerequisite: Sixteen hours of undergraduate credit in appropriate vocational and technical education courses. 4 hours or 1 unit.
385. **Problems in Concurrent Work-Education.** While employed in approved cooperating business firms, students observe the relationships between their activities and the specialized educational programs in the high school and community college; in class sessions, emphasis on job analysis, current trends, wage and benefit structure, personnel practices, labor relations, and their implications for teaching. Prerequisite: Completion of prescribed courses in vocational and technical education for teaching in their area of specialization; consent of instructor. 4 hours or 1 unit.
387. **Training Programs in Industry.** Study of the organization, instruction, supervision, and evaluation of training programs conducted within industry and their relationships to other educational agencies. 4 hours or 1 unit.
388. **Special Techniques of Teaching Career, Occupational, and Practical Arts Education.** A study of teaching techniques appropriate to career, occupational, and practical arts education; focuses on communication methods and instructional strategies; students conduct investigations, develop materials, and make applications to their areas of concern. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit.
399. **Issues and Developments in Vocational and Technical Education.** A special course for experimentation or for seminar on topics not treated by regularly scheduled courses; requests for initiation of this course may be made by students or faculty members. 2 or 4 hours, or $\frac{1}{2}$ or 1 unit. May be repeated to a maximum of 8 hours or 2 units.
442. **The Community College.** Same as Administration, Higher, and Continuing Education 442. Community colleges and vocational-technical institutes: their purposes, function, and objectives; social forces related to their development and evaluation; characteristics and needs of students; educational programs and teaching strategies; and organization, control, and financing. 1 unit.
445. **Investment in Human Resources.** Same as Labor and Industrial Relations 445. Activities which influence future monetary and psychic income by improving the resources in people; investments include schooling, on-the-job training, medical care, migration,

and the search for information on prices and incomes, with main emphasis on education. A last section covers educational planning. Prerequisite: An introductory course in economics and in quantitative methods. 1 unit.

448. **Continuing Education Program Development.** Same as Administration, Higher, and Continuing Education 448 and Secondary Education 448. Analysis of the process of planning and conducting continuing education programs for adults; includes theory, research, and practice regarding sponsors, need appraisal, objectives, selection and organization of learning activities, and evaluation. Recommended for majors in continuing education. Prerequisite: Consent of instructor. Administration, Higher, and Continuing Education 362 is recommended, especially for majors in continuing education. 1 unit.
449. **Independent Study.** Offers opportunity and challenge of self-directive, independent study, that is, develops the individual's ability as an independent student and enables the student to pursue needed study in a field in which appropriate courses are not being offered during a given semester. Prerequisite: Approval of study outline by adviser and the department chairman prior to enrollment. $\frac{1}{2}$ or 1 unit. No more than 2 units may be offered toward an advanced degree except by consent of the dean of the College of Education.
450. **Evaluation in Vocational, Technical, and Practical Arts Education.** Theory and techniques of evaluation in cognitive, affective, and psychomotor domains at different educational levels; includes development and analysis of activities and instruments for student and program evaluation, follow-up studies, and interpretation of results of self-evaluation for administrative decision making. 1 unit.
451. **Directing Personnel Development in Vocational, Technical, and Practical Arts Education.** Principles and techniques for development of personnel in programs of vocational, technical, and practical arts education; emphasis on personnel development and instructional supervision of paraprofessionals, employers, and foremen of vocational and technical education students. Prerequisite: One unit in vocational and technical education or consent of instructor. 1 unit.
453. **Problems in Home Economics Education.** Prepares consumers of research through a comprehensive study and 6.evaluation of home economics investigations now available and through the experience of carrying out an individual investigation of limited scope. 1 unit.
456. **Problems and Trends in Specialized Fields of Vocational and Technical Education.** Introduction to significant problems, points of view, and trends in the field concerned; explores significant research relating to organization, content, and techniques in the field in question. Students are encouraged to make special studies in approved areas. 1 unit.
459. **Workshop in Curriculum Development.** Curriculum development projects in the specialized fields of agriculture, business, home economics, health, and industry. $\frac{1}{2}$ to 2 units.
471. **Policy and Program Development in Vocational, Technical, and Practical Arts Education.** Local, state, and national policies for vocational and technical education; organizing for policy making and program development; and developing desirable policies and programs. 1 unit.
472. **Course Planning and Teaching Procedures in Agricultural Occupations Programs.** Gathering data essential in course planning, constructing course plans, and developing resource units, teaching procedures, and instructional aids. Prerequisite: Vocational and Technical Education 276 and 277, or consent of instructor. $\frac{3}{4}$ to 1 unit.
473. **Vocational Education in Agriculture for Adults.** The case for adult education, needs of young and adult farmers for education, development and present status of adult education in agriculture, objectives, evaluation, using advisory committees, organizing adult classes, enrolling students, course planning, teaching procedures and aids, supervised practice, group activities, and facilities. Prerequisite: Vocational and Technical Education 276 and 277, or consent of instructor. $\frac{3}{4}$ to 1 unit.

474. **Supervised Experience in Agricultural Occupations Programs.** Supervised agricultural experience programs as an educational strategy; importance and meaning of supervised agriculture experiences; planning, conducting, supervising, and evaluating agriculture experience programs; relation of supervised agriculture experience programs to establishment and advancement in an occupation; keeping and using records; and relating class instruction to supervised agriculture experience programs. Prerequisite: Vocational and Technical Education 276 and 277, or consent of instructor. $\frac{3}{4}$ to 1 unit.
475. **Organizing and Teaching Agricultural Mechanics.** Agriculture mechanics as a phase of vocational education in agriculture; purposes, course planning for high school students, young farmers, and adults; methods of teaching and evaluating on-farm or on-job instruction; planning agriculture-mechanics shops and facilities; and providing and teaching safety in agriculture mechanics. Prerequisite: Vocational and Technical Education 276 and 277, or consent of instructor. $\frac{3}{4}$ to 1 unit.
476. **Guidance in Vocational, Technical, and Practical Arts Education.** The guidance function of a vocational or technical teacher; identifying and selecting students for vocational and technical programs; determining manpower and job requirements; providing occupational information; placing graduates; counseling parents, students, foremen, advisory committee members, union members, and employers; and conducting follow-up studies. 1 unit.
481. **History and Basic Concepts of Vocational and Technical Education.** The historical development of modern vocational education; the educational theories underlying its development; and the educational concepts upon which present programs and procedures are based. 1 unit.
482. **Research Studies in Vocational and Technical Education.** Study and evaluation of examples of research in this field; consideration of the research needed to solve present problems. Each student proposes and completes a brief research project, or plans in detail a major research project to be completed later. 1 unit.
487. **Seminar in Vocational, Technical, and Practical Arts Education.** Overview and interpretation of social, economic, and technological trends which have relevance to the problem of developing new programs in the vocational, technical, and practical arts areas; analysis and evaluation of innovations in the field; and current issues and problems. Prerequisite: Graduate standing in vocational and technical education. 1 unit.
488. **Curriculum Problems and Trends in Industrial Education.** Selection and organization of instructional materials for industrial courses; study of basic concepts underlying course construction in industrial education. Prerequisite: Undergraduate work in appropriate vocational and technical education courses. 1 unit.
489. **Administration of Vocational and Technical Education.** Problems and approved practices in the administration and supervision of programs of vocational, technical, and practical arts education in secondary schools, junior colleges, and technical institutes. Prerequisite: Consent of instructor. 1 unit.
490. **Seminar for Advanced Students of Education.** Seminar in vocational and technical education open only to persons who have been admitted for doctoral study in vocational and technical education; sections are usually offered in the following areas: (a) industrial education, (b) agricultural education, (c) home economics education, (d) business education, and (e) general vocational and technical education. 1 to 2 units.
491. **Field Study and Thesis Seminar.** Assists doctoral candidates in planning field studies and thesis problems; students present their studies at each of four stages: (1) the inception, delimitation, tentative design stage; (2) the proposed design stage; (3) the revised design stage; and (4) the final design stage. Students are expected to analyze critically all presentations. Limited to students who have been admitted for doctoral study. 1 to 2 units.
499. **Thesis Research.** Individual direction of research and thesis writing. 0 to 4 units.
